SALISBURY ARPT: Boundary lgts inoperative.

**SOUTHERN PINES-PINEHURST-SOUTHERN PINES ARPT: Unicom.

**WADESBORO ARPT: Abandoned.

WILMINGTON-RADIO: VOR quad 65°-235° flgt-checked to shoreline only. About May 28, MH fac will be shut down until approx June 4-relctn to lat 34-16-14, long 77-54-43. About June 18, VOR will be shut down until approx July 18.

WILMINGTON-NEW HANOVER COUNTY ARPT: Helicopters lndg and take-off use caution to avoid 55' unlgtd overhead high voltage p-line running W from ctl twr to arpt boundary. Due to non-visibility twr unable to ctl tfc on taxi strip between Rnwys 16 and 23 and final apch leg and first 1300' Rnwy 23. Open drainage ditch 1500' W of midfield intsxn 60' from both sides rnwy 9-27.

NORTH DAKOTA: **DEVILS LAKE-BELL ARPT: Abandoned.

FARGO-HECTOR FLD: 1000' of rnwy 17-35 rough for jets on W side starting 4000' from S end. Jets should use center or E side.

FUNSTON-SPECIAL NOTICE: A temp controlled firing area is established as follows: Name: Funston, North Dakota. Description: Bounded on the N by lat 48-00, on the S by lat 47-55, on the W by long 100-08, on the E by long 100-00. Altitude: Surface to unlimited. Time of Use: Continuous. Activities: Artillery, mortar, rocketry and small arms firing. Controlling Agency: Adjutant General, State of North Dakota, Frame Barracks, Bismark, North Dakota. Effective dates: June 2nd thru June 16, 1956.

MINOT-RADIO: About June 1, VOR will be shut down until approx Aug 1-modernization.

MINOT-PORT O'MINOT ARPT: Several unmrkd and unlgtd 29' poles erected 1900' NW end of NW/SE rnwy. 140' lgtd water tank erected 1 s mi W, 1600' N of centerline of E/W runway.

OHIO: AKRON ARPT: Due non-visibility twr unable ctl tfc SSW airdock on apch to rnwy 36L.

AKRON-CANTON ARPT-TOWER: ILS back course has flyable bend 4 to 2 n mi from stn, displaced 3.5°E rnwy 18 centerline throughout area of bend. ILS glide slope usable to apch end rnwy 36 or 1230'MSL. FLD: Non-controlled area bounded by arwys Amber 6, Red 19, Victor 103 and Red 17 will become perm U.S. NAS Akron Ohio acrobatic--camera gunnery area from surface to 20,000' durg daylgt hrs VFR conditions only.

CANTON-MARTIN ARPT: Closed May 31 to September 1, 1956- construction.

**CHARDON ARPT: Unicom.

CINCINNATI-RADIO: VOR has light to moderate visual and aural interference 360°-60° from stn to 52 n mi at min en route instr alt. (2-23) DME coverage 60°-150°, 35 n mi at min en route alt. (1-14) About June 18, VOR/DME will be shut down until approx July 6 - Modernization. Freq change from 115.6 mc to 115.4 mc.

CINCINNATI-GREATER CINCINNATI ARPT: Due to non-visibility twr unable to ctl single-eng tfc on NW/SE taxiway from Rnwy 18 to 200' SE of Rnwy 18 unless such tfc remains on fld side of this taxiway. After lndg on rnwy in use acft taxi straight ahead to nearest intsxn. No 180° turns on rnwy prior to rcvg approval from twr. Prior to departure acft with no rdo rqrd to fone twr for taxi and take-off instructions. Caution-men and equip. working on outer perimeter of ramp between 0800 and 1630, mrkd. Const on ramp and all points thereto in progress wea permitting. Extreme caution all acft. Twr clearance rqrd prior using taxiways to or from ramp in const areas -flagged and lighted.

CINCINNATI-LUNKEN ARPT: Due to non-visibility twr unable to ctl tfc in tfc pat directly NW of fld. Prior to departure acft with no rdo are rqrd to fone twr for taxi and take-off instructions. Use rnwys only unless otherwise authorized by twr.

CLEVELAND-RADIO: DME coverage 60°-100°, 43 n mi at 2900'; 100°-145°, 35 n mi at 2500'; 170°-190°, 35 n mi at 2500'; 245°-310°, 35 n mi at 2000'; 310°-060°, not checked.

OHIO: CLEVELAND-HOPKINS ARPT-TOWER: About June 4, ILS will be shut down until approx June 14. Glide slope relctd to 1136' from apch end of rnwy 5L and 500' NW of its centerline. FLD: Rnwy 14-32 restricted to NW take-offs and SE lndgs. 92' const derrick 1900' off apch and 900' left of centerline rnwy 5L - lgtd. (3-22)

**CLEVELAND-LAKEFRONT SEAPLANE BASE: Open for season. (4-20)

COLUMBUS-RADIO: VOR has bends in excess of 3-1/2° NE quad 25°-35°. Moderate roughness between 35°-50° and 305°-345°. About June 4, LF rng will be shut down for about five days - use for Homing only. (5-7)

**COLUMBUS-PORT COLUMBUS ARPT-SPECIAL NOTICE: Two-way rdo rqrd all types of acft. VFR Jet Traffic Rules - Take-offs: Rnwy 27 - turn to a heading of 360° as soon as safety will permit and maintain 360° heading until clear of arpt control zone. Rnwy 9 - turn to a heading of 110° as soon as safety will permit and maintain 110° until clear of arpt ctl zone. Entering ctl zone - maximum airspeed 250 knots. Maintain 2,000' MSL until on base leg for landing apch. VFR Multi-engine Rules - Take-offs: Rnwy 23 and 27 - a right turn following take-off is required to avoid heavy populated area west and southwest of arpt. Approach for Landing: Maintain 2000' MSL until on base leg or if a straight-in apch is used maintain 2000' MSL as long as practical before starting normal descent on final approach. (3-23)

COLUMBUS-PORT COLUMBUS ARPT-TOWER: ASR will issue distance values in nautical miles in connection with radar control. (1-17) FLD: Due to non-visibility twr unable to control tfc on E taxi strip between hangars 1 and 4.

DAYTON-RADIO: VOR has moderate roughness from 120°-200° at min en route alt. DME coverage 150°-220°, 30 n mi at 2400'. (12-6)

DAYTON ARPT: Caution when apchg arpt as fluorscent street lgtg paralleling S boundry of arpt can be mistaken for rnwy lgtg. No grass operations. Radio receiver rqrd. Due to non-visibility, twr unable to ctl tfc on taxiway from E and N side to W side of hangars. Use unpainted area of concrete for taxiing in line with blacktop on taxistrip. (-52)

DAYTON-MONTGOMERY COUNTY ARPT: Closed - construction. (5-9)

DAYTON-WRIGHT-PATTERSON AFB-RADIO: USAF VHF/DF unreliable 295°-305° below 3000'; 306°-295°, below 2500'.

DEFIANCE-BRYAN-DEFIANCE MEMORIAL ARPT: N/S rnwy and sod areas clsd. (2-2)

FINDLAY-RADIO: DME coverage 220°-140°, 44 n mi; 140°-220°, 35 n mi at min en route alt.

GROVE CITY-REAVER ARPT: E/W rnwy closed. (4-16)

HAMILTON ARPT: Caution - grading on N side of E/W rnwy. Equip. on fld. (7-17)

**HUDSON-MID CITY ARPT: 228' (1493' MSL) lgtd rdo twr erected 3.9 n mi WSW (257° T) at lat 41-12-57, long. 81-31-14. (4-2)

MANSFIELD-RADIO: VOR has excessive roughness and course displacement (max 7°), 3 to 5 n mi from stn 100°-190°. Moderate roughness from 350° to 100°. Moderate to severe roughness and bends on Victor 5, 204° radial; and on Victor 92, 310° radial. (5-11)

NEW PHILADELPHIA ARPT: Use hard surface only. Rnwy lgtg cable trench area soft-wet.

PORT CLINTON ARPT: Sod areas usable, rough. Caution - land in centerline section of rnwys, standing water following heavy rains. Acft with 122.8 call Port Clinton Unicom for wind and field conditions. (4-30)

PUT-IN-BAY ARPT: Caution - blind spots to acft on ground preparing to take-off, autos cross the SW end of NE/SW rnwy, fld rough. For fld conditions call Port Clinton Unicom.

SPRINGFIELD ARPT: Caution - controlled jet tfc operg off fld. (9-29)

TOLEDO-EXPRESS ARPT-TOWER: ILS glide slope usable to end of rnwy 7.

TOLEDO MUN ARPT: Use rnwys and taxiways only. Areas adj rnwy plowed. (5-11)

WATERVILLE-RADIO: VOR coverage 39 n mi at min en route alt. DME coverage 260°-280°, 34 n mi at 2000'.

WOOSTER ARPT: NE/SW rnwy clsd - const. (12-3)

YOUNGSTOWN-RADIO: DME coverage 127°-259°, 26 n mi at 2600'; 344°-010°, 35 n mi at 2400'. VOR radials have moderate flyable bends beyond 15 mi. (2-15)

YOUNGSTOWN ARPT-TOWER: VHF/DF unreliable 100°-260° below 3000'; 270°-030° below
** 3500'. (3-25) FLD: Use rnwys and taxiways only. Under VFR conditions fighter type acft within 13 n mi and below 6000' will apch arpt within bndry NW quad Youngstown Rng. Due to non-visibility twr unable to control tfc on section of concrete NW/SE taxiway from the intsxn of the E/W taxiway NW to the end. Const - deep ditches 300' SE apch end rnwy 14. Two 56' lgtd rdo antenna twrs erected 1630' E of apch end rnwy 23 and 2805' E of apch end rnwy 32.

ZANESVILLE MUN ARPT: All acft advised to use rnwys and taxiways only.

OKLAHOMA: **ALTUS ARPT: Rnwy lgts on request. (5-1)

ARDMORE-RADIO: DME coverage 230°-280°, 35 n mi at 2300'.

OKLAHOMA: BUTTE ARPT: Rnwy 2-20 lgts inop - clsd ngt air carrier operns only. (5-1)

DUNCAN-HALLIBURTON ARPT: Men and equip. on fld. Use caution. (7-15)

DURANT-EAKER FLD: 1800' NW end NW/SE rnwy closed.

GAGE ARPT SITE 13, AMA-MKC: NE/SW rnwy clsd to aircarrier and ngt operns.

HOBART ARPT: Rnwys 17 and 35 clsd - resurfacing. Caution - men, equip. on fld.

McALESTER-RADIO: About June 16, VOR will be shut down until approx Aug 18. (4-26)

MANGUM-PONDER ARPT: Closed. (3-2)

OKLAHOMA CITY-TULAKES ARPT: Lgtd drilling derrick erected 4.8 n mi S (172° T) at lat 35-27-00, long. 97-39-00. (3-23)

OKLAHOMA CITY-WILEY POST ARPT: New 2640' E/W rnwy on S end of fld - usable. N/S, NE/SW, NW/SE and old E/W rnwy perm clsd.

PONCA CITY-RADIO: May 7, VOR shut down until approx May 28. Freq changed from 117.3 mc to 113.2 mc. (5-6)

RENFROW-SMYRCKA ARPT: About May 14, work will start on erection of a 240' (1569' MSL) lgtd rdo twr 6.9 n mi NW (302° T) at lat 37-02-36, long. 97-53-48. (4-3)

SOUTH COFFEYVILLE-JENSEN ARPT: NW/SE and NE/SW rnwys hazardous acct deep holes. (11-30)

TULSA-RADIO: VOR radials 270°-315° have severe bends for a radius of 5 mi out. (4-7)

TULSA ARPT-TOWER: ILS lclzr has bends within tolerance between mrkrs. Glide slope restricted to use on approaches to MM. (9-14) FLD: Rnwys 17R and 21R clsd for take-offs to all tactical type acft and all multi-engine acft exceeding 26,000 lbs take-off weight. Rnwy 3R-21L daylgt hrs only.

OREGON: BAKER-RADIO: VOR radial 119° lmtd to usable dist 31 n mi at 9000'; 125° lmtd to 31 n mi usable dist at 9000'; alt radial 140° lmtd to 32 n mi usable dist at 9000'.

**BEAVERMARSH, SITE 73, RIV-DLS: Open to all acft. (4-20)

EUGENE-RADIO: VOR has occasional severe scalloping, making course line information unusable in NE quad - caution. (8-3)

EUGENE ARPK: Effective June 30, fld will be abandoned. Housing and street const adj SE end of rnwy. 45' unlgtd poles, 750' SSE end rnwy. (4-20)

HERMISTON: Demolition approx 8.7 n mi W Mon thru Fri from 0730-1615 from gnd up to 2000'. N-lat 45-51-50; E-long. 119-29-20; S-lat 45-49-40; W-long. 119-30-47.

KLAMATH FALLS-RADIO: VOR coverage 40°-50°, 80°-110°, 195°-210°, 35 n mi at 10,500'; 275°-305°, 26 n mi at 10,500'.

KLAMATH FALLS-KLAMATH ARPT: Rnwy 14-32 and N/S taxiway closed. Asphalt paving plant and power line installed 950' S rnwy 7-25 and 800' E of S end rnwy 18-36. Maximum height 45' - caution - equip. crossing rnwys. (8-1)

**LA GRANDE ARPT: 204' lgtd rdo twr erected 5.0 n mi NW (312° T) at lat 45-19-45, long. 118-04-00. (4-12)

MADRAS-SPECIAL NTOICE: Caution in Deschutes River, Willow Creek area, construction-Pelon Dam. Transmission lines and cables crossing canyons. (4-25)

MEDFORD-RADIO: DME and VOR coverage 134°-189°, 35 n mi at 10,000'; 189°-255°, 35 n mi at 8000'; 255°-306°, 26 n mi at 8000'. (9-1)

MEDFORD ARPT: Industrial acft operg from taxiway NE side of fld. These acft use right tfc pattern when arpt tfc is NW or W, left pattern when arpt tfc is SE or E. (4-16)

NEWBERG-RADIO: VOR flgt-checked for en route Victor Arwys and route use only and on the 334° and 347° radials, at min instr alts. Occasional brief flag activity may be experienced within the service area of fac. 360° radial on Sauvies Island, usable dist 26 n mi at 3000'.

**NEWBERG-SPORTSMAN ARPT: Unicom. (10-10)

NEWPORT-RADIO: VOR flgt-checked for en route use only at min terrain clearance alts on the 23°, 102°, 163° and 342° radials. Usable dist lmtd in the signal shadow areas imposed by intervening high terrain.

NORTH BEND-RADIO: VOR flgt-checked for en route use only at min terrain clearance alts on the 21°, 86°, 114°, 161° and 343° radials. Usable dist lmtd in the signal shadow areas imposed by intervening high terrain.

**PORTLAND-TROH'S SKYPORT ARPT: Unicom. (10-10)

REDMOND-RADIO: VOR usable dist of many radials lmtd in the signal shadow area imposed by intervening high terrain. Flgt-checked for en route arwys use at min instr alts.

ROME-RADIO: VOR operns normal xcpt usable dist of many radials are lmtd in the signal shadow areas due to terrain.

SALEM-McNARY ARPT: Extreme caution when using unpaved areas. Equip. on fld. (5-2)

SCAPPOOSE-COLUMBIA COUNTY ARPT: Drag races will be conducted May 27, June 10 and 24, July 8 and 22, August 5 and 19, Sept 1, 2 and 3, Oct 14.

OREGON: THE DALLES-RADIO: VOR figt-checked for en route Victor Arwys use only at min instr alts and on the 11°, 90° and 266° radials at min terrain clearance alts.
THE DALLES ARPT: Blasting opern occasionally E of fld in connection with The Dalles Dam construction, stay above 1000' in this area. Rnwy lgts 7-25 inop.
TILLAMOOK-COASTWAY #2 ARPT: Water drains adjacent all rnwys-hazardous. (4-8)
TROUTDALE ARPT: Use rnwys and taxiways only - sink holes developing in grass area.
WARRENTON-SPECIAL NOTICE: Effect. June 16 thru 30 inclusive a temp controlled firing area will be established: Name: Warrenton, Oregon. Description: North boundary: lat 46-10-04, East boundary: long. 123-55-45; South boundary: lat 46-01-00; West boundary: long. 124-20-00. Altitude: Surface to 20,000' MSL. Time of Use: 0800-1700 daily. Activities: Drone operations, AAA firing. Controlling Agency: Oregon National Guard, Camp Clatsop.
PENNSYLVANIA: ALLENTOWN-RADIO: VOR radials 275° thru N to 75° usable 26 n mi at min instr alt. DME coverage 290°-330°, 35 n mi at 4000'; 330°-055°, 26 n mi at 4000'.
ALLENTOWN-BETHLEHEM EASTON ARPT-TOWER: ILS glide slope unusable from MM to touchdown. FLD: Due to non-visibility, twr unable to control tfc 100' of E end rnwy 9-27 and taxi strip leading to Bethlehem Steel hangar. Unlgtd trees and p-line between MM and rnwy 6. (5-18)
**ALTOONA-BLAIR COUNTY ARPT: 34' p-line erected 1400' S end of N/S rnwy in line with E bndry fld-unmrkd. (2-29) Unlgtd p-line erected from unlgtd hangar approx 250' NE of rnwy intsxn to bldg lctd approx 1000' NE of rnwy intsxn.
BRISTOL-3M AIRPORT: Caution-const equip. on S apch N/S rnwy-hazardous.
BUTLER-RADIO: H fac usable dist 17 to 26 n mi - due hvy interference.

Rnwys 16-34 north 1200' and taxiway north of WAL hangar clsd 0700-1800 Mon thru Fri. (4-27) Effect May 29, rnwys 7-25 and 11-29 will be clsd. Rnwy 7-25 will be redesignated as E/W taxiway. S taxiway from rnwy 7 to rnwy 34 will be clsd to all 4-eng acft. (5-4)

SPOKANE-RADIO: DME and VOR coverage 36°-152°, 43 n mi at 7000'; 152°-224°, 43 n mi at 5000'; 224°-264°, 43 n mi at 6000'; 264°-36°, 43 n mi at 8000'. (6-17)

SPOKANE-CALKINS ARPT: Rnwys N/S and E/W closed. (8-30)

SPOKANE-FAIRCHILD AFB-RADIO: USAF VHF/DF unreliable below 9500' in all quads. Operg on trng status only. (3-31)

SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip. on fld.

SPOKANE-GEIGER FLD-TOWER: UHF/DF coverage 110°-260°, 50 n mi at 5000'; 260°-280°, unreliable; 280°-330°, 40 n mi at 9000'; 330°-110°, 50 n mi at 9000'. Effect. May 7, request all VFR tfc arriving Geiger Arpt or utilizing apch facilities to Geiger for practice purposes make initial rdo contact with Spokane apch control on appropriate apch ctl freq in lieu of contacting Geiger twr. Contact Geiger twr lcl ctl freq approx 5 mi from arpt unless instructed otherwise. (5-4) FLD: Perm crash barriers 40 inches high lctd 150' off ends rnwy 3-21. Rnwy 7-25 and taxiway between National Guard Area and rnwy 34 clsd - repairs.

TACOMA ARPT: Rnwys being repaired. Roller and other equipment on fld and rnwys. Caution - land according to wind tee between rnwys. (1-26)

WASHINGTON-DEER PARK ARPT: E/W rnwys clsd on alternate Sundays - drag races.(4-9)

YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, and on the 123°, 161°, 191°, 298°, 321° and 336° radials at min terrain clearance alts.

WEST VIRGINIA:**BECKLEY-RALEIGH COUNTY MEMORIAL ARPT: Five 90' lgtd poles 1 mi E rnwy 28.

CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000'; 270°-330°, 26 n mi at 2500'. Moderate roughness all azimuths. May 7 VOR/DME shut down until approx June 8 - modernization. (5-7)

ELKINS-RADIO: LF rng has multiples and fades all courses. (5-31) DME coverage 35°-95°, 43 n mi at 6000'; 95°-120°, 35 n mi at 6800'; 120°-165°, 26 n mi at 6800'; 165°-195°, 35 n mi at 6800'; 195°-220°, 43 n mi at 6800'; 220°-35°, 43 n mi at 5000'. (7-1)

ELKINS MUNICIPAL ARPT: Rnwy lgts 4-22 inop. (2-24)

MARTINSBURG-RADIO: DME coverage 50°-95°, 35n mi at 2500';95°-150°,35n mi at 2000'.

WEST VIRGINIA: MARTINSBURG ARPT: Serv fac avail 0800 until sunset. 28' hangar 500' E of centerline and 1100' from S end rnwy 35, lgtd. (6-7) Factory bldg 40' high under const 1000' E of S end rnwy 35 in flood lgtd area. (9-13) Constr under way end of rnwy 26 and along entire length of rnwy 8 and 26, men and equip. on fld, obstn mrkd. (5-3)

MORGANTOWN-RADIO: LF rng has multiples and fades all courses.

PARKERSBURG-WOOD COUNTY ARPT: Caution - dip midway rnwy 16-34 covering full width of rnwy. (5-4)

WISCONSIN: CABLE-UNION ARPT: Closed. (1-14)

FOND DU LAC SKYPORT: Caution in snow. Rnwy sides soft wet seasons. (4-9)

GREEN BAY-RADIO: About June 1, VOR will be shut down until approx Aug 1 - modernization. (5-1)

LA CROSSE-RADIO: VOR radials 320° to 335° unreliable 20 to 30 n mi from stn. (11-3)

MADISON-TRUAX FLD: Caution, crossing hwy lndg rnwys 22, 26, 31. E taxiway N of Admin' Bldg perm clsd to all acft over 10,000 lbs. Sod unsafe. Apch lgts rnwy 36 inop. Taxiway 6 lctd between S end of rnwy 18 and AF ramp clsd - const - marked with yellow barricades and flares ngts. (4-23)

MILWAUKEE-GENERAL MITCHELL FLD-TOWER: ASR will issue distance values in nautical miles in connection with radar control. (1-9) All acft apchg Milwaukee with intentions to land will, durg VFR conditions and if equip. with multiple rdo freq, make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or before reaching a point 15 mi from the arpt giving position and altitude. (5-10) FLD: Rnwy 7L-25R open daylgt hrs only. E taxi strip clsd to all tri-gear acft and jets. Obstn lgts on apch end rnwy 13 are obscured by trees. (1-9)

WAUKESHA-COUNTY ARPT: Rnwy lgts being moved from NE/SW rnwy to E/W. Do not land NE/SW rnwy. (11-3)

WOODRUFF-ARBOR-VITAE RADIO: Privately owned MH fac shut down. (Except on req).

WOODRUFF-ARBOR VITAE ARPT: Clsd winter months. (11-9)

WYOMING: CAMP GUERNSEY: A temp controlled firing area is established as follows: Name: Camp Guernsey, Wyo. Description: Beginning at lat 42-16-00, long. 104-42-00, thence to lat 42-12-00, long. 104-42-00, thence to 42-12-00, long 104-45-00, thence to 42-16-00, long. 104-45-00, thence to point of beginning. Altitude: Surface to 6,000 ft.MSL. Activities: 155 mm and 105 mm Howitzer firing max of 15 rounds each day. Time of Use: Daily, 1000 - 1700 hours(MST). Controlling Agency: Adjutant General, Wyoming National Guard, Cheyenne, Wyoming. Effective dates: 15 and 16 June 1956.

CASPER-RADIO: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto. pilot apchs.

**CASPER-NATRONA COUNTY ARPT: Caution all acft entering tfc pat. occasional jet acft opern with pickup and dropping of tow targets. (4-29) 190' lgtd rdo twr erected 6.5 n mi ESE (133°T) at lat 42-51-22, long. 106-21-41. (4-6)

GILLETTE ARPT:50-75' W shoulder1500' from N end N/S strip soft - clsd to hvy acft.

JACKSON ARPT: E/W rnwy closed - fence const across rnwy just W of N/S rnwy. Small acft may use E end of F/W in case of emerg, but at own risk. N/S rnwy clsd, const. Use new auxiliary 150' x 5400' strip E of N/S rnwy. (3-15)

KEMMERER ARPT: Entire fld clsd all operns, xcpt graded 4000' S end N/S rnwy. Use extreme caution when wet. (11-6)

LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'.

RIVERTON ARPT: Men and equip. on fld. 5000' W end rnwy 28 surfaced and available. Remainder arpt closed. (4-12)

ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000.

ROCK SPRINGS-RADIO: ILS glide slope has light to moderate roughness between OM and LF rng.

ROCK SPRINGS ARPT: Caution - first 500' NW end NW/SE rnwy clsd - marked.

SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.

TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men and equip on fld. Use extreme caution. (10-4)

PUERTO RICO: SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2,3,4 and and 5 on N departure ramp not fully visible from twr. Caution. (6-7)

VOR RECEIVER CHECK SIGNALS

✓ Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods: (a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator(FPDI) centered, the omnibearing selector should read 0° with the to-from indication being "From"; or the omnibearing selector should read 180° with the to-from indication reading "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an individual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of ± 4° be indicated through use of the ground check or ± 6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of this date check points or facilities have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 112.0 mc)
*Chicago (Midway 111.0 mc)
*Kansas City (Municipal 113.0 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)
**Wichita (Municipal 111.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

(15 May 1956)

Temporary Controlled Firing Area – Jordan Narrows, Utah

Firing to cease upon approach of aircraft over firing area.

Designated Altitude – Surface to 15,000 ft. above terrain.

Time of Use – Daylight hours only during period of June 3-24, 1956 inclusive

Activity – Artillery firing

Using Agency – Utah National Guard

Firing to be conducted in accordance with the following restrictions:

1. Visual surveillance will be continuously maintained over the entire area by safety officers during firing operations to detect approaching aircraft and communication will be established with gun positions to order cessation of firing upon the approach of aircraft.

2. Firing will be conducted only when there are no clouds below 16,000 ft. greater than scattered clouds and when visibility is at least 10 miles.

3. No projectile shall enter or pass through any clouds.

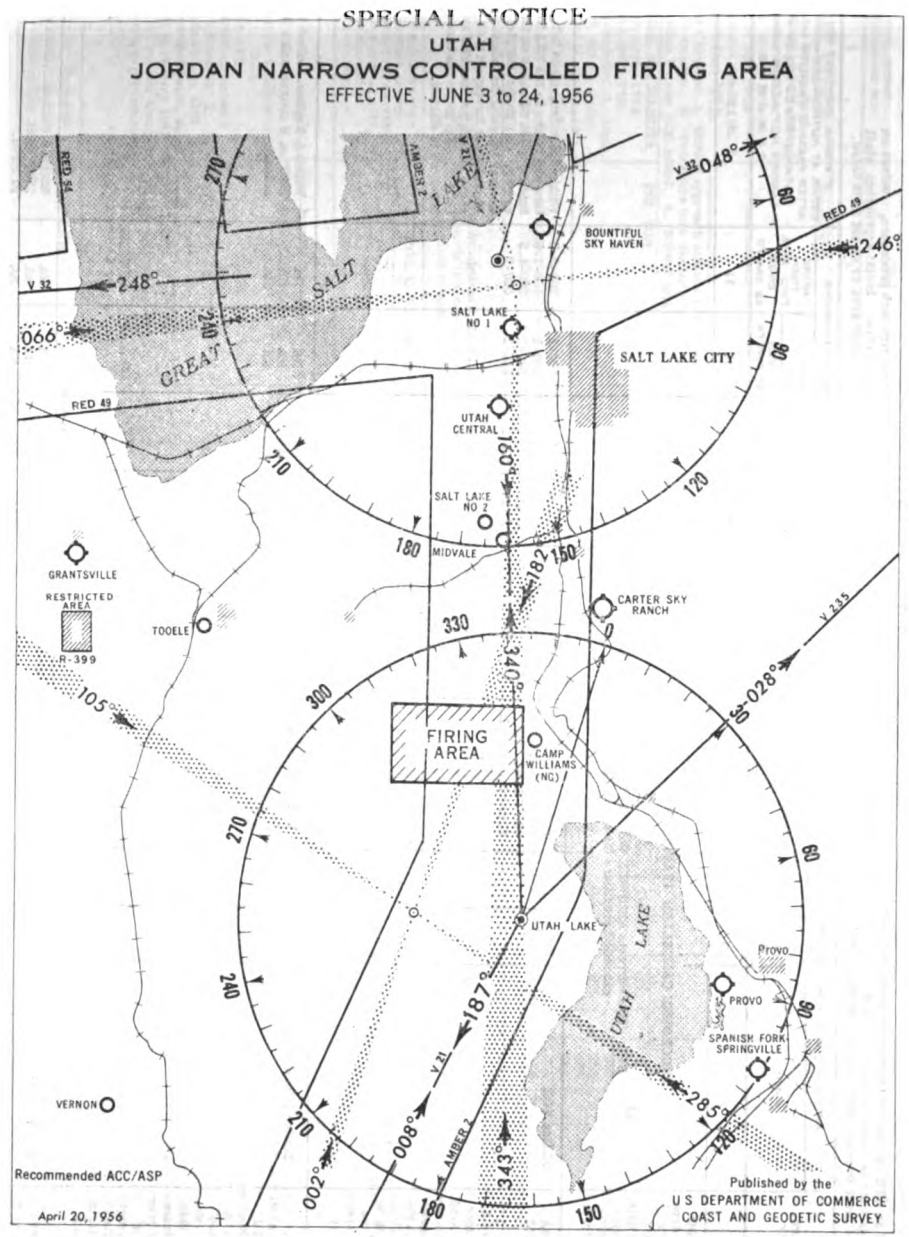
4. All firing to be conducted to the west.

5. The nearest Civil Aeronautics Administration Interstate Airways Communication Station (Salt Lake City INSAC) shall be advised at least 24 hours in advance of firing activities in order that adequate NOTAMS may be issued. During all scheduled periods of firing, as evidenced by the issuance of a NOTAM, the Civil Aeronautics Administration Interstate Airways Communication Stations at Salt Lake City and Delta, Utah will suggest to all aircraft contacting them that the aircraft follow the east side of the south course of Salt Lake Radio Range while in the vicinity of the Controlled Firing Area.

6. Radar surveillance of the Jordan Narrows Valley will be provided during all periods of firing.

7. Provision will be made for the placarding of all airports in the vicinity of Jordan Narrows, particularly small airports, sufficiently in advance to warn area and transient private pilots of the controlled firing area and the dates of its utilization.

8. Notice of firing will be broadcast by INSACS in the area at the time weather forecasts are transmitted.



Revisions to Instrument Approach Procedures (DISTANCES ARE IN NAUTICAL MILES)

LOW FREQUENCY RANGE PROCEDURES

If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

Major change: Increase orbiting altitude.					Note: When authorized by ATC, DME may be used within 10 miles between radials 325° clockwise to 200° at 7300' to position aircraft for final approach, with the elimination of a procedure turn.												

GROUND CONTROLLED APPROACH SYSTEM PROCEDURES

If a GCA instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with GCA to final authorized landing minimums the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a PAR approach or, for more than 30 seconds during an ASR approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing, minimums; or (D) if landing is not accomplished.

NOTICES TO AIRMEN Page 2

VOL. 11, NO. 6 ..... MAY 29, 1956

The AIRMAN'S GUIDE is issued every two weeks
This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

ATC IFR CLEARANCE PHRASEOLOGY: Effective November 15, 1955, ATC facilities will resume general use of the phrase "VIA FLIGHT PLANNED ROUTE" in air traffic clearances to replace the lengthier detailed description of any portion of the route of flight that is identical to the route filed by the pilot. When used, the phrase will be preceded by sufficient detailed route of flight information to establish the flight on the filed route. The "VIA FLIGHT PLANNED ROUTE" phraseology does not include approval of altitudes filed in the flight plan. Specific altitudes assignments will be issued in each clearance. IFR flight plans filed by the pilots should contain the complete route of flight and should be relayed to air traffic control unchanged. Pilots may request route verification when considered necessary and are requested to do so whenever a filed route has been changed prior to departure. If route verification is desired prior to departure, the request should be included with the initial call for taxi clearance to avoid delay in receiving the information.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequencies available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical location. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert of these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations and outer compass locators).

Omniranges and outer compass locators where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification: e.g. Long Beach omnirange .—.. -.-. ... (voice) (LGB in Code).

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e., if no facility for providing air-ground communications services is associated with the omni, the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy fields is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

WARNING OF MAINTENANCE AT CAA NAVAIDS: During periods of routine or emergency maintenance, the coded identification (or code and voice, where applicable) will be removed from certain CAA Navaids, namely, ILS localizers, VHF ranges (VOR, TVOR and VAR) and L/MF ranges but not from "H" facilities, compass locators or 75 mc marker beacons. The removal of identification serves as a warning to pilots that the facility has been officially taken over by "Maintenance" for tune-up or repair and may be unreliable even though on the air intermittently or constantly.

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS: In the Airman's Guide, "n miles" or "n mi" stands for nautical miles; "s miles" or "s mi" for statute miles.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newarl will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

RADIO CALL-UP PROCEDURES - ARTC CENTERS: Effective February 1, 1956, aircraft on IFR flight plans making position reports direct to ARTC centers shall, in the initial call-up include the fix or geographical location over which the aircraft is reporting. Examples: "Indianapolis Center, this is TWA 55, Maxwell, over."; "Indianapolis Center, this is Beechcraft 1234, 20 south of Maxwell, over."

Pilots are reminded, however, that direct communication with the center shall NOT be established until the pilot is specifically requested to do so.

UNACCEPTABLE RADIO MESSAGES: CAA facilities will no longer accept non-safety messages (requests for ground transportion, meals, telephone calls, etc.) from pilots of aircraft in flight. Arrangements should be made by a pilot prior to departure via public communications (telephone, telegraph, etc.) for such requirements. Pilots are also reminded that transmission of such messages violates the terms of their aircraft radio license as provided in Part 9 of the FCC Regulations.

CLASSIFICATION OF ILS BACK COURSES: ILS back courses have in the past been classified as either "usable" or "unusable". It now appears that further classification of the "unusable" courses are necessary, since some back courses formerly classified as "unusable" actually may be satisfactory for intersections, holding, transitions or missed approaches, even though they are not satisfactory for back course approaches.

ILS back courses will in the future be classified as follows:

Usable - suitable for ILS back course approaches

Restricted - not suitable for ILS back course approaches, but suitable for intersections, holding, transitions or missed approaches

Unusable - not suitable for any of the above.

SPURIOUS GLIDE SLOPE INDICATIONS: CAA glide slope facilities are intended to provide reliable glide slope signals for use in conjunction with the front course of the ILS localizer. Glide slope signals may be received in other azimuths (because of stray radiation from the antennas and reflections from nearby objects) which may in some cases be sufficient to activate the airborne warning flag. Any glide slope needle activity in these other azimuths should be disregarded.

All pilots are particularly cautioned to ignore glide slope indications when making back course localizer approaches. All CAA approved procedures for back course approaches are limited to use of the localizer portion of the ILS. Any attempt to fly spurious glide slope indications on such back course approaches could result in hazardous operations.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, reagrdless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

FLIGHTS IN GRAND CANYON NATIONAL PARK: Pilots are cautioned that any unauthorized flight below the rim of the Canyon within the Park boundaries will constitute an undue hazard to persons or property and will subject the pilot to appropriate violation action. Grand Canyon National Park Regulations prohibit the landing of any aircraft within the boundaries of the Park.

RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

(Part 608 - Restricted Areas - Amendment 166)
(June 23, 1956)

(1) In Section 608.38 the Fort Dix, N. J., area (R-25), amended on February 8, 1956 in 21 F.R. 859 is further amended by changing the "Controlling Agency" column to read: "Headquarters, First Army, Governors Island 4, New York."

(2) In Section 608.57, the Camp Williams, Wisc., area (R-468 formerly D-468) published on October 9, 1954 in 19 F. R. 6513, is amended by changing the "Time of Designation" column to read: "Day and Night", and the "Controlling Agency" column to read: "Adjutant General of the State of Wisconsin, Madison 2, Wisconsin."

(3) In Section 608.41, the Center Hill, N. C., area (R-89), amended on May 5, 1956 in 21 F.R. 2977, is rescinded.

(4) In Section 608.30, the Betsie Point, Mich., area (R-77 formerly D-77), amended on June 4, 1954 in 19 F. R. 3298 is redesignated as follows: "Description by Geographical Coordinates": Beginning at lat 44-43-15N, long. 86-27-40W; ESE to lat 44-41-30N, long. 86-16-04W; SSW to lat 44-20-12N, long. 86-22-30W; WNW to lat 44-21-45N, long. 86-34-12W; NNE to lat 44-43-15N, long. 86-27-40W, point of beginning. Designated Altitudes: Surface to 30,000 feet MSL. Time of Designation: Days. Controlling Agency: Adjutant General, State of Michigan."

(5) In Section 608.57, the Sheboygan, Wisc., area (R-83) amended on March 24, 1956 in 21 F. R. 1819, is redesignated as follows: "Description by Geographical Coordinates: From lat 43-44-30, long. 87-36-00; thence to lat 43-35-00, long. 87-00-00; thence to lat 43-14-15, long. 87-12-30; thence to lat 43-23-00, long. 87-43-00; thence to lat 43-33-00, long. 87-41-30; thence to point of beginning. Designated Altitudes: Surface to 40,000 feet MSL. Time of Designation: Daylight. Controlling Agency: 10th Air Force, Fort Selfridge AFB, Michigan."

(Part 608 - Restricted Areas - Amendment 167)
(July 1, 1956)

(1) In Section 608.18, the Pensacola, Fla., area (D-153), amended on November 6, 1954 in 19 F. R. 7225, is further amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat 30-13-30N, long. 88-01-30W; thence easterly along the shoreline to lat 30-16-25N, long. 87-34-20W; thence clockwise along the arc of a circle with a 1.7 n mile radius centered at lat 30-16-48N, long. 87-32-10W; to the shoreline at lat 30-16-55N, long. 87-30-20W; thence to lat 30-17-15N, long. 87-29-15W; thence clockwise along the arc of a circle with a 1.7 n mile radius centered at lat 30-17-47N, long. 87-27-28W, to the shoreline at lat 30-17-50N, long. 87-25-30W; thence to lat 30-18-20N, long. 87-23-20W; thence counterclockwise along the arc of a circle with a 4.3 n mile radius centered at lat 30-20-53N, long. 87-19-04W; to the shoreline at lat 30-19-10N, long. 87-14-45W; thence to lat 30-19-15N, long. 87-13-50W; thence to lat 30-16-30N, long. 87-13-00W; thence westerly 3 n miles from and parallel to the shoreline to lat 30-10-20N, long. 87-01-30W; thence to point of beginning."

CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE, AND REPORTING POINT AMENDMENTS: Effective as indicated, unless otherwise advised, the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

Effective June 28, 1956:

CIVIL AIRWAYS: (1) Red civil airway No. 63 (Bangor, Mich., to Jackson, Mich.), caption changed and is amended to read: "From the intsxn of the SW course of the Grand Rapids, Mich., rdo rng and the W course of the Battle Creek, Mich., rdo rng via the Battle Creek, Mich. rdo rng stn to the Jackson, Mich., nondirectional rdo bcn."

(2) Blue civil airway No. 3 (Miami, Fla., to Sault Ste. Marie, Mich.), is amended between Miami, Fla., and Fort Myers, Fla., to read: "From the Miami, Fla., rdo rng stn via the Tamiami, Fla., nondirectional rdo bcn; Fort Myers, Fla., nondirectional rdo bcn;"

(3) VOR civil airway No. 11 (Memphis, Tenn., to Detroit, Mich.,), is amended by changing the words "Indianapolis omnirng 232° True radials;" to read: "Indianapolis omnirng 230° True radials;"

(4) VOR civil airway No. 12 (Santa Barbara, Calif., to Philadelphia, Pa.), is amended by changing the portion which reads: "Wichita, Kans., omnirng stn, including a N alternate from the Gage omnirng stn to the Wichita omnirng stn via the intsxn of the Gage omnirng 044° True and the Wichita omnirng 245° True radials and also a S alternate from the Anthony omnirng stn to the Wichita omnirng stn via the intsxn of the Anthony omnirng 078° True and the Wichita omnirng 194° True radials;" to read: "Wichita, Kans., omnirng stn, including a N alternate from the Gage omnirng stn to the Wichita omnirng stn via the intsxn of the Gage omnirng 044° True and the Wichita omnirng 245° True radials and also a S alternate from the Anthony omnirng stn to the Wichita omnirng stn via the intsxn of the Anthony omnirng 060° True and the Wichita omnirng 190° True radials;"

(5) VOR civil airway No. 14 (Roswell, N. Mex., to Boston, Mass.), is amended by changing the portion which reads: "Tulsa, Okla., omnirng stn, including a N alternate and also a S alternate via the intsxn of the Oklahoma City omnirng 100° True and the Tulsa omnirng 207° True radials;" to read: "Tulsa, Okla., omnirng stn, including a N alternate via the intsxn of the Oklahoma City omnirng 040° True and the Tulsa omnirng 257° True radials, and also a S alternate via the intsxn of the Oklahoma City omnirng 107° True and the Tulsa omnirng 222° True radials;" and by changing the portion which reads: "Indianapolis, Ind., omnirng stn, including a S alternate via the intsxn of the Terre Haute omnirng 082° True and the Indianapolis omnirng 232° True radials;" to read: "Indianapolis, Ind., omnirng stn, including a S alternate via the intsxn of the Terre Haute omnirng 082° True and the Indianapolis omnirng 230° True radials;"

(6) VOR civil airway No. 15 (Galveston, Tex., to Minot, N, Dak.), is amended by changing the portion which reads: "Ardmore, Okla., omnirng stn, including a W alternate from the Dallas, Tex., omnirng stn to the Ardmore, Okla., omnirng stn via the intsxn of the Dallas omnirng 324° True and the Ardmore omnirng 176° True radials to the Tulsa, Okla., omnirng stn, including an E alternate." to read: "Ardmore, Okla., omnirng stn, including a W alternate from the Dallas, Tex., omnirng stn to the Ardmore, Okla., omnirng stn via the intsxn of the Dallas omnirng 324° True and the Ardmore omnirng 176° True radials; to the Tulsa, Okla., omnirng stn, including an E alternate and also a W alternate via the point of intsxn of the Oklahoma City, Okla., omnirng 107° True and the Tulsa omnirng 222° True radials."

(7) VOR civil airway No. 16 (Los Angeles, Calif., to Boston, Mass.), is amended by changing the portion which reads: "Hassayampa, Ariz., omnirng stn;" to read: "Hassayampa, Ariz., omnirng stn, including a N alternate via the intsxn of the Blythe omnirng 079° True and the Hassayampa omnirng 291° True radials;"

(8) VOR civil airway No. 20 (Laredo, Tex., to Richmond, Va.), is amended by changing the portion which reads: "That airspace over United States territory from the Laredo, Tex., omnirng stn via the Corpus Christi, Tex., omnirng stn;" to read: "That airspace over United States territory from the Laredo, Tex., omnirng stn via the Alice, Tex., omnirng stn; Corpus Christi, Tex., omnirng stn;"

(9) VOR civil airway No. 38 (Chicago, Ill., to Elkins, W. Va.), is amended to read: "From the Peotone, Ill., omnirng stn via the Fort Wayne, Ind., omnirng stn; intsxn of the Fort Wayne omnirng 099° True and the Findlay omnirng 276° True radials; Findlay, Ohio, omnirng stn; Columbus, Ohio, omnirng stn; Parkersburg, W. Va., omnirng stn; to the Elkins, W. Va., omnirng stn."

(10) VOR civil airway No. 50 (Kirksville, Mo. to Indianapolis, Ind.), is amended to read: "From the Kirksville, Mo., omnirng stn via the Quincy, Ill., omnirng stn, including a S alternate via the intsxn of the Kirksville omnirng 121° True and the Quincy omnirng 258° True radials; Springfield, Ill., omnirng stn; Terre Haute, Ind., omnirng stn; to the point of intsxn of the Terre Haute omnirng 082° True radial and the Indianapolis, Ind., Weir Cook Airport ILS lclzr 225° True course."

(11) VOR civil airway No. 68 (Albuquerque, N. Mex., to Brownsville, Tex.), is amended by changing all after the San Angelo, Tex., omnirng to read: "San Angelo, Tex., omnirng stn, including a S alternate; Junction, Tex., omnirng stn, including a S alternate via the intsxn of the San Angelo omnirng 181° True and the Junction omnirng 310° True radials; San Antonio, Tex., omnirng stn; intsxn of the San Antonio omnirng 169° True and the Corpus Christi, omnirng 321° True radials; Corpus Christi, Tex., omnirng stn; intsxn of the Corpus Christi omnirng 236° True and the Alice, Tex., omnirng 171° True radials; intsxn of the Alice omnirng 171° True and the Brownsville omnirng 339° True radials; to the Brownsville, Tex., omnirng stn. The portions of this airway which conflict with the Corpus Christi Restricted Area (R-227) are excluded."

(12) VOR civil airway No. 69 (Pine Bluff, Ark., to Chicago, Ill.), is amended to read: "From the Pine Bluff, Ark., omnirng stn via the point of intsxn of the Little Rock, Ark., omnirng 062° True and the Memphis, Tenn., omnirng 276° True radials; Walnut Ridge, Ark., omnirng stn; Farmington, Mo., omnirng stn; intsxn of the Farmington omnirng 351° True and the Troy omnirng 215° True radials; Troy, Ill., omnirng stn; Springfield, Ill., omnirng stn; Pontiac, Ill., omnirng stn; Joliet, Ill., omnirng stn; to the Chicago, Ill., Midway Airport term. omnirng stn."

(13) VOR civil airway No. 77 (San Angelo, Tex., to Des Moines, Iowa), is amended by changing all after the Ponca City, Okla., omnirng stn to read: "Ponca City, Okla., omnirng stn; intsxn of the Ponca City omnirng 327° True and the Wichita omnirng 226° True radials; Wichita, Kans., omnirng stn; Topeka, Kans., omnirng stn; St. Joseph, Mo., omnirng stn; Lamoni, Iowa, omnirng stn; to the Des Moines, Iowa, omnirng stn."

(14) VOR civil airway No. 99 (Newport, Oreg., to Vancouver, B. C.), is added to read: "That airspace over United States territory from the Newport, Oreg., omnirng stn via the intsxn of the Newport omnirng 023° True and the Newberg omnirng 251° T radials; Newberg, Oreg., omnirng stn; intsxn of the Newberg omnirng 359° True and the Olympia omnirng 184° True radials; Olympia, Wash., omnirng stn; point of intsxn of the Seattle, Wash., omnirng 359° True and the Bellingham omnirng 169° True radials; Bellingham, Wash., omnirng stn; to the Vancouver, B. C., rdo rng stn."

(15) VOR civil airway No. 123 (Newport, Oreg., to Newberg, Oreg.), is revoked.

(16) VOR civil airway No. 137 (Thermal, Calif., to Salinas, Calif.), is amended to read: "From the Thermal, Calif., omnirng stn via the Palmdale, Calif., omnirng stn; point of intsxn of the Bakersfield, Calif., omnirng 210° True and the Coalinga omnirng 153° True radials; Coalinga, Calif., omnirng stn; to the Salinas, Calif., omnirng stn."

(17) VOR civil airway No. 144 (Chicago, Ill., to Washington, D. C.), is amended by changing the portion which reads: "Fort Wayne, Ind., omnirng stn; Findlay, Ohio, omnirng stn;" to read: "Fort Wayne, Ind., omnirng stn; intsxn of the Fort Wayne omnirng 099° True and the Findlay omnirng 276° True radials; Findlay, Ohio, omnirng stn;"

(18) VOR civil airway No. 163 (Waco, Tex., to Oklahoma City, Okla.), is amended to read: "From the Waco, Tex., omnirng stn via the Mineral Wells, Tex., omnirng stn; Ardmore, Okla., omnirng stn; intsxn of the Ardmore omnirng 350° True and the Oklahoma City omnirng 137° True radials; to the Oklahoma City, Okla., omnirng stn, including an east alternate from the Ardmore omnirng stn to the Oklahoma City omnirng stn via the point of intsxn of the Oklahoma City omnirng 107° True and the Tulsa, Okla., omnirng 222° True radials and also a W alternate from the Ardmore omnirng stn to the Oklahoma City omnirng stn via the intsxn of the Ardmore omnirng 332° True and the Oklahoma City omnirng 175° True radials."

(19) VOR civil airway No. 165 (Long Beach, Calif., to Coalinga, Calif.), is amended to read: "From the Long Beach, Calff., omnirng stn via the intsxn of the Long Beach omnirng 346° True and the Palmdale omnirng 200° True radials; Palmdale, Calif., omnirng stn; point of intsxn of the Palmdale omnirng direct radial to the point of intsxn of the Bakersfield, Calif., omnirng 210° True and the Coalinga, Calif., omnirng 153° True radials and the Bakersfield, omnirng 149° True radials; Bakersfield, Calif., omnirng stn; to the Coalinga, Calif., omnirng stn."

(20) VOR civil airway No. 233 (Springfield, Ill., to Moline, Ill.), is amended to read: "From the Springfield, Ill., omnirng via the Peoria, Ill., omnirng stn; Bradford, Ill., omnirng stn; to the Moline, Ill., omnirng stn."

(21) VOR civil airway No. 238 (Philadelphia, Pa., to Atlantic City, N. J.), is amended to read: "From the point of intsxn of the West Chester, Pa., omnirng 120° True radial and the Philadelphia, Pa., International Airport ILS lclzr 256° True course via the Woodstown, N. J., omnirng stn; to the point of intsxn of the Woodstown omnirng 106° True and the Coyle, N. J., omnirng 203° True radials."

CONTROL AREAS: (1) Red civil airway No. 63 (Bangor, Mich., to Jackson, Mich.), caption changed and is amended to read: "All of Red civil airway No. 63."

(2) VOR civil airway No. 50 (Kirksville, Mo., to Indianapolis, Ind.), is amended to read: "All of VOR civil airway No. 50, including a S alternate."

(3) VOR civil airway No. 69 (Pine Bluff, Ark., to Chicago., Ill.), is amended to read: "All of VOR civil airway No. 69."

(4) VOR civil airway No. 77 (San Angelo, Tex., to Des Moines, Iowa), is amended to read: "All of VOR civil airway No. 77, including E alternates, but excluding the airspace between the main airway and its E alternate between the San Angelo, Tex., omnirng stn and the Abilene, Tex., omnirng stn."

(5) VOR civil airway No. 99 (Newport, Oreg. to Vancouver, B. C.), is added to read: "All of VOR civil airway No. 99."

(6) VOR civil airway No. 123 (Newport, Oreg., to Newberg, Oreg.), is revoked.

(7) VOR civil airway No. 137 (Thermal, Calif., to Salinas, Calif.), is amended to read: "All of VOR civil airway No. 137."

(8) VOR civil airway No. 163 (Waco, Tex., to Oklahoma City, Okla.), is amended to read: "All of VOR civil airway No. 163 including an E alternate and a W alternate."

(29 May 1956)

(9) VOR civil airway No. 165 (Long Beach, Calif., to Coalinga, Calif.), is amended to read: "All of VOR civil airway No. 165."

(10) VOR civil airway No. 233 (Springfield, Ill,, to Moline, Ill.), is amended to read: "All of VOR civil airway No. 233."

CONTROL AREA EXTENSIONS: (1) (Detroit, Mich.), is amended by changing the words which read: "on the N by Red civil airway No. 63," to read: "on the N by VOR civil airway No. 84."

(2) (Grosse Ile, Mich.), is amended by changing the words which read: "bounded on the NW by VOR civil airway No. 96," to read: "bounded on the W by VOR civil airway No. 197,"

(3) (Golva, N. Dak.), is revoked.

(4) (Litchfield, Mich.), is amended by changing the words which read: "on the NE by VOR civil airway No. 45," to read: "on the NE by VOR civil airway No. 47,"

(5) (Del Rio, Tex.), is amended to read: "That airspace over United States territory within a 25 mile radius of Laughlin Air Force Base, Del Rio, Tex.,"

(6) (Abilene, Tex.), is amended to read: "That airspace within a 35 mile radius of the Abilene omnirng stn."

(7) (Cotulla, Tex.), is amended by adding the following portion to present control area extension: "and within 5 miles either side of the 40° True radial of the Cotulla omnirng extending from the omnirng stn to the perimeter of the San Antonio control area extension."

(8) Five-mile radius zones, is amended by deleting the following airport; Altus, Okla., Altus Air Force Base.

CONTROL ZONES: (1) (Galveston, Tex.), is amended to read: "Within a 5 mile radius of Galveston Airport and within 2 miles either side of the NW and SE courses of the Galveston rdo rng extending from the 5 mile radius zone to a point 3 miles NW of the rdo rng stn."

(2) (Altus, Okla.), is added to read: "Within a 5 mile radius of Altus Air Force Base and within 2 miles either side of lines bearing 180° and 360° True extending from the Air Force Base to points 10 miles N and S."

REPORTING POINTS: (1) Red civil airway No. 27 (Atlanta, Ga., to Detroit, Mich.), is amended to read: "Corbin, Ky., VHF VAR rdo rng stn."

(2) Red civil airway No. 63 (Bangor, Mich., to Jackson, Mich.), caption changed and is amended to read: "No reporting point designation."

VOR REPORTING POINTS: (1) Domestic VOR reporting points is amended by adding the following reporting points: (a) Greenville, Intsxn - the intsxn of the Tallahassee, Fla., omnirng 091° True; the Valdosta, Ga., omnirng 236° True radials, and the Cross City, Fla., omnirng 333° True radials. (b) Jackson Intsxn - the intsxn of the Litchfield, Mich., omnirng 050° True and the Salem, Mich., omnirng 257° True radials. (c) Gill Intsxn - the intsxn of the Carleton, Mich., omnirng 100° True and the Gleveland, Ohio, omnirng 024° True radials. (d) Leslie Intsxn - the intsxn of the Lansing, Mich., omnirng 148° True and the Salem, Mich., omnirng 272° True radials.

(2) Domestic VOR reporting points is amended by changing the following reporting points to read: (a) Radnor Intsxn - the intsxn of the Lafayette, Ind., omnirng 089° True and the Indianapolis, Ind., omnirng 341° True radials.

Effective July 1, 1956:

CIVIL AIRWAYS: (1) Green Civil airway No. 6 (Laredo, Tex., to Norfolk, Va.), is amended between New Orleans, La., rdo rng stn and Bay Minette, Ala., nondirectional rdo bcn to read: "New Orleans, La., rdo rng stn via the Keesler AFB, Biloxi, Miss., rdo rng stn; Bay Minette, Ala., nondirectional rdo bcn;"

(2) Red civil airway No. 30 (Shreveport, La., to Jacksonville, Fla.), is amended by changing the portion beginning at New Orleans, La., to read: "From the New Orleans, La., rdo rng stn via the intsxn of the NE course of the Saufley Field, Pensacola, Fla., (Navy) rdo rng and the W course of the Pensacola, Fla., rdo rng; Whiting Field, Milton, Fla., (Navy) rdo rng stn; Crestview, Fla., rdo rng stn, excluding the portion below 2000' MSL lying within Pensacola caution area C-488; the intsxn of the E course of the Crestview, Fla., rdo rng and the NW course of the Tallahassee, Fla., rdo rng; Tallahassee, Fla., rdo rng stn to the Jacksonville, Fla., rdo rng stn, excluding the portion above 19,000' MSL lying within the Tyndall restricted area (R-336), between sunset and sunrise."

(3) Red civil airway No. 74 (New Orleans, La., to Bay Minette, Ala.), is added to read: "From the intsxn of the E course of the New Orleans, La., rdo rng with a line bearing 230° True from the Bay Minette, Ala., nondirectional rdo bcn to the Bay Minette, Ala., nondirectional rdo bcn."

(4) Red civil airway No. 101 (Biloxi, Miss., to Pensacola, Fla.), is added to read: "From the Keesler Air Force Base, Biloxi, Miss., rdo rng stn to the intsxn of the SE course of the Keesler AFB rdo rng with the W course of the Pensacola, Fla., rdo rng."

(5) Red civil airway No. 110 (Mobile, Ala., to Pensacola, Fla.), is added to read: "From the intsxn of a line bearing 331° True from the Brookley Air Force Base, Mobile, Ala., nondirectional rdo bcn with Green civil airway No. 6 via the Brookley AFB nondirectional rdo bcn to the intsxn of a line bearing 151° True from the Brookley AFB nondirectional rdo bcn with the W course of the Pensacola, Fla., rdo rng."

(6) Blue civil airway No. 59 (Pensacola, Fla., to Goodway, Ala.), is revoked.

(7) VOR civil airway No. 22 (New Orleans, La., to Jacksonville, Fla.), is amended by changing all before the Crestview, Fla., omnirng stn to read: "From the New Orleans, La., omnirng stn via the Pensacola (Saufley Field), Fla., omnirng stn; intsxn of the Pensacola (Saufley,Field), Fla., omnirng 039° True and the Crestview omnirng 260° True radials; Crestview, Fla., omnirng stn;" and by adding a new last sentence to read: "The portions of this airway, below 2000 feet above MSL, which lie within the Pensacola Caution Area (C-488) are excluded."

(8) VOR civil airway No. 240 (Ship Island, Miss., to Mobile, Ala.), is added to read: "From the point of intsxn of the New Orleans, La., omnirng direct radial to the Pensacola (Saufley Field), Fla., omnirng stn and the Mobile omnirng 224° True radial to the Mobile, Ala., omnirng stn."

(9) VOR civil airway No. 241. (Unassigned)

(10) VOR civil airway No. 242 (Mobile, Ala., to Magnolia Springs, Ala.), is added to read: "From the Mobile, Ala., omnirng stn to the point of intsxn of the Mobile omnirng 134° True and the New Orleans, La., omnirng direct radial to the Pensacola (Saufley Field), Fla., omnirng stn."

CONTROL AREAS: (1) Red civil airway No. 74 (New Orleans, La., to Bay Minette, Ala.), is added to read: "All of Red civil airway No. 74."

(2) Red civil airway No. 101 (Biloxi, Miss., to Pensacola, Fla.), is added to read: "All of Red civil airway No. 101."

(3) Red civil airway No. 110 (Mobile, Ala., to Pensacola, Fla.), is added to read: "All of Red civil airway No. 110."

(4) Blue civil airway No. 59 (Pensacola, Fla., to Goodway, Ala.), is revoked.

(5) VOR civil airway No. 240 (Ship Island, Miss., to Mobile, Ala.), is added to read: "All of VOR civil airway No. 240."

(6) VOR civil airway No. 241. (Unassigned).

(7) VOR civil airway No. 242 (Mobile Ala., to Magnolia Springs, Ala.), is added to read: "All of VOR civil airway No. 242."

CONTROL AREA EXTENSIONS: (1) (Mobile, Ala.), is amended by changing the words which read: "Caution Area C-146," to read: "Caution Area C-488,"

(2) (Pensacola, Saufley Field, Fla.), is amended to read: "Within a 25 mile radius of Saufley Field, Pensacola, Fla., excluding the portions which overlap Restricted and Warning Areas."

(3) (Milton, Fla.), is added to read: "Within a 5 mile radius of NAAS Whiting (North), Milton, Fla., and with 5 miles either side of the NW course of the Whiting (Navy) rdo rng extending from the rdo rng stn to a point 12 miles NW."

(4) (Crestview, Fla.), is added to read: "Within 5 miles either side of the 292° True radial of the Crestview, Fla., omnirng extending from the omnirng stn to a point 12 miles NW."

(5) (Five mile radius zones) is amended by adding the following airport: Pensacola, Fla.; Forrest Sherman Field.

REPORTING POINTS: (1) Green civil airway No. 6 (Laredo, Tex., to Norfolk, Va.), is amended after New Orleans, La., rdo rng stn by adding the following reporting point: "Keesler AFB, Biloxi, Miss., rdo rng stn."

(2) Red civil airway No. 30 (Shreveport, La., to Jacksonville, La.), is amended after Baton Rouge, La., rdo rng stn by deleting the following reporting point: "Keesler AFB, Biloxi, Miss., rdo rng stn;" and by adding the following reporting point in lieu thereof: "the intsxn of the W course of the Pensacola, Fla., rdo rng and the NE course of the Saufley Field (Navy) rdo rng;"

(3) Red civil airway No. 74 (New Orleans, La., to Bay Minette, Ala.), is added to read: "No reporting point designation."

(4) Red civil airway No. 101 (Biloxi, Miss., to Pensacola, Fla.), is added to read: "No reporting point designation."

(5) Red civil airway No. 110 (Mobile, Ala., to Pensacola, Fla.), is added to read: "Brookley AFB, Mobile, Ala., nondirectional rdo bcn."

(6) Blue civil airway No. 59 (Pensacola, Ala., to Goodway, Ala.), is revoked.

VOR REPORTING POINTS: (1) Domestic VOR reporting points is amended by adding the following reporting points: (a) Pensacola (Saufley Field), Fla., omnirng stn. (b) Dog Intsxn - the intsxn of the New Orleans, La., omnirng 078° True and the Mobile, Ala., omnirng 224° True radials.

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

AEX	Alexandria, La., England AFB (Name change)
CSR	Anchorage, Alaska, Campbell Air Strip (Assignment)
LRF	Jacksonville, Ark., Little Rock AFB (Change from LOK 15 June 1956)
PLA	Port Lavaca, Tex., Tanner Airport (Assignment)
UCY	Union City, Tenn., Stewart Airport (Assignment)
XSG	Saugus Intersection, Calif., (Assignment)

✓ ON-REQUEST REPORTING POINTS: The following on-request reporting points are designated, redesignated or cancelled and shall become effective as indicated:

(Effective June 28, 1956)

DESIGNATE:

(1) BELLWOOD, VA. INTSXN - the intsxn of Flat Rock, Va. VOR 120° mag radial and the SW course of the Richmond, Va. ILS.

(2) BLANCHARD (VHF) INTSXN - the intsxn of the Oklahoma City, Okla., VOR 165° mag and the Ardmore, Okla., VOR 323° mag radials.

(3) CALUMET (VHF) INTSXN - the intsxn of the Oklahoma City, Okla., VOR 288° mag and the Enid, Okla., VOR 175° mag radials.

(4) CASHION (VHF) INTSXN - the intsxn of the Oklahoma City, Okla., 011° mag and the Enid Okla., VOR 142° mag radials.

(5) CHICKASHA (VHF) INTSXN - the intsxn of the Oklahoma City, Okla., VOR 192° mag and the Hobart, Okla., VOR 063° mag radials.

(6) CHRISTOVAL, TEX. (VHF) INTSXN - the intsxn of the San Angelo, Tex., VOR 170° mag and the Junction, Tex., VOR 300° mag radials. (Effect. with designation of proposed arwy V-68S Junction-San Angelo.)

(7) CLEARWATER, KANS. INTSXN - the intsxn of the Wichita, Kans., 180° mag (V-12S) and the Anthony, Kans., 050° mag radials (V-12S).

(8) CUTLER (LF) INTSXN - the intsxn of the Miami, Fla., LFR SE course and the Perrine, Fla., LFR E course.

(9) FLORIDA, IND. INTSXN - the intsxn of the Indianapolis, Ind. VOR 053° mag radial (V-14) and the Fort Wayne, Ind. VOR 199° mag radial.

(10) GROUPER (LF) INTSXN - the intsxn of the Key West Fla., LFR NE course and the Perrine, Fla., LFR SE course.

(11) KROME (LF) INTSXN - the intsxn of the Miami, Fla., LFR W course and the Perrine, Fla., LFR N course.

(12) LOTTS, GA. (VHF) INTSXN - the intsxn of the Savannah, Ga., VOR 284° mag and the Alma, Ga., VOR 032° mag radials.

(13) MILTON, KANS. INTSXN - the intsxn of the Anthony, Kans. VOR 035° mag radial (V-12), the Ponca City, Okla., VOR 317° mag radial (V-77), and the Wichita, Kans. VOR 216° mag radial. (V-12).

(14) MORVEN, VA. INTSXN - the intsxn of a Flat Rock, Va., VOR radial direct to present Morven LF intsxn. (Intsxn N course Blackstone, Va., LFR and the 272° bearing from Richmond, Va. LFR.)

(15) MUNNSVILLE, N. Y. (LFR) INTSXN - the intsxn of the Syracuse, N.Y., VOR 128° mag radial and the SW course of the Utica, N.Y. LFR.

(16) MUNNSVILLE, N. Y. (VOR) INTSXN - the intsxn of the Syracuse, N. Y. VOR 128° mag radial and the Binghamton, N. Y. VOR 033° mag radial.

(17) NORTH (VHF) INTSXN - the intsxn of the Columbia, S. C., 183° mag and the Augusta, Ga., 090° mag radials. MRA 2500'.

(18) PAT (VHF) INTSXN - the intsxn of the Midland, Tex., VOR 356° mag and the Hobbs, N. Mex., VOR 085° mag radials.

(19) PORT MADISON, WASH. INTSXN - the intsxn of the 359° mag radial of Olympia, Wash. VOR and the 308° mag radial of the Seattle, Wash. VOR.

(20) PRAGUE (VHF) INTSXN - the intsxn of the Oklahoma, City, Okla., VOR 077° mag and the Tulsa, Okla. 213° mag radials.

(21) ROSEDALE, WASH. INTSXN - the intsxn of the 359° mag radial of the Olympia, Wash., VOR and the 225° mag radial of the Seattle, Wash. VOR.

(22) ST. GEORGE, S. C. (VHF) INTSXN - the intsxn of the Charleston, S. C., VOR 302° mag and the Savannah, Ga., VOR 032° mag radials.

(23) SHAWNEE, OKLA. (VHF) INTSXN - the intsxn of the Oklahoma City, Okla. VOR 097° mag and the Ardmore, Okla., VOR 357° mag radials.

(24) SPRING VALLEY, N. J. INTSXN - the intsxn of the bearing from White Plains, N.Y., LOM to the present Spring Valley Intsxn. (Intsxn of the S course of the Poughkeepsie, N. Y. LFR and the 265° radial from Wilton, Conn. VOR).

(25) TULALIP, WASH. INTSXN - the intsxn of the 359° mag radial of the Olympia, Wash., VOR and the 146° mag radial of the Bellingham, Wash. VOR.

(26) UNION (VHF) INTSXN - the intsxn of the Oklahoma City, Okla., 257° mag and the Lawton, Okla., VOR 005° mag radials.

(27) WHITEROCK (VHF) INTSXN - the intsxn of the Columbia, S. C., VOR 330° mag and the Augusta, Ga., VOR 050° mag radials. MRA 2500'.

REDESIGNATE:

(1) BLUE JACKET, FLA. (VHF) INTSXN - the intsxn of the 173° mag radial of the Jacksonville, Fla., VOR and the 087°-267° mag bearing of the Jacksonville, Fla., NAS LFR (NIP).

(2) BISCOE, ARK., (VHF) INTSXN - the intsxn of the Little Rock, Ark. VOR 070° mag and the Pine Bluff, Ark., 030° mag radials.

(3) CLOVERDALE, IND. INTSXN - the intsxn of the 080° mag radial of the Terre Haute, Ind. VOR and the 229° mag radial of the Indianapolis, Ind. VOR.

(4) ELMENDORF (VHF) INTSXN - the intsxn of the San Antonio, Tex. VOR 160° mag and the Cotulla, Tex. VOR 031° mag radials.

(5) HILLEMANN, ARK. INTSXN - the intsxn of the 271° mag radial of the Memphis, Tenn., VOR and the 182° mag radial of the Walnut Ridge, Ark. VOR.

(6) KINGSVILLE, TEX. INTSXN - the intsxn of the Corpus Christi, Tex. VOR 227° mag and the Alice, Tex. VOR 162° mag radials.

(7) LEESBURG, VA. (VHF) INTSXN - the intsxn of the Herndon, Va., VOR 337° mag and the Front Royal, Va. VOR 094° mag radials.

(8) MAPLE HILL, KANS. (LF-VHF) INTSXN - the intsxn of the NW course of the Forbes, Kans. LFR 252° mag radial, the Topeka, Kans. VOR and the 359° mag radial of the Emporia, Kans. VOR.

CANCEL:

(1) ASHER (VOR) INTSXN - the intsxn of the Ardmore 002° mag and the Oklahoma City, Okla. 110° mag radials.

(2) CAT INTSXN - the intsxn of the New Orleans, La. VOR 075° mag radial and the Mobile, Ala., VOR 218° mag radial.

(3) HAZEN (VHF) INTSXN - the intsxn of the Little Rock, Ark., VOR 071° mag and the Pine Bluff, Ark. VOR 022° mag radials.

(4) MAYFIELD (VOR) INTSXN - the intsxn of the 317° mag radial of the Ponca City, VOR with the Anthony, Kans. 062° mag radial.

(5) ROME INTSXN - the intsxn of the 072° mag radial of the Anthony VOR and the 156° mag radial of the Wichita, Kans. VOR.

(6) SANDS INTSXN - the intsxn of the E course of the Homestead, Fla. LFR and the SE course of the Miami, Fla. LFR.

(7) TAMIAMI, FLA. INTSXN - the intsxn of the W course of the Miami, Fla. LFR and the 306° mag radial of the Ft. Myers, LF/RBN.

(Effective July 1, 1956)

DESIGNATE:

(1) BON SECOUR (L/MF) INTSXN - the intsxn of the Pensacola, Fla. (PNS) LFR W course and a line bearing of 146° mag from Brookley AFB, Ala., (BFM) rdo bcn.

(2) BON SECOUR (VHF) INTSXN - the intsxn of the Saufley, Fla., VOR 255° mag and the Mobile, Ala., VOR 129° mag radials.

(3) GONZALEZ (VHF) INTSXN - the intsxn of the Saufley, Fla., VOR 035° mag radial and the NW course of the Pensacola, Fla., ILS lclzr.

(4) NAVY WHITING, FLA. INTSXN - LFR

(5) PRITCHARD (L/MF) INTSXN - the intsxn of a line bearing of 239° mag from the Bay Minette, Ala., (BAE) rdo bcn and a line bearing of 326° mag from the Brookley AFB, Ala., (BFM) rdo bcn.

(6) WHITING (VHF) INTSXN - the intsxn of the Saufley, Fla., VOR 035° mag and the Crestview, Fla. VOR 256° mag radials.

REDESIGNATE:

(1) GONZALEZ (L/MF) INTSXN - the intsxn of the Pensacola, Fla., (PNS) LFR NW course and the Navy Saufley, Fla., (NUN) LFR NE course.

(2) HORN (L/MF) INTSXN - the intsxn of the Pensacola (PNS), Fla., LFR W course and the Keesler AFB, Miss. LFR SE course.

CANCEL:

(1) McDAVID (LF) and (VHF) INTSXNS.

✓ NON-STANDARD HOLDING PATTERNS: The following non-standard holding patterns are established and shall become effective as indicated:

(Effective June 28, 1956)

(1) CASHION (VHF) INTSXN - direction of holding - N on Oklahoma City, Okla. VOR 011° mag radial (inbound course 191° mag); direction of turn - RIGHT; time - one minute; minimum altitude - 2300'.

(2) CHICKASHA (VHF) INTSXN - direction of holding - S on Oklahoma City, Okla. VOR 192° mag radial (inbound course 012° mag); direction of turns - LEFT; minimum altitude - 3000'.

(3) KROME (LF) INTSXN - direction of holding - W on Miami, Fla. LFR W course (inbound course 093° mag); direction of turns - LEFT; time - two minutes; minimun altitude - 1100'.

*1400 - MOCA		

WARNING AREA PENETRATIONS: The following incident is cited as a WARNING to all pilots: Recently an unidentified aircraft escaped destruction by about one second because of the alertness of a military air-to-air missile firing crew. The aircraft was well within a designated Warning Area without clearance or permission and was not immediately detected by radar. Its presence became evident only following the missile radar lock on, moments before firing, when the crew noted the nose up attitude and the slight turn of the launching plane.

AIRMAN'S GUIDE CORRECTIONS: Correct Airmans' Guide, Volume 11, No. 4, dated May 1, 1956, as follows:

(1) Page 8 - On-Request Reporting Points - NARROWS, ALA. INTSXN, cancelled in error, should have read: NARROWS, ALA. (VHF) INTSXN. (Narrows Integrated still in effect.)

(2) Page 8 - On-Request Reporting Points - WARREN, MICH. INTSXN cancelled inadvertently, still in effect.

(3) Page 9 - Non-Standard Holding Patterns - BLUE JACKET, FLA. INTSXN - correct to read: direction of holding - S on Jacksonville, Fla. VOR 173° mag radial (inbound course 353° mag); direction of turn - RIGHT; time - one minute; minimum altitude - 1200'.

Correct Airman's Guide, Volume 11, No. 5, dated May 15, 1956, as follows:

(1) Page 29 - On-Request Reporting Points: Under Redesignated: - Correct Halsmer Intsxn to read: the intsxn of the NW course of the Indianapolis, Ind., LFR and the 125° mag radial of the Lafayette, Ind. VOR.

AERONAUTICAL CHART CORRECTIONS: Correct the following Aeronautical Charts as indicated:

(1) WAC 359, 22 Edition, dated December 21, 1955; correct NE course of Scott Low Frequency Range to read: 229° instead of 299°.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Detroit	Lake of the Woods	WAC 218
Fargo	Minot	WAC 219
Lake Huron	Detroit Local	JN 30

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for issue. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE - Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.
BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd.
BIRMINGHAM-RADIO: VOR operg on test-basis. (5-18)
ALABAMA: BIRMINGHAM ARPT: Caution-traffic operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm closed to high performance single engine conventional lndg gear type acft, including T-6. (4-8)
CLANTON-GRAGG ARPT: Closed - const. (3-21)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
ELBA MUN. ARPT: Unattended. Lgts on req. (4-27)
EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.
GUNTERSVILLE ARPT: Closed. (3-26)
HUNTSVILLE-RADIO: VOR radials 005°-030° unusable due to roughness and bends. (5-11)
HUNTSVILLE MUN ARPT: Caution - rnwy 18-36 under const.
**MONTGOMERY-DANNELLY FLD: Taxiway from rnwy 15 to E/W taxi strip perm clsd. Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft lndg and taking-off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard hangar. E/W rnwy clsd to all military acft-const. Easternmost 5000' avail. days, easternmost 6000' avail sunset to sunrise to civil acft. Western end mrkd by flags-days, lgts-ngts. (5-15)
MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi acct scalloping and bends. (4-22)
ARIZONA: SPECIAL NOTICE: Until July 24, 1956, captive balloons will be flown nightly from one hr after sunset to one hr before sunrise at lctns 10 mi W Gila Bend AF Aux, 2 mi S Sentinel and 3 mi E Dateland, Ariz. Surface to 1500' and lgtd by one red lgt. Extreme caution when flying at low alts near these lctns. (12-27)
AJO ARPT: Beacon and lights inoperative. (4-3)
COCHISE-RADIO: VOR/DME flgt-checked, opern normal. Coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA.
DATELAND-SPECIAL NOTICE: Captive balloons anchored on 1500' cables will be flown 1700M Mondays thru 2400M Thursdays at Dateland and Gila Bend Aux AFB, Ariz., for approx 6 weeks. Extreme caution advised-low altitudes near these lctns. (3-12)
**FREDONIA ARPT: Elev: 4750'E. (5-10)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.
HASSAYAMPA-RADIO: VOR/DME usable to 30 n mi from 30°-70°, 240°-255°, 320°-345° and 40 n mi from 70°-85° at MEA. (3-30)
PHOENIX-LUKE AFB-RADIO: USAF/DF unreliable below 13,000' beyond 30 n mi in WNW quad. (2-2)
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. (4-11)
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185°, 39 n mi at 10,000'.
SALOME, SITE # 27B, LAX-PHX: Clsd. (12-14)
SCOTTSDALE-THUNDERBIRD #2 ARPT: Clsd. (3-26)
**TEMPE ARPT: Abandoned. (5-11)
TUCSON-RADIO: May 1, VOR/DME shut down until approx June 1. (4-6)
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.
**WINSLOW ARPT: Obstn lgts installed on radar antenna lctd 6.5 n mi NW (300°T) at lat 35-04-45, long. 110-49-48, approx 20' below top of the dome. (4-18)
YUMA-RADIO: May 18, VOR flgt-checked, opern normal. Coverage 280°-300°, 30 n mi MEA. (5-18)
YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area.
ARKANSAS: EL DORADO-RADIO: DME 2000' MSL coverage 43.5 mi 325° thru N to 225°; 2000' MSL coverage 35 mi 225° thru W to 325°. (3-30)
FAYETTEVILLE-RADIO: Soon VOR will be shut down approx June 4 - modernization. (5-23)
FT. SMITH ARPT-TOWER: About June 7 twr will be cmsnd. Trans freq: 269 kc; 118.3 mc 121.5 mc, 126.18, 257.8, 243. 0 mc. Rcvs: 3023.5kc, 118.3, 121.5, 122.5, 125.18 mc. Trans & rcvr 121.9 mc ctl mobile gnd tfc. Class: C(g). (5-25)
HARRISON ARPT: N/S, new NW/SE rnwys clsd-const. Fld clsd ngts.
NORTH LITTLE ROCK-CENTRAL ARPT: Fld closed to all operns - const. (3-1)

(29 May 1956)

ARKANSAS: TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends.

WALNUT RIDGE-RADIO: VOR radials 290°-320°, 120°-150° and 200°-210° unusable acct bends and course roughness. (10-14)

CALIFORNIA: ✱ARCATA-RADIO: May 15, trans 243.0, 255.4 mc and rcvr 243.0 mc cmsnd.

ARCATA ARPT: Experimental testing of rotating lgts in inner apch zone of Rnwy 31 at infrequent times. Rotating lgts at 2100' and 1000' S of threshold of rnwy with six high intensity lgts rotating at 6 or 12 rpm.

AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (11-24)

BLYTHE-RADIO: DME coverage 165°-188°, 39 n mi at 7000'; 189-200°, 26 n mi at 6000'; 200°-220°, 39 n mi at 6000'; 220-293°, 43 n mi at 9000'; 293°-310°, 26 n mi at 9000';310°-327°, 35 n mi at 9000'. May 28 VOR/DME shut down until approx Aug 1. During this period, the following arwys will not be usable: Victor 64 Thermal to Blythe; V-16 Palm Springs Intersection to Hassayampa, Ariz;V-135 Needles to Yuma, Ariz.

CAMARILLO-RADIO: All courses have multiples. (6-17)

**CORNING ARPT: Reopened. Fuel: F2.(4-9)

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

FAIRFIELD-TRAVIS AFB-RADIO: USAF VHF/DF bearings and communications in NW quad unreliable below 8500'. Opers 0700-1600 Mon-Fri training status only. (7-5)

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'. (9-17)

FT.JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRESNO AIR TERMINAL: Exercise extreme caution in vcnty, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines Rnwys 29-11 and areas N and E of arpt. (10-28)

FULLERTON ARPT: Attended daylight hrs only. (4-12)

FURNACE CREEK SITE 17 RIV-DLS: N 1200' of rnwy clsd to all operns-mrkd. Entire fld clsd to all hvy or multi-eng acft. S 4500' of rnwy open to lgt acft-caution. (4-3)

KLAMATH-McBETH ARPT: Closed. (1-3)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°. 5000': 305°-340° 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (6-16) ILS and LF rng during VFR conditions heavy simulated instrument apch traffic. (10-25)

**LONG BEACH ARPT: Several 230' MSL portable oil derricks NW, W and S of fld. (10-21) No fuel servicing avail. for civil acft 2400-0600. (11-1) N 800' apch end rnwy 16L perm clsd. (1-23)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000" MSL. (6-4)

LOS ANGELES AIR ROUTE TRAFFIC CONTROL CENTER: Center will activate high alt sector 0900 Mar 20. Sector will control all acft operg at specific alt at or above 25,000'. IFR including jet acft operg at least 1000' on top. All jet acft specific alt or at least 1,000' on top should ctc ARTC center 301.4 mc as soon as possible after departure within or entering area inbound. (5-11)

LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd open VFR tfc only. Equip. on and adj to const area. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL approx the intersection of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu Intersection in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the Shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommended cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt, or between LF rng and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10)

LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700.

CALIFORNIA: MODESTO-RADIO: Mar. 20, VOR shut down.

NEWARK-RADIO: About June 11, H fac name and ident will be changed to Fremont "FRX".

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'. About June 11, name of Newark FM, on the SE course LF rng, will be changed to Fremont. (5-18)

OAKLAND INTERNATIONAL ARPT-TOWER: ASR will issue distance values in nautical miles in connection with radar control. UHF/DF steers unreliable below 7,000' within 10 mi of stn. (4-24) FLD:Dredging and clam shell equip. working S of lndg area. All booms & equip. lgtd and mrkd. Use extreme caution when flying over or within this area.

**ONTARIO INTERNATIONAL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng runups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as mrkd by yellow paint lines either side. High intensity rnwy lgts oper. rnwy 7-25. (4-27) Formation take-offs and lndgs prohibited xcpt ANG 196th fighter interceptor acft. (5-14)

OCEANSIDE-RADIO: VOR coverage 310°-020°, 35 n mi at min en route alt. (10-10)

ONTARIO-RADIO: DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000; 350°-0°, 35 n mi at 13,000. May 7, VOR shut down until approx June 1. (5-7)

OXNARD AFB-RADIO: USAF VHF/DF unreliable below 12,000' within 50 n mi. (4-20)

**OXNARD-VENTURA COUNTY ARPT: 160' lgtd derrick erected 700 ft N center of arpt.

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)

PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.

**PLACERVILLE-EL DORADO COUNTY ARPT: Formerly carried as Placerville Mun Arpt.

QUINCY-GANSNER FLD: E 700' E/W rnwy and taxi strip unusable (1-3)

**RAVENDALE ARPT: Correct lat and long: 40-48-15, 120-22-00. Elevation: 5300'. (4-16)

RED BLUFF-RADIO: DME coverage 180°-208°, 26 n mi at 9000'; 208°-217°, 26 n mi at 10,000'; 217°-235°, 35 n mi at 10,000'. Apr 19 VOR shut down until approx June 1; freq will be changed to 115.7 mc. During shut-down, the current Victor arwys may be used as direct routes using Red Bluff LFR, provided acft are equipped with ADF. MEAs remain the same as currently estab on Victor Arwys.

RIDGECREST-DAVIS ARPT: Lgts inop. (4-11)

RIVERSIDE-RADIO: USAF VOR unreliable. (6-20)

RIVERSIDE ARPT: Clsd to all itinerant tfc-const. (5-5)

** ROSAMOND ARPT: Elev: 2415'. (4-26)

SACRAMENTO-RADIO: Disregard spurious signals and interruptions in service of voice commun INSACS and twr until approx April 30 - modernization. (3-30) About June 4, VOR will be shut down until approx Aug 4 - modernization. During this period the following Victor Arwys are affected: V-150 Sacramento to West Point intersection may be used utilizing 082° bear. from Sacramento LFR provided acft is equip. with ADF: MEA westbound 5000', Eastbound 8000'; Modesto VOR to Williams VOR direct MEA 3000'. Following arwys are not usable: V-23 Sacramento to intersection with V-200;V-195 Rio intersection to Williams; V-6 Rio intersection to Reno;V-6N Sacramento to Mt. Lola intersection; V-212 Auburn intersection to Reno. (5-28)

SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated inst apchs including jets VFR weather actual apchs IFR weather. (4-2)

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-152°, 17 n mi at 7000'; 153° 180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.

✱SAN-DIEGO-RADIO-SPECIAL NOTICE: Effect May 16, acft VFR inbound to Lindbergh Fld, are requested to make initial call to San Diego Apch Ctl on 118.3 mc. This initial call should be made over one of the following reporting points: Oceanside from north; Jamul from east; Mexican Border from south; approximately 20 mi west from seaward.

CALIFORNIA: Apch Ctl will give initial tfc ctl instructions and advise pilot where to contact Lindbergh Tower for lndg clearance. This procedure does not apply to VFR acft departing local immediate area for Lindbergh Fld due to short distance involved. (5-14)
SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads except 20 mi MEA from 310° to 330°. (10-25)
SAN DEIGO-LINDBERGH FLD: 500' W end rnwy 9-27 clsd - jet barrier. (2-29)
SAN FRANCISCO: See Oakland Control Zone Notam.
SAN FRANCISCO-RADIO: DME coverage 10°-30°, 17 n mi at 5000'; 30°-85°, 26 n mi at 7000'; 85°-100°, 35 n mi at 7000'; 160°-180°, 26 n mi at 5000'; 180°-225°, 17 n mi at 5000'; 225°-265°, 26 n mi at 5000'; 345°-10°, 35 n mi at 4000'.
SAN FRANCISCO INTERNATIONAL ARPT-TOWER: Interference on 119.1 mc vicinity ILS OM. (4-24)
SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)
SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. Reception 3023.5 kc unreliable. daylgt hrs. (2-2)
**SANTA MARIA-PUBLIC ARPT: Unicom. (4-23)
SANTA MONICA-RADIO: TVOR radials 030°,075°,210°,260° and 323° usable. (1-20)
SANTA MONICA ARPT: Service avail only between 0700 and 2100 daily. Extreme caution advised during ngt use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)
THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi; 060°-085°, 40 n mi; 145°-175°, 40 n mi; 175° thru 180° to 250°, 20 n mi; 250°-280°, 40 n mi at min en route alt. (3-14)
**TULARE ARPT: Closed - reconstruction. (5-18)
UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500' MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100°-150° at 6000'. 105° thru S and W to 305° over water not checked. (10-11)
**VICTORVILLE-CIRCLE M RANCH ARPT: Abandoned. (4-10)
VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360°-045°, below 15,000'.
COLORADO: COLORADO SPRINGS-PETERSON FLD: Caution-lndg acft-due to rise in terrain at apch end rnwy 21. Const on ramp SE of twr. (5-1)
DENVER-STAPLETON FLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft xcpt when absolutely necessary for taxiing W of rnwy 3-21. Hvy air tfc N and E due to extensive instrument trng. Flashing amber lgt in segmented circle indicates rgt hand tfc. Two-way rdo rqrd capable of communicating with twr.
EADS ARPT: Emergency only - rough. (4-20)
GRAND JUNCTION-RADIO: May 7, ILS glide slope and lclzr shutdown. (5-23)
LONGMONT ARPT: NW/SE rnwy under const. (3-13)
PUEBLO-SPECIAL NOTICE: Ordnance depot approx 14.8 n mi E at lat 38-16-53, long. 104-18-00, conducting demolition work - days.
THRMAN-RADIO: Soon VOR will be shut down until approx June 21. During this period the following arwys will be affected: V-4 Denver to Goodland direct MEA 11,000'. The following arwys will not be usable: V-4N Thruman to Goodland; V-148 Thurman to Imperial.(4-13)
CONNECTICUT: **GROTON-TRUMBULL ARPT: Unicom. (3-26)
HARTFORD-BRAINARD FLD: Rnwy 9-27 closed. (5-14)
**MERIDEN ARPT: Unicom. (3-26)
SIMSBURY ARPT: Experimental dropping of parachutes on fld during VFR wea. days Mon thru Fri. Fld occasionally clsd by standard mrkr.
WAREHOUSE POINT-SKYLARK ARPK: Caution - const N side. (3-26)
WILTON-RADIO: VOR has minor bends in SW quad out to 17 n mi. DME coverage 270°-285°, 35 n mi at 3000'; 230°-360°, 35 n mi at 3000'; 360°-15°, 35 n mi at 2500'.
WINDSOR LOCKS-BRADLEY FLD: Effective June 1, no service, fuel, maintenance, or parking facs for transient military acft - repairs to ramp and hangar. (5-15)
DELAWARE: **GEORGETOWN-SUSSEX COUNTY ARPT: Caution NNE/SSW and NNW/SSE rnwys rough. Men and equip. on fld. Extensive glider activity week ends and evenings. (3-29) E/W rnwy perm clsd.
NEW CASTLE-BELLANCA FLD: Sod rnwys clsd-rough. Soft when wet. Use rnwys and taxiway strips only. (5-22)
WILMINGTON-NEW CASTLE CO. ARPT-TOWER: Soon, twr freq will be changed to 278 kc. (4-20) May 21 ILS glide slope shut down until approx Sept 5 - rnwy const. During this time lclzr may be shut down for intermittent periods. (5-21) FLD: Rnwy 1-19 clsd-const.

DIST. OF COLUMBIA: WASHINGTON-SPECIAL NOTICES: (1) Caution - dynamiting daily, heavy charges, dam const along E bank Potomac River, 3/4 mi N of Key Bridge at Dalecaria, Md. (2) Thru 31 July 1956, special VFR operating rules effect. in hi-density zone. Zone identical with Wash. control zone excluding Washington-Virginia Arpt and prohibited areas. Altitudes - surface to 3000' N of and 700' to 3000' S of Washington rng. Two-way rdo rqrd. Prior to take-off within zone or entry for lndg in zone, establish rdo communication with ATC tower of take-off or landing and maintain continuous listening watch. Acft passing thru zone contact and maintain continuous listening watch with WNA control twr. Helicopters excepted, regardless of other VFR clearance, no VFR flight within zone when gnd visibility less than one mile, except when smoke, dust, snow, sand, then VFR flight permissible with one-half mi visibility. Do not exceed 180 mph (156 knots) unless operational characteristics require more, in which case use minimum speed consistent with safety.
WASHINGTON-RADIO: LF rng SE course bends 4 to 9 n mi from stn; 17 to 22 n mi from stn, multiples 3°-to 3.5° S.
WASHINGTON NATIONAL ARPT-AIR ROUTE TRAFFIC CONTROL CENTER: Radar service will be provided UHF equip acft on 250.2 mc, 318.2 mc and 348.6 mc only in Washington Metropolitan Area.
WASHINGTON NATIONAL ARPT-TOWER: PAR and VHF/DF shut down. (3-29) FLD: USAF NAVY, CG: Clsd to all acft xcpt: (a) Acft carrying VIP and officers ABOVE rank of Major General or Rear Admiral. WOODDALE-WOODALE MOODY ARPT: Clsd irregular intervals-flgt trng - mrkd. (5-22)

INDIANA: SPECIAL NOTICE: The Atomic Energy Commission requests all pilots to maintain a reasonable altitude when flying over their Dana Installation, as a safety precaution to the plant. The area involved is located approx 29 s mi N of the Terre Haute LF rng between Montezuma and Newport and is bounded by latitudes 39-50, 39-52 and longitudes 87-21, 87-26.

AUBURN ARPT: A 910' (1780'MSL) lgtd TV twr being erected 3 n mi SSE(167°T) at lat 41-19-59, long 85-03-07. (4-4)

CAMP ATTERBURY-SPECIAL NOTICE: Frequent violations have been reported of Restricted Area R-65 to the S. High angle mortar and artillery firing being conducted daily. All acft are warned to keep clear of this area.

COLUMBUS-BAKALAR AFB-RADIO: USAF VHF/DF unreliable 250°-270° outbound below 3000' and 010°-250° below 2500'. (8-18)

**DECATUR-HI WAY ARPT: Abandoned. (5-8)

**ELKHART ARPT: 236' (1016'MSL) lgtd steel microwave twr erected 3.3 n mi NNW(320°T) at lat 41-43-50, long. 86-03-48. (4-24) N/S rnwy usable at pilots' discretion. (8-22)

EVANSVILLE-DRESS MEMORIAL ARPT: The tetrahedron tfc direction indicator perm. withdrawn. Soon a lgtd wind cone will be provided on hangar S of terminal bldg on W side of arpt.(4-6) Rnwy 3-21 clsd for repairs. (4-24)

FT. WAYNE-PADIO: VOR has moderate course roughness between 300°-340° at 20 to 35 mi from stn. (5-4)

FT. WAYNE-BAER FLD: Rnwy 4-22 now 7800' - daylgt operns, 6200' - ngt operns. 1600' ext. not lgtd. Due to non-visibility twr unable to ctl tfc on first 500' of rnwy 9 and entire taxistrip leading to apch end of rnwy.

GARY MUN ARPT: Const on pole line SW. Pole heights vary from 29' to 83' above ground. Four poles lctd nearest centerline of rnwy 2 will be 43'(633'MSL). (1-5)

GOSHEN-RADIO: DME coverage 46°-145°, 35 n mi at 2300'; 172°-310°, 35 n mi at 2100'.

GREENSBURG ARPT: Regrading and seeding W half N/S rnwy-caution. (5-14)

HUNTINGTON ARPT: Closed all operns - due soft fld. (3-18)

INDIANAPOLIS-SPECIAL NOTICE: May 31, acft flying locally in vcnty of Indianapolis Speedway shall maintain altitude of at least 1500', make all turns to left and maintain a distance horizontally from boundary of speedway of at least 2000'. (4-22)

INDIANAPOLIS-RADIO: Following experimental facs operd intermittently by TDC (approx one yr.): Tilden VOR freq 115.7 mc, ident: IEX. Weir Cook VORW freq 112.3 mc, Ident: IAX. TVOR freq 111.4 mc, ident: IDX, with voice ident. Lclzr freq 109.1 mc (without voice), ident: IBX. Glide slope freq 335.0 mc, serving N/S rnwy. DME lctd in laboratory N side fld, Channel 64, Mode C. Directional lclzr 110.3 mc serving E/W rnwy. One VORW on 112.9 mc testing intermittently. Mar 19, en route radar control provided in vicinity of Terre Haute. Opern conducted from 0700-2300 Mon thru Fri. Facility identified as Rockville Control. Primary trans & recvg: 125.3, 319.8 mc. Secondary trans. 121.5, 122.2, 126.7, 135.0, 135.9, 243.0, 255.4, 301.4 mc; rcvg 121.5, 122.1, 126.7, 135.9, 243.0, 255.4, 301.4 mc. (3-13)

INDIANAPOLIS-WEIR COOK ARPT-TOWER: ASR will issue distance values in nautical miles in connection with radar control.

(29 May 1956)

INDIANA: INDIANAPOLIS-WEIR COOK ARPT: All acft rqrd to have rdo rcvrs. Rnwy gross wt lmtd to 110,000 lbs. Fee for acft wt excess of 110,000 lbs. Left and right tfc pat. Lndg Fee for multi-engine acft. Due to non-visibility twr unable to ctl tfc on taxiway from SE hangar to Turner ramp. All military jet acft rqrd to have transmitters and rcvrs tuned to twr freq. Rnwy 9-27 used only at discretion of ctl twr. Rnwy 4-22 slippery when wet. Use rnwys and taxiways only. Parking in sod area at discretion of ctl twr.

LAFAYETTE-RADIO: Severe roughness and scalloping VOR radials 100° clockwise 170°. (1-18) About May 31, VOR will be decmsnd and re cmsnd at lat 40-29-07, long. 87-00-37. Freq will be changed to 112.0 mc. Monitoring category (1). Class: BVOR.

LAFAYETTE-HALSMER ARPT: Const-E side SW end NE/SW rnwy and entire NW/SE rnwy. Rnwy lgts inop. Middle one-third NE/SW rnwy serviceable W side.

LA PORTE-SPECIAL NOTICE: Ground demolition in progress approx 6.9 n mi SE during daylight hrs Mon thru Sat. Center of operns lctd at lat 41-31-28, long. 86-36-46.

**LA PORTE ARPT: 254' (1049'MSL) lgtd steel microwave twr erected 5.9 n mi NNE(24°T) at lat 41-40-23, long. 86-40-57.

MADISON-SPECIAL NOTICE: Frequent violations of Restricted Area approx 4.3 n mi N have been reported. Artillery and anti-acft firing practice being conducted daily in Jefferson Proving Grounds. All acft are warned to keep clear of this area.

MT. VERNON ARPT: 223'(653'MSL) lgtd twr erected 8950' WNW (290°T).

ROCKVILLE-RADAR: En route radar control provided. Primary trans and rcvg: 125.3, 319.8 mc. Secondary trans. 121.5, 122.2, 126.7, 135.0, 135.9, 243.0, 255.4, 301.4 mc; rcvg 121.5, 122.1, 126.7, 135.9, 243.0, 255.4, 301.4 mc. See Indianapolis Radio.

SOUTH BEND-ST. JOSEPH COUNTY ARPT-TOWER: ILS lclzr back course flyable with slow bends one to 5 n mi from stn. Glide slope flyable down to 50'. No touchdown point.

** FLD: 156'(962'MSL) lgtd steel microwave twr erected 2.0 n mi WNW(310°T) at lat 41-43-50, long. 86-20-56. 2230-0630 daily rnwy lgts avail on req thru South Bend radio.

**TERRE HAUTE-COX ARPT: 25'(500'MSL) two-story 500' square bldg erected 1/2 n mi S (180°T) at lat 39-25-30, long. 87-25-00.

TILDEN-RADIO: See Indianapolis, Indiana.

IOWA: **ALGONA ARPT: Two 160' (1375'MSL) lgtd rdo twrs erected 8.9 n mi WSW (260°T) at lat 43-03-52, long. 94-18-13.

BURLINGTON-SPECIAL NOTICE: Demolition approx 3.5 n mi SW. Explosions every 30 mins daily 0800-1700, xcpt Suns., holidays. Area boundary: N-lat 40-46-27; S-lat 40-45-35; E-long. 91-11-04; W-long. 91-14-37.

BURLINGTON-RADIO: About June 4, VOR/DME will be shut down until approx June 25.

DAVENPORT MUN ARPT: E/W strip under const.

**DENISON ARPT: Unicom.

DES MOINES-RADIO: VOR/DME shut down until approx May 30.

DES MOINES ARPT: Due to non-visibility twr unable to ctl tfc on portion of W ramp and NW 1600' of taxiway and warm-up ramp of rnwy 12.

**ELKADER-MEYER ARPT: NW/SE rnwy perm closed-plowed up.

**ESTHERVILLE ARPT: Unicom.

LE MARS-WESTMAR COLLEGE ARPT: Land at own risk winter months.

**MARSHALLTOWN-NIEDERHAUSER ARPT: Unicom.

**MUSCATINE ARPT: Unicom.

OSKALOOSA ARPT: NE/SW rnwy closed indef. NW/SE rnwy now 120 feet wide.

SIOUX CITY-RADIO: DME coverage 77°-103°, 35 n mi; 172°-244°, 26 n mi at min en route alt.

SIOUX CITY ARPT: Due to non-visibility twr unable to ctl ramp tfc in front of Admin Bldg, NE of black hangar and parking area at SE corner of field.

SPENCER ARPT: Unicom.

WEBSTER CITY ARPT: Intsxn rnwys soft with ruts-broken tile in drainage system. E/W rnwy closed. NW/SE rnwy closed - construction.

KANSAS: ARKANSAS CITY-STROTHER AUX #2 ARPT: P-line varying from 12' to 25' above ground and surrounding arpt.

**ATCHISON ARPT: 200'(1308'MSL) lgtd antenna erected 3.0 n mi SSW(205°T) at lat. 39-31-49, long. 95-13-02.

CALDWELL ARPT: About June 15, work will start on erection of a 278' (1421'MSL) lgtd rdo twr 13.1 n mi E (102°T) at lat 37-00-00, long. 97-19-05.

**COFFEYVILLE-McGUGIN ARPT: 200' (1095'MSL) lgtd antenna erected 7.0 n mi NW(320°T) at lat 37-11-29, long. 95-41-07. NW/SE and NE/SW rnwys closed.

**DODGE CITY ARPT: Rnwy lgts installed on NW/SE rnwy. About June 5, work will start on erection of a 265' (2879'MSL) radio tower 2.5 n mi WSW(262°T) at lat 37-45-57, long. 100-01-55.

KANSAS:

EMPORIA-RADIO: April 16, VOR shut down. Freq will be changed from 114.3 mc to 112.8 mc.

GARDEN CITY-RADIO: Radial 125° has course roughness and bends of 2.5°.

GOODLAND ARPT: NW/SE rnwy clsd-const.

GREAT BEND ARPT: Navy lndg and take-off practice by P2V and SNB acft 0700-1700, Mon thru Fri xcpt holidays. All movement of acft durg this period controlled by twr. Mil acft pat. will be adjusted by twr to facilitate civil acft operns. Non-rdo-equipped acft should fly standard tfc pat. and observe twr for lgt gun signals. Lgt acft 600' above gnd. Hvy acft 1000' above gnd. Caution-men and equip. near rnwys, days.

GREENSBURG ARPT: 265' (2680'MSL) lgtd rdo twr being erected 9.9 n mi WSW (246°T) at lat 37-32-24, long. 99-28-02.

**INDEPENDENCE ARPT: Delete listing-Private Field.

KANSAS CITY-FAIRFAX FLD: SPECIAL NOTICE: Acrobatic area approved 7.0 miles W for certain flying schools in Kansas City, Mo. area bounded on E by long. 94-46, on S by lat 39-07, on W by long. 94-55, on N by lat 39-15 thence SE along Missouri River to long. 94-46. This area is in use daily when ceiling and visibility exceed 4000' and 5 miles between 2500 and 5500' MSL.

LIBERAL ARPT: 240' (3135'MSL) lgtd rdo tower 4.1 n mi NNE (350°T) at lat 37-06-47, long. 100-54-34.

**MEDICINE LODGE ARPT: About June 1, work will start on erection of a 278' (2065'MSL) lgtd rdo twr erected 8.5 n mi NE (47°T) at lat 37-21-21, long. 98-25-40.

NEWTON-81 ARPT: Restricted services due to by-pass road const on N end of fld with hvy const equip. N/S rnwy reduced to 1400' with hi-line pole 40' W of rnwy. All landings at pilot's risk.

OLATHE-SPECIAL NOTICE: May 31, Caution Area C-198 is amended as follows: Bounded on the North by lat 38-12, on the East by Victor 161, on the South by Red Civil Airway 105, and on the West by Amber 4.

OSBORNE ARPT: Strip lights inoperative.

OTTAWA ARPT: Use turf strips with caution.

PAOLA-RADIO: Navy H fac cmsnd. Freq: 260 kc. Ident: NUU. Lctd lat 38-36-36, long. 94-53-24 at Paola FM. Bearing, dist. Olathe NAS: 352°, 12.8 mi. Class: HW.

PARSONS-SPECIAL NOTICE: 7.8 n mi ESE at lat 37-17-45, long. 95-07-15.

PRATT ARPT: 228'(2294'MSL) lgtd radio tower being erected 11 nautical miles SW (229°T). at lat 37-34-33, long. 98-55-36.

RUSSELL ARPT: Caution-ditch NE of intsxn rnwy 16-34 and 3-21 marked.

SALINA-RADIO: VOR coverage 202°-257°, 35 n mi at min en route alt.

**SUBLETTE ARPT: About June 5, const begins on 240' (3159'MSL) lgtd rdo twr located 2 n mi SW (232°T) at lat 37-28-26, long. 100-51-09.

TOPEKA-RADIO: About May 28, VOR/DME will be shut down until approximately June 18.

TOPEKA-PHILIP BILLARD ARPT: Portion of NE/SW runway SW of N/S intersection not usable for aircraft over 15,000 lbs gross weight except in emergency. Extreme caution-temp shelter for radiosonde observations West of centerline N/S taxiway North of ctl twr. Use runways only.

**WICHITA ARPT: 208'(1548'MSL) lighted antenna erected 8.9 n mi N (20°T) at lat 37-48-55, long. 97-22-05. A concrete plant top structure 50' AGL and 100'(1417'MSL) antenna twr erected 3100' North of N end runway 1-10, marked, lighted. 128' lgtd steel water tank erected 0.4 nautical miles ESE of SE corner of airport. Mowing equipment on field-days. Dirt pile 2' high 25' North of taxi strip at end of rnwy 19 to deflect run-up prop wash. Aircraft remain on concrete area. Sod areas unsafe. (3-28). Men, equip on turf area S end runway 1-19 days.

WICHITA-BEECH ARPT: Building construction W side of field. North half NW/SE rnwy closed. Equipment on field. Contact Beech Tower for landing instructions.

WICHITA-CESSNA ARPT: All aircraft use new hard surface runway 17L-35R along East side of field for N/S operations. If adverse wind conditions prevail, sod strips are usable. All approaches from and departures to easterly quadrants. Avoid crossing N and S approach & take-off lanes of jet aircraft to adjoining McConnell AFB. Due to remote location, the McConnell tower is limited to advisory traffic information only for radio equipped aircraft to and from Cessna Airport. Call McConnell tower on 122.5 mc-listen 126.18 mc. Non-radio equipped aircraft must first obtain traffic pattern information by telephone Murray 4-7261, ext. 216. Under IFR conditions contact Wichita Approach Control for traffic clearance to entering control zone. Transmit 3023.5 kc., 122.5 mc. Listen 278 kc. 199.5 mc. or range voice channels.

KENTUCKY: BOWLING GREEN RADIO: About May 28, VOR/DME will be shut down until approx June 15 - modernization. Freq change from 116.1 mc to 116.2 mc. (3-26)
BOWLING GREEN-WARREN COUNTY ARPT: All lgts inop. (5-11)
CARROLLTON-BUTLER ST. PARK ARPT: New fld. Type: L. Lctn: 2 SE; hwy, RR-W. Elev: 500'. No. of rnwys: 1. Longst rnwy & facs: 25. Remarks: Strip to open approx July 1. Caution when wet. (3-15)
CORBIN-RADIO: VAR N visual course has moderate roughness 3 to 6 n mi and S course 2 to 3 n mi from stn. (10-21)
FORT KNOX-SPECIAL NOTICE: 12.2 n mi NW (4.3 n mi E Brandenburg, Kentucky) plant is processing highly inflammable and explosive compressed gas. Acft warned to avoid flying in this vcnty.
LEXINGTON-BLUE GRASS ARPT: Due to non-visibility twr unable to ctl tfc on ramp area adj to Terminal Bldg from hangar line SE to taxi ramps NW and NE. Taxi and parking area SE end SE hangar apron unsafe. (2-24)
LOUISVILLE-BOWMAN FLD: Due to non-visibility twr unable to ctl tfc on first 150' rnwy 6 and outer 150' of the wide NE ramp next to hangar line and in tfc pat. SW of fld.
LOUISVILLE-STANDIFORD FLD-TOWER: May 21, ILS glide slope shut down. All other components will remain in opern. (5-23) FLD: Acct smoke from factory, twr unable to observe apch to and end of rnwy 1. (12-22) Rnwy 1-19 clsd, apch lgt sys shut down for rnwy extension. Const equip. on fld. Due to limited servicing and parking facilities, acft having gross landing weight of less than 30,000 lbs use Bowman Fld.
PADUCAH-RADIO: VOR has moderate bends in NE quad. (7-14)
PERRY PARK ARPT: Clsd - const. (3-2)
YORK-RADIO: VOR has moderate bends 4 to 8 n mi from stn at min en route instr alt from 50°-230° and from 300°-350°. DME coverage 35 n mi at 2500' MSL. (5-14)
LOUISIANA: ALEXANDRIA-RADIO: VOR radials 340°-20° unusable acct bends. About June 6, VOR will be shut down until approx July 6. (4-25)
BATON ROUGE-RYAN ARPT: Narrow open ditches both sides rnwy 13-31 outside of rnwy lgts. (3-29)
BOGALUSA ARPT: 900' W end of E/W rnwy unusable - const. N/S strip soft spots on S half of strip. Use caution when wet. Spots marked with red flags. (5-4)
BOSSIER CITY-RAINBOW ARPT: Closed. (3-12)
KAPLAN ARPT: Closed-const.
LAKE CHARLES-RADIO: VOR shut down - severe scalloping and bends. (4-19)
MINDEN MUN ARPT - SPECIAL NOTICE: Test detonating will be conducted daily 0830-1630, 7.5 n mi S (188°T) within an area 4.3 n mi in radius centered at lat 32-34-10, long. 93-26-00 (3 smi NNW of Doylene, La.), when ceiling is at least 3000', visibility 5 mi. Pilots should avoid area at latitudes below 2000'. (12-20)
MINDEN-WEBSTER ARPT: New fld. under construction. Lctd: 1 mi NW; lat 32-38, long. 93-18. (9-30)
MONORE-RADIO: VOR has scalloping bends and course displacement beyond tolerance between 20°-40° and 310°-335°. DME coverage 120°-150°, 35 n mi at 1500'. About July 11, VOR will be shut down until approx Aug 11. (4-26)
NEW ORLEANS-RADIO: VOR radials 271°-339°, unusable - severe scalloping and bends.
NEW ORLEANS ARPT: Hvy acft use rnwys only. Lgt acft take-off on rnwys. Acft transporting any items listed in Part 49 of CAR are prohibited from lndg without permission.
NEW ORLEANS-MOISANT INTERNATIONAL ARPT-TOWER: ASR will issue dist. values in n mi in connection with radar control. About July 1, ASR will be shut down until approx
** Sept 1. (5-4) FLD: 250' (255' MSL) lgtd rdo twr erected 47.0 n mi SSE (178°T) at lat 29-13-02, long. 90-13-11. (4-24) 162' MSL lgtd steel drilling derrick erected 6.2 n mi NNE (30°T) at lat 30-05-01, long. 90-12-05. (5-4) Caution - stay on hard surface rnwys and taxiways because of incomplete and soft shoulders. (5-16)
PATTERSON-WILLIAMS MEMORIAL ARPT: Extreme caution advised - const., mrkd.
RUSTON ARPT: Const. on rnwy extension S end of fld. (3-30)
SHREVEPORT-RADAR APPROACH CONTROL CENTER: About June 1, RAPCON will be cmsnd. Trans & rcvg freqs: 118.5, 119.9, 120.7, 121.5, 126.18, 137.88, 136.8, 134.1, 142.02, 243.0, 236.6, 327.4, 275.8, 263.0, 348.6, 363.8, 270.6, 335.8 and 289.4. Rcvg only: 3023.5 kc and 122.5 mc. (5-10)
SHREVEPORT-BARKSDALE AFB-RADIO: USAF Elm Grove FM pattern irregular-caution.
WELSH ARPT: E/W rnwy closed nights. Beacon inop. (10-17)
MAINE: AUGUSTA-RADIO: VOR coverage 80°-160° and 220°-240°, 35 n mi at min en route alt.
BANGOR-RADIO: VOR coverage 360°-50°, 16 n mi; 50°-240°, 26 n mi; 240°-360°, 22 n mi at min en route instr alt. DME coverage 235°-260°, 35 n mi at 2500'.
BREWER ARPT: N/S strip open on gravel portion only. Taxi on gravel portion of fld only. Turf extremely soft. (3-25)
LIMESTONE-LORING AFB-RADIO: USAF VHF/DF unreliable beyond 25 n mi below 3000'; due to terrain. USAF VOR unreliable below 3500' at 50 n mi.
**MILLINOCKET ARPT: Rnwy lgts rnwy 11-29 perm discontd. Apron usable with caution - due broken pavement. Use rnwys only. (5-21)
PORTLAND ARPT: Rnwy 10-28 open daylgt hrs only. No lgtg avail. Rnwy now 2400' long. Approx 1200' of S end rnwy 02-20 clsd to acft below 5000 lbs due equipment crossing rnwy.
PRESQUE ISLE-RADIO: VOR coverage 35 n mi at min instr alt. Flyable bends beyond 17 n mi between 80°-120° and 180°-210°.
PRINCETON-RADIO: VOR coverage 150°-240°, 35 n mi and 290°-30°, 30 n mi at min instr alt. (10-3)
ROCKLAND ARPT: Rnwy 17-35 closed night operns.
WATERVILLE-LA FLEUR ARPT: Rnwy 14-32 rough, not maintained. Pilots use at own risk. Rnwys 8-26 and 14-32 clsd to wheeled acft winters. (3-29)
MARYLAND: BALTIMORE-RADIO: VOR shut down.
CAMP SPRINGS-ANDREWS AFB-RADIO: USAF VHF/DF unreliable beyond 50 n mi 015°-245° at 4500'; 245°-330° at 3500'; 300°-350° at 2000'; 350°-15°, at 3000'. (9-22)
CHESAPEAKE BAY-SPECIAL NOTICE: Until May 31 - 1 hr before sunrise to 1 hr after sunset daily, ten moored kite balloons Chesapeake Bay Restricted Area R-35. Vicinity lat 38-40, long. 76-32 to 2000'.
**CHESTERTOWN-GILL FLD: Abandoned. (5-26)
FREDERICK ARPT: Caution Area C-55, that portion overlapped by the Herndon-Harrisburg Civil Airway, temp. rescinded.
**HAGERSTOWN ARPT: All taxi strips W of N/S rnwy closed - parked mil acft. Taxi strips leading to City Hangar remain open to transient traffic. Caution - provide proper clearance over U.S. 11 when approaching to land W on E/W rnwy. Rnwy marked to show where 40 to 1 approach clearance line intersects rnwy. Entire rnwy available at pilots' discretion. Rnwy lights installed on E/W rnwy - operating sunset - 2400 Mon - Fri; weekends operating schedule sunset - 2200. (5-7)
LAYTONSVILLE-DAVIS ARPT: Construction extending rnwy 900' at ENE end. (8-16)
PATUXENT RIVER NAS-RADIO: Meekins Neck FM on NE course unreliable.
SALISBURY-RADIO: VOR has flyable bends and roughness on Arwy V-1 to the NE at lower alts. (3-19)
SALISBURY-DELMARVA ARPT: Clsd to all commercial operations. Will operate as private airport only. Landings made with prior permission only. (11-9)
MASSACHUSETTS: SPECIAL NOTICE: Airport condition information available by calling State Police Barracks.
**BOLTON ARPT: Abandoned.
BOSTON-RADIO: VOR coverage 26 n mi at minimum en route altitude in all azimuths.
BOSTON-BEDFORD (HANSCOM) ARPT-TOWER: ILS glide slope and lclzr shut down. FLD: Rnwy 5-23 closed except for taxiing and parking. (5-10)
BOSTON-LOGAN ARPT: Obstruction lights on 174' stack 1.3 n mile WSW inoperative. Due to non-visibility tower unable to control traffic on apron between radar tower and National Guard hangar. S hangar area W of station 23 restricted to acft 80,000 lbs or less. Take-offs in northeasterly direction rnwy 4L and landings in southwesterly direction rnwy 22R restricted to aircraft of 12,500 lbs or less. Turboprop and turbojet aircraft landings and take-offs rnwy 4L-22R and turboprop and turbojet take-offs rnwy 33 prohibited. Caution - construction 140' control tower located Terminal Building area 2000' from centerline rnwy 15 and 1750' from centerline rnwy 4L, lighted. Use marked hard surface rnwys and taxiways only. Other areas including grass shoulders unsafe. Caution - seagulls on and adjacent to landing areas. All rnwy widths should be corrected to indicate a usable width of 210' with elevated rnwy lights 10' from the usable rnwy edge. Lead-in lighting system rnwy 4R consists of green threshold lights located 2502' NE of the SW end of rnwy 4R and bar lights of alternating red and white units spaced at 100' intervals on the extended rnwy centerline extending from 42' to 1100' SW of end of rnwy 45. Cluster of 6 alternate red and white bar lights located at the 1100' point. All bar type lights present predominately red indication. Standard rnwy lights between threshold lights and bar lights. Brightness of lights is determined by prevailing weather conditions and is controlled by tower.

MASSACHUSETTS: CHICOPEE FALLS-WESTOVER AFB-RADIO: VHF/DF unreliable SE and SW quads below 4000' beyond 40 n mi. (11-4)

FALMOUTH-COONSMESSETT RANCH: Exercise extreme caution when ceiling 3000' or below and visibility 5 mi or less. Hvy jet operns vcnty Otis AFB. Ctc Otis RAPCON on 122.5 mc; listen 126.18 mc prior entering Otis RAPCON area. (7-6)

NANTUCKET-RADIO: About June 26, HH fac will be shut down until approx July 24. (5-28)

NANTUCKET MEMORIAL ARPT: Two flashing hi-intensity lgts installed apch to Rnwy 24 avail during drizzle.

**NANTUCKET SHOALS OFFSHORE WARNING AREA: Effect. June 22,1956, Warning Area (W-506, will be established as follows: Name: Nantucket Shoals Offshore, Mass. Description: Beginning at lat 41-12-30, long. 69-40; thence to lat 41-16, long. 68-00; thence to lat 41-00, long. 68-00; thence to lat 39-52, long 68-58-15; thence to lat 40-11-45, long 69-13-30; thence to lat 40-47, long. 69-40; thence to point of beginning. Altitude: Surface to 45,000' MSL. Time of Use: Unlimited. Activities Conducted: Air to air gunnery and rocketry. Controlling Agency: Otis AFB, Mass.

**NARRAGANSETT OFFSHORE WARNING AREA: Effect. June 23, Warning Area W-105 will be reestablished as follows: Lat 40-40, long. 72-30; lat 40-41-30, long. 72-07; lat 41-09, long. 70-14; lat 39-52, long. 69-34-20; lat 39-52, long. 71-01-30; lat 39-07, long. 71-53; lat 39-34, long. 72-30; thence to point of beginning.

NORWOOD-MEMORIAL ARPT: Rnwy lgts inop.

ORANGE ARPT: Airport closed on the following Sundays: June 17, July 15, Aug 19, Sept 16 and Oct 21 from 1300 to 1800, fld mrkd. (5-24)

REVERE ARPT: Caution when landing-extensive const of an arterial highway near the apch ends of rnwys 13 and 15. (4-18)

WESTOVER-RADIO: Precise receiver tuning required in vicinity Gardner intersection acct potential interference between Chicopee LF rng and Bedford MHW. (12-8)

MICHIGAN: BATTLE CREEK-KELLOGG FLD: Men and equip. on fld - days. Trees above obstn lgts on SE edge fld. (11-11)

WOODRUFF-ARBOR VITAE ARPT: Open sunrise-sunset. (5-25)

WYOMING: CAMP GUERNSEY: A temp controlled firing area is established as follows: Name: Camp Guernsey, Wyo. Description: Beginning at lat. 42-16-00, long. 104-42-00, thence to lat 42-12-00, long. 104-42-00, thence to lat 42-12-00, long 104-45-00, thence to lat 42-16-00, long. 104-45-00, thence to point of beginning. Altitude: Surface to 6,000 feet. MSL. Activities: 155 mm and 105 mm Howitzer firing max of 15 rounds each day. Time of Use: Daily, 1000 - 1700 hours(MST). Controlling Agency: Adjutant General, Wyoming National Guard, Cheyenne, Wyoming. Effective dates: 15 and 16 June 1956.

WYOMING: CASPER-NATRONA CO. ARPT-TOWER: ILS Glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs. Effect. June 9, tower hours operation will be 0400-2400. (5-18) FLD: Caution - all aircraft entering traffic pattern occasional jet aircraft operation with pickup and dropping of tow targets. (4-29)

CHEYENNE ARPT: Overrun lgts rnwy 8-26 inop. (5-24)

GILLETTE ARPT: 50-75' W shoulder 1500' from N end N/S strip soft - clsd to hvy acft.

JACKSON ARPT: E/W rnwy closed - fence const across rnwy just W of N/S rnwy. Small acft may use E end of E/W rnwy in case of emerg, but at own risk. N/S rnwy clsd, const. Use new auxiliary 150' x 5400' strip E of N/S rnwy. (3-15)

KEMMERER ARPT: Entire fld clsd all operns, xcpt graded 4000' S end N/S rnwy. Use extreme caution when wet. (11-6)

LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'.

RIVERTON ARPT: Men and equip. on fld. 5000' W end rnwy 28 surfaced and available. Remainder arpt closed. (4-12)

ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000'.

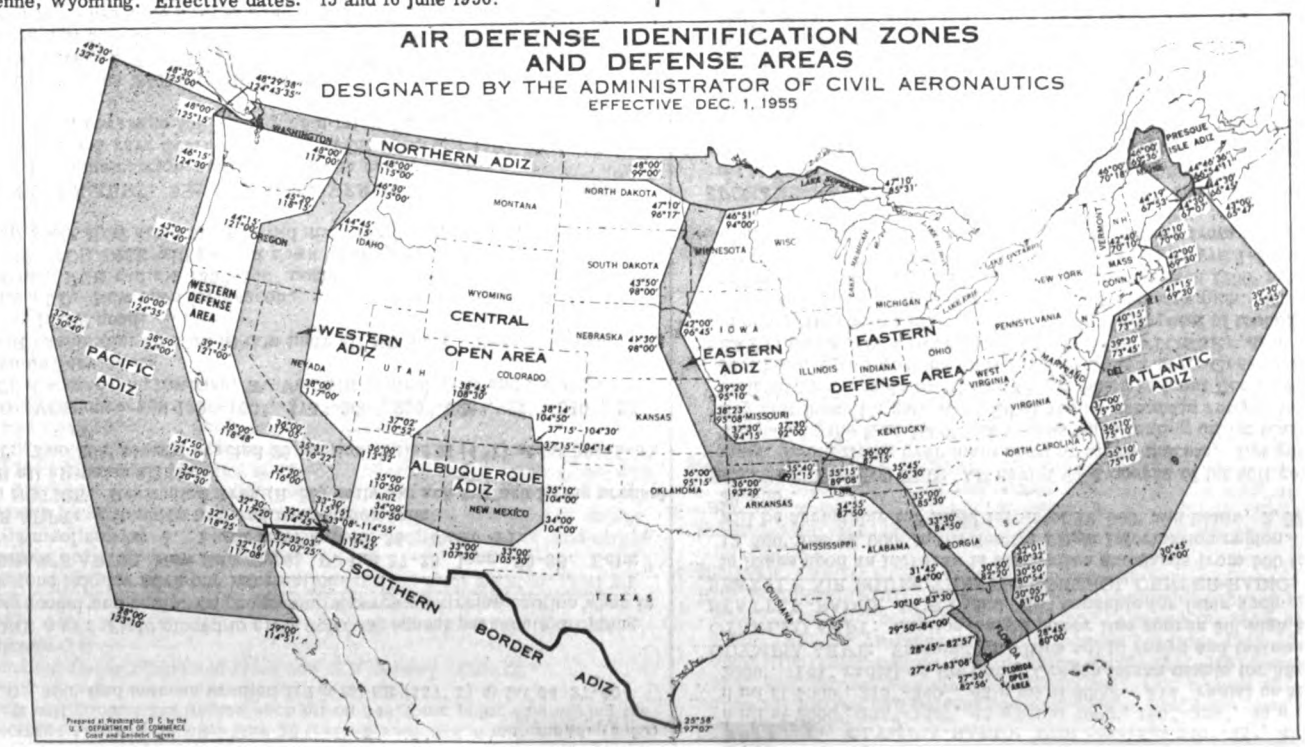
ROCK SPRINGS-RADIO: ILS glide slope has light to moderate roughness between OM and LF rng.

ROCK SPRINGS ARPT: Caution - first 500' NW end NW/SE rnwy clsd - marked.

SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.

TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men and equip. on fld. Use extreme caution. (10-4)

PUERTO RICO: SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from twr. Caution. (6-7)



(29 May 1956)

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED!
IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS: IT IS YOUR RESPONSIBILITY!

This list covers recent obstructions(television towers, smoke stacks, etc.)which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals. When the list does not appear in the Guide, all new obstructions will be carried as two-starred items in the NOTAMS. The list will be brought up to date each time it is issued; newly added or changed material will be indicated by arrows.

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position height and top elevation above MSL of these new obstructions can be taken from the list given below. New obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

WYOMING

LEGEND:

"B" denotes antenna structure on a building.
DISTANCE is given in nautical miles.
BEARINGS are true.
(MSL) Mean Sea Level.
(AGL) Above Ground Level.

(29 May 1956)

LOW FREQUENCY RANGE PROCEDURES

If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

CITY AND STATE AIRPORT NAME AIRPORT ELEVATION CLASS OF FACILITY FREQ. IDENT. PROCEDURE NO.	INITIAL APPROACH TO FACILITY			PROCEDURE TURN: I SIDE OF FINAL APCH. CRS. (OUTBND. AND INBND.) ALTITUDES. AUTOMATIC DIRECTION FINDING PROCEDURES

If an ADF instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

CITY AND STATE / AIRPORT NAME / AIRPORT ELEVATION / CLASS OF FACILITY / FREQ.. IDENT. / PROCEDURE NO.	INITIAL APPROACH TO FACILITY: FROM	CRS. AND DIST.	MIN. ALT. ALWAYS CHECK NOTICES TO AIRMEN SECTION

AIR NAVIGATION RADIO AIDS

INSACS = Interstate Airway Communications Station/s (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSACS. (C) The station identification is monitored continuously by the communicator at the associated INSACS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSACS. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSACS, and located too distant from INSACS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)=Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
* = Automatic voice identification
[redacted] Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
Cl. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled
DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-drectional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing and voice signals available. Inclusion suffix "W" indicates range and homing signals only
T. . . . . Teletype
TVOR. . . Low power VOR (no standby equipment) located on airport
TX. . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same INSACS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

RADAR AVAILABLE : How and Where

(12 June 1956)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. TASR = Terminal Area Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an amergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR FLIGHT ADVISORY SERVICE: If radar advisory service is desired, the pilot of an aircraft will request such service through the appropriate Air Route Traffic Control Center, using normal en route communications facilities. ARTC will determine if service can be provided and will request pilot to change to appropriate frequency for direct communication with radar. Radar station will be identified by "THIS IS AIR FORCE RADAR ADVISORY". All suggested vectors to circumnavigate storm areas will be of advisory nature and do not relieve pilot of responsibility for safety of aircraft. If advisory service cannot be furnished for any reason, the procedure word "UNABLE" will be used. This will terminate radar advisory service to the aircraft without further explanation. This service will be available in the following ARTC Flight Advisory Areas; Chicago, St. Louis, Minneapolis, Kansas City, Albuquerque, San Antonio, Ft. Worth, Oakland, Denver, Great Falls, Los Angeles, and the area immediately around Knoxville, Tenn.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

ILS localizer identifier is preceded by International Morse Code "I" (two dots). Time interval between the "I" designator and the first letter of the assigned characteristic will be 0.6 second. *-Automatic voice identification. **-Distance from markers to approach end ILS runway. NOTE: The service area of compass locators is 15 miles.

(L5) - Instrument Approach (neon) (L7) - Hi-intensity Approach Lights W - Without voice BC - Back course BC-restricted = Not suitable for approaches

DIRECTORY OF AIRPORTS – LEGEND

CITY AND AIRPORT NAME

(AF) City and Airport Name (with L or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of above citation of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields, respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

NOTES:

1. Where lights are owned or maintained by CAA the site number and airway abbreviation are included in the city and airport name column ie: Chadron, 15, CYS-HON.

2. USAF aircraft are permitted to use only those fields prefixed with an AF, A, N, NG, CG, P, PC.

3. When city and airport names are identical, the airport name is omitted to conserve space.

4. When city is part of airport name, a dash will appear between city and airport, such as Venice-State.

TYPE

P - Public Use L - Limited

NOTES

PUBLIC USE - Intended for general use by the public at large, this category consists of:

(1) Operationally active airports (those attended during normal working hours of each day, and provide, as a minimum of service, aircraft fuel for sale at the airport).
(2) All airports serving scheduled and large irregular air carriers as regular, alternate and provisional stops.
(3) All CAA intermediate landing fields.
(4) All airports having a true light certificate to indicate a lighted airport.

Data on these airports are obtained from physical inspections made by CAA personnel.

LIMITED - All airports not qualifying as "Public Use" (See definition above)

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is from the center of referenced city to airport and carried in statute miles.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

LOCATION (Continued)

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Elevation is given in feet above mean sea level and is based on highest usable portion of landing area.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY AND FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, weather reports, and unicom available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet, using 70 as division point. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h -runway is paved (concrete, asphalt or similar type of paving)
aw -allway field
(26) -runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is either not available or not operating standard hours (sunset-sunrise)

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting
L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Portable lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway or Strip
5 - Instrument approach (neon)
6 - High intensity runway
7 - High intensity instrument approach

✱ An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or CAA communications station on field.

UNICOM

U: Unicom (Aero Advisory Station transmitting and receiving on 122.8 mc). Operates during airport hours only.

FUEL OCTANE

F1: 80 oct., at least F3: 91/96 oct., and lower
F2: 80/87 oct., and lower F4: 100/130 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.
(b) "CLOSED" indicates closed to all traffic except in emergency.
(c) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.
(d) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.
(e) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.
(f) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.
(g) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

NOTES

1. ← New or revised data.
2. SCHEDULED AIRLINE STOP: Airport names are capitalized.
3. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
4. NEW AIRPORTS: At the end of each state, under this listing will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

(12 Jun 1956)

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

ATC IFR CLEARANCE PHRASEOLOGY: Effective November 15, 1955, ATC facilities will resume general use of the phrase "VIA FLIGHT PLANNED ROUTE" in air traffic clearances to replace the lengthier detailed description of any portion of the route of flight that is identical to the route filed by the pilot. When used, the phrase will be preceded by sufficient detailed route of flight information to establish the flight on the filed route. The "VIA FLIGHT PLANNED ROUTE" phraseology does not include approval of altitudes filed in the flight plan. Specific altitudes assignments will be issued in each clearance. IFR flight plans filed by the pilots should contain the complete route of flight and should be relayed to air traffic control unchanged. Pilots may request route verification when considered necessary and are requested to do so whenever a filed route has been changed prior to departure. If route verification is desired prior to departure, the request should be included with the initial call for taxi clearance to avoid delay in receiving the information.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequences available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-.. --- -.-. ... (LGB in Code).

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy fields is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

WARNING OF MAINTENANCE AT CAA NAVAIDS: During periods of routine or emergency maintenance, the coded identification (or code and voice, where applicable) will be removed from certain CAA Navaids, namely, ILS localizers, VHF ranges (VOR, TVOR and VAR) and L/MF ranges but not from "H" facilities, compass locators or 75 mc marker beacons. The removal of identification serves as a warning to pilots that the facility has been officially taken over by "Maintenance" for tune-up or repair and may be unreliable even though on the air intermittently or constantly.

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS: In the Airman's Guide, "n miles" or "n mi" stands for nautical miles; "s miles" or "s mi" for statute miles.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight

(12 Jun 1956)

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

RADIO CALL-UP PROCEDURES - ARTC CENTERS: Effective February 1, 1956, aircraft on IFR flight plans making position reports direct to ARTC centers shall, in the initial call-up include the fix or geographical location over which the aircraft is reporting. Examples: "Indianapolis Center, this is TWA 55, Maxwell, over."; "Indianapolis Center, this is Beechcraft 1234, 20 south of Maxwell, over."

Pilots are reminded, however, that direct communication with the center shall NOT be established until the pilot is specifically requested to do so.

UNACCEPTABLE RADIO MESSAGES: CAA facilities will no longer accept non-safety messages (requests for ground transportation, meals, telephone calls, etc.) from pilots of aircraft in flight. Arrangements should be made by a pilot prior to departure via public communications (telephone, telegraph, etc.) for such requirements. Pilots are also reminded that transmission of such messages violates the terms of their aircraft radio license as provided in Part 9 of the FCC Regulations.

CLASSIFICATION OF ILS BACK COURSES: ILS back courses have in the past been classified as either "usable" or "unusable". It now appears that further classification of the "unusable" courses are necessary, since some back courses formerly classified as "unusable" actually may be satisfactory for intersections, holding, transitions or missed approaches, even though they are not satisfactory for back course approaches.

ILS back courses will in the future be classified as follows:

Usable	-	suitable for ILS back course approaches
Restricted	-	not suitable for ILS back course approaches, but suitable for intersections, holding, transitions or missed approaches
Unusable	-	not suitable for any of the above.

SPURIOUS GLIDE SLOPE INDICATIONS: CAA glide slope facilities are intended to provide reliable glide slope signals for use in conjunction with the front course of the ILS localizer. Glide slope signals may be received in other azimuths (because of stray radiation from the antennas and reflections from nearby objects) which may in some cases be sufficient to activate the airborne warning flag. Any glide slope needle activity in these other azimuths should be disregarded.

All pilots are particulary cautioned to ignore glide slope indications when making back course localizer approaches. All CAA approved procedures for back course approaches are limited to use of the localizer portion of the ILS. Any attempt to fly spurious glide slope indications on such back course approaches could result in hazardous operations.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, regardless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

✓ NON-STANDARD HOLDING PATTERN: The following non-standard holding pattern is established and shall become effective June 28, 1956:

(1) KINGSVILLE, TEX. VHF INTSXN - direction of holding - S on Alice, Tex., VOR 162° mag radial (inbound course 342° mag); direction of turns - LEFT; time - two minutes; minimum altitude - 1300'.

✓ AERONAUTICAL CHART CORRECTIONS: Correct the following Aeronautical Charts as indicated:

(1) JN-44, 3rd Civil Edition, dated March 15, 1956; add boundaries of Eastern ADIZ as follows:

(a) A line from eastern edge of chart at 37-30, 93-33; to 37-30, 94-15; 38-23, 95-08; 39-20, 95-10; to northern edge of chart at 39-57, 95-30.

(b) A line from eastern edge of chart at 36-00, 93-57; to 36-00, 95-15; to northern edge of chart at 40-11, 97-18.

Area between lines (a) and (b) label "Eastern ADIZ"; northeast of line (a) label "Eastern Defense Area"; and southwest of line (b) label "Central Open Area".

✓ AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide, Volume 11, No. 6, dated May 29, 1956, as follows:

(1) Page 4 - CIVIL AIRWAYS: Item (19) Correct to read: VOR civil airway No. 165 (Long Beach, Calif., to Coalinga, Calif.), is amended to read: "From the Long Beach, Calif., omnirng stn via the intsxn of the Long Beach omnirng 346° True and the Palmdale omnirng 200° True radials; Palmdale, Calif., omnirng stn; point of intsxn of the Palmdale omnirng direct radial to the point of intsxn of the Bakersfield, Calif., omnirng 210° True and the Coalinga, Calif., omnirng 153° True radials with the Bakersfield, omnirng 149° True radials; Bakersfield, Calif., omnirng stn; to the Coalinga, Calif., omnirng stn."

(2) Page 6 - On-Request Reporting Points: Under "Designate"; Item (19) correct to read: PORT MADISON, WASH. INTSXN - the intsxn of the 356° mag radial of the Olympia, Wash. VOR and the 308° mag radial of the Seattle, Wash. VOR.

Item (21) correct to read: ROSEDALE, WASH. INTSXN - the intsxn of the 356° mag radial of the Olympia, Wash. VOR and the 225° mag radial of the Seattle, Wash. VOR.

Item (25) correct to read: TULALIP, WASH. INTSXN - the intsxn of the 356° mag radial of the Olympia, Wash., VOR and the 146° mag radial of the Bellingham, Wash. VOR.

(3) Page 9 - Minimum En Route Altitudes, Amendment Number 3; Correct effective date to read: July 1, 1956.

C.A.B. "NEAR COLLISION" REPORTING PROGRAM: The Civil Aeronautics Board's "NEAR COLLISION" Reporting Program was inaugurated May 1, and "NEAR COLLISION" questionnaire forms are now being distributed throughout the entire industry. Pilots experiencing a "NEAR COLLISION" incident are requested to use one of these questionnaires to report the circumstances to the CAB. These reports will be anonymous and will be handled as confidential material. If forms cannot be obtained through normal organizational channels, or are not available at the nearest airport, write to the Civil Aeronautics Board, Washington 25, D. C., Attention: B-90, for a copy. (12 Jun 1956)

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Albany	Burlington	Twin Cities
Aroostook	Duluth	WAC 186
Boston	Lewiston	

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for issue. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE - Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.

BESSEMER-DURHAM ARPT: Caution - auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are marked.

★BIRMINGHAM-RADIO: June 7, trans 255.4, trans & rcvr 121.5 , 243.0 mc cmsnd. Rcvd too late for ANRA page. About July 15, VOR will be shut down. (6-7)

BIRMINGHAM ARPT: Caution - traffic operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm closed to high performance single engine conventional lndg gear type acft, including T-6. (4-8)

CLANTON-GRAGG ARPT: Closed - const. (3-21)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

GUNTERSVILLE ARPT: Closed. (3-26)

HUNTSVILLE-RADIO: VOR radials 006°-030° unusable due to roughness and bends. About July 16, VOR will be shut down until approx Sept. 17.

HUNTSVILLE MUN ARPT: Caution - rnwy 18-36 under const.

MOBILE-RADIO: About July 16, VOR will be shut down until approx Sept. 17.

**MONTGOMERY-DANNELLY FLD: Taxiway from rnwy 15 to E/W taxi strip perm clsd. Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft lndg and taking-off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard hangar. E/W rnwy clsd to all military acft-const. Easternmost 5000' avail days, easternmost 6000' avail sunset to sunrise to civil acft. Western end mrkd by flags-days, lgts-ngts. (5-15)

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi acct scalloping and bends. (4-22)

ARIZONA: SPECIAL NOTICE: Until July 24, 1956, captive balloons will be flown nightly from one hr after sunset to one hr before sunrise at lctns 10 mi W Gila Bend AF Aux, 2 mi S Sentinel and 3 mi E Dateland, Ariz. Surface to 1500' and lgtd by one red lgt. Extreme caution when flying at low alts near these lctns. (12-27)

AJO ARPT: Beacon and lights inoperative. (4-3)

COCHISE-RADIO: VOR/DME flgt-checked, opern normal. Coverage 015°-045°, 30 n mi 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°,30 n mi; 235°-255°, 35 n mi at MEA.

DATELAND-SPECIAL NOTICE: Captive balloons anchored on 1500' cables will be flown 1700M Mondays thru 2400M Thursdays at Dateland and Gila Bend Aux AFB, Ariz., for approx 6 weeks. Extreme caution advised-low altitudes near these lctns. (3-12)

ARIZONA: GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.
HASSAYAMPA-RADIO: VOR/DME usable to 30 n mi from 30°-70°, 240°-255°, 320°-345° and 40 n mi from 70°-85° at MEA.
★PHOENIX-LUKE AFB-RADIO: USAF VHF/DF decmsnd.
PHOENIX-SKY HARBOR ARPT: Closed to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager.
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185°, 39 n mi at 10,000'.
SALOME, SITE # 27B, LAX-PHX: Closed.
SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed.
TUCSON-RADIO: May 1, VOR/DME shut down until approximately June 15.
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF- steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000' (d) NE quad 13,000'.
**WINSLOW ARPT: Obstn lgts installed on radar antenna lctd 6.5 n mi NW (300 T) at lat 35-04-45, long. 110-49-48, approx 20' below top of the dome.
YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA.
YUMA -COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area.
ARKANSAS: EL DORADO-RADIO: DME 2000' MSL coverage 43.5 mi 325° thru N to 225°; 2000' MSL coverage 35 mi 225° thru W to 325°.
FAYETTEVILLE-RADIO: VOR shut down until approx July 11 - modernization.
FT. SMITH ARPT-TOWER: Soon twr will be cmsnd as combined stn/twr. Trans freq: 269 kc; 118.3 mc, 121.5 mc, 126.18, 257.8, 243.0 mc. Revs: 3023 5 kc, 118.3, 121.5, 122.5, 125.18 mc. Trans & rcvr 121.9 mc ctl mobile gnd tfc. Class: C(g).
HARRISON ARPT: N/S, new NW/SE rnwys clsd- const. Field closed nights.
NORTH LITTLE ROCK-CENTRAL ARPT: Fld closed to all operns - construction.
TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends.
WALNUT RIDGE-RADIO: VOR radials 290°-320°, 120°-150° and 200°-210° unusable acct bends and course roughness.
CALIFORNIA: ARCATA ARPT: Experimental testing of rotating lgts in inner apch zone of Rnwy 31 at infrequent times. Rotating lgts at 2100' and 1000' S of threshold of rnwy with six high intensity lgts rotating at 6 or 12 rpm.
AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys.
BLYTHE-RADIO: DME coverage 165°-188°, 39 n mi at 7000'; 189°-200°, 26 n mi at 6000'; 200°-220°, 39 n mi at 6000'; 220°-293°, 43 n mi at 9000'; 293°-310°, 26 n mi at 9000'; 310°-327°, 35 n mi at 9000'. May 28 VOR/DME shut down until approx August 1. During this period, the following arwys will not be usable: Victor 64 Thermal to Blythe; V-16 Palm Springs Intersection to Hassayampa, Ariz; V-135 Needles to Yuma, Arizona.
CAMARILLO-RADIO: All courses have multiples.
CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.
DAGGETT-RADIO: VOR flgt-checked on arwy radials only.
FAIRFIELD-TRAVIS AFB-RADIO: USAF VHF/DF bearings and communications in NW quad inreliable below 8500'. Opers 0700-1600 Mon-Fri training status only.
FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.
FT. JONES-RADIO: VOR has lgt course roughness in all quads. Only arwy radials flgt-checked.
FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy rads flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.
FRESNO AIR TERMINAL: Exercise extreme caution in vcnty, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines Rnwys 29-11 and areas N and E of airport.
FULLERTON ARPT: Attended daylight hours only.
FURNACE CREEK SITE 17 RIV-DLS: N 1200' of rnwy closed to all operns-mrkd. Entire fld closed to all hvy or multi-eng acft. S 4500' of rnwy open to lgt acft-caution.
KLAMATH-McBETH ARPT: Closed.

CALIFORNIA: LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. ILS and LF rng during VFR conditions heavy simulated instrument apch traffic.
**LONG BEACH ARPT: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail. for civil acft 2400-0600. N 800' apch end rnwy 16L permanently closed. Rnwy 12-30 closed - construction.
LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL.
LOS ANGELES AIR ROUTE TRAFFIC CONTROL CENTER: Center will activate high alt sector 0900 March 20. Sector will control all acft operg at specific alt at or above 25,000'. IFR including jet acft operg at least 1000' on top. All jet acft specific alt or at least 1,000' on top should ctc ARTC center 301.4 mc as soon as possible after departure within or entering area inbound.
LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx. 4000' W of Sepulveda Blvd open VFR tfc only. Equip. on and adj to const areas. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL approx the intersection of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu intersection in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the Shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR weather. Recommend cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt, or between LF rng and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34.
LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700.
MODESTO-RADIO: March 20, VOR shutdown. Soon, VOR class will be changed to BVOR.
★NEWARK-RADIO: June 11, H fac name & ident chgd to Fremont "FRX". Too late for ANRA.
OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of field. Exercise extreme caution in these areas.
OAKLAND-RADIO-SPECIAL NOTICE: Effect. Sept 1, mil acft planning to use VHF communs and proposing IFR flight into Oakland, Alameda NAS or Hayward should ctc Oakland Apch Control on 118.1 mc, or proposing IFR flight into San Francisco should ctc San Francisco Apch Control on 118.5 mc. Communs during IFR flight should not be conducted with Oakland Apch Control or San Francisco Apch Control utilizing the freq 126.18 mc. Due to extreme congestion, 126.18 mc is not considered a suitable communs channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (5-23)
★OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'. June 1, name of Newark FM on the SE crs LFR changed to Fremont.
OAKLAND INTERNATIONAL ARPT-TOWER: ASR will issue distance values in n mi in connection with radar control. UHF/DF steers unreliable below 7000' within 10 mi of stn.
FLD: Dredging and clam shell equip. working S of landing area. All booms and equip. lgtd and mrkd. Use extreme caution when flying over or within this area.
OCEANSIDE-RADIO: VOR coverage 310°-020°, 35 n mi at min en route altitude.
ONTARIO-RADIO: DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-0°, 35 n mi at 13,000'. May 7, VOR shut down until approx June 15.
ONTARIO INTERNATIONAL ARPT: Make turns on or off taxiway S side rnwy 7-25 at int only. Engine runups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as mrkd by yellow paint lines either side. Formation tk-off & lndg prohibited xcpt ANG 196th fighter interceptor.
OXNARD AFB-RADIO: USAF VHF/DF unreliable below 12,000' within 50 n mi.

[redacted]:**OXNARD-VENTURA CO. ARPT: 160' lgtd derrick erected 700'N center of arpt.
PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)
PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.
QUINCY-GANSNER FLD: E 700' E/W rnwy and taxi strip unusable. (1-3)
RED BLUFF-RADIO: DME coverage 180°-208°, 26 n mi at 9000'; 208°-217°, 26 n mi at 10,000'; 217°-235°, 35 n mi at 10,000'. Apr 19 VOR shut down until approx June 25; freq will be changed to 115.7 mc. During shut-down, the current Victor arwys may be used as direct routes using Red Bluff LFR, provided acft are equipped with ADF. MEAs remain the same as currently estab on Victor Arwys. (6-6)
RIDGECREST-DAVIS ARPT: Lgts inop. (4-11)
RIVERSIDE-RADIO: USAF VOR unreliable. (6-20)
RIVERSIDE ARPT: Clsd to all itinerant tfc-const. (5-5)
SACRAMENTO-RADIO: Disregard spurious signals and interruptions in service of voice commun INSACS and twr until approx April 30 - modernization. (3-30) About June 4, VOR will be shut down until approx Aug 15 - modernization. During this period the following Victor Arwys are affected: V-150 Sacramento to West Point intersection may be used utilizing 082° bear. from Sacramento LFR provided acft is equip. with ADF; MEA westbound 5000', Eastbound 8000'; Modesto VOR to Williams VOR direct MEA 3000'. Following arwys are not usable: V-23 Sacramento to intersection with V-200;V-195 Rio intersection to Williams; V-6 Rio intersection to Reno; V-6N Sacramento to Mt. Lola intersection; V-212 Auburn intersection to Reno. (5-28)
SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated inst apchs including jets VFR weather actual apchs IFR weather. (4-2)
SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000';153° 180°, 26 n mi at 7000'; 180°-225°; 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20 , 43 n mi at 7000'.
✱SAN DIEGO-RADIO-SPECIAL NOTICE: Effect May 16, acft VFR inbound to Lindbergh Fld, are requested to make initial call to San Diego Apch Ctl on 118.3 mc. This initial call should be made over one of the following reporting points: Oceanside from north; Jamul from east; Mexican Border from south; approximately 20 mi west from seaward. Apch Ctl will give initial tfc ctl instructions and advise pilot where to contact Lindbergh Tower for lndg clearance. This procedure does not apply to VFR acft departing local immediate area for Lindbergh Fld due to short distance involved. (5-14)
SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads except 20 mi MEA from 310° to 330°. (10-25) About June 21, BVOR will be shut down until approx July 12. (6-7)
SAN DIEGO-LINDBERGH FIELD: 500' W end rnwy 9-27 clsd - jet barrier. (2-29)
SAN FRANCISCO: See Oakland Control Zone Notam.
SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft inbound to San Francisco International Arpt are requested to make initial call to San Francisco Approach Control, freq 118.5 mc. Points over which to make this initial call are changed to the following: Richmond from N; Bay Point from NE; Livermore - E; Evergreen or Campbell - SE; at or abeam Farallon Islands - W; at or abeam Stinson Beach - NW. Approach control will give initial traffic control instructions and advise pilot when to change to local control freq for landing clearance. This procedure does not apply to VFR acft departing Oakland for San Francisco due to the short distance involved. These flights should call San Francisco tower-freq 119.1 mc as in the past. This amends AIRGI Vol. 11, No. 5, dated May 15, 1956. (5-26)
SAN FRANCISCO-RADIO: DME coverage 10°-30°, 17 n mi at 5000'; 30°-85°, 26n mi at 7000'; 85°-100°, 35 n mi at 7000'; 160°-180°, 26 n mi at 5000'; 180°-225°;17n mi at 5000'; 225°-265°, 26 n mi at 5000'; 345°-10°, 35 n mi at 4000'.
SAN FRANCISCO INTERNATIONAL ARPT-TOWER: Interference on 119.1 mc vicinity ILS OM. (4-24)
SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)
**SANTA ANA-ORANGE COUNTY ARPT: Effective June 11, hours of opern are 0545P - 1030P and 1300P - 1900P daily. Saturdays and Sundays 0545P - 1900P. (6-4)
SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. Reception 3023.5 kc unreliable daylgt hrs. (2-2)
SANTA MONICA-RADIO: TVOR radials 030°, 075°, 210°, 260° and 323° usable. (1-20)
SANTA MONICA ARPT: Service avail only between 0700 and 2100 daily. Extreme caution

[redacted]: advised during ngt use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)
THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi; 060°-085°,40n mi; 145°-175°, 40n mi; 175° thru 180° to 250°, 20n mi; 250°-280°, 40n mi at min en route alt.(3-14)
TULARE ARPT: Closed - reconstruction. (5-18)
UKIAH-RADIO: DME coverage 43n mi; 305°-355° at 6500'MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100°-150° at 6000'. 105° thru S and W to 305° over water not checked.(10-11)

JACKSONVILLE-RADIO: DME and VOR coverage 35 n mi at min en route alt. VOR unusable 180°-260°, with exception apch course 248° usable to 9 n mi. (4-27)

JACKSONVILLE-IMESON ARPT: Rnwy 18L-36R clsd to jet acft.

KEY WEST-INTN'L ARPT: Caution new fld under const. No ngt operns. Const equip on and about rnwys. First 1500' rnwy 26 clsd. Rnwy 34 and 16 clsd. Large or fast acft taking off from rnwys 8 and 11 will proceed straight out and pass S and E of Boca Chica NAS. All acft en route Intn'l Fld will ctc Boca Chica twr on 126.18mc for tfc info when 20 mi out, if unable ctc twr, ctc Key West rdo. Air Carrier operns authorized for Lockheed 18, DC-3 and C-46 acft only due to condition of rnwys. Lndg fee for cargo or charter acft.

LAKE CITY MUN ARPT: S and central ramp areas clsd. Transient acft use N end near hangar. (1-19)

MARIANNA-RADIO: April 17, VOR shut down until approx June 19, During shutdown the following MEAs are estab: V-22 Crestview to over Marianna 5000'. V-7 Tallahassee to Dothan, Ala., using Dothan TVOR 1500'. V-7W Gantt, Ala., to Marianna and V-22 N Marianna to Calvary unusable. Calls on UHF will be answered on 275kc or VHF freqs.

MARIANNA-GRAHAM AIR BASE: AF Contract Primary School clsd Sat, Sun, holidays and other days 1730-0700 xcpt on prior approval. Prior approval for Sat and Sun must be obtained before 1500 Friday. Approval for 1730-0700 week days must be obtained before 1500 on arrival day. No fuel avail for civil acft. New rnwys parallel N side rnwy 8-26 and W side rnwy 18-36 under const. (4-30) No itinerant lndgs rnwys 18R-36L and 8L-26R.

MIAMI-RADIO: May 18, Z marker at LF rng shut down. (5-16)

MIAMI INTERNATIONAL ARPT-SPECIAL NOTICE: All flights operating within an area of a ten n mi radius at night, at altitudes of 3,000' or below, shall establish, prior to entry into area and maintain thereafter air speeds not in excess of 180 knots. Acft types having characteristics requiring minimum air speeds in excess of 180 knots shall maintain the lowest possible air speed consistent with safety. Miami's operators and pilots request cooperative compliance by itinerant flights.

MIAMI INTERNATIONAL ARPT: Approx 800' rnwy 9L-27R and portion taxiway N of 20th Street hangar area not visible to twr. Parking space avail. 20th St. for civil acft. (12-6) Taxiway entrance to SW corner USAF ramp clsd. All jet acft xcpt multi-eng transport types are prohibited from lndg or taking off. All instrument apchs to arpt either actual, simulated or practice by jet acft xcpt multi-eng transport types are prohibited. (5-23)

MILTON CAUTION AREA: Effect. July 1, Caution Area (C-48) will be rescinded.

ORLANDO-RADIO: DME and VOR coverage 35 n mi at min en route alt.

ORLANDO ARPT: Concrete area immediately E of rnwy 18 NW portion arpt clsd for taxiing. (4-1)

ORLANDO-PINECASTLE AFB-RADIO: USAF VHF/DF unreliable below 2000' at 50 n mi.

PANAMA CITY-FANNIN FLD: NW/SE rnwy clsd ngt opern. Trees penetrate standard apch zone to rnwy 32. Caution-shoulders soft. Men and equip adj rnwys. (9-8)

PENSACOLA-SPECIAL NOTICE: Aerobatic and formation tactics being conducted in Caution Areas 144, 146, 147 and 148 during daylgt hrs., Monday thru Saturday. Intensive ngt flgt trng to 8000' in 146 and 147 sunset to 0100 CST nightly. Due to saturation of areas, civil air tfc is requested to remain on airwys. Military acft to Pensacola should proceed on airways, or between 1500' and 2000' or above 8000' while in Caution Areas. Air traffic

FLORIDA: using Red Airway No. 30 between Crestview and McDavid Intersection is cautioned that extensive aerobatic training is being conducted in Caution Areas adj to airways between 4000' and 10,000'.

PENSACOLA CAUTION AREAS: Effect. July 1, Caution Areas (C-146 and C-147) will be rescinded.

PENSACOLA CAUTION AREA: Effect. July 1, Caution Area (C-488) will be established: Name: Pensacola, Fla. Description: Beginning at a point at lat 31-30-00, long. 85-45-00; thence due south to the northwestern boundary of Restricted Area R-383; thence along the northwest, west and southwest boundaries of R-383 to the intsxn of the Florida shoreline with long. 96-48-00; thence westerly along the northern boundary of Restricted Area R-154 to the Pensacola Control Area thence southeast, west and northwest along the Pensacola Control Area extension to its intsxn with the Florida coast line; thence along the northern boundary of redesignated RA-153 to lat 30-15-00, long. 87-41-20; thence northwest to lat 30-31-00, long. 87-55-00; thence north and west along the eastern shoreline of Mobile Bay to the eastern boundary of the airway at lat 30-41-15, long. 88-00-45; thence along the eastern boundary of this airway and Green Civil Airway No. 6 to lat 31-30-00; thence east to point of beginning. Effective from surface to 2000' MSL, within Civil Airways and from the surface to unlimited outside of civil airways. This Caution Area to exclude all Control Zones. Altitude: Surface to unlimited except within Civil Airways. Activities: Extensive basic flight trng. Time of use: Unlimited. Controlling Agency: Chief of Naval Air Basic Training NAS, Pensacola, Fla.

PERRINE-RADIO: About July 2, LFR will be cmsnd. Ident: PRR. Freq: 266 kc. Lctd at lat 25-36-30, long. 80-31-39. Courses: 48A 178N 270A 340N. Class: SMRAZ. (6-8)

**PERRY-FOLEY ARPT: About June 25, work starts on erection of a 240' (336'MSL) lgtd rdo twr 23 n mi NNW (351°T) at lat 30-27-36, long. 83-38-36. (5-15)

TALLAHASSEE-RADIO: VOR courses unusable 110°-150°. (6-23)

TALLAHASSEE-DALE MABRY ARPT: Clsd to air carrier acft exceeding 50,000 lbs xcpt as alternate arpt. Non-air carrier acft exceeding 50,000 lbs rqr prior permission. Rnwy 9-27 clsd to air carrier ngt operns. (10-7)

TAMPA-RADIO: VOR courses 95°-105° unusable.

**TITUSVILLE MUN ARPT: 146' (MSL) lgtd rdo twr erected 3.1 n mi E (105°T) at lat 28-36-36, long. 80-48-34. (5-4)

VERO BEACH ARPT: Rnwys 3R-21L and 7R-25L clsd ngts. (2-15)

**WEST PALM BEACH-PALM BEACH COUNTY PARK ARPT: 120' lgtd rdo twr erected 7.3 n mi NW (335°T) at lat 26-42-04, long. 80-07-39.

WHITING CAUTION AREAS: Effective July 1, Caution Areas (C-144 and C-145) will be rescinded.

WINTER HAVEN-GILBERT FLD: Taxiway and parking ramp near rnwys 4 and 29 extensive excavation. Trucks crossing runways after normal operating hours and week ends.

GEORGIA: **ADEL-COOK COUNTY ARPT: 237' (487'MSL) lgtd rdo twr erected 2.1 n mi E (90°T) at lat 31-08-06, long. 83-25-30. (5-15)

ALBANY ARPT: Clsd to air carrier acft exceeding 50,000 lbs xcpt as alternate arpt. Non-air carrier acft exceeding 50,000 lbs require prior permission. Jet aircraft operating from Turner AFB particularly SE of arpt. Contact Turner twr on 126.18 mc for Advisory Information. If unable to contact Turner tower contact Albany radio for relay. (11-18)

ALMA-RADIO: DME and VOR coverage 35 n mi at min en route alt. (8-3)

ATLANTA-SPECIAL NOTICE-RADIO: ARTC accepting IFR tfc which is equipped with UHF rdo freq only with destination Atlanta Mun Arpt. Center advises high altitude sector with jurisdiction over airspace 25,000' and above within Atlanta Control Area to be activated 0800, Feb 15. All jet type acft operg on IFR flgt plans at or above 25,000' or 1,000' on top should guard 301.4 mc. Within Atlanta area, this channel will be utilized to obtain tfc clearances and to forward progress reports. Weather and other information not pertinent to traffic control should be handles on 255.4 mc. This channel should also be used if unable to contact Atlanta Center direct on 301.4 mc. (2-14)

ATLANTA-RADIO: VOR courses 060°-090° unusable acct bends and roughness. (4-19)

ATLANTA ARPT-TOWER: ASR-PAR shut down-modernization. (3-10) FLD: Aircraft arriving airport make initial contact with Atlanta apch control on 120.7 mc regardless of weather or flight plan. Aircraft not equipped for 2-way communication on 120.7 mc will use other available frequency. (3-6) Runways 27R-9L and 33R-15L closed. (4-21)

ATLANTA-FULTON COUNTY ARPT: Construction southeast end of northwest-southeast runway-caution. (9-13)

BRUNSWICK ARPT: Caution-intensive blimp training in vicinity.

COLUMBUS-RADIO: VOR courses 350°-30° unusable acct bends and roughness. (3-17)

[redacted]

GEORGIA: COLUMBUS ARPT: E/W rnwy clsd - construction. (5-17)
LA GRANGE RADIO: VOR flgt-checked on arwys radials only.
MACON-RADIO: May 9, VOR/DME flgt-checked. Usable dist. 35 n mi at MEA. (5-10)
NORCROSS-RADIO: VOR coverage 060°-240°, 35 n mi at min en route alt. (5-9)
**QUITMAN-BROOKS COUNTY ARPT: 270' (490'MSL) lgtd rdo twr erected 3.1 n mi NE (61°T) at lat 30-50-47, long. 83-32-15.
ROME-RADIO: LF rng operg as unmonitored fac. Use of LF rng as en route or apch aid must be ADF disregarding on-course signals and pilot must monitor fac durg such use.
ROYSTON-RADIO: VOR courses lgt to moderate roughness may be noted over mountains NW at min alt. About June 16, VOR will be shut down until approx Aug. 18 - modernization. During this period, the following intsxn re-estab: Honea 84° bearing from Anderson,S. C. Rbn & front course Greenville, S. C. ILS lclzr, Laurens 140° bearing Greenville LFR & 193 radial Spartanburg, S.C. VOR, Clemson 250 radial, Spartanburg VOR & 214 radial Asheville, N.C. VOR. Silver City 13 radial of Norcross, Ga., & 120 radial of Chattanooga, Tenn., VOR. During this outage Victor Airway 194 is formed as follows: From Anderson Rbn via 84° bearing to intercept the 242 radial of Charlotte, N. C., VOR thence to Charlotte VOR. During the shut down period the following temporary MRA established. V-20 Atlanta, Ga. & Spartanburg, S. C. 5000'. V-35 Macon, Ga. & Asheville, N. C. 6500'. V97E Norcross, Ga. - Silver City 5500'. (6-7)
VALDOSTA-RADIO: VOR unusable 240° clockwise thru 360° to 110° account excessive roughness and course displacement with exception of arpt apch course 003°, usable to 10 n mi. (8-31)
IDAHO: BOISE AIR TERMINAL-TOWER: UHF/DF NE and NW quads unreliable below 14000' beyond 40 n mi. SW and SE quads unreliable below 10,500' beyond 40 n mi. (11-9)
BOISE AIR TERMINAL: Rnwy 16-34 clsd xcpt emerg daytime lndgs-const adj S end. (4-3)
BURLEY-RADIO: VOR coverage 130°-150°, 26 n mi at min terrain clearance alt.
DIXIE USFS ARPT: Closed - const.
**GOODING ARPT: Excavation 30' wide, 15' deep, 135' to 165' NW of NW end of rnwy 12-30, mrkd by red flags 135' to 165' extending 36' above ground on SE edge of rnwy 30. Men and equipment operg vicinity. (4-4)
MALAD CITY-RADIO: VOR coverage 360°-20° and 50°-60°, 35 n mi at 12,000'.
MOUNTAIN HOME AFB-RADIO: USAF VOR unreliable.
MOUNTAIN HOME-CONTROLLED FIRING AREA: A temp controlled firing area is established as follows: Name: Mountain Home, Idaho. Description: Beginning at lat 43-22, long. 116-08; thence to lat 43-13, long. 116-00; thence to lat 43-07, long. 116-12; thence to lat 43-17, long. 116-19; thence to lat 43-22, long. 116-19; thence to point of beginning. Altitude: June - surface to 14,000' MSL; August - surface to 25,000' MSL. Time of Use: Daylgt hrs. Activities conducted: Artillery firing - gun, mortar and Howitzer. Controlling Agency: June - Idaho National Guard; August - Montana National Guard. Effective date: June 2 - 30, inclusive; August 11 - 25, inclusive.
STREVELL ARPT: All lgts inop. (5-2)
TWIN FALLS-JOSLIN ARPT: Excavation 15' deep, 30' wide, lctd 165' off NW end rnwy 12-30. Mrkd by line of red flags extending 36" above grnd on SE edge of excavation paralleling rnwy. Men & equip operg vcnty. (4-4)
ILLINOIS: ALTON-CIVIC MEMORIAL ARPT: Aerobatic area for student trng in following described area: Bounded by long. 89-48 and 90-00; lat 38-57 and 39-03. In use daily when ceiling and visibility exceed 5000 ft and 5 mi, between 2500 ft. and 5500 ft. MSL. (6-16)
BELLEVILLE-SCOTT AFB-RADIO: USAF LF rng has slight splits and multiples within 35 n mi. NW, SW & SE courses unreliable beyond 35 n mi due to splits and bends. NE course unreliable beyond 35 n mi due to splits and bends. NE course unreliable beyond 65 n mi.
BENTON ARPT: Caution - New N/S rnwy under const. (9-9)
BRADFORD-RADIO: H fac useable dist 20-25 s mi. (3-1)
**CHICAGO-SPECIAL NOTICE: 22 telephone poles, 24' to 34' high, erected in the Pinehurst Subdivision approx. 600 ft. south of Glenview Naval Air Station. (1-31)
CHICAGO-RADIO: Multiples on NW course LF rng.
CHICAGO-MEIGS FLD: Caution-S end rnwy dist from threshold lgts to seawall 90'.
CHICAGO-MIDWAY ARPT-TOWER: TVOR courses unreliable beyond 20 n mi between 5°-10°, 35°-40°, 145°-155° 255°-265°, 335°-348°. (2-8) ILS back course erratic.
CHICAGO-MIDWAY ARPT: Single eng transient acft will not be allowed dock space at the N terminal bldg, must use facs of S terminal bldg. Due to non-visibility acct parked acft, twr unable to ctl single eng acft on many portions of all outer ramps. Use extreme caution on E ramp and in vcnty of both terminal bldgs. All acft will remain N of white line on S side of rnwy 27R while running up, parking or taxiing. (5-9) One experimental ILLINOIS: oscillating flasher guidance lgt installed on each side of green threshold lgts on apch end rnwy 31L. (3-16)
CHICAGO-O'HARE INTERNATIONAL FLD: Due to non-visibility twr unable to ctl tfc 300'-800' W rnwy 36, 800'-1600' E apch end rnwy 9, 100'-1100' N rnwy 9-27, 800' SE intsxn rnwy 14-32, and USAF ramp due bldgs & parked acft center taxiway to ramp & black top taxiway to Slick hangar, and terminal gates 1, 2 and 3. Rnwy 14-32 clsd - const. All inbound acft equipped with appropriate multiple rdo freq shall make initial ctc with O'Hare apch ctl on 118.3mc or 348.6mc if UHF equipped regardless of wea. Landings and take-offs prohibited unless acft equipped with functioning rdo capable of two-way direct commun with ctl twr.
CHICAGO-SMITH SEAPLANE BASE: 251' lgtd grain elevator being erected 2 n mi N (360°T) at lat 41-41-00, long 87-33-36. (1-27)
CHICAGO-SMITH SEAPLANE BASE: Effect July, erection will begin of three brick chimneys 255' (844'MSL) lctd 1/2 mi N. (5-4)
CHICAGO HEIGHTS-RADIO: DME coverage 151°-285°, 35 n mi at 2000'. (9-10)
EAST ST. LOUIS-PARKS METROPOLITAN ARPT: Aerobatic area for student trng in following area: Bounded by long. 90-00 and 90-15; lat 38-25 and 38-35. In use daily when ceiling and visibility exceed 5000' and 5 mi, between 2500' and 5500' MSL. (5-13)
EFFINGHAM COUNTY MEM'L ARPT: Const on E/W rnwy. (11-18)
ELMHURST ARPT: Effect December 31, 1956, fld will be closed. (4-2)
**FREEPORT-ALBERTUS ARPT: 311'(1211' MSL) lgtd rdo twr erected 9.1 n mi E(99°T) at lat 42-14-45, long 89-21-05. (5-4)
JOLIET-RADIO: VOR coverage 35 n mi at all azimuths at min en route alt.
KEWANEE ARPT: Men and equip. on fld intermittently - caution. (7-5)
LOMBARD-MITCHELL ARPT: Obstn lgts inop on 123' water tank lctd 5200' SE at lat 41-50-00, long 88-02-30. (4-12)
LOMBARD-YORK TOWNSHIP ARPT: Transmission line approx 3000' W. Height of twrs, 123', not mrkd or lgtd. (11-21)
PEORIA-RADIO: VOR coverage 190°-70°, 35 n mi at min en route alt. (10-11)
PEORIA-GREATER PEORIA ARPT: No trans jet mil acft permitted to land without prior coordination with and approval by Comdr 126 FI Group at arpt. (4-18) 5' unlgtd fence apch end rnwy 22.
PEOTONE-RADIO: VOR coverage lmtd between 39 and 43 n mi at most azimuths at min en route alt. (2-4)
POLO-RADIO: VOR coverage 280°-350°, 39 to 43 n mi at min en route alt. (2-21)
ROCKFORD-RADIO: About July 1, H fac will be cmsnd. Ident: RFD. Freq: 275 kc. Lctn: Lat 42-06-52, Long 89-05-53. Class: MHW (6-6)
SPRINGFIELD-CAPITAL ARPT-TOWER: About July 1, ILS will be cmsnd. Lclzr freq: 109.5 mc with voice. Ident: SPI. Lctd 1400' NE of NE end NE/SW rnwy. Apch bear. 38°. Glide slope freq: 332.6 mc. Lctd 400' NW of centerline and 1050' from apch end NE/SW rnwy. Proposed angle: 2.5°. MM lctd 400' (0.66 mi) SW apch end NE/SW rnwy. Elev: 580' MSL. LMM freq 203 kc. Ident: PI. OM lctd 5.92 mi. SW apch end rnwy. LOM freq 230 kc. Ident: SP. Elev: 604' MSL. (5-18)
**SPRINGFIELD-CAPITAL ARPT: Men and equip. on fld durg daylgt hrs. (12-8) 40' lgtd glide slope antenna pole 1050' apch end rnwy 4 and 400' NW rnwy centerline. Lgtd lclzr antenna shelter 1400' NE apch end rnwy 22. (3-7)
**UTICA-STARVED ROCK ARPT: 311' (991'MSL) lgtd rdo twr erected 4.5 n mi NNW (346°T) at lat 41-24-45, long 89-01-55. (5-4)
VANDALIA-RADIO: About July 2, VOR will be shut down until approx Aug 2. - modernization. (6-6)
WOODDALE-WOODDALE MOODY ARPT: Clsd irregular intervals-flgt trng-mrkd. (5-22)
INDIANA: SPECIAL NOTICE: The Atomic Energy Commission requests all pilots to maintain a reasonable altitude when flying over the Dana Installation, as a safety precaution to the plant. The area involved is located approx 29 s mi N of the Terre Haute LF rng between Montezuma and Newport and is bounded by latitudes 39-50, 39-52 and longitudes 87-21, 87-26.
**AUBURN ARPT: A 910' (1780' MSL) lgtd TV twr erected 3 n mi SSE(167°T) at lat 41-19-59, long 85-03-07. (4-4)
CAMP ATTERBURY-SPECIAL NOTICE: Frequent violations have been reported of restricted Area R-65 to the S. High angle mortar and artillery firing being conducted daily. All acft are warned to keep clear of this area.
COLUMBUS-BAKALAR AFB-RADIO: USAF VHF/DF unreliable 250°-270° outbound below 3000' and 010°-250° below 2500'. (8-18)
**ELKHART ARPT: 236' (1016' MSL) lgtd steel microwave twr erected 3.3 n mi NNW(320°T) at lat 41-43-50, long 86-03-48. (4-24)

INDIANA: ELKHART ARPT: N/S rnwy usable at pilot's discretion. (8-22)
EVANSVILLE-DRESS MEMORIAL ARPT: The tetrahedron tfc direction indicator perm. withdrawn. Soon a lgtd wind cone will be provided on hangar S of terminal bldg on W side of arpt; (4-6)
FT WAYNE-RADIO: VOR has moderate course roughness between 300°-340° at 20 to 35 mi from stn. (5-4)
FORT WAYNE-BAER FLD-TOWER: About Jul 9, ILS glide slope will be shut down until approx Aug 6. FLD: Rnwy 4-22 7800'-day operns, 6200' ngt operns. 1600' ext not lgtd. Due non-visibility twr unable ctl tfc first 500' rnwy 9 & taxistrip leading to apch to rnwy.
GARY MUN ARPT: Const on pole line SW. Pole heights vary from 29' to 83' above gnd. Four poles lctd nearest centerline of rnwy 2 will be 43' (633'MSL). (1-5)
GOSHEN-RADIO: DME coverage 46°-145°, 35 n mi at 2300'; 172°-310°, 35 n mi at 2100'.
GREENSBURG ARPT: Regrading and seeding W half N/S rnwy-caution. (5-14)
HUNTINGTON ARPT: Closed all operns - due soft fld. (3-18)
INDIANAPOLIS-RADIO: Following experimental facs operd intermittently by TDC (approx one yr.): Tilden VOR freq 115.7 mc, ident: IEX. Weir Cook VORW freq 112.3 mc, ident: IAX. TVOR freq 111.4 mc, ident: IDX, with voice ident. Lclzr freq 109.1 mc (without voice, ident: IBX. Glide slope freq 335.0 mc, serving N/S rnwy. DME lctd in laboratory N side field, Channel 64, Mode C. Directional lclzr 110.3 mc serving E/W rnwy. One VORW on 112.9 mc testing intermittently. Until Jul 1, en route radar control provided in vicinity of Terre Haute. Opern conducted from 0700-2300 Mon-Fri. Facility identified as Rockville Control. Primary trans and receiving: 125.3, 319.8 mc. Secondary trans 121.5, 122.2, 126.7, 135.0, 135.9, 243.0, 255.4, 301.4 mc; rcvg 121.5, 122.1, 126.7, 135.9, 243.0, 255.4, 301.4 mc. (3-13)
INDIANAPOLIS-WEIR COOK ARPT-TOWER: ASR will issue distance values in n mi in connection with radar control. FLD: All acft rqrd to have rdo rcvrs. Rnwy gross wt lmtd to 110,000 lbs. Fee for acft wt excess of 110,000 lbs. Left and right tfc pat. Lndg Fee for multi-engine acft. Due to non-visibility twr unable to ctl tfc on taxiway from SE hangar to Turner ramp. All military jet acft rqrd to have transmitters and rcvrs tuned to twr freq. Rnwy 9-27 used only at discretion of ctl twr. Rnwy 4-22 slippery when wet. Use rnwys and taxiways only. Parking in sod area at discretion of ctl twr. (5-14)
LA FAYETTE-RADIO: Severe roughness and scalloping VOR radials 100° clockwise 170°. Soon VOR will be decmsnd and recmsnd at lat 40-29-07, long. 87-00-37. Freq will be changed to 112.0 mc. Monitoring category (l). Class: BVOR. (3-28)
LA FAYETTE-HALSMER ARPT: Const - E side SW end NE/SW rnwy and entire NW/SE rnwy. Rnwy lgts inop. Middle one-third NE/SW rnwy serviceable W side.
LA PORTE-SPECIAL NOTICE: Ground demolition in progress approx 6.9 n mi SE during daylgt hrs Mon-Sat. Center of operns lctd at lat 41-31-28, long. 86-36-46.
*LA PORTE ARPT: 254' (1049' MSL) lgtd steel microwave twr erected 5.9 n mi NNE (24°T) at lat 41-40-23, long. 86-40-57. (4-24)
MADISON-SPECIAL NOTICE: Frequent violations of Restricted Area approx 4.3 n mi N have been reported. Artillery and anti-acft firing practice being conducted daily in Jefferson Proving Grounds. All acft are warned to keep clear of this area.
**MICHIGAN CITY MUN ARPT: 180' unmrkd microwave twr erected 4.5 n mi SSE (164°T) at lat 41-36, long. 86-51.
**MT. VERNON ARPT: 223' (653'MSL) lgtd twr erected 8950' WNW (290°T). (4-24)
ROCKVILLE-RADAR: En route radar control provided. Primary trans and rcvg: 125.3, 319.8 mc. Secondary trans 121.5, 122.2, 126.7, 135.0, 135.9, 243.0, 255.4, 301.4 mc; rcvg 121.5, 122.1, 126.7, 135.9, 243.0, 255.4, 301.4 mc. See Indianapolis Radio. (3-13)
SOUTH BEND-ST JOSEPH COUNTY ARPT-TOWER: ILS lclzr back course flyable with slow bends one to 5 n mi from stn. Glide slope flyable down to 50'. No touchdown point.
** FLD: 156' (962' MSL) lgtd steel microwave twr erected 2.0 n mi WNW (310°T) at lat 41-43-50, long. 86-20-56. (4-24) 2230-0630 daily rnwy lgts avail on req thru So. Bend Rdo.
**TERRE HAUTE-COX ARPT: 25' (500'MSL) two-story 500' square bldg erected 1/2 n mi S (180°T) at lat 39-25-30, long. 87-25-00. (5-14)
TILDEN-RADIO: See Indianapolis, Ind.
IOWA: **ALGONA ARPT: Two 160' (1375'MSL) lgtd rdo twrs erected 8.9 n mi WSW (260°T) at lat 43-03-52, long. 94-18-13. (5-9)
BURLINGTON-SPECIAL NOTICE: Demolition approx 3.5 n mi SW. Explosions every 30 min daily 0800-1700, xcpt Suns., holidays. Area boundary N lat 40-46-27; S lat 40-45-35; E long. 91-11-04; W long. 91-14-37.
BURLINGTON-RADIO: About June 4, VOR/DME will be shut down until approx June 27. (6-7)

IOWA: DAVENPORT MUN ARPT: E/W strip under const. (2-2)
DES MOINES ARPT: Due to non-visibility twr unable to ctl tfc on portion of W ramp and NW 1600' of taxiway and warm-up ramp of rnwy 12.
OSKALOOSA ARPT: NE/SW rnwy closed indef. NW/SE rnwy now 120 ft wide. (10-25)
SIOUX CITY-RADIO: DME coverage 77°-103°, 35 n mi; 172°-244°, 26 n mi at min en route alt. (7-30)
SIOUX CITY ARPT: Due to non-visibility twr unable to ctl ramp tfc in front of Admin Bldg, NE of black hangar and parking area at SE corner of fld. (4-16)
WEBSTER CITY ARPT: Intsxn rnwys soft with ruts - broken tile in drainage system. E/W rnwy clsd. NW/SE rnwy closed-const. (5-18)
KANSAS: ARKANSAS CITY-STROTHER AUX #2 ARPT: P-line varying from 12' - 25' above ground and surrounding arpt.
**ATCHISON ARPT: 200' (1308'MSL) lgtd antenna erected 3.0 n mi SSW (205°T) at lat 39-31-49, long. 95-13-02. (4-23)
CALDWELL ARPT: 278' (1421'MSL) lgtd rdo twr being erected 13.1 n mi E (102°T) at lat 37-00, long. 97-19-05. (4-3)
**COFFEYVILLE-McGUGIN ARPT: 200' (1095'MSL) lgtd antenna erected 7.0 n mi NW (320°T) at lat 37-11-29, long. 95-41-07. (4-23) NW/SE and NE/SW rnwys clsd. (11-8)
DODGE CITY ARPT: 265' (2879'MSL) radio twr 2.5 n mi WSW (262°T) at lat 37-45-57, long. 100-01-55, under const.
EMPORIA-RADIO: VOR coverage 200°-270°, 35 to 43 n mi at min en route alt. (5-29)
GARDEN CITY RADIO: Radial 125° has course roughness and bends of 2.5 °. (3-28)
GOODLAND ARPT: NW/SE rnwy closed-const.
GREAT BEND ARPT: Navy lndg and take-off practice by P2V and SNB acft 0700-1700, Mon thru Fri xcpt holidays. All movement of acft during this period controlled by twr. Mil acft pat. will be adjusted by twr to facilitate civil acft operns. Non-rdo-equipped acft should fly standard tfc pat and observe twr for lgt gun signals. Lgt acft 600' above gnd. Hvy acft 1000' above gnd. Caution - men and equip. near nrwys, days. (4-25)
GREENSBURG ARPT: 265' (2680'MSL) lgtd rdo twr being erected 9.9 n mi WSW (246°T) at lat 37-32-24, long. 99-28-02.
HUTCHINSON-RADIO: About July 2, VOR will be shut down until approx Aug 2 - modernization. (6-6)
KANSAS CITY-FAIRFAX FLD-SPECIAL NOTICE: Acrobatic area approved 7.0 mi W for certain flying schools in Kansas City, Mo., area bounded on E by long. 94-46, on S by lat 39-07, on W by long. 94-55, on N by lat 39-15 thence SE along Missouri River to long. 94-46. This area is in use daily when ceiling and visibility exceed 4000' and 5 mi between 2500 and 5500' MSL. (4-17)
LIBERAL ARPT: 240' (3135'MSL) lgtd rdo twr being erected 4.1 n mi NNE (350°T) at lat 37-06-47, long. 100-54-34. (4-3)
**MEDICINE LODGE ARPT: 278' (2065'MSL) lgtd rdo twr erected 8.5 n mi NE (47°T) at lat 37-21-21, long. 98-25-40. (4-3)
NEWTON-81 ARPT: Restricted services due to by-pass road const on N end of fld, with hvy const equip. N/S rnwy reduced to 1400' with hi-line pole 40' W of rnwy. All lndgs at pilot's risk. (9-6)
OLTHE-SPECIAL NOTICE: Effect. May 31, Caution Area C-198 is amended as follows: Bounded on the N by lat 38-12, on the E by Victor 161, on the S by Red civil arwy 105, and on the W by Amber 4.
**OSBORNE ARPT: 225' (2274' MSL) lgtd guyed twr erected 19 n mi SW (239°T) at lat 39-16-12, long. 99-01-30. Strip lgts inop.
OTTAWA ARPT: Use turf strips with caution. (2-2)
PARSONS-SPECIAL NOTICE: Demolition 7.8 n mi ESE at lat 37-17-45, long. 95-07-15.
PRATT ARPT: 228' (2294'MSL) lgtd rdo twr being erected 11 n mi SW (229°T) at lat 37-34-33, long. 98-55-36. (4-3)
RUSSELL ARPT: Caution-ditch NE of intsxn rnwy 16-34 and 3-21 marked. (3-13)
SALINA RADIO: VOR coverage 202°-257°, 35 n mi at min en route alt. (2-2)

CINCINNATI-RADIO: VOR has light to moderate visual and aural interference 360°-60° from stn to 52 n mi at minimum en route instr alt. DME coverage 60°-150°, 35 n mi at min en route alt. (1-14)

OHIO: CINCINNATI-GREATER CINCINNATI ARPT: Due to non-visibility twr unable to ctl single-eng tfc on NW/SE taxiway from rnwy 18 to 200' SE of rnwy 18 unless such tfc remains on fld side of this taxiway. After lndg on rnwy in use acft taxi straight ahead to nearest intsxn. No 180° turns on rnwy prior to rcvg approval from twr. Prior to departure acft with no rdo rqrd to fone twr for taxi and take-off instructions. Caution - men and equip. working on outer perimeter of ramp between 0800 and 1630, mrkd. Const on ramp and all points thereto in progress wea permitting. Extreme caution all acft. Twr clearance rqrd prior using taxiways to or from ramp in const areas-flagged and lgtd. (3-23)

CINCINNATI-LUNKEN ARPT: Due to non-visibility twr unable to ctl tfc in tfc pat directly NW of fld. Prior to departure acft with no rdo are rqrd to fone twr for taxi and take-off instructions. Use rnwys only unless otherwise authorized by twr. (3-5)

CLEVELAND-RADIO: DME coverage 60°-100°, 43n mi at 2900'; 100°-145°, 35n mi at 2500'; 170°-190°, 35n mi at 2500'; 245°-310°, 35n mi at 2000'; 310°-060°, not checked.

CLEVELAND-HOPKINS ARPT: Rnwy 14-32 restricted to NW take-offs and SE lndgs. 92' const derrick 1900' off apch and 900' left of centerline rnwy 5L - lgtd. (3-22)Const. of north concourse in progress 800' N from main terminal. (5-17)

CLEVELAND-LAKEFRONT SEAPLANE BASE: Land in ship channel only- steel cable below surface of water running N from Cleveland Stadium 500' in navigational channel.

COLUMBUS AREA-SPECIAL NOTICE: Effect. immediately the following direct routings will be used during period Columbus VOR is inoperative. Routes, minimum en route instrument altitudes and reporting points are identified with appropriate Victor Airways: (1) Victor 5 - From Xenia, Ohio Intsxn to Columbus, Ohio LFR via 068° crs to Columbus LFR - MEA 2500'. (2). Victor 5 - from Mansfield, Ohio, to Columbus, Ohio, via Mansfield 208° mag rad and 208° crs to Columbus LFR - MEA 2500'. (3) Victor 5 East- from Columbus, Ohio, LFR to Homer, Ohio, intsxn via 053° crs from Columbus LFR - MEA 2500'; from Homer Intsxn to Mansfield, Ohio, VOR via Mansfield 187° mag rad - MEA 2500'. (4) Victor 12- from Dayton, Ohio, VOR to Columbus, Ohio, via Dayton VOR 089° mag rad and 089° crs to Columbus, Ohio, LFR; from Columbus, Ohio, to Wheeling, West Virginia, via 084° crs from Columbus LFR and Wheeling VOR 267° mag rad - MEA 2500'. (5) Victor 12 North - from Dayton, Ohio, to Columbus, Ohio, via Dayton, Ohio, VOR 061° mag rad and 300° from Columbus LFR - MEA 2500'; from Columbus, Ohio, to Baltic, Ohio, intsxn not usable. (6) Victor 38 - from Findlay, Ohio to Columbus, Ohio, via Findlay 145° mag rad and 145° crs to Columbus LFR - MEA 2500'; from Columbus, Ohio, to Crooks, Ohio, intsxn via 114° crs from Columbus, Ohio, LFR - MEA 2500'. (7) Victor 43- from Columbus, Ohio, to Mt. Hope, Ohio, intsxn via 233° crs to Columbus, Ohio, LFR-MEA 4000'. (8) Victor 45 - from York, Ky, VOR to Upper Sandusky, Ohio, intsxn unusable. The following reporting points changes in the Columbus, Ohio, area are effective immediately and for the duration of the Columbus, Ohio omni rng shutdown: (A) Designate non-compulsory reporting point: (1) Lewisburg, Ohio, Intsxn - the intsxn of Dayton, Ohio, 061° mag rad and the 120° mag bearing to Columbus, Ohio, LFR - MEA 2500'. (B) Redesignate non-compulsory reporting points: (1) Xenia, Ohio Intsxn - the intsxn of Dayton, Ohio 135° mag rad and the 068° mag bearing to Columbus, Ohio, LFR - MEA 2500'. (2) Homer, Ohio, Intsxn - the intsxn of Mansfield, Ohio, 187° mag rad and the 233° mag bearing to Columbus Ohio, LFR - MEA 2500'. (3) Richwood, Ohio intsxn - the intsxn of the Findlay, Ohio 145° mag rad and the Dayton, Ohio 061° mag rad - MEA 2500'. (4) Newark, Ohio Intsxn - the intsxn - the intsxn of the Mansfield, Ohio, 179° mag rad and the 264° mag bearing to Columbus, Ohio - MEA 2500'. (5) Fredericktown, Ohio Intsxn - the intsxn of the Findlay, Ohio, 120° mag rad and the 208° mag rad to Columbus, Ohio, LFR - MEA 4500'. (C) Redesignate compulsory reporting point: (1) Adamsville, Ohio Intsxn - the intsxn of Parkersburg, W. Va., 332° mag rad and the 264° mag bearing to Columbus, Ohio, LFR - MEA 2500'.

COLUMBUS-RADIO: VOR has bends in excess of 3-1/2° NE quad 25°-35°. Moderate roughness between 35° - 50° and 305°-345°.

**COLUMBUS-PORT COLUMBUS ARPT-SPECIAL NOTICE: Two-way rdo rqrd all types of acft. VFR Jet Traffic Rules--Take Offs: Rnwy 27 - turn to a heading of 360° as soon as safety will permit and maintain 360° heading until clear of airport control zone. Rnwy 9 - turn to a heading of 110° as soon as safety will permit and maintain 110° until clear of airport control zone. Entering control zone - maximum airspeed 250 knots. Maintain 2,000' MSL until on base leg for landing apch. VFR Multi-engine Rules-Take offs: Rnwy 23 and 27, a right turn following take-off is required to avoid heavy populated area west and southwest of arpt. Approach for Landing: Maintain 2,000' MSL until on base leg or if a straight-in apch is used maintain 2,000' MSL as long as practical before starting normal descent on final approach. (3-23)

COLUMBUS-PORT COLUMBUS ARPT-TOWER: ASR will issue distance values in nautical miles in connection with radar control. (1-17) FLD: Due to non-visibility twr unable to control traffic on E taxi strip between hangars 1 and 4.

DAYTON-RADIO: VOR has moderate roughness from 120°-200° at min en route alt. DME coverage 150°-220°, 30 n mi at 2400'. VOR has interference from 90° clockwise to 240°. This area not to be used for IFR opern acct unreliable course indication during period of interference. (5-23)

DAYTON ARPT: Caution when apchg arpt as fluorescent street lgtg paralleling S bndry of arpt can be mistaken for rnwy lgtg. No grass operations. Radio receiver rqd. Due to non-visibility, twr unable to ctl tfc on taxiway from E and N side to W side of hangars. Use unpainted area of concrete for taxiing in line with blacktop on taxistrip. (5-2)

DAYTON-MONTGOMERY COUNTY ARPT: Closed - construction. (5-9)

DAYTON-WRIGHT-PATTERSON AFB-RADIO: USAF VHF/DF unreliable 295°-305° below 3000'; 306°-295°, below 2500'.

DEFIANCE-BRYAN-DEFIANCE MEMORIAL ARPT: N/S rnwy and sod areas closed. (2-2)

FINDLAY-RADIO: DME coverage 220°-140°, 44 n mi; 140°-220°, 35n mi at min en route alt.

GROVE CITY-BEAVER ARPT: E/W rnwy closed. (4-16)

HAMILTON ARPT: Caution - grading on N side of E/W rnwy. Equip. on fld. (7-17)

MANSFIELD-RADIO: VOR has excessive roughness and course displacement (max 7°), 3 to 5 n mi from stn 100°-190°. Moderate roughness from 350° to 100°. Moderate to severe roughness and bends on Victor 5, 204° radial; and on Victor 92, 310° radial. (5-11)

MANSFIELD ARPT-TOWER: About July 2, combined stn/twr will be cmsnd. Twr will trans and rcv 278 kcs; 118.7, 121.5 mc. Enroute tfc call Mansfield Rdo. Class: C(g). (6-8)

NEW PHILADELPHIA ARPT: Use hard surface only. Rnwy lgtg cable trench area soft-wet.

PORT CLINTON ARPT: Sod areas usable, rough. Caution - land in centerline section of rnwys, standing water following heavy rains. Acft with 122.8 call Port Clinton unicom for wind and field conditions. (4-30)

PUT-IN-BAY ARPT: Caution-blind spots to acft on ground preparing to take-off, autos cross the SW end of NE/SW rnwy, fld rough. For field conditions call Port Clinton unicom.

SPRINGFIELD ARPT: Caution - controlled jet tfc operg off fld. (9-29)

★TOLEDO-EXPRESS ARPT-TOWER: ILS glide slope usable to end of rnwy 7. June 8, freq 126.18 mc cmsnd. Rcvd too late for ANRA pages.

TOLEDO MUN ARPT: Use rnwys and taxiways only. Areas adj rnwy plowed. (5-11)

WATERVILLE-RADIO: VOR coverage 39 n mi at min en route alt. DME coverage 260°-280°, 34 n mi at 2000'. (10-5)

WOOSTER ARPT: NE/SW rnwy closed - const. (12-3)

YOUNGSTOWN-RADIO: DME coverage 127°-259°, 26 n mi at 2600'; 344°-010°, 35 n mi at 2400'. VOR radials have moderate flyable bends beyond 15 mi. (2-15)

**YOUNGSTOWN ARPT-TOWER: VHF/DF unreliable 100°-260° below 3000'; 270°-030°below 3500'. (3-25) FLD: Use rnwys and taxiways only. Under VFR conditions fighter type acft within 13n mi and below 6000' will apch arpt within bndry NW quad Youngstown Rng. Due to non-visibility twr unable to control tfc on section of concrete NW/SE taxiway from the intsxn of the E/W taxiway NW to the end. Const - deep ditches 300' SE apch end rnwy 14. Two 56' lgtd rdo antenna twrs erected 1630' E of apch end rnwy 23 and 2805' E of apch end rnwy 32. (2-15)

ZANESVILLE MUN ARPT: All acft advised to use rnwys and taxiways only.

OKLAHOMA: **ANADARKO ARPT: 280' (1926'MSL) lgtd rdo twr erected 19.1 n mi NNW(352°T) at lat 35-22-38, long 98-16-21. (5-7)

ARDMORE-RADIO: DME coverage 230°-280°, 35n mi at 2300'.

BUTTE ARPT: Rnwy 2-20 lgts inop-clsd ngt air carrier operns only. (5-1)

CLAREMORE-WILL ROGRES FLD: Bndry lgts inop. (6-11)

DURANT-EAKER FLD: 1800' NW end NW/SE rnwy closed. (5-16)

**EL RENO ARPT: 200' (1529'MSL) lgtd rdo twr erected 4.1 n mi E(105°T) at lat. 35-30-26, long. 97-53-10. (5-7)

GAGE ARPT SITE 13, AMA-MKC: NE/SW rnwy clsd to aircarrier and ngt operns.

**HOBART ARPT: 265' (1760'MSL) lgtd rdo twr erected 6.1 n mi SSE(177°T) at lat 34-53-30, long. 99-02-10. (5-7)240' (1728'MSL) lgtd rdo twr erected 21 n mi NE(56°T) at lat.35-11-10, long. 98-41-55. (5-7) Rnwys 17 and 35 clsd-resurfacing. Caution-men, equip. on fld.

McALESTER-RADIO: About June 16, VOR will be shut down until approx Aug 18. (4-26)

MANGUM-PONDER ARPT: Closed. (3-2)

**OKLAHOMA CITY-DOWNTOWN ARPT: 205'(1216'MSL) lgtd microwave twr is being erected 1.5 n mi NE(60°T) at lat 35-27-45, long 97-30-51. (5-4)

**OKLAHOMA CITY-WILEY POST ARPT: New 2640' E/W rnwy on S end of fld - usable. N/S, NE/SW, NW/SE and old E/W rnwys perm. closed.

[redacted]: RENFROW-SMYRCKA ARPT: 240' (1569'MSL) lgtd rdo twr erected 6.9 n mi NW (302°T) at lat 37-02-36, long. 97-53-48. (4-3)

**SHAWNEE ARPT: 350' (1080'MSL) lgtd microwave twr erected 15.0 n mi WNW (308°T) at lat 35-30-35, long. 97-11-10. (5-4)

SOUTHCOFFEYVILLE-JENSEN ARPT: NW/SE and NE/SW rnwys hazardous acct deepholes.

TULSA ARPT-TOWER: ILS lclzr has bends within tolerance between mrkrs. Glide slope restricted to use on approaches to MM. (9-14) FLD: Rnwys 17R and 21R clsd for take-offs to all tactical type acft and all multi-engine acft exceeding 26,000 lbs take-off wt. Rnwy 3R-21L daylgt hrs only.

OREGON: BAKER-RADIO: VOR radial 119° lmtd to usable dist 31 n mi at 9000'; 125° lmtd 31 n mi usable dist at 9000'; alt radial 140° lmtd to 32 n mi usable dist at 9000'.

EUGENE-RADIO: VOR has severe scalloping, making course line information unusable in NE quad - caution. (8-3)

HERMISTON: Demolition approx 8.7 n miW Mon-Fri from 0730-1615 from gnd up to 2000'. N lat 45-51-50; E long. 119-29-20; S lat 45-49-40; W long. 119-30-47.

KLAMATH FALLS RADIO: VOR coverage 40°-50°, 80°-110°, 195°-210°, 35 n mi at 10,500'; 275°-305°, 26 n mi at 10,500'.

KLAMATH FALLS-KLAMATH ARPT: Rnwy 14-32 and N half N/S taxiway clsd. Asphalt paving plant and power line 950' S rnwy 7-25 and 800' E of S end rnwy 18-36 - max height 45'. Caution - equipment crossing rnwys.

LAPINE ARPT: Caution - construction. (6-8)

MADRAS - SPECIAL NOTICE: Caution in Deschutes River, Willow Creek area, construction - Pelon Dam. Transmission lines and cables crossing canyons. (4-25)

MEDFORD-RADIO: DME and VOR coverage 134°-189°, 35 n mi at 10,000'; 189°-255°, 35 n mi at 8000'; 255°-306°, 26 n mi at 8000'. (9-1)

MEDFORD ARPT: Industrial acft operg from taxiway NE side of fld. These acft use right tfc pat. when arpt tfc is NW or W, left pat. when arpt tfc is SE or E. (4-16)

NEWBERG-RADIO: VOR flgt-checked for en route Victor Arwys and route use only and on the 334° and 347° radials, at min instr alts. Occasional brief flag activity may be experienced within the service area of fac. 360° rad on Sauvies Island, usable dist 26 n mi at 3000'.

NEWPORT-RADIO: VOR flgt-checked for en route use only at min terrain clearance alts on the 23°, 102°, 163° and 342° radials. Usable dist lmtd in the signal shadow areas imposed by intervening high terrain.

NORTH BEND-RADIO: VOR flgt-checked for en route use only at min terrain clearance alts on the 21°, 86°, 114°, 161° and 343° radials. Usable dist lmtd in the signal shadow areas imposed by intervening high terrain.

PINEHURST ARPT: Caution - construction. (6-8)

PORTLAND INTN'L ARPT: All inbnd acft equipped with appropriate multiple rdo freq shall make initial contact with Portland Apch Ctl on 118.1 mc regardless of weather.

REDMOND-RADIO: VOR usable dist of many radials lmtd in the signal shadow area imposed by intervening high terrain. Flgt-checked for en route arwys use at min instr alts.

ROME-RADIO: VOR operns normal xcpt usable dist of many radials are lmtd in signal shadow areas due to terrain.

SALEM-McNARY ARPT: Extreme caution when using unpaved areas. Equip. on fld. (5-2)

SCAPPOOSE-COLUMBIA COUNTY ARPT: Drag races will be conducted June 24, July 8, and 22, August 5 and 19, Sept 1, 2 and 3, Oct 14. (4-6)

THE DALLES-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts and on the 11°, 90° and 266° radials at min terrain clearance alts.

THE DALLES ARPT: Blasting opern occasionally E of fld in connection with The Dalles Dam construction, stay above 1000' in this area. Rnwy lgts 7-25 inop.

TILLAMOOK-COASTWAY #2 ARPT: Water drains adjacent all rnwys - hazardous. (4-8)

TROUTDALE ARPT: Use rnwys and taxiways only - sink holes developing in grass area.

WARRENTON-SPECIAL NOTICE: Effect. June 16 thru 30 inclusive a temp controlled firing area will be established: Name: Warrenton, Oregon: Description: N boundary: lat 46-10-04; E boundary. long. 123-55-45; S boundary: lat 46-01-00; W boundary: long. 124-20-00. Altitude: Surface to 20,000'MSL. Time of use: 0800-1700 daily. Activity: Drome operation, AAA firing. Controlling Agency: Oregon National Guard, Camp Clatsop.

[redacted]: ALLENTOWN-RADIO: VOR radials 275°-N to 75° usable 26 n mi at min instr alt. DME coverage 290°-330°, 35 n mi at 4000'; 330°-055°, 26 n mi at 4000'.

ALLENTOWN-BETHLEHEM EASTON ARPT-TOWER: ILS glide slope unusable from MM to touchdown. FLD: Due to non-visibility, twr unable to control tfc 100' E end rnwy 9-27 and taxistrip leading to Bethlehem Steel hangar. Unlighted trees and p-line between MM and rnwy 6. (5-18)

[redacted]: BRISTOL-3M ARPT: Caution - const. equip. on S apch N/S rnwy-hazardous.

BUTLER-RADIO: H fac usable dist 17 to 26 n mi - due hvy interference.

CHAMBERSBURG-SPECIAL NOTICE: High explosive demolition approx 6.9 n mi NW daily, Mon-Fri, 0800-1700. N bndry - lat 40-01-00; S lat 39-59-30; E long. 77-47-00; W long. 77-49-00.

MOSES LAKE-LARSON AFB-RADIO: USAF VHF/DF unreliable below 7000' NE quad; 5000' all other quads. (11-1)
[redacted]: MT. CATHERINE BCN SITE #4, SEA-HLN: Bcn inop. (2-16)
OLYMPIA-RADIO: VOR coverage 340°-45°, 43 n mi at 4000'; 45°-135°, 43 n mi at 8000'; 135°-155°, 43 n mi at 7000'; 155°-225°, 43 n mi at 5000'; 225°-275°, 17 n mi at 5000'; 275°-340°, 43 n mi at 8000'. 314° radial on Shelton usable for 26 n mi at 2000'. 143° radial on Portland, Oregon intsxn usable for 35 n mi at 5000'. (5-3)
OLYMPIA ARPT: Farming activities adj to rnwys and taxiways spring thru fall.
OTHELLO ARPT: Caution - unlgtd power line approx 50' high E end - unmrkd.
SEATTLE-RADIO: VOR radial 158° unusable for instr apch. (3-15) About June 25, VOR will be shut down until approx July 13. (6-8)
SEATTLE AIR ROUTE TRAFFIC CONTROL CENTER-RADIO: Flight Advisory Information is based upon an increase in separation standards from 500 to 1000' between flgt levels of 12,500' and 29,000' in the Seattle Flight Information region. 500' vertical separation will be acceptable for flight levels of 12,500' and below, 2,000' vertical separation above 29,000'.
SEATTLE-BOEING FLD: All daylgt VFR operns of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat. to the E at 1000'. All turns when taxiing off lgt plane strip made toward twr. Hvy acft make tfc pat. W of fld at 1500'-use main rnwys, taxi strips only. Due to non-visibility twr unable to ctl tfc W blast fence in front Boeing Flgt Center and parking apron #4. Men, equip working on N 5000' of main rnwy. Crew in rdo ctc with twr - caution.
SEATTLE-TACOMA INTERNATIONAL ARPT-TOWER: ASR will issue dist values in n mi in connection with radar control. (8-17) Glide slope point of touchdown 1314'N of apch end rnwy 34. Glide slope rough not approved for automatic apch. (3-15) FLD: Soft dirt along both sides and N end N 1000' rnwy 16-34. Rnwys 16-34 north 1200' and taxiway north of WAL hangar clsd 0700-1800 Mon thru Fri. (4-27) Rnwys 7-25 and 11-29 clsd. Rnwy 7-25 will be redesignated as E/W taxiway. S taxiway from rnwy 7 to rnwy 34 will be clsd to all 4-eng acft. (5-4)
SHELTON- RADIO: About June 21, Z marker associated with HWZ fac will be changed to low powered FM. (6-8)
SPOKANE-RADIO: DME and VOR coverage 36°-152°, 43n mi at 7000'; 153°-224°, 43n mi at 5000'; 225°-264°, 43n mi at 6000'; 265°-35°, 43n mi at 8000'. (6-17)
SPOKANE-FAIRCHILD AFB-RADIO: USAF VHF/DF unreliable below 9500' in all quads. Operg on trng status only. (3-31)
SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat. and mrkd area S of rnwy. Equip. on fld.
SPOKANE-GEIGER FLD-TOWER: UHF/DF coverage 110°-260°, 50n mi at 5000'; 261°-280°, unreliable; 281°-330°, 40 n mi at 9000';331°-110°, 50 n mi at 9000'. Effect. May 7, request all VFR tfc arriving Geiger Arpt or utilizing apch facilities to Geiger for practice purposes make initial rdo contact with Spokane apch control on appropriate apch ctl freq in lieu of contacting Geiger twr. Contact Geiger twr lcl ctl freq approx 5 mi from arpt unless instructed otherwise. FLD: Perm crash barriers 40 inches high lctd 150' off ends rnwy 3-21.(5-28)
T ACOMA ARPT: Rnwys being repaird. Roller and other equip.on fld and rnwys. Caution - land according to wind tee between rnwys. (1-26)
YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, and on the 123°, 161°, 191°, 298°, 321° and 336° radials at min terrain clearance alts.
[redacted]: CHARLESTON-RADIO: VOR coverage 10°-58°, 26n mi at 3000'; 270°-330°, 26 n mi at 2500'. Moderate roughness all azimuths. May 7 VOR/DME shut down - modernization.
ELKINS-RADIO: LF rng has multiples and fades all courses. (5-31) DME coverage 35°-95°, 43 n mi at 6000'; 95°-120°, 35 n mi at 6800'; 120°-165°, 26 n mi at 6800'; 165°- 195°, 35 n mi at 6800'; 195°-220°, 43 n mi at 6800'; 220°-35°, 43 n mi at 5000'. (7-1)
ELKINS MUNICIPAL ARPT: Rnwy lgts 4-22 inop. (2-24)
MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'.
MARTINSBURG ARPT: Serv fac avail 0800 until sunset. 28' hangar 500' E of centerline and 1100' from S end rnwy 35, lgtd. (6-7) Factory bldg 40' high under const 1000' E of S end rnwy 35 in flood lgtd area. (9-13) Const under way end of rnwy 26 and along entire length of rnwy 8 and 26, men and equip. on fld, obstn mrkd. (1-3)
MORGANTOWN-RADIO: LF rng has multiples and fades all courses.
PARKERSBURG-WOOD COUNTY ARPT: Caution - dip midway rnwy 16-34 covering full width of rnwy. (5-4)
[redacted]: FOND DU LAC SKYPORT: Caution. Rnwy sides soft wet seasons. (4-9)
GREEN BAY-RADIO: VOR shut down until approx. Aug 1 - modernization. (6-4)

WISCONSIN: LA CROSSE-RADIO: VOR radials 320°-335° unreliable 20 to 30 n mi from stn.
LONE ROCK-RADIO: About July 9, VOR will be shut down until approx Sept. 1-modernization. (6-5)
MADISON-TRUAX FLD: Caution crossing hwy lndg rnwys 22, 26, 31. E taxiway N of Admin Bldg perm clsd to all acft over 10,000 lbs. Sod unsafe. Apch lgts rnwy 36 inop. Taxiway 6 lctd between S end of rnwy 18 and AF ramp clsd-const-mrkd with yellow barricades and flares nqts. (4-23)
MILWAUKEE-GENERAL MITCHELL FLD-TOWER: ASR will issue distance values in n miles in connection with radar control. All acft apchg Milwaukee with intentions to lndg will, during VFR conditions and if equip with multiple rdo freq, make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or before reaching a point 15 mi from the arpt giving position and altitude. (5-10) FLD: Rnwy 7L-25R open daylgt hrs only. E taxi strip clsd to all tri-gear acft and jets. Obstn lgts on apch end rnwy 13 are obscured by trees. Parking fac limited-itinerant military acft on unofficial bus, may find parking fac unavailable. (5-14)
MILWAUKEE-MAITLAND FLD: Closed all operations. (5-29)
WYOMING: CAMP GUERNSEY: A temp controlled firing area is established as follows: Name: Camp Guernsey, Wyo. Description: Beginning at lat 42-16-00, long. 104-42-00, thence to lat 42-12-00, long. 104-42-00, thence to lat 42-12-00, long. 104-45-00, thence to lat 42-16-00, long. 104-45-00, thence to point of beginning. Altitude: Surface to 6,000' MSL. Activities: 155 mm and 105 mm Howitzer firing max of 15 rounds each day. Time of Use: Daily, 1000-1700 hours (MST). Controlling Agency: Adjutant General, Wyoming National Guard, Cheyenne, Wyoming. Effective dates: 15 and 16 June 1956.
CASPER-NATRONA CO. ARPT-TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs. FLD: Caution all acft entering tfc pat, occasional jet acft opern with pick up and dropping of tow targets. (4-29) Rnwy 12-30 clsd. Acft to be parked on rnwy. (6-7)
CHEYENNE ARPT: Overrun lgts rnwy 8-26 inop. (5-24)
GILLETTE ARPT: 50-75' W shoulder 1500' from N end N/S strip soft-clsd to hvy acft.
JACKSON ARPT: E/W rnwy clsd-fence const across rnwy just W of N/S rnwy. Small acft may use E end of E/W rnwy in case of emerg, but at own risk. N/S rnwy clsd, const. Use new auxiliary 150' x 5400' strip E of N/S rnwy. (3-15)
KEMMERER ARPT: Entire fld clsd all operns, xcpt graded 4000' S end N/S rnwy. Use extreme caution when wet. (11-6)
LARAMIE-RADIO: DME coverage 155°-225°, 35 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'.
★RAWLINS-RADIO: June 6, trans & rcvr 243.0 mc cmsnd. Rcvd too late for ANRA page.
RIVERTON ARPT: Men, equip on fld. 5000' W end rnwy 28 surfaced and available. Remainder arpt closed. (4-12)
ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000'.
ROCK SPRINGS-RADIO: ILS glide slope has lgt to moderate roughness between OM and LF rng.
ROCK SPRINGS ARPT: Caution-first 500' NW end NW/SE rnwy clsd- marked.
SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.
TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men, equip on fld. Use extreme caution. (10-4)
Puerto Rico: SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2, 3,4 and 5 on N departure ramp not fully visible from tower-caution. (6-7)

1/ CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE, AND REPORTING POINT AMENDMENTS: Effective July 2, 1956, unless otherwise advised, the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Amber civil airway No. 7 (Key West, Fla., to United States-Canadian Border), is amended between Key West, Fla., and Miami, Fla., rdo rng stns to read: "From the Key West, Fla., rdo rng stn via the Marathon, Fla., nondirectional rdo bcn; Homestead, Fla., AFB nondirectional rdo bcn; Miami, Fla., rdo rng stn;"

(2) Blue civil airway No. 48 (Marathon, Fla., to Miami, Fla), is added to read: "From the Marathon, Fla., nondirectional rdo bcn via the intsxn of the NE course of the Key West, Fla., rdo rng and the SE course of the Miami, Fla., rdo rng to the Miami, Fla., rdo rng stn."

(3) VOR civil airway No. 54 (Texarkana, Ark., to Charlotte, N. C.), is amended by deleting the portion which reads: "to the Muscle Shoals, Ala., omnirng stn. From the Chattanooga, Tenn., omnirng stn via the Spartanburg, S. C., omnirng stn; to the Charlotte, N. C., omnirng stn." and by adding the following portion in lieu thereof: "Muscle Shoals, Ala., omnirng stn; Huntsville, Ala., omnirng stn; Chattanooga, Tenn., omnirng stn; Spartanburg, S. C., omnirng stn; to the Charlotte, N. C., omnirng stn."

CONTROL AREA: (1) Blue civil airway No. 48 (Marathon, Fla., to Miami, Fla.), is added to read: "All of Blue civil airway No. 48."

CONTROL AREA EXTENSIONS: (1) (Marathon, Fla.) Caption changed and amended to read: "Within 5 miles either side of a line bearing 219° T extending from the Marathon, Fla., nondirectional rdo bcn to the northern boundary of the Havana, Cuba, Control Area, excluding the portion below 2000' between Amber civil airway No. 7 and the Havana Control Area boundary, and within 5 miles either side of a direct line extending from the Marathon, Fla., nondirectional rdo bcn to the Tamiami, Fla., nondirectional rdo bcn."

(2) (Miami, Fla.), is added to read: "That airspace S of Miami bounded on the E by Miami control area extension, on the South by Blue civil airway No. 48 and Amber civil airway No. 7, and on the NW by Blue civil airway No. 19; that airspace SW of Miami bounded on the N by Blue civil airway No. 3, on the SE by Blue civil airway No. 19 and on the W by the Marathon control area extension."

(3) (Huntsville, Ala.), is added to read: "Within 5 miles either side of the 341° T and 161° T radials of the Huntsville omnirng extending from the omnirng stn to points 15 miles NW and SE excluding the portion which overlaps the Redstone Arsenal restricted area (R-112)."

CONTROL ZONES: (1) (Homestead, Fla.), is added to read: "Within a 5 mile radius of the Homestead Air Force Base and within 2 miles either side of the centerline of the NE-SW runway extending from the runway end to a point 10 miles SW of the Homestead AFB nondirectional rdo bcn."

(2) (Huntsville, Ala.), is added to read: "Within a 6 mile radius of the Huntsville Mun. Airport excluding the portion which overlaps the Redstone Arsenal restricted area (R-112)."

REPORTING POINTS: (1) Amber civil airway No. 7 (Key West, Fla., to United States-Canadian Border), is amended by changing all before Miami, Fla., rdo rng stn to read: "Key West, Fla., rdo rng stn; Marathon, Fla., nondirectional rdo bcn; Homestead, Fla., AFB nondirectional rdo bcn; Miami, Fla., rdo rng stn;"

(2) Blue civil airway No. 48 (Marathon, Fla., to Miami, Fla.), is added to read: "The intsxn of the SE course of the Miami, Fla., rdo rng and the NE course of the Key West, Fla., rdo rng."

VOR REPORTING POINT: (1) Domestic VOR reporting points is amended by adding the following reporting point: (a) Sable Intsxn - the intsxn of the SW course of the Perrine, Fla., rdo rng and the centerline of the Marathon control area extension."

(12 Jun 1956)

Revisions to Instrument Approach Procedures

LOW FREQUENCY RANGE PROCEDURES

(DISTANCES ARE IN NAUTICAL MILES)

If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

GROUND CONTROLLED APPROACH SYSTEM PROCEDURES

If a GCA instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with GCA to final authorized landing minimums the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a PAR approach or, for more than 30 seconds during an ASR approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing, minimums; or (D) if landing is not accomplished.

RADIO FACILITY DATA Page 2

VOL. 11, NO. 8 ..... JUNE 26, 1956

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

ATC IFR CLEARANCE PHRASEOLOGY: Effective November 15, 1955, ATC facilities will resume general use of the phrase "VIA FLIGHT PLANNED ROUTE" in air traffic clearances to replace the lengthier detailed description of any portion of the route of flight that is identical to the route filed by the pilot. When used, the phrase will be preceded by sufficient detailed route of flight information to establish the flight on the filed route. The "VIA FLIGHT PLANNED ROUTE" phraseology does not include approval of altitudes filed in the flight plan. Specific altitudes assignments will be issued in each clearance. IFR flight plans filed by the pilots should contain the complete route of flight and should be relayed to air traffic control unchanged. Pilots may request route verification when considered necessary and are requested to do so whenever a filed route has been changed prior to departure. If route verification is desired prior to departure, the request should be included with the initial call for taxi clearance to avoid delay in receiving the information.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequences available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange .--.. -.-.... (Voice) (LGB in Code).

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy fields is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

WARNING OF MAINTENANCE AT CAA NAVAIDS: During periods of routine or emergency maintenance, the coded identification (or code and voice, where applicable) will be removed from certain CAA Navaids, namely, ILS localizers, VHF ranges (VOR, TVOR and VAR) and L/MF ranges but not from "H" facilities, compass locators or 75 mc marker beacons. The removal of identification serves as a warning to pilots that the facility has been officially taken over by "Maintenance" for tune-up or repair and may be unreliable even though on the air intermittently or constantly.

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS: In the Airman's Guide, "n miles" or "n mi" stands for nautical miles; "s miles" or "s mi" for statute miles.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

RADIO CALL-UP PROCEDURES - ARTC CENTERS: Effective February 1, 1956, aircraft on IFR flight plans making position reports direct to ARTC centers shall, in the initial call-up include the fix or geographical location over which the aircraft is reporting. Examples: "Indianapolis Center, this is TWA 55, Maxwell, over."; "Indianapolis Center, this is Beechcraft 1234, 20 south of Maxwell, over."

Pilots are reminded, however, that direct communication with the center shall NOT be established until the pilot is specifically requested to do so.

UNACCEPTABLE RADIO MESSAGES: CAA facilities will no longer accept non-safety messages (requests for ground transportation, meals, telephone calls, etc.) from pilots of aircraft in flight. Arrangements should be made by a pilot prior to departure via public communications (telephone, telegraph, etc.) for such requirements. Pilots are also reminded that transmission of such messages violates the terms of their aircraft radio license as provided in Part 9 of the FCC Regulations.

CLASSIFICATION OF ILS BACK COURSES: ILS back courses have in the past been classified as either "usable" or "unusable". It now appears that further classification of the "unusable" courses are necessary, since some back courses formerly classified as "unusable" actually may be satisfactory for intersections, holding, transitions or missed approaches, even though they are not satisfactory for back course approaches.

ILS back courses will in the future be classified as follows:

Usable	-	suitable for ILS back course approaches
Restricted	-	not suitable for ILS back course approaches, but suitable for intersections, holding, transitions or missed approaches
Unusable	-	not suitable for any of the above.

SPURIOUS GLIDE SLOPE INDICATIONS: CAA glide slope facilities are intended to provide reliable glide slope signals for use in conjunction with the front course of the ILS localizer. Glide slope signals may be received in other azimuths (because of stray radiation from the antennas and reflections from nearby objects) which may in some cases be sufficient to activate the airborne warning flag. Any glide slope needle activity in these other azimuths should be disregarded.

All pilots are particulary cautioned to ignore glide slope indications when making back course localizer approaches. All CAA approved procedures for back course approaches are limited to use of the localizer portion of the ILS. Any attempt to fly spurious glide slope indications on such back course approaches could result in hazardous operations.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, regardless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

✓ CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective July 26, 1956, unless otherwise advised, the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Amber civil airway No. 1 (United States-Mexican Border to Nome, Alaska), is amended by changing the portion which reads: "excluding the portion which the Fort Lewis, Wash., restricted area (R-244);" to read: "excluding the portion below 1500' MSL which lies over Fort Lewis, Wash., restricted area (R-503) and the portion below 5000' MSL which lies over Fort Lewis, Wash., restricted area (R-504);"

(2) Amber civil airway No. 7 (Key West, Fla., to United States-Canadian Border), is amended between the Charleston, S. C., and Raleigh, N. C., rdo rng stns to read: "Charleston, S. C., rdo rng stn; the intsxn of the NE course of the Charleston, S. C., rdo rng and the S course of the Florence, S. C., rdo rng; Florence, S. C., rdo rng stn; the intsxn of the N course of the Florence, S. C., rdo rng and the SW course of the Raleigh, N. C., rdo rng; Raleigh, N.C., rdo rng stn;"

(3) Red civil airway No. 16 (Tallahassee, Fla., to Raleigh, N. C.), caption changed and is amended by changing the last portion to read: "From the Augusta, Ga., rdo rng stn via the Columbia, S. C., rdo rng stn; the intsxn of the E course of the Columbia, S. C., rdo rng and the S course of the Florence, S. C., rdo rng; Florence, S. C., rdo rng stn; Lumberton, N. C., nondirectional rdo bcn; the intsxn of a line bearing 21° T from the Lumberton, N. C., nondirectional rdo bcn and a line bearing 191° T from the Raleigh, N. C., rdo rng stn to the Raleigh, N. C. rdo rng stn."

(4) Red civil airway No. 74 (New Orleans, La., to Bay Minette, Ala.), is amended to read: "From the intsxn of the E course of the New Orleans, La., rdo rng with a line bearing 225° T from the Bay Minette, Ala., nondirectional rdo bcn to the Bay Minette, Ala., nondirectional rdo. bcn."

(5) Blue civil airway No. 3 (Miami, Fla., to Sault Ste. Marie, Mich.), is amended by changing the portion which reads: "Cross City, Fla., rdo rng to the intsxn of the NW course of the Cross City, Fla., rdo rng and the E course of the Tallahassee, Fla., rdo rng stn," to read: "Cross City, Fla., rdo rng stn to the Tallahassee, Fla., rdo rng stn, excluding the portion above 19,000' MSL which lies within the Tyndall AFB restricted area (R-336) between sunset and sunrise."

(6) VOR civil airway No. 1 (Charleston, S. C., to New York, N. Y.), is amended by changing the first portion to read: "From the Charleston, S. C., omnirng stn via the Myrtle Beach, S. C., omnirng stn; Wilmington, N. C., omnirng stn; New Bern, N. C., omnirng stn; Cofield, N. C., omnirng stn; intsxn of the Cofield omnirng 058° T radial and the SW course of the Norfolk, Va. ILS lclzr; Norfolk, Va., ILS lclzr; to the point of intsxn of the Norfolk ILS lclzr NE course and the Norfolk, Va., VAR N course, excluding the portion of this arwy above 5500' MSL within 60 s miles of a point at lat 34-54-30N, long. 76-53-00W, daily from sunset to sunrise."

(7) VOR civil airway No. 7 (Miami, Fla., to Green Bay, Wisc.), is amended by changing all before the Muscle Shoals, Ala., omnirng stn to read: "From the Miami, Fla., omnirng stn via the Fort Myers, Fla., omnirng stn; Lakeland, Fla., omnirng stn, including an E alternate via the intsxn of the Fort Myers omnirng 035° T and the Lakeland omnirng 161° T radials; Cross City, Fla., omnirng stn, including a W alternate from the Fort Myers omnirng stn to the Cross City omnirng stn via the Tampa, Fla., omnirng stn and the intsxn of the Tampa omnirng 012° T and the Cross City omnirng 150° T radials; Tallahassee, Fla., omnirng stn; Marianna, Fla., omnirng stn, including a W alternate from the Cross City omnirng stn to the Marianna omnirng stn via the intsxn of the Cross City omnirng 287° T and the Marianna omnirng 141° T radials; Dothan, Ala., term omnirng stn; intsxn of the Dothan term omnirng 336° T and the Montgomery omnirng 123° T radials; Montgomery Ala., omnirng stn; Birmingham, Ala., omnirng stn, including an E alternate via the intsxn of the Montgomery omnirng 358° T and the Birmingham omnirng 138° T radials and also a W alternate; intsxn of the Birmingham omnirng 358° T and the Muscle Shoals omnirng 129° T radials; Muscle Shoals, Ala., omnirng stn."

(8) VOR civil airway No. 23 (San Diego, Calif., to Bellingham, Wash.), is amended by adding a new last sentence to read: "The portion of this arwy below 1500' above MSL which overlaps the Fort Lewis restricted area (R-503) and the portion of this arwy below 5000' above MSL which overlaps the Fort Lewis restricted area (R-504) are excluded."

(9) VOR civil airway No. 97 (Miami, Fla., to Alexandria, Minn.), is amended by changing the portion which reads: "Tallahassee, Fla., omnirng stn, including an E alternate from the Tampa omnirng stn to the Tallahassee omnirng stn via the intsxn of the Tampa omnirng 331° T and the Cross City omnirng 182° T radials, the Cross City, Fla., omnirng stn and the intsxn of the Cross City omnirng 287° T and the Tallahassee omnirng 150° T radials;"to read: "Tallahassee, Fla., omnirng stn, including an E alternate from the Tampa omnirng stn to the Tallahassee omnirng stn via the intsxn of the Tampa omnirng 331° T and the Cross City omnirng 182° T radials and the Cross City, Fla., omnirng stn; "

(10) VOR civil airway No. 99 (Newport, Oreg., to Vancouver, B. C.), is amended by changing the portion which reads: "to the Vancouver, B. C., rdo rng stn, excluding the portion which overlaps the Fort Lewis restricted area." to read: "to the Vancouver, B. C., rdo rng stn, excluding the portion of this arwy, below 14,000' above MSL, which overlaps the Fort Lewis restricted area (R-505)."

(11) VOR civil airway No. 194 (Royston, Ga., to Norfolk, Va.), is amended by changing all after the Charlotte, N. C., omnirng stn to read: "Charlotte, N. C. omnirng stn; Raleigh, N.C., omnirng stn; Rocky Mount, N. C., omnirng stn, including a S alternate via the intsxn of the Raleigh omnirng 116° T and the Rocky Mount omnirng 237° T radials; Cofield, N. C., omnirng stn; point of intsxn of the Cofield, N. C. omnirng 058° T and the Norfolk, ILS lclzr SW course; Norfolk, Va. ILS lclzr; to the point of intsxn of the Norfolk ILS lclzr NE course and the Norfolk, Va., VAR N course."

(12) VOR civil airway No. 208 (Los Angeles, Calif., to Needles, Calif.), is amended to read: "From the Los Angeles, Calif., omnirng stn via the intsxn of the Los Angeles omnirng 185° T and the Oceanside omnirng 280° T radials; Oceanside, Calif., omnirng stn; point of intsxn of the Oceanside 101° T and the San Diego, Calif., omnirng 046° T radials; Thermal, Calif., omnirng stn; to the Needles, Calif., omnirng stn."

(13) VOR civil airway No. 241 (Kinston, N. C. to Cofield, N. C.), is added to read: "From the point of intsxn of the Wilmington, N. C., omnirng 005° T and the New Bern, N. C., omnirng 297° T radials to the Cofield, N. C., omnirng stn."

(14) VOR civil airway No. 243 (Chattanooga, Tenn., to Bowling Green, Ky.), is added to read: "From the Chattanooga, Tenn., omnirng stn to the Bowling Green, Ky. omnirng stn."

(15) VOR civil airway No. 244 (Crestview, Fla., to Dothan, Ala.), is added to read: "From the Crestview, Fla., omnirng stn via the intsxn of the Crestview omnirng 076° T and the Dothan term omnirng 240° T radials; to theDothan, Ala., term omnirng stn. The portion of this arwy above 19,000' above MSL, which lies within the Tyndall AFB restricted area (R-336), is excluded daily between sunset and sunrise."

CONTROL AREAS: (1) Red civil aireay No. 16 (Tallahassee, Fla., to Raleigh, N.C.), caption changed and is amended to read: "All of Red civil arwy No. 16."

(2) VOR civil airway No. 7 (Miami, Fla., to Green Bay, Wisc.), is amended to read: " "All of VOR civil arwy No. 7, including E and W alternates, but excluding all that airspace below 2000' above MSL which lies beyond the continental limits of the United States and also excluding the airspace between the main arwy and its W alternate between the Cross City, Fla., omnirng stn and the Marianna, Fla., omnirng stn."

(3) VOR civil airway No. 97 (Miami, Fla., to Alexandria, Minn.), is amended to read: "All of VOR civil arwy No. 97 including E and W alternates, but excluding all the airspace below 2000' above MSL which lies beyond the continental limits of the United States."

(4) VOR civil airway No. 208 (Los Angeles, Calif., to Needles, Calif.), is amended to read: "All of VOR civil arwy No. 208."

(5) VOR civil airway No. 241 (Kinston, N. C., to Cofield, N. C.), is added to read: "All of VOR civil arwy No. 241."

(6) VOR civil airway No. 243 (Chattanooga, Tenn., to Bowling Green, Ky.), is added to read: "All of VOR civil arwy No. 243."

(7) VOR civil airway No. 244 (Crestview, Fla., to Dothan, Ala.), is added to read: "All of VOR civil arwy No. 244."

CONTROL AREA EXTENSIONS: (1) (New Orleans, La.), is amended by changing the words which read: "and on the N by Green civil arwy No. 6;" to read: "and on the N by Red civil arwy No. 30;"

(2) (Memphis, Tenn.), is amended to read: "That airspace within a 50 mi radius of the Memphis rdo rng stn lying in the SE, SW and NW quadrants of the rdo rng and that airspace within an arc 45 mi in radius from the Memphis NAS rdo rng stn bounded on the W and NW by VOR civil arwy No. 11 and on the SE by Green civil arwy No. 5".

(3) (Tallahassee, Fla.), is amended to read: "That airspace bounded on the N by VOR civil arwy No. 22, on the E by VOR civil arwy No. 159 and on the S and W by VOR civil arwy No. 7W, excluding the portion above 19,000' MSL between sunset and sunrise which lies within Tyndall AFB restricted area (R-336)."

(4) (Seattle, Wash.), is amended to read: "That airspace within a 30 mi radius of the Seattle-Tacoma Intnl Arpt, excluding the portion below 1500' MSL which lies over Fort Lewis restricted area (R-503), below 5000' MSL which lies over Fort Lewis restricted area (R-504), and below 14,000' MSL which lies over Fort Lewis restricted area (R-505); that airspace SSW of Seattle bounded on the S by lat 46-35-00, on the W by long. 123-03-00 and on the NNE by Blue civil arwy No. 71; that airspace N of Seattle bounded on the S by Red civil arwy No. 79, on the E by Green civil arwy No. 10, and on the NW by a line extending from a point at lat 48-02-00, long. 122-26-00 to a point at lat 47-55-00, long. 122-32-00."

(5) (Edenton, N. C.), is added to read: "That airspace bounded on the W by Amber civil arwy No. 9, on the N by the Norfolk, Va., control area extension, on the NE by Red civil arwy No. 34 and the Elizabeth City, N. C., control area extension, on the SE by the NW shore of the Pamlico Sound, and on the S by the Cherry Point restricted area (R-123), excluding the portions which overlap Albemarle Sound restricted areas R-1, R-2, R-3, R-6, R-7, R-8 and R-9."

(6) (Toledo, Wash.), is amended to read: "Within 5 mi either side of the E course of the Toledo rdo rng extending from the rdo rng stn to a point 20 mi E and within five miles either side of the W course of the rdo rng extending from the rdo rng stn to a point 25 mi W, excluding the portion which overlaps restricted areas."

(7) (Cross City, Fla.), is amended by adding the following portion to present control area extension: "and within 5 mi either side of the 242° T radial of the Cross City omnirng extending from the omnirng stn to the eastern boundary of VOR civil arwy Nos. 35 and 97."

(8) (Tacoma, Wash.), is amended to read: "That airspace within a 40 n mi radius of McChord AFB excluding the following: the portions which overlap Hood Canal Caution Area (C-243) and VOR civil arwy No. 27, the portion which conflicts with Olympic Peninsula restricted area (R-241), the portions below 1500' MSL which lie over Fort Lewis restricted area (R-503), below 5000' MSL which lie over Fort Lewis restricted area (R-504) and below 14,000' MSL which lie over Fort Lewis restricted area (R-505)."

(9) (Fayetteville, N. C.), is revoked.

(10) (Blytheville, Ark.), is added to read: "That airspace NW of the Blytheville AFB bounded on the E by VOR civil arwy No. 9, on the S by VOR civil arwy No. 140, on the W by VOR civil arwy No. 69, and on the N by a line extending through a point at lat 36-21-00, long. 90-04-00" and a point at lat 36-32-00, long. 90-40-00."

(11) (Yakataga, Alaska), is amended by changing the last word from "SW to "SE".

(12) Five mile radius zones is amended by deleting the following arpt: Memphis, Tenn.: Naval Air Station.

CONTROL ZONES: (1) (Oakland, Calif.), is amended by changing the name "Newark fan marker." to read: "Fremont fan marker."

(2) (Syracuse, N. Y.), is amended to read: "Within a 5 mi radius of the Clarence E. Hancock Arpt, within 2 mi either side of the Syracuse ILS lclzr E course extending from the lclzr to a point 10 mi E of the OM, within 2 mi either side of a direct line extending westward from the arpt to the Syracuse rdo rng stn thence within 2 mi either side of the W course of the W course of the rdo rng extending from the rdo rng stn to a point 10 mi W, and the airspace within 2 mi either side of the 120° T and 300° T radials of the Syracuse omnirng extending to a point 10 mi NW of the omnirng stn."

(3) (Albany, Ga.), is amended to read: "Within a 5 mi radius of the Albany Mun. Arpt, within 2 mi either side of the 155° T and 335° T radials of the Albany omnirng extending from the Mun. Arpt. control zone to a point 10 mi NW of the omnirng stn, within a 5 mi radius of Turner AFB, within 2-1/2 mi either side of a line extending from Turner AFB to the Doles nondirectional bcn, and within 2 mi either side of the E and S courses of the Albany rdo rng extending from the rdo rng stn to points 10 miles E and S of the rdo rng stn."

(4) (Tacoma, Wash.), is amended to read: "Within a 5 mi radius of McChord AFB, Tacoma, Wash., excluding the portion below 1500' MSL which lies over Fort Lewis restricted area (R-503)."

(5) (Memphis, Tenn.), is added to read: "Within a 5 mi radius of the Memphis Naval Air Station and witin 2 mi either side of the SW and NE courses of the Memphis NAS rdo rng extending from the five mile radius control zone to the Gainsville nondirectional rdo bcn."

(6) (Blytheville, Ark.), is added to read: "Within a 5 mi radius of the Blytheville AFB and within 2 mi either side of a line extending from the AFB to a point 2 mi N of the Blytheville nondirectional rdo bcn."

REPORTING POINTS: (1) Amber civil airway No. 7 (Key West, Fla., to United S States-Canadian Border), is amended by deleting the following reporting point: "Lumberton, N. C., nondirectional rdo bcn;"

(2) Red vivil airway No. 16 (Tallahassee, Fla., to Raleigh, N. C.), caption changed and is amended to read: "Albany, Ga., rdo rng stn; Columbia, S. C., rdo rng stn; Lumberton, N.C. nondirectional rdo bnc."

VOR REPORTING POINTS: (1) Domestic VOR reporting points is amended by adding the following reporting points to read: (a) Dothan, Ala., term omnirng stn. (b) Cofield, N.C., omnirng stn.

(2) Domestic VOR reporting points is amended by changing the following reporting point to read: (a) Avalon Intsxn - the intsxn of the Oceanside, Calif., omnirng 280° T and the Long Beach, Calif., omnirng 200° T radials.

(3) Domestic VOR reporting points is amended by revoking the following reporting point to read: (a) Harrelsville Intsxn - the intsxn of the Williamston, N. C. VAR N course and the Rocky Mount, N. C., omnirng 064° T radial.

(26 June 1956)

✓ MINIMUM EN ROUTE ALTITUDES: The following minimum en route IFR altitudes are amended as follows, effective July 14, 1956: (Amendment 4)

Section 610.1001 is amended to read:

COLUMBUS, OHIO AREA: The routing in Columbus, Ohio, Area as outlined on this chart and as listed in temporary intersection changes should be charted and utilized until further advised. Use this data in conjunction with Coast and Geodetic Survey RF Chart 7. Effective immediately:

CANCEL: (1) Marion Intsxn, Ohio - the intsxn of the Mansfield, Ohio VOR 243° mag radial and the Columbus, Ohio VOR 338° mag radial.

(2) Marysville, Ohio Intsxn - the intsxn of the Dayton, Ohio VOR 061° mag radial and the Columbus, Ohio 305° mag radial.

(3) Irwin, Ohio LFR/VOR Intsxn - the intsxn of the Columbus, Ohio VOR 283° mag radial and the Springfield, Ohio MH 225° bearing.

(4) Urbana, Ohio Intsxn - the intsxn of the Columbus, Ohio VOR 283° mag radial and the Dayton, Ohio VOR 061° radial.

(5) Sidney, Ohio Intsxn - the intsxn of the Columbus, Ohio VOR 283° mag radial and the Dayton, Ohio VOR 019° mag radial.

(6) Baltic, Ohio Intsxn - the intsxn of the Columbus, Ohio VOR 069° mag radial and the Mansfield, Ohio VOR 123° mag radial.

(7) Sunbury, Ohio Intsxn - the intsxn of the Columbus, Ohio VOR 338° mag radial and the Mansfield, Ohio VOR 220° mag radial.

(8) Delaware, Ohio Intsxn - the intsxn of the Columbus, Ohio VOR 320° mag radial and the Mansfield, Ohio VOR 221° mag radial.

(9) Glenford, Ohio, Intsxn - the intsxn of the Columbus, Ohio VOR 120° mag radial and the Mansfield, Ohio VOR 179° mag radial.

DESIGNATE AND/OR REDESIGNATE: (1) Lewisburg, Ohio Intsxn - the intsxn of the Dayton, Ohio VOR 061° mag radial and the 120° mag bearing to the Columbus, Ohio LFR.

(2) Richwood, Ohio Intsxn - the intsxn of the Findlay, Ohio VOR 144° mag radial and the Dayton, Ohio VOR 061° mag radial.

(3) Xenia, Ohio Intsxn - the intsxn of the 011° mag bearing to Springfield, Ohio rdo bcn and the 069° mag bearing to Columbus, Ohio LFR.

(4) Mechanicsburg, Ohio Intsxn - MRA-3500' - the intsxn of the Dayton, Ohio VOR 089° mag radial, Findlay, Ohio VOR 174° mag radial and the 225° mag bearing to Springfield, Ohio rdo bcn.

(5) West Jefferson, Ohio Intsxn - MRA-3800' - the intsxn of the Findlay, Ohio VOR 158° mag radial and the 091° mag bearing to Columbus, Ohio LFR.

(6) Fredericktown, Ohio Intsxn - MRA-4500' - the intsxn of the Findlay, Ohio VOR 120° mag radial and the 209° mag bearing to Columbus, Ohio LFR.

(7) Mt. Hope, Ohio Intsxn - MRA-4000' - the intsxn of the Mansfield, Ohio VOR 102° mag radial, Youngstown, Ohio VOR 235° mag radial and the 234° mag bearing to Columbus, Ohio LFR.

(8) Homer, Ohio Intsxn - the intsxn of the Mansfield, Ohio VOR 187° mag radial and the 234° mag bearing to Columbus, Ohio LFR.

(9) Tiverton, Ohio Intsxn - the intsxn of the Mansfield, Ohio VOR 151° mag radial and the 234° mag bearing to Columbus, Ohio LFR.

(10) Briar Hill, Ohio Intsxn - MRA-4000' - the intsxn of the Mansfield, Ohio VOR 123° mag radial and the 234° mag bearing to Columbus, Ohio LFR.

(11) Baltic, Ohio, Intsxn - the intsxn of the Mansfield, Ohio VOR 123° mag radial, Wheeling, W. Va. VOR 286° mag radial and the 021° mag bearing to Akron, Ohio LFR.

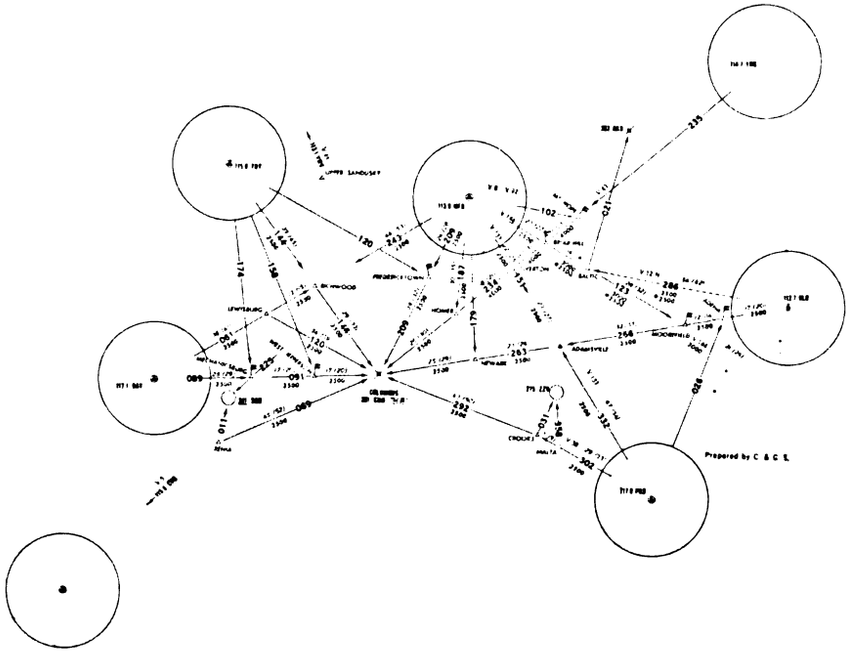
(12) Adamsville, Ohio Intsxn - the intsxn of the Wheeling, W. Va., VOR 266° mag radial, Parkersburg, W. Va. VOR 332° mag radial and the 263° mag bearing to Columbus, Ohio LFR.

(13) Newark, Ohio Intsxn - the intsxn of the Mansfield, Ohio VOR 179° mag radial and the 263° mag bearing to Columbus, Ohio LFR.

(14) Moorefield, Ohio, Intsxn - MRA-3000' - the intsxn of the Wheeling, W. Va. VOR 266° mag radial and the Mansfield, Ohio VOR 123° mag radial.

(15) Adena, Ohio Intsxn - MRA-3500' - the intsxn of the Wheeling, W. Va. VOR 266° mag radial and Parkersburg, W. Va. VOR 026° mag radial.

(16) Crooks, Ohio Intsxn - the intsxn of the Parkersburg, W. Va. VOR 302° mag radial, 031° mag bearing to Zanesville, Ohio rdo bcn and the 292° mag bearing to Columbus, Ohio LFR.



RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effeciive as indicated:

(Part 608 - Restricted Areas - Amednment 168)
(July 20, 1956)

(1) In Section 608.20, the Craters of the Moon, Idaho, area (R-458 formerly D-458), published on May 29, 1954 in 19 F.R. 3183, is rescinded.

(2) In Section 608.34, a Virgelle, Montana, area (R-507), is added to read: "Name and location: Virgelle Bombing and Gunnery Range (R-507). Description by Geographical Coordinates: Beginning at lat 48-07-45, long. 110-04-00; thence to lat 47-46-50, long. 109-53-40; thence to lat 47-44-00, long. 110-06-00; thence to lat 48-07-45, long. 110-17-30; thence to point of beginning. Designated Altitudes: 50,000' MSL. Time of Designation: Daylight hours. Controlling Agency: Malmstrom AFB, Montana."

(3) In Section 608.55, the Coulee Dam, Washington, area (R-248 formerly D-248), amended on October 31, 1951 in 16 F. R. 11066, is redesignated as follows: "Description by Geographical Coordinates: Beginning at Tonasket, Wash., thence on a direct line to Colville, Wash; thence due S to lat 48-21-00, long. 117-54-00; thence counterclockwise along an arc of 45 n mi radius centered on Fairchild AFB to a point at lat 47-44-35, long. 118-44-00; thence on a direct line to Entiat, Wash.; thence northeasterly along the Columbia River to it's junction with the Okanogan River, thence northerly along the Okanogan River to point of beginning. Designated Altitudes: All airspace above 20,000 feet MSL. Time of Designation: Continuous. Controlling Agency: Ninth Air Division (Defense), Geiger Fld, Spokane, Wash."

(4) In Section 608.52, the Wendover, Utah, Number 3 area (R-508), is added to read: "Description by Geographical Coordinates: Beginning at lat 40-36-30, long. 114-14-00; thence to lat 40-38-00, long. 114-07-40; thence to lat 40-38-00, long. 114-00-00; thence to lat 40-26-00, long. 114-00-00; thence to lat 40-26-00, long. 114-08-00; thence to lat 40-20-00, long. 114-08-00; thence to lat 40-20-00, long. 114-18-00; thence to point of beginning. Designated Altitudes: Surface to 50,000' MSL. Time of Designation: Continuous. Controlling Agency: Wendover AFB, Utah.

(Part 608 - Restricted Areas - Amendment 169)
(July 26, 1956)

(1) In Section 608.30, the Camp Lucas, Mich., Area (R-467), amended on April 12, 1956 in 21 F. R. 2373, is further amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat 46-58-15N, long. 85-03-00W; thence to lat 46-53-30N, long. 84-51-30W; thence to lat 46-52-30N, long. 84-51-15W; thence to lat 46-49-00N, long. 84-54-30W; thence to lat 46-53-30N, long. 85-07-00W; thence to point of beginning" and by changing the "Time of Designation" column to read: "Days, April 1 to November 30 annually".

(2) In Section 608.55, the Fort Lewis, Wash., area (R-244 formerly D-244), amended on January 3, 1951 in 16 F.R. 4, is rescinded.

(3) In Section 608.58, the Casper, Wyoming, area (R-461 formerly D-461), amended on June 26, 1954 in 19 F. R. 3906, is further amended by changing the "Controlling Agency" column to read: "Adjutant General, Wyoming National Guard, Cheyenne, Wyoming."

(4) In Section 608.55, a Fort Lewis, Wash., area (R-503), is added to read: "Description by Geographical Coordinates": From a point on Highway US 99 at lat 47-06-35, long. 122-34-05; southeasterly along road to Northern Pacific Railroad at lat 47-05-22, long. 122-30-15; thence southerly along railroad to lat 47-03-10, long. 122-31-25; thence northwesterly to the western edge of Victor Arwy No. 23 at lat 47-04-25, long. 122-35-15; thence northerly along the western edge of Victor Arwy No. 23 to point of beginning at lat 47-06-35, long. 122-34-05. Designated Altitudes: Surface to 1500' MSL. Time of Designation: Continuous. Controlling Agency: Commanding General, Fort Lewis, Wash."

(5) In Section 608.55, a Fort Lewis, Wash., area (R-504), is added to read: "Description by Geographical Coordinates: From a point of on theNorthern Pacific Railroad at lat 47-03-10, long. 122-31-25, southerly along railroad to lat 47-02-30, long. 122-31-40; thence E to lat 47-02-30, long. 122-31-00; thence southerly to lat 47-00-50, long. 122-31-25; thence W to the Northern Pacific Railroad at lat 47-00-50, long. 122-32-10; thence southerly along the railroad to lat 46-54-30, long. 122-39-20; thence northeasterly along the western edge of Victor Arwy No. 23 to lat 47-04-25, long. 122-35-15; thence southeasterly to point of beginning at lat 47-03-10, long. 122-31-25. Designated Altitudes: Surface to 5,000' MSL. Time of Designation: Continuous. Controlling Agency: Commanding General, Fort Lewis, Wash."

(6) In Section 608.55, a Fort Lewis, Wash. area (R-505), is added to read: "Description by Geographical Coordinates: From a point along Highway US 99 at lat 47-05-25, long. 122-38-10; thence southeasterly to the western edge of Victor Arwy No. 23 at lat 47-04-25, long. 122-35-15; thence southwesterly along the western edge of Victor Arwy No. 23 to lat 46-54-30, long. 122-39-20; thence southwesterly along the Northern Pacific Railroad to town of Ranier, Wash. at lat 46-53-12, long. 122-41-15; thence northwesterly along road to road junction at lat 46-57-12, long. 122-46-47; thence due N to Northern Pacific Railroad at lat 46-59-52, long. 122-46-47; thence northeasterly along railroad to Highway US 99 at lat 47-05-00, long. 122-40-04; thence northeasterly along Highway 99 to point of beginning at lat 47-05-25, long. 122-38-10. Designated Altitudes: Surface to 14,000' MSL. Time of Designation: Continuous. Controlling Agency: Commanding General, Fort Lewis, Wash."

(Part 608 - Restricted Areas - Amendment 170)
(July 26, 1956)

(1) In Section 608.41, the Cherry Point, N. C., area No. 2 (R-125), amended on Aug. 12, 1955 in 20 F.R. 5850, is further amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat 35-46-30, long. 76-47-00; southwesterly along the E edge of Amber Civil Airway No. 9 to lat 34-21-40, long. 77-41-30; clockwise along the arc of a circle with a radius of 60 s mi centered at lat 34-54-30, long. 76-53-00; to lat 34-26-50, long. 77-46-35; thence N to lat 35-20-30, long. 77-40-50; thence NE to lat 35-40-00, long. 77-23-40, clockwise along the arc of a circle with a radius of 60 s mi centered at lat 34-54-30, long. 76-53-00; to lat 35-46-30, long. 76-47-00, point of beginning."

ON-REQUEST REPORTING POINTS: The following on-request reporting points are designated, redesignated or cancelled and shall become effective July 26, 1956:

DESIGNATE:

(1) BIVINS VHF INTSXN - the intsxn of the Amarillo, Tex. VOR 321° mag radial and 340° mag bearing from the Amarillo, Tex. ILS LOM.

(2) BRISTOL VHF INTSXN - the intsxn of the Tallahassee, Fla., VOR 235° mag and the Marianna, Fla. VOR 138° mag radials.

(3) BURNET, TEX. VHF INTSXN - the intsxn of the NW lclzr course of the Austin, Texas ILS and the Austin, Tex. VOR 205° mag radial.

(4) CLAUDE VHF INTSXN - the intsxn of the Amarillo, Tex. VOR 117° mag radial and the 092° mag bearing from the Amarillo, Tex. ILS LOM.

(5) FINLEY VHF INTSXN - the intsxn of the Amarillo, Tex. VOR 132° mag radial and the 092° mag bearing from the Amarillo, Tex. ILS LOM.

(6) GREENFIELD, MASS INTSXN - the intsxn of the E course of the Albany, N. Y. LFR and the N course of the Westfield, Mass. LFR.

(7) MAITLAND, WISC. INTSXN - the intsxn of the Milwaukee, Wisc. VOR 100° mag radial and the Milwaukee ILS lclzr 006° mag (back) course.

(8) MAYFIELD, KANS. INTSXN - the intsxn of the Ponca City, Okla. VOR 318° mag radial (V-77) and the 190° mag (front) course of the Wichita, Kans. ILS lclzr.

(9) MESA GRANDE, CALIF. INTSXN - the intsxn of the 101° T, Oceanside, Calif. VOR and the 046° T of San Diego, Calif. VOR.

(10) ORADELL, N. J. INTSXN - the intsxn of the Caldwell, N. J. VOR 081° mag radial and the Idlewild, N. Y. VOR 345° mag radial.

(11) PALO DURO VHF INTSXN - the intsxn of the Amarillo, Tex. 161° mag radial and the 130° mag bearing from the Amarillo, Tex. ILS LOM.

(12) PANHANDLE VHF INTSXN - the intsxn of the Amarillo, Tex. VOR 075° mag and the 060° mag bearing from the Amarillo, Tex. ILS LOM.

(13) PLANT VHF INTSXN - the intsxn of the Amarillo, Tex. VOR 306° mag radial and the 340° mag bearing from the Amarillo, Tex. ILS LOM.

(14) PLATEAU, TEX. VHF INTSXN - the intsxn of the NW lclzr course of the Austin, Tex. ILS and the Austin, Tex. VOR 260° mag radial.

(15) SACO VHF INTSXN - the intsxn of the Montgomery, Ala. VOR 120° mag and the Dothan, Ala., TVOR 333° mag radials.

(16) SAM VHF INTSXN - the intsxn of the Amarillo, Tex. VOR 270° mag radial and the 302° mag bearing from Amarillo, Tex. ILS LOM.

(17) SEA ISLAND, GA. VHF INTSXN - the intsxn of the Jacksonville, Fla., VOR 025° mag, the Brunswick, Ga. VOR 054° mag and the Savannah, Ga. VOR 180° mag radials.

(18) SMITHVILLE, TENN. VHF INTSXN - the intsxn of the Chattanooga, Tenn. VOR 330° mag and the Crossville, Tenn. VOR 282° mag radials.

(19) SPRINGFIELD, MINN. INTSXN - the intsxn of the SW course of the Minneapolis, Minn. LFR range and the Redwood Falls, Minn. VOR 150° mag radial.

(20) TERESA VHF INTSXN - the intsxn of the Cross City, Fla. VOR 285° mag and the Marianna, Fla. VOR 138° mag radials.

(21) TOWER VHF INTSXN - the intsxn of the Amarillo, Tex., VOR 255° mag radial and the 302° mag bearing from the Amarillo, Tex. ILS LOM.

(22) TYBEE, GA. VHF INTSXN - the intsxn of the Jacksonville, Fla. VOR 025° mag, the Charleston, S. C., VOR 208° mag and the Savannah, Ga. VOR 157° mag radials.

(23) WALL EYE, WISC. INTSXN - the intsxn of the Milwaukee, Wisc. VOR 063° mag radial and the Milwaukee ILS lclzr 006° mag (back) course.

(24) WAYCROSS, GA. VHF INTSXN - the intsxn of the Alma, Ga. VOR 147° mag and the Brunswick, Ga. VOR 285° mag radials.

REDESIGNATE:

(1) BLUE JACKET, FLA. VHF INTSXN - the intsxn of the173° mag radial of the Jacksonville, Fla. VOR and the 087° mag bearing from NAS Cecil (NZC) rdo bcn.

(2) CLEMSON, S. C. VHF INTSXN - the intsxn of the Royston, Ga. VOR 033° mag and the Spartanburg, S. C. VOR 250° mag radials.

(3) HARRIS VHF INTSXN - the intsxn of the Norcross, Ga., 013° mag and the Crossville, Tenn. VOR 127° mag radials.

(4) SHADY GROVE VHF INTSXN - the intsxn of the Montgomery, Ala. VOR 120° mag and the Columbus, Ga. VOR 242° mag radials.

CANCEL:

(1) DRIFTON INTSXN - the intsxn of the Tallahassee, Fla. LFR E course and the Cross City, Fla., LFR NW course.

(2) GANTT INTSXN - the intsxn of the Montgomery, Ala. VOR 189° mag radial and the Marianna, Fla. VOR 300° mag radial.

(3) HARTFORD VHF INTSXN - the intsxn of the Dothan, Ala. TVOR 230° mag and the Marianna, Fla. VOR 300 mag radials.

(4) VEEDERSBURG INTSXN - the intsxn of the SW course LaFayette LFR and the N course of the Terre Haute, Ind. LFR.

✓ NON-STANDARD HOLDING PATTERNS: The following non-standard holding patterns are established and shall become effective July 26, 1956:

(1) COFIELD, N. C. VHF INTSXN - direction of holding - SW on the 223° mag radial (inbound course 043° mag); direction of turns - RIGHT; time - one minute; minimum altitude 1400'.

(2) GREENFIELD, MASS. INTSXN - direction of holding - E (3000') and W (5500') of intsxn; direction of turns - RIGHT; time - one minute.

(3) WALLBURG, N. C. LF INTSXN - direction of holding - SE on SE course of Winston-Salem, N. C. rdo rng (inbound course 328° mag); direction of turns - LEFT; time - two minutes; minimum altitude - 2300'.

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

CSK	Cape Suckling, Alaska, REP (Assignment)
HUO	Huguenot, N.Y., VOR (Assignment)
ICY	Icy Bay, Alaska, REP (Assignment)
RKF	Rockford, Ill., Radiobeacon (Assignment)
SYK	South Yakataga, Alaska, REP (Deletion)
TRT	Trenton, N. J., VOR (Assignment)
URL	Upper Russian Lake, Alaska (Assignment)

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual, Volume 9, dated June 15, 1955, as follows:

(1) Page 24 - St. Louis, Missouri - Correct CAA telephone number to read: PErshing 1-0525.

(2) Page 25 - Columbus, Ohio - Effective July 15, 1956, correct CAA telephone number to read: BElmont 1-2415.

(3) Page 96 - Austin, Texas (Airborne): Correct magnetic bearing from VOR to read: 177°.

(4) Page 98 - Laredo, Texas, (Airborne): add to read: 317°; over Laredo LFR; 1500'.

(5) Page 104 - Sidney, Nebraska (Ground): VOR Check Point decommissioned.

✓ AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orderr for these particular charts should be kept to a minimum until new edition is printed

Cheyenne	Lake Superior	WAC 264
Denver	Milwaukee	WAC 265
La Grande	JN 29	

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

NEW CHARTS

AL 597 VOR-2 Peoria, Illinois Greater Peoria Arpt.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.
** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ - New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE - Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.

BESSEMER-DURHAM ARPT: Caution - auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd.

BIRMINGHAM-RADIO: About July 15, VOR will be shut down - relctn. (6-7)

BIRMINGHAM ARPT: Caution - traffic operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg geat type acft, including T-6. (4-8)

CLANTON-GRAGG ARPT: Closed - const.

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

(26 June 1956)

ALABAMA: GUNTERSVILLE ARPT: Closed. (3-26)
HUNTSVILLE-RADIO: VOR radials 005 -030° unusable due to roughness and bends. (5-11)
About July 16, VOR will be shut down until approx Sept. 17. (6-8)
HUNTSVILLE MUN ARPT: Caution - rnwy 18-36 under const.
MOBILE-RADIO: About July 16, VOR will be shut down until approx Sept. 17. (6-8)
**MONTGOMERY-DANNELLY FLD: Taxiway from rnwy 15 to E/W taxi strip perm clsd. Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft lndg and taking-off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard hangar. E/W rnwy clsd to all military acft-const. Easternmost 5000' avail days, easternmost 6000' avail sunset to sunrise to civil acft. Western end mrkd by flags-days, lgts-ngts. (5-15)
MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi acct scalloping and bends. (4-22)
ARIZONA: SPECIAL NOTICE: Until July 24, 1956, captive balloons will be flown nightly from one hr after sunset to one hr before sunrise at lctns 10 mi W Gila Bend AF Aux, 2 mi S Sentinel and 3 mi E Dateland, Ariz. Surface to 1500' and lgtd by one red lgt. Extreme caution when flying at low alts near these lctns. (12-27)
AJO ARPT: Beacon and lights inoperative. (6-18)
**CHANDLER-RIGGS ARPT: Abandoned. (6-11)
COCHISE-RADIO: VOR/DME flgt-checked, opern normal. Coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA.
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.
HASSAYAMPA-RADIO: VOR/DME usable to 30 n mi from 30° - 70°, 240°-255°, 320°-345° and 40 n mi from 70°-85° at MEA. (3-30)
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. (4-11)
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185°, 39 n mi at 10,000'.
SALOME, SITE #27B, LAX-PHX: Caution - puncture vines. (6-18)
SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)
**SEDONA-OAK CREEK ARPT: New fld - Type: P. Lat 34-50, long. 111-47. Lctn: 2 mi SE. Elev: 4800'. No. of rnwys: 1. Lngst rnwy & facs: 38. Fuel: F2. (5-7)
TUSCON-RADIO: VOR/DME shut down. (6-6)
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000';(b) SW quad 10,000';(c) SE quad 12,000; (d) NE quad 13,000'.
**TUCSON-GILPIN ARPT: Two 200' lgtd twrs erected 2.0 mi N (13°T) at lat 32-00-19, long 111-00-32.
**WINSLOW ARPT: Obstn lgts installed on radar antenna lctd 6.5 n mi NW (300°T) at lat 35-04-45, long. 110-49-48, approx 20' below top of the dome (4-18)
YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)
YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target vcnty. All acft refrain from flying close proximity to B-45 type acft in Yuma area.
ARKANSAS: EL DORADO-RADIO: DME 2000' MSL coverage 43.5 mi 325° thru N to 225°; 2000' MSL coverage 35 mi 225° thru W to 325°. (3-30)
FAYETTEVILLE-RADIO: VOR shut down until approx July 11. (6-11)
FLIPPIN-RADIO: About July 23, VOR will be shut down until approx Sept 24. (6-22)
FT SMITH ARPT-TOWER: June 7, twr cmsnd as combined stn/twr. Trans freq: 269 kc; 118.3, 121.5, 126.18, 257.8, 243.0 mc. Rcvs: 3023.5kc, 118.3, 121.5, 122.5, 126.18 mc. Trans & rcvs 121.9 mc ctl mobile gnd tfc. Class: C(g). (6-19)
HARRISON ARPT: N/S, new NW/SE rnwys clsd-const. Fld Clsd ngts.
NORTH LITTLE ROCK-CENTRAL ARPT: Fld closed to all operns - const. (3-1)
TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends.
WALNUT RIDGE-RADIO: VOR radials 290°-320°, 120°-150° and 200°-210°unusable acct bends and course roughness. (10-14)
**WALNUT RIDGE ARPT: Three 65' unlgtd antenna poles erected 985' E of north end of N/S rnwy. (6-18)
California: **ADELANTO-GREY BUTTE ARPT: Abandoned. (5-28)
ARCATA ARPT: Experimental testing of rotating lgts in inner apch zone of Rnwy 31 at infrequent times. Rotating lgts at 2100' and 1000' S of threshold of rnwy with six high intensity lgts rotating at 6 or 12 rpm.

CALIFORNIA: AUBURN ARPT: Clsd to hvy acft. Lgt acft use extreme caution acct soft rnwys. (11-24)
BLYTHE-RADIO: DME coverage 165°-188°, 39n mi at 7000' 189°-200°, 26 n mi at 6000'; 200°-220°, 39 n mi at 6000';220°-293°, 43 n mi at 9000'; 293°-310°, 26 n mi at 9000', 310°-327°, 35 n mi at 9000'. May 28, VOR/DME shut down until approx Aug. 1. During this period, the following arwys will not be usable: Victor 64 Thermal to Blythe; V-16 Palm Springs Intersection to Hassayampa, Ariz; V-135 Needles to Yuma, Ariz. (5-28)
CAMARILLO-RADIO: All courses have multiples. (6-17)
CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.
CRESCENT CITY-DEL NORTE COUNTY ARPT: Entire length of rnwy 11 usable and free of drifting sand. (6-15)
DAGGETT-RADIO: VOR flgt-checked on arwy radials only.
FAIRFIELD-TRAVIS AFB-RADIO: USAF VHF/DF bearings and communications in NW quad unreliable below 8500'. Opers 0700-1600 Mon-Fri training status only. (7-5)
FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'. (9-17)
FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.
FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000' 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.
FRESNO AIR TERMINAL: Exercise extreme caution in vcnty, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. (10-28)
FULLERTON ARPT: Attended daylight hrs only. (4-12)
FURNACE CREEK SITE 17 RIV-DLS: N 1200' of rnwy clsd to all operns - mrkd. Entire fld clsd to all hvy or multi-eng acft. S 4500' of rnwy open to lgt acft-caution. (4-3)
★HOMESTEAD-RADIO:June 21, LF rng decmsnd. (6-20)
KLAMATH-McBETH ARPT: Closed (6-13)
LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000';305°-340° 7000'; 340°-040°, 12,000'; 040-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (6-16)
ILS and LF rng during VFR conditions heavy simulated instrument apch traffic. (10-25)
**LONG BEACH ARPT: Several 230' MSL portable oil derricks NW, W and S of fld. (10-21)
No fuel servicing avail. for civil acft 2400-0600. (11-1) N 800' apch end rnwy 16 L perm clsd. Rnwy 12-30 clsd - repairs. After July 1, 1956 until January 1, 1958, the first 800' on rnwy 30 and adj. taxiways will be closd for new const. 6200' lgtd rnwy usable. Landings & takeoffs permitted on rnwy 30. Rnwy 12 clsd to all takeoffs and landings. (6-8)
LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (6-4)
LOS ANGELES AIR ROUTE TRAFFIC CONTROL CENTER: Center will activate high alt sector 0900 Mar 20. Sector will control all acft operg at specific alt at or above 25,000'. IFR including jet acft operg at least 1000' on top. All jet acft specific alt or at least 1,000' on top should ctc ARTC center 301.4 mc as soon as possible after departure within or entering area inbound. (5-11)
LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx. 4000' W of Sepulveda Blvd open VFR tfc only. Equip. on and adj to const areas. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL approx the intersections of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu Intersection in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the Shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat down-wind leg is 2500'. Acft not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommend crossing course at 3000' or above, ceiling permitting, directly over arpt, or between LF rng and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10)
LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc dir ection indicator inop 2300-0700.
★MODESTO-RADIO: June 25, VOR class changed to BVOR.
**MOJAVE-MYER ARPT: Abandoned. (5-28)

CALIFORNIA: OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Effect. Sept Sept 1, military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (5-23)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND INTERNATIONAL ARPT-TOWER: ASR will issue distance values in nautical miles in connection with radar control. UHF/DF steers unreliable below 7,000' within 10 mi of stn. (4-24) FLD: Dredging and clam shell equip. working S of lndg area. All booms and equip. lgtd and mrkd. Use extreme caution when flying over or within this area.(9-30)

OCEANSIDE-RADIO: VOR coverage 310°-020°, 35n mi at min en route alt. (10-10)

ONTARIO-RADIO: DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-0°, 35 n mi at 13,000'. May 7, VOR shut down until approx July 13. (6-22)

ONTARIO INTERNATIONAL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng runups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as mrkd by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th fighter interceptor acft. (5-14)

OXNARD AFB-RADIO: USAF VHF/DF unreliable below 12,000' within 50 n mi. (4-20)

**OXNARD-VENTURA COUNTY ARPT: 160' lgtd derrick erected 700' N center of arpt.(4-23)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)

PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.

QUINCY-GANSNER FLD: E 700' E/W rnwy and taxi strip unusable. (1-3)

RED BLUFF-RADIO: DME coverage 180°-208°, 26 n mi at 9000'; 208°-217°, 26 n mi at 10,000'; 217°-235°, 35 n mi at 10,000'. Apr 19 VOR shut down until approx June 25; freq will be changed to 115.7 mc. During shut down, the current Victor arwys may be used as direct routes using Red Bluff LFR, provided acft are equipped with ADF. MEAs remain the same as currently estab on Victor Arwys. (6-6)

**RICE FLD: Abandoned. (6-14)

RIDGECREST-DAVIS ARPT: Lgts inop. (4-11)

RIVERSIDE-RADIO: USAF VOR unreliable. (6-20)

RIVERSIDE ARPT: Clsd to all itinerant tfc-const. (5-5)

SACRAMENTO-RADIO: Disregard spurious signals and interruptions in service of voice commun INSACS and twr. (3-30) About July 2, VOR will be shut down until approx Sept 12 modernization. During this period the following Victor Arwys are affected: V-150 Sacramento to West Point intersection may be used utilizing 082° bear. from Sacramento LFR provided acft is quip. with ADF; MEA westbound 5000', Eastbound 8000'; Modesto VOR to Williams VOR direct MEA 3000'. Following arwys are not usable: V-23 Sacramento to intersection with V-200; V-195 Rio intersection to Williams; V-6 Rio intersection to Reno V-6N Sacramento to Mt. Lola intersection; V-212 Auburn intersection to Reno. (6-25)

SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather actual apchs IFR weather. (4-2)

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.

✱SAN DIEGO-RADIO-SPECIAL NOTICE: Effect May 16, acft VFR inbound to Lindbergh Fld, are requested to make initial call to San Diego Apch Ctl on 118.3 mc. This initial call should should be made over one of the following reporting points: Oceanside from north; Jamul from east; Mexican Border from south; approximately 20 mi west from seaward. Apch Ctl will give initial tfc ctl instructions and advise pilot where to contact Lindbergh Tower for lndg clearance. This procedure does not apply to VFR acft departing local immediate area for Lindbergh Fld due to short distance involved. (5-14)

✱SAN DIEGO-RADIO: H fac name changed to "Loma Portal". (5-22) VOR coverage 50 mi MEA all quads except 20 mi MEA from 310° to 330°. Soon VOR will be shut down until approx July 12. (6-7)

SAN DIEGO-LINDBERGH FIELD: 500' W end rnwy 9-27 clsd - jet barrier. (2-29)

SAN FRANCISCO: See Oakland Control Zone Notam.

SAN FRANCISCO-RADIO: SPECIAL NOTICE: Acft inbound to San Francisco International Arpt are requested to make initial call to San Francisco Approach Control, freq 118.5 mc Points over which to make this initial call are changed to the following: Richmond from N; Bay Point from NE; Livermore-E; Evergreen or Campbell - SE; at or abeam Farallon Islands - W; at or abeam Stinson Beach - NW. Approach control will give initial traffic control instructions and advise pilot when to change to local control freq for landing clearance. This procedure does not apply to VFR acft departing Oakland for San Francisco due to the short distance involved. These flights should call San Francisco Tower - freq 119.1 mc as in the past.

SAN FRANCISCO-RADIO: DME coverage 10°-30°, 17 n mi at 5000'; 30°-85°, 26 n mi at 7000'; 85°-100°, 35 n mi at 7000'; 160°-180°, 26 n mi at 5000'; 180°-225°, 17 n mi at 5000'; 225°-265°, 26 n mi at 5000'; 345°-10°, 35 n mi at 4000'.

SAN FRANCISCO INTERNATIONAL ARPT-TOWER: Interference on 119.1 mc vicinity ILS OM. (4-24)

SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)

**SANTA ANA-ORANGE COUNTY ARPT: Effect. June 11, hours of opern are 0545-1030 and 1300-1900 daily. Saturdays and Sundays 0545 - 1900. (6-4)

SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. Reception 3023.5 kc unreliable daylgt hrs. (2-2)

**SANTA BARBARA ARPT: Group of six 200' twrs lctd 2 mi ESE perm removed. (6-2)

SANTA MONICA-RADIO: TVOR radials 030°,075°,210°,260° and 323° usable. (1-20)

SANTA MONICA ARPT: Service avail only between 0700 and 2100 daily. Extreme caution advised during ngt use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)

THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi; 060°-085°, 40 n mi; 145°-175°, 40 n mi; 175° thru 180° to 250°, 20 n mi; 250°-280°, 40 n mi at min en route alt. (3-14)

TULARE ARPT: Closed - reconstruction. (5-18)

UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500' MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100°-150° at 6000'. 105° thru S and W to 305° over water not checked.(10-11)

VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360° - 045°, below 15,000'.

COLORADO: COLORADO SPRINGS-PETERSON FLD: Caution-lndg acft due to rise in terrain at apch end rnwy 21. Const on ramp SE of twr. (5-1)

DENVER-STAPLETON FLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft xcpt when absolutely necessary for taxiing W of rnwy 3-21. Hvy air tfc N and E due to extensive instrument trng. Flashing amber lgt in segmented circle indicates rgt hand tfc. Two-way rdo rqrd capable of communicating with twr.

EADS ARPT: Emergency only - rough. (4-20)

GRAND JUNCTION-RADIO: May 7, ILS glide slope and lclzr shut down. (6-6)

KREMLING-RADIO: About July 10 VOR will be shut down until approx Aug 7. (6-22)

LONGMONT ARPT: NW/SE rnwy under const. (3-13)

PUEBLO-SPECIAL NOTICE: Ordnance depot approx 14.8 n mi E at lat 38-16-53, long. 104-18-00, conducting demolition work - days.

THURMAN-RADIO: VOR shut down. During this period the following arwys will be affected: V-4 Denver to Goodland direct MEA 11,000'. The following arwys will not be usable: V-4N Thurman to Goodland; V-148 Thurman to Imperial. (6-7)

CONNECTICUT: HARTFORD-BRAINARD FLD: Rnwy 9-27 closed. (5-14)

SIMSBURY ARPT: Experimental dropping of parachutes on fld during VFR wea. days Mon thru Fri. Fld occasionally clsd by standard marker.

WAREHOUSE POINT SKYLARK ARPK: Caution - const N side. (3-26) (26 June 1956)

CONNECTICUT: WILTON-RADIO: VOR has minor bends in SW quad out to 17 mi. DME coverage 270°-285°, 35 n mi at 3000'; 230°-360°, 35 n mi at 3000'; 360°-015°, 35 n mi at 2500'.

WINDSOR LOCKS-BRADLEY FLD: No service, fuel, maintenance, or parking facs for transient military acft - repairs to ramp and hangar. (5-15)

DELAWARE: GEORGETOWN-SUSSEX COUNTY ARPT: Caution, NNE/SSW and NNW/SSE runways rough. Men & equipment on fld. Extensive glider activity weekends and evenings.

**HARRINGTON ARPT: Abandoned. (5-28)

NEW CASTLE-BELLANCA FLD: Sod strips clsd-rough. Soft when wet. Use rnwys, and taxiway strips only. (5-22)

WILMINGTON-NEW CASTLE CO. ARPT-TOWER: May 21, ILS glide slope shut down until approx. Sept 5, rnwy const. During this time lclzr may be shut down for intermittent periods. (6-5) FLD: Rnwy 1-19 clsd - const. About July 16, due to limited visibility, twr unable to ctl surface tfc on new terminal ramp. (6-9)

DIST. OF COLUMBIA: WASHINGTON-SPECIAL NOTICES: (1) Caution - dynamiting daily, hvy charges, dam const. along E bank Potomac River, 3/4 mi N of Key Bridge at Dalecaria, Md. (2) Thru 31 July 1956, special VFR operating rules effective in hi-density zone. Zone identical with Wash. control zone excluding Washington-Virginia Arpt and prohibited areas. Altitudes - surface to 3000' N of and 700' to 3000' S of Washington rng. Two-way radio required. Prior to take-off within zone or entry for landing in zone, establish rdo communication with ATC tower of take-off or landing and maintain continuous listening watch. Acft passing thru zone contact and maintain continuous listening watch with WNA control twr. Helicopters excepted, regardless of other VFR clearance, no VFR flight within zone when ground visibility less than one mile, except when smoke, dust, snow, sand, then VFR flight permissible with one-half mi visibility. Do not exceed 180 mph (156 knots) unless operational characteristics require more, in which case use minimum speed consistent with safety.

WASHINGTON-RADIO: LF rng SE course bends 4 to 9 n mi from stn; 17 to 22 n mi from stn, multiples 3° - 3.5° S.

WASHINGTON NATIONAL ARPT-AIR ROUTE TRAFFIC CONTROL CENTER: Radar service will be provided UHF equip acft on 250.2 mc, 318.2 mc and 348.6 mc only in Washington Metropolitan Area.

**WASHINGTON NATIONAL ARPT: Rnwy 9-27 perm clsd-mrkd. Lmtd parking and taxiing W of taxiway #6. Taxiing E of taxiway #6 will be at discretion of ctl twr only. (6-20)

USAF, NAVY, CG: Clsd to all acft except: (a) Acft carrying VIP and officers ABOVE rank of Major General or Rear Admiral. (b) Scheduled MATS. (c) Flgts rqrg customs and immigration service. (d) Navy and CG logistic support flgts. (CG logistic flgts not hangared at WNA rqr prior approval of arpt director, must be cleared with Comdt., CG and will be flown VFR conditions only.) NO acft over 120,000 lbs without prior approval arpt director. CG and Navy acft taxi to MATS term N of Admin Bldg.

FLORIDA: **ARCADIA ARPT: 206' (266'MSL) lgtd rdo twr erected 1.0 n mi N (6°T) at lat 27-13-11, long. 81-51-37. (6-6)

BARTOW AIR BASE: AF primary Contract School clsd Sat., Sun., holidays, and other days 1730-0700 xcpt on prior approval. Prior approval for Sat and Sun must be obtained before 1500 Fri. Prior approval 1730 to 0700 must be obtained before 1500 on arrival day.

CAPE CANAVERAL-SPECIAL NOTICE: Until August 15, thunderstorm research balloons 34 ft in diameter with 200 ft load train climbing at 1000 ft per min will be released at irregular intervals. Direction of drift westerly at 6500 ft. (6-16)

CRESTVIEW-RADIO: About July 1, W course LF rng will be realigned from 91°-83°.

CROSS CITY-RADIO: About July 26, NW course LF rng will be realigned from 135°-124°. About July 16, VOR will be shut down until approx Sept. 17 - modernization. (6-8)

DAYTONA BEACH-RADIO: VOR/DME shut down until approx Aug 6. During this period, 338° radial of Vero Beach VOR may be substituted for the 157° radial of Daytona Beach VOR to define Maytown intersection. MRA 3500'. Due to temp shutdown, temp MEA V3 Vero Beach to over Daytona Beach 5500'. MEA Daytona Beach to Jacksonville 4500'. V-152 Orlando to over Daytona Beach published MEA adequate. Other arwys predicated on Daytona Beach VOR unusable. (6-6)

**DAYTONA BEACH ARPT: 349' lgtd TV twr erected 2.1 n mi (5°T) at lat 29-13-51, long. 81-02-33.

EVERGLADES ARPT: Closed - due construction. (6-15)

FT MYERS-RADIO: VOR radial 131°, V35, not usable - excessive scalloping and bends.

JACKSONVILLE-RADIO: DME and VOR coverage 35 n mi at min en route alt. VOR unusable 180°-260°, with exception apch course 248° usable to 9 n mi. (4-27)

JACKSONVILLE-IMESON ARPT: Rnwy 18L-36R closed to jet acft.

FLORIDA: **KEY WEST-CAUTION AREA: Effective July 2, Caution Area (C-175) and Warning Area (W-465) will be revised so the areas will be contiguous to Control Area 1234, and will exclude the Marathon-Miami Airway B-48).

KEY WEST-INTN'L ARPT: Caution new fld under const. No ngt operns. Const. equipment on and about rnwys. First 1500' rnwy 26 clsd. Rnwy 34 and 16 clsd. Large or fast acft taking off from rnwys 8 and 11 will proceed straight out and pass S and E of Boca Chica NAS. All acft en route Intn'l Fld will ctc Boca Chica twr on 126.18 mc for tfc information when 20 mi out, if unable ctc twr, ctc Key West rdo. Air Carrier operns authorized for Lockheed 18, DC-3 and C-46 acft only due to condition of rnwys. Landing fee for cargo or charter acft. (5-5)

LAKE CITY MUN ARPT: S and central ramp areas clsd. Transient acft use N end near hangar. (1-19)

MARIANNA-RADIO: Apr 17, VOR shut down. During shut down the following MEAs are estab: V-22 Crestview to over Marianna 5000'. V-7, Tallahassee to Dothan, Ala, using Dothan TVOR 1500'. V-7W Gantt, Ala, to Marianna and V-22 N Marianna to Calvary unusable.

MARIANNA-GRAHAM AIR BASE: AF Contract Primary School clsd Sat, Sun, holidays, and other days 1730-0700 except on prior approval. Prior approval for Sat and Sun must be obtained before 1500 Friday. Approval for 1730-0700 weekdays must be obtained before 1500 on arrival day. No fuel available for civil acft. New runways parallel N side rnwy 8-26 and W side rnwy 18-36 under construction. No itinerant lndgs rnwys 18R-36L and 8L-26R. (5-16)

**MIAMI-CAUTION AREA: Effective July 2, Caution Area (C-172) will be rescinded.

MIAMI INTERNATIONAL ARPT-SPECIAL NOTICE: All flights operating within an area of 10 n mi radius at night, at altitudes of 3000 ft or below, shall establish, prior to entry into area and maintain thereafter air speeds not in excess of 180 knots. Acft types having characteristics requiring minimum air speeds in excess of 180 knots shall maintain the lowest possible air speed consistent with safety. Miami's operators and pilots request cooperative compliance by itinerant flights.

MIAMI INTERNATIONAL ARPT: Approx 800' rnwy 9L-27R and portion taxiway N of 20th Street hangar area not visible to twr. Parking space avail. 20th St. for civil acft. Taxiway entrance to SW corner USAF ramp clsd. All jet xcpt multi-eng transport types are prohibited from lndg or taking off. All instrument apchs to arpt either actual, simulated or practice by jet acft xcpt multi-eng transport types are prohibited. (5-23)

MILTON CAUTION AREA: Effective July 1, Caution Area (C-148) will be rescinded.

ORLANDO-RADIO: DME and VOR coverage 35 n mi at min en route alt.

ORLANDO ARPT: Concrete area immediately E of rnwy 18 NW portion arpt closed for taxiing. (4-1)

ORLANDO-PINECASTLE AFB-RADIO: USAF VHF/DF unreliable below 2000' at 50 n mi.

PANAMA CITY-FANNIN FLD: NW/SE rnwy clsd ngt opern. Trees penetrate standard apch zone to rnwy 32. Caution - shoulders soft. Men and equipment adj rnwys. (9-8)

PENSACOLA-SPECIAL NOTICE: Aerobatic and formation tactics being conducted in Caution Areas 144, 146, 147 and 148 during daylgt hrs., Mon - Saturday. Intensive ngt flgt trng to 8000' in 146 and 147 sunset to 0100 CST nightly. Due to saturation of areas, civil air tfc is requested to remain on ai rways. Military acft to Pensacola should proceed on airways, or between 1500' and 2000' or above 8000' while in Caution Areas. Air tfc using Red Arwy No. 30 between Crestview and McDavid Int is cautioned that extensive aerobatic trng is being conducted in Caution Areas adj to arwys between 4000' and 10,000'.

PENSACOLA CAUTION AREAS: Effective July 1, Caution Areas (C-146 & C-147) will be rescinded. Effective July 1, Caution Area (C-488) will be established: Name: Pensacola, Fla. Description: Beginning at a point at lat 31-30-00, long. 85-45-00 thence due S to the northwestern boundary of Restricted Area R-383; thence along the NW, W and SW boundaries of R-383 to the intsxn of the Florida shoreline with long. 96-48-00; thence westerly along the northern boundary of Restricted Area R-154 to the Pensacola Control Area thence SE, W and NW along the Pensacola Control Area extension to its intsnx with the Florida coast line; thence along the northern boundary of redesignated Restricted Area R-153 to lat 30-15-00, long. 87-41-20; thence NW to lat 30-31-00, long. 87-55-00; thence N and W along the eastern shoreline of Mobile Bay to the eastern boundary of the airway at lat 30-41-15, long. 88-00-45; thence along the eastern boundary of this airway and Green Civil Airway No. 6 to lat 31-30-00; thence E to point of beginning. Effective from surface to 2000' MSL, within Civil airways and from the surface to unlimited outside of civil airways. This Caution Area to exclude all Control Zones. Altitude: Surface to unlimited except within Civil Airways. Activities: Extensive basic flight trng. Time of use: Unlimited. Controlling Agency: Chief of Naval Air Basic Trng NAS, Pensacola, Fla.

FLORIDA: PERRINE-RADIO: About July 2, LF rng will be cmsnd. Freq: 266 kc. Ident: PRR Lctd at lat 25-36-30, long. 80-31-39. Mag. var. 1°E. Courses: 49 A 179 N 271 A 341 N. Class: SRAZ. Will be controlled from Miami OFACS. (6-8) This corrects AIRGI Vol. 11 No. 7.

**PERRY-FOLEY ARPT: About June 25, work starts on erection of a 240' (336'MSL) lgtd rdo twr 23 n mi NNW (351°T) at lat 30-27-36, long. 83-38-36. (5-15)

TALLAHASSEE-RADIO: VOR courses unusable 110°-150°. (6-23)

TALLAHASSEE-DALE MABRY ARPT: Clsd to air carrier acft exceeding 50,000 lbs xcpt as alternate arpt. Non-air carrier acft exceeding 50,000 lbs rqr prior permission. Rnwy 9-27 clsd to air carrier ngt operns. (10-7)

TAMPA-RADIO: VOR courses 95°-105° unusable.

VERO BEACH ARPT: Rnwys 3R-21L and 7R-25L clsd ngts. (2-15)

WHITING CAUTION AREAS: Effect. July 1, Caution Areas (C-144 and C-145) will be rescinded.

WINTER HAVEN-GILBERT FLD: Taxiway and parking ramp near rnwys 4 and 29 extensive excavation. Trucks crossing runways after normal operg hours and week ends. (2-3)

GEORGIA: **ADEL-COOK COUNTY ARPT: 237' (487'MSL) lgtd rdo twr erected 2.1 n mi E (90°T) at lat 31-08-06, long. 83-25-30. (5-15)

ALBANY ARPT: Clsd to air carrier acft exceeding 50,000 lbs xcpt as alternate arpt. Non-air carrier acft exceeding 50,000 lbs require prior permission. Jet acft operg from Turner AFB particularly SE of arpt. Contact Turner twr on 126.18 mc for Advisory Info. If unable to contact Turner twr contact Albany rdo for relay. (11-18)

ALMA-RADIO: DME and VOR coverage 35 n mi at min en route alt. (8-3)

ATLANTA-SPECIAL NOTICE-RADIO: ARTC accepting IFR tfc which is equipped with UHF rdo freq only with destination Atlanta Mun Arpt. (2-26) Center advises high altitude sector with jurisdiction over airspace 25,000' and above within Atlanta Control Area to be activated 0800, Feb. 15. All jet type acft operg on IFR flgt plans at or above 25,000' or 1,000' on top should guard 301.4 mc. Within Atlanta area, this channel will be utilized to obtain traffic clearances and to forward progress reports. Weather and other information not pertinent to traffic control should be handled on 255.4 mc. This channel should also be used if unable to contact Atlanta Center direct on 301.4 mc. (2-14)

ATLANTA-RADIO: VOR courses 060°-090° unusable acct bends and roughness. (4-19)

ATLANTA ARPT-TOWER: ASR-PAR shut down-modernization. (3-10) FLD: Acft arriving arpt make initial contact with Atlanta apch control on 120.7 mc regardless of weather or flight plan. Acft not equipped for 2-way commun on 120.7 mc will use other available freq. (3-6) Rnwys 27R-9L and 33R-15L clsd. (4-21)

ATLANTA-FULTON COUNTY ARPT: Const SE end of NW/SE rnwy-caution. (9-13)

BRUNSWICK ARPT: Caution-intensive blimp training in vcnty.

**BRUNSWICK-McKINNON ARPT: 200' MSL lgtd twrs lctd on Brunswick Riv bridge 1 n mi S (240°T) at lat 31-07-00, long. 81-28-09. (6-18)

**CAMPBELLTON: Obstn lgts and markings on LFR discontd. (8-4)

COLUMBUS-RADIO: VOR courses 350°-30° unusable acct bends and roughness. (3-17)

COLUMBUS ARPT: E/W rnwy clsd-const. (5-17)

LA GRANGE-RADIO: VOR flgt-checked on arwys radials only.

MACON-RADIO: VOR/DME usable dist. 35 n mi at MEA. (5-10)

NORCROSS-RADIO: VOR coverage 060°-240°, 35 n mi at min en route alt. (5-9)

**QUITMAN-BROOKS COUNTY ARPT: 270' (490' MSL) lgtd rdo twr erected 3.1 n mi NE (61°T) at lat 30-50-47, long. 83-32-15.

ROME-RADIO: LF rng operg as un monitored fac. Use of LF rng as en route or apch aid must be ADF disregarding on-course signals and pilot must monitor fac durg such use.

ROYSTON-RADIO: VOR courses lgt to moderate roughness may be noted over mountains NW at min alt. About July 2, VOR will be shut down until approx Sept 3. (6-15) During this period, the following intsxn re-established: Honea 84° bearing from Anderson, S.C. Rbn & front course Greenville, S.C. ILS lclzr Laurens 140° bearing Greenville LFR & 193° radial Spartanburg, S.C. VOR, Clemson 250° radial, Spartanburg VOR ° 214° radial Asheville, N. C. VOR Silver City 13° radial of Norcross, Ga., & 120° radial of Chattanooga, Tenn., VOR. During this outage Victor Airway 194 is formed as follows: From Anderson Rbn via 84° bearing to intercept the 242° radial of Charlotte, N. C. VOR thence to Charlotte VOR. During the shut down period the following temporary MRA established. V-20 Atlanta, Ga & Spartanburg, S. C. 5000'. V-35 Macon, Ga. & Asheville, N.C. 6500'. V97E Norcross, Ga.- Silver City 5500'. (6-15)

VALDOSTA-RADIO: VOR unusable 240° clockwise thru 360° to 110° account excessive roughness and course displacement with xcptn of arpt apch course 003°, usable to 10 n mi.

IDAHO: BOISE AIR TERMINAL-TOWER: UHF/DF NE and NW quads unreliable below 14,000' beyond 40 n mi. SW and SE quads unreliable below 10,500' beyond 40 n mi. (11-9) FLD: Rnwy 16-34 clsd xcpt emerg daytime lndgs-const adj S end. (4-3)

**BOISE-CAMPBELL ARPK: (Formerly carried Boise, Major's Arpt). (5-29)

BURLEY-RADIO: VOR coverage 130°-150°, 26 n mi at min terrain clearance alt.

DIXIE USFS ARPT: Closed-const. (6-5)

**GOODING ARPT: Excavation 30' wide, 15' deep 135 to 165' NW of NW end of rnwy 12-30, mrkd by red flags 135' to 165' extending 36'' above ground on SE edge of rnwy 30. Men and equip operg vcnty. (4-4)

MALAD CITY-RADIO: VOR coverage 360°-20° and 50°-60°, 35 n mi at 12,000'.

MOUNTAIN HOME AFB-RADIO: USAF VOR unreliable. (5-29)

MOUNTAIN HOME-CONTROLLED FIRING AREA: A temp controlled firing area is established as follows: Name: Mountain Home, Idaho. Description: Beginning at lat 43-22, long. 116-08; thence to lat 43-13, long. 116-00; thence to lat 43-07, long. 116-12; thence to lat 43-17, long. 116-19; thence to lat 43-22, long. 116-19; thence to point of beginning. Altitude: June - surface to 14,000' MSL; August - surface to 25,000' MSL. Time of Use: Daylgt hrs. Activities conducted: Artillery firing - gun, mortar and Howitzer. Controlling Agency: June - Idaho National Guard; August - Montana National Guard. Effective Date: June 2 - 30 inclusive; August 11-25 inclusive.

STREVELL ARPT: All lgts inop. (5-2)

TWIN FALLS-JOSLIN ARPT: Excavation 15' deep, 30' wide lctd 165' off NW end rnwy 12-30. Mrkd by line of red flags extending 36'' above ground on SE edge of excavation paralleling rnwy. Men, equip operg vcnty. (4-4)

ILLINOIS: ALTON-CIVIC MEMORIAL ARPT: Aerobatic area for student trng in following described area: Bounded by long. 89-48, and 90-00; lat 38-57 and 39-03. In use daily when ceiling and visibility exceed 5000' and 5 mi, between 2500', and 5500' MSL. (6-16)

BELLEVILLE-SCOTT AFB-RADIO: USAF LF rng has slight splits and multiples within 35 n mi. NW, SW & SE courses unreliable beyond 35 n mi due to splits and bends. NE course unreliable beyond 65 n mi.

BRADFORD-RADIO: H fac usable dist 20-25 s mi. (3-1)

** CHICAGO-SPECIAL NOTICE: 22 telephone poles, 24'to 34' high, erected in the Pinehurst Subdivision approx. 600' S of Glenview Naval Air Station. (1-31)

CHICAGO-RADIO: Multiples on NW course LF rng.

CHICAGO-MEIGS FLD: Caution - S end rnwy dist from threshold lgts to seawall 90'.

CHICAGO-MIDWAY ARPT-TOWER: Erratic course indications may be encountered when approaching back course ILS lclzr from the E. Back course has lgt to moderate bends TVOR course unreliable beyond 20 n mi between 5°-10°, 35°-40°, 145°-155°, 255°-265°, 335°-348°. (2-8) FLD: Single eng transient acft will not be allowed dock space at the N term bldg, must use facs of S term bldg. Due to non-visibility acct parked acft, twr unable to ctl single eng acft on many portions of all outer ramps. Use extreme caution on E ramp and in vcnty of both term bldgs. All acft will remain N of white line on S side of rnwy 27R while running up, parking or taxiing. (5-9) One experimental oscillating flasher guidance lgt installed on each side of green threshold lgts on apch end rnwy 31L.

CHICAGO-O'HARE INTERNATIONAL FLD: Due to non-visibility twr unable to ctl tfc 300'-800' W rnwy 36, 800'-1600' E apch end rnwy 9, 100'-1100' N rnwy 9-27, 800' SE intsxn rnwy 14-32, and USAF ramp due bldgs & parked acft center taxiway to ramp & black top taxiway to Slick hangar, and terminal gates 1, 2 and 3. Rnwy 14-32 clsd-const. All inbound acft equipped with appropriate multiple rdo freq shall make initial ctc with O'Hare apch ctl on 118.3 mc or 348.6 mc if UHF equipped regardless of wea. Lndgs and take-offs prohibited unless acft equipped with functioning rdo capable of 2-way direct comm with ctl twr. (4-27)

CHICAGO-SMITH SEAPLANE BASE: 251' lgtd grain elevator being erected 2. n mi N (360°T) at lat 41-41-00, long. 87-33-36. (1-27) Effect. July, erection will begin of three brick chimneys 255' (844'MSL) lctd 1/2 mi N (5-4)

CHICAGO HEIGHTS-RADIO: VOR/DME coverage limited to 03°-58°, 70°-130° and 155°-317°, 35 n mi at 2000' MSL. (6-12)

EAST ST. LOUIS-PARKS METROPOLITAN ARPT: Aerobatic area for student trng in following area: Bounded by long. 90-00 and 90-15; lat 38-25 and 38-35. In use daily when ceiling and visibility exceed 5000' and 5 mi, between 2500' and 5500' MSL. (5-13)

EFFINGHAM COUNTY MEM'L ARPT: Const on E/W rnwy. (6-15)

ELMHURST ARPT: Effect. December 31, 1956 fld will be closed. (4-2)

JOLIET-RADIO: VOR coverage 35 n mi at all azimuths at min en route alt.

KEWANEE ARPT: Men, equip on fld intermittently-caution. (7-5)

ILLINOIS: LOMBARD-MITCHELL ARPT: Obstn lgts inop on 123' water tank lctd 5200' SE at 41-50-00, long 88-02-30. (4-12)

LOMBARD-YORK TOWNSHIP ARPT: Transmission line approx 3000' W. Height of twrs, 123', not mrkd or lgtd. (11-21)

MOLINE-RADIO: About July 16, VOR/DME will be shut down until approx Sept. 16. (6-21)

PEORIA-RADIO: VOR coverage 190°-70°, 35 n mi at min en route alt. (10-11)

PEORIA-GREATER PEORIA ARPT: No trans jet mil acft permitted to land without prior coordination with and approval by Comdr 126 FI Group at arpt. (4-18) 5' unlgtd fence apch end rnwy 22.

PEOTONE-RADIO: VOR coverage lmtd between 39 and 43 n mi at most azimuths at min en route alt. (2-4)

POLO-RADIO: VOR coverage 280°-350°, 39 to 43 n mi at min en route alt. (2-21)

QUINCY-RADIO: About July 9, ILS glide slope and lclzr will be shut down until approx July 30. (6-21)

ROCKFORD-RADIO: About July 1, H fac will be cmsnd. Ident: RFD. Freq: 275 kc. Lctn: Lat 42-06-52, Long 89-05-53, Class: MHW (6-6)

SPRINGFIELD-CAPITAL ARPT-TOWER: About July 1, ILS will be cmsnd. Lclzr freq: 109.5 mc with voice. Ident: SPI. Lctd 1400' NE of NE end NE/SW rnwy. Apch bear. 38°. Glide slope freq: 332.6 mc. Lctd 400' NW of centerline and 1050' from apch end NE/SW rnwy. Proposed angle: 2.5°. MM lctd 400' (0.66 mi) SW apch end NE/SW rnwy. Elev:580' MSL. LMM freq 203 kc. Ident: PI. OM lctd 5.92 mi SW apch end rnwy. LOM freq 230 kc.

** Ident: SP. Elev: 604'MSL. (5-18) FLD: Men and equip. on fld durg daylgt hrs. (12-8) 40' lgtd glide slope antenna pole 1050' apch end rnwy 4 and 400' NW rnwy centerline. Lgtd lclzr antenna shelter 1400' NE apch end rnwy 22. (3-7)

VANDALIA-RADIO: About August 6, VOR will be shut down until approx Sept. 6 - modernization. (6-6)

WOODDALE-WOODDALE MOODY ARPT: Clsd irregular intervals-flgt trng-mrkd. (5-22)

INDIANA: SPECIAL NOTICE: The Atomic Energy Commission requests all pilots to maintain a reasonable altitude when flying over their Dana Installation, as a safety precaution to the plant. The area involved is located approx 29 s mi N of the Terre Haute LF rng between Montezuma and Newport and is bounded by latitudes 39-50, 39-52 and longitudes 87-21, 87-26.

**AUBURN ARPT: 910' (1780'MSL) lgtd TV twr erected 4.0 n mi SSE (173°T) at lat 41-19-59, long 85-03-07.

CAMP ATTERBURY-SPECIAL NOTICE: Frequent violations have been reported of Restricted Area R-65 to the S. High angle mortar and artillery firing being conducted daily. All acft are warned to keep clear of this area.

COLUMBUS-BAKALAR AFB-RADIO: USAF VHF/DF unreliable 250°-270° outbound below 3000' and 010°-250° below 2500'. (8-18)

ELKHART ARPT: N/S rnwy usable at pilots' discretion. (8-22)

**EVANSVILLE-DRESS MEMORIAL ARPT: Lgtd wind cone has been installed on the first hangar S of the terminal bldg on the W side of arpt. The tetrahedron tfc direction indicator perm. withdrawn. Soon a lgtd wind cone will be provided on hangar S of terminal bldg on W side of arpt. (4-6)

FT. WAYNE-RADIO: VOR has moderate course roughness between 300°-340° at 20 to 35 mi from stn. (5-4)

FT. WAYNE-BAER FLD-TOWER: About July 9, ILS glide slope will be shut down until approx August 6. (6-7)

FT. WAYNE-BAER FLD: Rnwy 4-22 now 7800' -daylgt operns, 6200' - ngt operns. 1600' ext. not lgtd. Due to non-visibility twr unable to ctl tfc on first 500' of rnwy 9 and entire taxistrip leading to apch end of rnwy.

GARY MUN ARPT: Const on pole line SW. Pole heights vary from 29' to 83' above ground. Four poles lctd nearest centerline of rnwy 2 will be 43'(633'MSL). (1-5)

GOSHEN-RADIO: DME coverage 46°-145°, 35 n mi at 2300'; 172°-310°, 35 n mi at 2100'.

GREENSBURG ARPT: Regrading and seeding W half N/S rnwy-caution. (5-14)

HUNTINGTON ARPT: Closed all operns - due soft fld. (3-18)

★INDIANAPOLIS-RADIO: Trans and rcvs 255.4 mc at INSACS - delete from ARTCC. (6-23) Following experimental facs operd intermittently by TDC (approx one yr.): Tilden VOR freq 115.7 mc, ident: IEX. Weir Cook VORW freq 112.3 mc, Ident: IAX. TVOR freq 111.4 mc, ident: IDX, with voice ident. Lclzr freq 109.1 mc (without voice), ident: IBX. Glide slope freq 335.0 mc, serving N/S rnwy. DME lctd in laboratory N side fld, Channel 64, Mode C. Directional lclzr 110.3 mc serving E/W rnwy. One VORW on 112.9 mc testing intermittently. Until July 1, en route radar control provided in vicinity of Terre Haute. Opern conducted from 0700-2300 Mon thru Fri. Facility will be identified as Rockville

INDIANA: Control. Primary trans & rcvg : 125.3, 319.8 mc. Secondary trans. 121.5, 122.2, 126.7, 135.0, 135.9, 243.0, 255.4, 301.4 mc; rcvg 121.5,122.1,126.7,135.9, 243.0,255.4, 301.4 mc.

★INDIANAPOLIS-AIR ROUTE TRAFFIC CONTROL CENTER: Channel 338.6 mc cmsnd. (6-18)

INDIANAPOLIS-WEIR COOK ARPT-TOWER: ASR will issue distance values in nautical miles in connection with radar control. FLD: All acft rqrd to have rdo rcvrs. Rnwy gross wt lmtd to 110,000 lbs. Fee for acft wt excess of 110,000 lbs. Left and right tfc pat. Lndg Fee for multi-engine acft. Due to non-visibility twr unable to ctl tfc on taxiway from SE hangar to Turner ramp. All military jet acft rqrd to have transmitters and rcvrs tuned to twr freq. Rnwy 9-27 used only at discretion of ctl twr. Rnwy 4-22 slippery when wet. (2-6) Use rnwys and taxiways only. Parking in sod area at discretion of ctl twr. (5-14)

★LAFAYETTE-RADIO: Correct name VOR West Lafayette. (6-20)

LAFAYETTE-HALSMER ARPT: Const - E side SW end NE/SW rnwy and entire NW/SE rnwy. Rnwy lgts inop. Middle one-third NE/SW rnwy serviceable W side.

LA PORTE-SPECIAL NOTICE: Ground demolition in progress approx 6.9 n mi SE during daylgt hrs Mon thru Saturday. Center of operns lctd at lat 41-31-28, long. 86-36-46.

MADISON-SPECIAL NOTICE: Frequent violations of Restricted Area approx 4.3 n mi N have been reported. Artillery and anti-acft firing practice being conducted daily in Jefferson Proving Grounds. All acft are warned to keep clear of this area.

**MICHIGAN CITY MUN ARPT: 180' unmrkd microwave twr erected 4.5 n mi SSE (164°T) at lat 41-36, long. 86-51.

ROCKVILLE-RADAR: Until July 1 en route radar control will be provided. Primary trans and rcvg: 125.3, 319.8 mc. Secondary trans. 121.5, 122.2, 126.7, 135.0, 135.9, 243.0, 255.4, 301.4 mc; rcvg 121.5, 122.1, 126.7, 135.9, 243.0, 255.4, 301.4, mc. See Indianapolis Radio(3-13)

SOUTH BEND-ST. JOSEPH COUNTY ARPT-TOWER: ILS lclzr back course flyable with slow bends one to 5 n mi from stn. Glide slope flyable down to 50'. No touchdown point.

TILDEN-RADIO: See Indianapolis, Ind.

IOWA: BURLINGTON-SPECIAL NOTICE: Demolition approx 3.5 n mi SW. Explosions every 30 mins daily 0800-1700, xcpt Suns., holidays. Area boundary: N-lat 40-46-27; S-lat 40-45-35; E-long. 91-11-04; W-long. 91-14-37.

BURLINGTON-RADIO: June 20 VOR/DME shut down until approx July 11. (6-20)

DAVENPORT MUN ARPT: E/W strip under const. (2-2)

DES MOINES ARPT: Due to non-visibility twr unable to ctl tfc on portion of W ramp and NW 1600' of taxiway and warm-up ramp of rnwy 12.

OSKALOOSA ARPT: NE/SW rnwy closed indef. NW/SE rnwy now 120 ft. wide. (10-25)

SIOUX CITY-RADIO: DME coverage 77°-103°, 35 n mi; 172°-244°, 26 n mi at min en route alt. (7-30) About July 16, VOR/DME will be shut down until approx Aug. 16. (6-21)

SIOUX CITY ARPT: Due to non-visibility twr unable to ctl ramp tfc in front of Admin Bldg. NE of black hangar and parking area at SE corner of fld. (4-16)

**VILLISCA-TYLER ARPT: ABANDONED. (5-28)

WATERLOO MUN ARPT: Due to non-visibility twr unable to ctl tfc on portion of ramp W of hangars. (6-20)

WEBSTER CITY ARPT: Intsxn rnwys soft with ruts - broken tile in drainage system. E/W rnwy clsd. (1-24) NW/SE rnwy clsd-const. (5-18)

KANSAS: ARKANSAS CITY-STROTHER AUX #2 ARPT: P-line varying from 12' to 25' above ground and surrounding arpt.

CALDWELL ARPT: 278' (1421'MSL) lgtd rdo twr being erected 13.1n mi E(102°T)lat 37-00, long 97-19-05. (4-3)

COFFEYVILLE-McGUGIN ARPT: NW/SE and NE/SW rnwys clsd. (11-8)

DODGE CITY ARPT: 265' (2879' MSL) radio twr 2.5 n mi WSW(262°T) at lat 37-45-57, long 100-01-55, under const.

**EL DORADO ARPT: 200' (1550' MSL) lgtd guyed rdo twr erected 5.0 n mi WNW(299°T) at lat 37-49-00, long 96-55-00. (6-4)

EMPORIA-RADIO: VOR coverage 200°-270°, 35 to 43 nautical miles at min en route altitude. (5-29)

**EMPORIA ARPT: 220' (1690'MSL) lighted, guyed radio tower erected 8.1 nautical miles West Southwest (250°T), at latitude 38-16-06, longitude 96-22-20. (6-4) 300' (1485' MSL) lighted guyed radio tower erected 18.9 nautical miles North (17°T), at latitude 38-38-50, longitude 96-02-35. (6-4)

**FLORENCE-CLOTHIER ARPT: 200' (1640' MSL) lgtd guyed rdo twr erected 13.5 n mi ESE (134°T) at lat 38-03-33, long 96-38-30. (6-4)

GARDEN CITY-RADIO: Radial 125 degrees has course roughness and bends of 2.5 degrees. (3-28)

GOODLAND ARPT: NW/SE rnwy clsd-const.

KANSAS: GREAT BEND ARPT: Navy lndg and take-off practice by P2V and SNB acft 0700-1700, Mon thru Fri xcpt holidays. All movement of acft durg this period controlled by twr. Mil acft pat. will be adjusted by twr to facilitate civil acft operns. Non-rdo-equipped acft should fly standard tfc pat. and observe twr for lgt gun signals. Lgt acft 600' above gnd. Hvy acft 1000' above gnd. Caution - men and equip. near rnwys, days. (4-25)

HUTCHINSON-RADIO: About July 2, VOR will be shut down until approx Aug. 2 - modernization. (6-18)

KANSAS CITY-FAIRFAX FLD-SPECIAL NOTICE: Acrobatic area approved 7.0 miles W for certain flying schools in Kansas City, Mo. area bounded on E by long. 94-46, on S by lat 39-07, on W by long. 94-55, on N by lat 39-15 thence southeast along Missouri River to long. 94-46. This area is in use daily when ceiling and visibility exceed 4000' and 5 miles between 2500 and 5500' MSL. (4-17)

**LAWRENCE ARPT: 300' (1345'MSL) lgtd guyed rdo twr erected 5.5 n mi WSW (245°T), at lat 38-59-39, long. 95-20-30. (6-4)

**MEDICINE LODGE ARPT: 278' (2065'MSL) lgtd rdo twr erected 8.5 n mi NE(47°T) at lat 37-21-21, long. 98-25-40. (4-3)

NEWTON-81 ARPT: Restricted services due to by-pass road const on N end of fld, with hvy const equip. N/S rnwy reduced to 1400' with hi-line pole 40' W of rnwy. All lndgs at pilot's risk. (9-6)

**DAHLGREN-SPECIAL NOTICE: Restricted Area (R-38) daily air and surface firing present. Extreme hazard to acft all altitudes all times.

FRONT ROYAL-RADIO: VOR coverage 120°-160°, 175°-200°, 220°-226°, 270°-010°, 35 n mi at 4000'. INSACS discontd-Martinsburg, W.Va. will control VOR and LF rngs. Auto wea trans entered on Service A. (5-23)

GORDONSVILLE-RADIO: VOR has roughness in all quads. DME coverage 55°-75°, 35 n mi at 1500'; 75°-85°, 30 n mi at 1500'; 85°-130°, 35 n mi at 1500'; 130°-160°, 39 n mi at 3000'. (6-11)

HERNDON-RADIO: VOR usable dist 35 n mi at min instr alt NE quad. Terrain causes minor course roughness in SW quad.

LAWRENCEVILLE-RADIO: VOR radials 185°-240° usable only to 22 n mi at min en route instr alt. Soon, VOR/DME will be shut down until approx August 3. (4-13)

LEESBURG ARPT: New 3500' E/W strip closed-old strip lying parallel and S will be available-2200'. (3-14)

LYNCHBURG-PRESTON GLEN ARPT: Signal for below VFR wea minimums inop, ngts.

MONTEBELLO-RADIO: VOR coverage 110°-220°, 35 n mi at min en route alt. DME coverage 150°-180°, 35 n mi at 3000'; 180°-210°, 35 n mi at 5000'.

NORFOLK-RADIO: Visual courses VAR slightly rough.

PULASKI-RADIO: VOR coverage 305°-15°, 22 n mi; 15°-55° and 195°-210°, 35 n mi at min instr alt. DME coverage 10°-40°, 35 n mi at 6000'; 40°-120°, 43 n mi at 6000'; 120°-200°, 35 n mi at 6000'; 200°-225°, 26 n mi at 6000'; 225°-255°, 43 n mi at 6000'; 255°-010°, 26 n mi at 6000'.

RICHMOND-BYRD FLD: Due to non-visibility twr unable to ctl tfc on N portion of N/S taxiway parallel to rnwy 2-20. All acft rqrd to have two-way rdo ngt opern and at least rdo rcvr for daylgt opern. Use paved areas only, all other soft. Landing FEE for multi-engine executive and non-scheduled acft. (9-15)

ROANOKE MUN-WOODRUM FLD: Due to non-visibility twr unable to ctl tfc last 200' NE/SW taxi strip and 200' approx midway E/W strip. Men, equip adj all rnwys and taxiways-caution.

WILLIAMSBURG-COLLEGE ARPT: Caution-NE/SW rnwy under const. Men, equip on rnwy all hours.

WASHINGTON: SPECIAL NOTICE: Unmrkd p-line across coves in Puget Sound area & lakes.

WASHINGTON: BELLEVUE ARPT: 40' power crane working S end of rnwy in apch zone.

BELLINGHAM-RADIO: VOR radial 280°, on Vancouver, B.C. lmtd to usable dist of 27 n mi acct course roughness at the lowest instr alt of 1500'. In general, usable dist of other radials are lmtd in the signal shadow areas imposed by intervening high terrain.

BELLINGHAM ARPT: 1000' NE end NE/SW rnwy clsd to hvy tfc. (11-19)

BREMERTON-KITSAP COUNTY ARPT: The first 2,000' rnwy 1 closed to all Naval acft.

DEER PARK ARPT: E/W rnwy closed on alternate Sundays - drag races. (4-9)

ELLENSBURG-RADIO: DME and VOR coverage 40°-60°, 26 n mi at 7000'; 60°-150° unknown prohibited area; 150°-175°, 26 n mi at 5500'; 175°-260°, 43 n mi at 10,000'; 260°-290°, 43 n mi at 8000'; 290°-40°, 26 n mi at 10,000'.

EPHRATA-RADIO: DME and VOR coverage 124°-209°, unknown, prohibited area; 227°-280° 35 n mi at 8000'; 280°-340°, 26 n mi at 5000'; 340°-350°, 35 n mi at 5000'.

EVERETT-PAINE AFB-RADIO: USAF VHF/DF steers unreliable 080°-160° below 9000'; opers 0700-2300 daily, 30 mins notice other hours. (2-23)

**FORT LEWIS-CONTROLLED FIRING AREA: Effect. July 26, the following Controlled Firing Area will be established: Name: Fort Lewis, Wash. Description: From a point of Northern Pacific RR at lat 47-05-22, long. 122-30-15; easterly to a highway at lat 47-05-22, long. 122-26-00; southeasterly along this highway to lat 47-01-20, long. 122-22-00; southwesterly to lat 46-59-40, long. 122-26-00; westerly to lat 46-59-40, long.122-30-00; northwesterly to lat 47-00-50, long. 122-32-10; thence northerly along the eastern edge of R-503 and R-504 to point of beginning at lat 47-05-22, long. 122-30-15. Time of Use: Daylgt hrs only. Activities Conducted: Artillery firing, intermittent air/ground firing and aerial bombing in support of ground troops. Controlling Agency: CG, Fort Lewis, Wash.

MOSES LAKE-LARSON AFB-RADIO: USAF VHF/DF unreliable below 7000' NE quad; 5000' all other quads. (11-1)

MT. CATHERINE BCN SITE #4, SEA-HLN: Bcn inop.

OLYMPIA-RADIO: VOR coverage 340°-45°, 43 n mi at 4000'; 45°-135°, 43 n mi at 8000'; 135°-155°, 43 n mi at 7000'; 155°-225°, 43 n mi at 5000'; 225°-275°, 17 n mi at 5000'; 275°-340°, 43 n mi at 8000'; 314° radial on Shelton usable for 26 n mi at 2000'. 143° radial on Portland, Oregon intsxn usable for 35 n mi at 5000'. (5-3)

OLYMPIA ARPT: Farming activities adj to rnwys and taxiways spring thru fall.

OTHELLO ARPT: Caution-unlgtd power line approx 50' high E end-unmrkd.

PULLMAN-MOSCOW ARPT: Closed to ngt operns.

SEATTLE-RADIO: About June 25, VOR will be shut down until approx July 13.

SEATTLE AIR ROUTE TRAFFIC CONTROL CENTER-RADIO: Flight Advisory Information is based upon an increase in separation standards from 500 to 1000' between flgt levels of 12,500' and 29,000' in the Seattle Flight Information Region. 500' vertical separation will be acceptable for flight levels of 12,500' and below, 2,000' vertical separation above 29,000'. (3-15)

SEATTLE-BOEING FLD: All daylgt VFR operns of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat. to the E at 1000'. All turns when taxiing off lgt plane strip made toward twr. Hvy acft make tfc pat W of fld at 1500'-use main rnwys, taxi strips only. Due to non-visibility twr unable to ctl tfc W blast fence in front Boeing Flgt Center and parking apron #4. Men, equip working on N 5000' of main rnwy. Crew in rdo ctc with twr-caution.

SEATTLE-TACOMA INTERNATIONAL ARPT-TOWER: ASR will issue dist values in n mi in connection with radar control. Glide slope point of touchdown 1314' N of apch end rnwy 34. Glide slope rough not approved for automatic apch. FLD: Soft dirt along both sides and N end N 1000' rnwy 16-34. Rnwys 7-25 and 11-29 clsd. Rnwy 7-25 will be redesignated as E/W taxiway. S taxiway from rnwy 7 to rnwy 34 will be clsd to all 4 eng acft. (5-4)

SHELTON-RADIO: Soon, Z marker associated with H facility will be changed to low powered FM. Class: HW. (6-8)

SPOKANE-RADIO: DME and VOR coverage 36° - 152°, 43 nautical miles at 7000'; 153° - 224°, 43 nautical miles at 5000'; 225° - 264° , 43 nautical miles at 6000'; 265° - 35° , 43 nautical miles at 8000'. (6-17)

**SPOKANE-CAUTION AREA: Effective July 20, 1956, Caution Area (C-249) will be rescinded.

SPOKANE-FAIRCHILD AFB-RADIO: USAF VHF/DF unreliable below 9500' in all quads. Operg on training status only. (3-81)

SPOKANE-FELTS FLD: Light aircraft use rectangular traffic pattern and marked area south of runway. Equipment on field.

WASHINGTON: SPOKANE-GEIGER FLD-TOWER: UHF/DF coverage 110°-260°, 50 n mi at 5000'; 261°-280°, unreliable; 281°-330°, 40 n mi at 9000'; 331°-110°, 50 n mi at 9000'. Effect. May 7, request all VFR tfc arriving Geiger Arpt. or utilizing apch facilities to Geiger for practice purposes make initial rdo contact with Spokane apch control on appropriate apch ctl freq in lieu of contacting Geiger twr. Contact Geiger twr lcl ctl freq approx 5 miles from airport unless instructed otherwise. FLD: Perm crash barriers 40 inches high lctd 150' off ends rnwy 3-21.

TACOMA ARPT: Rnwys being repaired. Caution - Land according to wind tee between rnwys.

TACOMA-BARRY'S SKYHARBOR ARPT: Closed.

YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, and on the 123°, 161°, 191°, 298°, 321° and 336° rads at min terrain clearance alts.

WEST VIRGINIA: CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000'; 270°-330°, 26 n mi at 2500'. Moderate roughness all azimuths.

ELKINS-RADIO: LF rng has multiples and fades all courses. (5-31) DME coverage 35°-95°, 43 n mi at 6000'; 95°-120°, 35 n mi at 6800'; 120°-165°, 26 n mi at 6800'; 165°-195° 35 n mi at 6800'; 195°-220°, 43 n mi at 6800'; 220°-35°, 43 n mi at 5000'.

ELKINS MUNICIPAL ARPT: Runway lights 4-22 inoperative.

MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'.

MARTINSBURG ARPT: Serv fac avail 0800 until sunset. 28' hangar 500' E of centerline and 1100' from S end rnwy 35, lgtd. (6-7). Factory bldg 40' high under const 1000' E of S end rnwy 35 in flood lgtd area. (9-13) Construction under way end of rnwy 26 and along entire length of rnwy 8 and 26, men and equip. on fld, obstn marked.

MORGANTOWN-RADIO; LF rng has multiples and fades all courses.

PARKERSBURG-WOOD COUNTY ARPT: Caution - dip midway rnwy 16-34 covering full width of runway.

WISCONSIN: GREEN BAY-RADIO: VOR shut down until approx Aug 1 - modernization.

LA-CROSSE-RADIO: VOR radials 320° to 335° unreliable 20 to 30 n mi from stn.

LONE ROCK-RADIO: About July 9, VOR will be shut down until approx Sept. 1 - modernization.

MADISON-TRUAX FLD: Caution crossing hwy lndg rnwys 22, 26, 31. E taxiway N of Admin Bldg perm clsd to all acft over 10,000 lbs. Sod unsafe. Apch lgts rnwy 36 inop. Taxiway 6 lctd between S end of rnwy 18 and AF ramp clsd-const-marked with yellow barricades and flares nights.

MILWAUKEE-GENERAL MITCHELL FLD-TOWER: ASR will issue distance values in nautical miles in connection with radar control. All acft apchg Milwaukee with intentions to land will, durg VFR conditions and if equip. with multiple rdo freq, make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or before reaching a point 15 mi from the arpt giving position and altitude. FLD: Rnwy 7L-25R open daylgt hrs only. E taxi strip clsd to all tri-gear acft and jets. Obstn lgts on apch end rnwy 13 are obscured by trees. (1-9) Parking fac limited-itinerant military acft on unofficial bus. may find parking fac unavailable. (5-14)

MILWAUKEE-MAITLAND FLD: Closed all operations.

**STOUGHTON-NELSON ARPT: ABANDONED.

WYOMING: CASPER-NATRONA CO. ARPT-TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs. FLD: Caution all acft entering tfc pat. occasional jet acft opern with pickup and dropping of tow targets. (4-29) Rnwy 12-30 closed. Aircraft to be parked on runway.

CHEYENNE ARPT: Overrun lgts rnwy 8-26 inop.

GILLETTE ARPT: 50-75' W shoulder 1500' from N end N/S strip soft-clsd to hvy acft.

JACKSON ARPT: E/W rnwy closed-fence const across rnwy just W of N/S rnwy. Small aircraft may use E end of E/W rnwy in case of emerg, but at own risk. N/S rnwy clsd, const. Use new auxiliary 150' x 5400' strip E of N/S rnwy.

KEMMERER ARPT: Caution - all rnwys open to traffic. Rnwys recently re-seeded and little soft.

LARAMIE-RADIO: DME coverage 155, -225°, 35 n mi at 15,000'; 225, -300°, 26 n mi at 15,000'.

RIVERTON ARPT: Men and equip. on fld. 5000' W end rnwy 28 surfaces and available. Remainder airport closed.

ROCK RIVER-RADIO: DME coverage 360°-40°, 43 n mi at 11,000'; 40°-110°, 43 n mi at 11,300'; 110°-160°, 43 n mi at 11,000'; 160°-230°, 43 n mi at 15,000'; 230°-360°, 43 n mi at 12,000'.

ROCK SPRINGS-RADIO: ILS glide slope has light to moderate roughness between OM and LF range.

ROCK SPRINGS ARPT: Caution - first 500' NW end NW/SE rnwy clsd-marked.

SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.

TORRINGTON ARPT: Oil well pumps and storage tanks edge all rnwys. Men and equip on field. Use extreme caution.

PUERTO RICO: SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from tower. Caution.

Revisions to Instrument Approach Procedures

LOW FREQUENCY RANGE PROCEDURES

(DISTANCES ARE IN NAUTICAL MILES)

If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

CITY AND STATE / AIRPORT NAME / AIRPORT ELEVATION / CLASS OF FACILITY / FREQ. / IDENT. / PROCEDURE NO.	INITIAL APPROACH TO FACILITY: FROM	CRS. AND DIST.	MIN. ALT.	PROCEDURE TURN: SIDE OF FINAL APCH. VHF OMNIRANGE (TVOR) PROCEDURES

If a TVOR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

AIR NAVIGATION RADIO AIDS

INSACS = Interstate Airway Communications Station/s (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSACS. (C) The station identification is monitored continuously by the communicator at the associated INSACS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSACS. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSACS, and located too distant from INSACS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)=Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
• = Automatic voice identification
■ Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled
DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-drectional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing and voice signals available. Inclusion suffix "W" indicates range and homing signals only
T. . . . . Teletype
TVOR. . . Low power VOR (no standby equipment) located on airport
TX. . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same INSACS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

RADAR AVAILABLE : How and Where

(10 July 1956)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. TASR = Terminal Area Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR FLIGHT ADVISORY SERVICE: If radar advisory service is desired, the pilot of an aircraft will request such service through the appropriate Air Route Traffic Control Center, using normal en route communications facilities. ARTC will determine if service can be provided and will request pilot to change to appropriate frequency for direct communication with radar. Radar station will be identified by "THIS IS AIR FORCE RADAR ADVISORY". All suggested vectors to circumnavigate storm areas will be of advisory nature and do not relieve pilot of responsibility for safety of aircraft. If advisory service cannot be furnished for any reason, the procedure word "UNABLE" will be used. This will terminate radar advisory service to the aircraft without further explanation. This service will be available in the following ARTC Flight Advisory Areas; Chicago, St. Louis, Minneapolis, Kansas City, Albuquerque, San Antonio, Ft. Worth, Oakland, Denver, Great Falls, Los Angeles, and the area immediately around Knoxville, Tenn.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

ATC IFR CLEARANCE PHRASEOLOGY: Effective November 15, 1955, ATC facilities will resume general use of the phrase "VIA FLIGHT PLANNED ROUTE" in air traffic clearances to replace the lengthier detailed description of any portion of the route of flight that is identical to the route filed by the pilot. When used, the phrase will be preceded by sufficient detailed route of flight information to establish the flight on the filed route. The "VIA FLIGHT PLANNED ROUTE" phraseology does not include approval of altitudes filed in the flight plan. Specific altitudes assignments will be issued in each clearance. IFR flight plans filed by the pilots should contain the complete route of flight and should be relayed to air traffic control unchanged. Pilots may request route verification when considered necessary and are requested to do so whenever a filed route has been changed prior to departure. If route verification is desired prior to departure, the request should be included with the initial call for taxi clearance to avoid delay in receiving the information.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequences available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-..- -.-... (LGB in Code).

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy fields is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

WARNING OF MAINTENANCE AT CAA NAVAIDS: During periods of routine or emergency maintenance, the coded identification (or code and voice, where applicable) will be removed from certain CAA Navaids, namely, ILS localizers, VHF ranges (VOR, TVOR and VAR) and L/MF ranges but not from "H" facilities, compass locators or 75 mc marker beacons. The removal of identification serves as a warning to pilots that the facility has been officially taken over by "Maintenance" for tune-up or repair and may be unreliable even though on the air intermittently or constantly.

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS: In the Airman's Guide, "n miles" or "n mi" stands for nautical miles; "s miles" or "s mi" for statute miles.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight

(10 July 1956)

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

RADIO CALL-UP PROCEDURES - ARTC CENTERS: Effective February 1, 1956, aircraft on IFR flight plans making position reports direct to ARTC centers shall, in the initial call-up include the fix or geographical location over which the aircraft is reporting. Examples: "Indianapolis Center, this is TWA 55, Maxwell, over."; "Indianapolis Center, this is Beechcraft 1234, 20 south of Maxwell, over."

Pilots are reminded, however, that direct communication with the center shall NOT be established until the pilot is specifically requested to do so.

UNACCEPTABLE RADIO MESSAGES: CAA facilities will no longer accept non-safety messages (requests for ground transportation, meals, telephone calls, etc.) from pilots of aircraft in flight. Arrangements should be made by a pilot prior to departure via public communications (telephone, telegraph, etc.) for such requirements. Pilots are also reminded that transmission of such messages violates the terms of their aircraft radio license as provided in Part 9 of the FCC Regulations.

CLASSIFICATION OF ILS BACK COURSES: ILS back courses have in the past been classified as either "usable" or "unusable". It now appears that further classification of the "unusable" courses are necessary, since some back courses formerly classified as "unusable" actually may be satisfactory for intersections, holding, transitions or missed approaches, even though they are not satisfactory for back course approaches.

ILS back courses will in the future be classified as follows:

Usable - suitable for ILS back course approaches
Restricted - not suitable for ILS back course approaches, but suitable for intersections, holding, transitions or missed approaches
Unusable - not suitable for any of the above.

SPURIOUS GLIDE SLOPE INDICATIONS: CAA glide slope facilities are intended to provide reliable glide slope signals for use in conjunction with the front course of the ILS localizer. Glide slope signals may be received in other azimuths (because of stray radiation from the antennas and reflections from nearby objects) which may in some cases be sufficient to activate the airborne warning flag. Any glide slope needle activity in these other azimuths should be disregarded.

All pilots are particulary cautioned to ignore glide slope indications when making back course localizer approaches. All CAA approved procedures for back course approaches are limited to use of the localizer portion of the ILS. Any attempt to fly spurious glide slope indications on such back course approaches could result in hazardous operations.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, regardless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

ATLANTA AND MEMPHIS CENTERS BOUNDARIES: Effective July 2, the Atlanta Center and the Memphis Center boundaries are amended as follows: Beginning at the present boundary crossing Red civil arwy No. 10 and VOR civil arwy No. 18 and 18N on a 50 mile arc NE of the Meridian, Miss., LF rng stn thence direct to lat 33-17-30N, and long.87-39-00W; thence direct to lat 33-56-30N and long. 87-39-00W; thence direct to cross Red civil arwy No. 52 and VOR civil arwy No. 7 on a 30 mile arc SE of the Muscle Shoals, Ala. LF rng stn; thence direct to lat 34-30-00N, and long. 86-30-00W; thence direct to cross VOR civil arwy No. 54 40 miles W of the Chattanooga, Tenn. VOR stn; thence direct to the present boundary crossing Amber civil arwy No. 6 and VOR civil airway No. 5 30 miles NW of the Chattanooga, Tenn. LF rng stn.

LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

EVW Evanston, Wyoming (Assignment)
INE Winner, South Dakota, Winner Airport (Assignment)

RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

(Part 608 - Restricted Areas - Amendment 171)
(July 18, 19; August 1, 2, 15, 16, 29, 30; September 12, 13, 26, 27)

(1) In Section 608.30, a Manistique, Michigan, Temporary Area is added to read: "Description by Geographical Coordinates: Beginning at lat 45-12-00, long. 86-01-00; thence to lat 45-39-00, long. 86-35-00; thence to lat 45-50-00, long. 86-12-00; thence to lat 45-17-00, long. 85-46-00; thence to point of beginning. Designated Altitudes: Surface to 18,000 ft. MSL. Time of Designation: Daylgt only when visibility and ceiling exceed the maximum ordinate of fire. Controlling Agency: COM 9, NAS Glenview, Illinois.

(Part 608 - Restricted Areas - Amendment 172)
(August 3, 1956)

(1) In Section 608.12, the Fort Huachuca, Ariz., area (R-181), amended on November 17, 1955 in 20 F.R. 8519, is further amended by changing the "Designated Altitudes" column to read: "Surface to 35,000 ft. MSL."

(2) In Section 608.28, the Assateague Island, Md, area (R-42 formerly D-42), published on July 16, 1949 in 14 F. R. 4291, is rescinded.

(Part 608 - Restricted Areas - Amendment 173)
(July 15, 1956)

(1) In Section 608.21, the Savanna, Illinois, temporary area (R-498), published on December 13, 1955 in 20 F. R. 9301, is amended to make it a permanent area and by changing the "Time of Designation" column to read: "Continuous".

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Aberdeen	Lincoln	WAC 191
Casper	Salina	WAC 262
Des Moines	Wichita	WAC 263
Dubuque	Boston Local	

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

NATIONAL EMERGENCY DEFENSE AIRLIFT TEST EXERCISE: A test exercise involving the National Emergency Defense Airlift (NEDA) will be undertaken during Operation Alert 1956. This includes all business and privately owned aircraft of 12,500 lbs and over.

The exercise will consist of a routine "Position Report" including the additional information as to the home airport base of the aircraft. The "Position Report" will begin with the words "Civil Defense Exercise" which designates the message as part of the test exercise. Pilots of all airborne business and privately owned aircraft of the weight of 12,500 lbs and over are requested to make "Position Reports" to the nearest CAA communications station or tower.

Reporting time is to be on July 20. 1956 between 1400 and 1500 hours local time.

Pilots of aircraft not in the air during this time, are requested to telephone the nearest CAA Aviation Safety District Office and report the location of the aircraft, N-number, make and model of aircraft, home airport base, and estimated time aircraft will be available. The words "Civil Defense Exercise" should also be used to begin the telephone message.

The purpose of this test exercise is to determine the degree of availability and also the location of all business and privately owned aircraft of 12,500 lbs and over at a given time for support of Federal Civil Defense under emergency conditions.

Cooperation of all pilots of the above mentioned aircraft is urgently requested and is essential to the success of this test exercise.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31)	-	Month and day item was reported.
**	-	New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★	-	New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE	-	Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

ALABAMA: **ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.**

BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd.(5-8)

BIRMINGHAM-RADIO: About July 15, VOR will be shut down - relctn. (6-7)

BIRMINGHAM ARPT: Caution-traffic operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional landing gear type acft, including T-6. (4-8) Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

GUNTERSVILLE ARPT: Runways usable. (7-9)

★HUNTSVILLE-RADIO: Omni rng class: VOR. Monitoring category (1) Voice call: "Redstone Army Radio". (7-2) VOR radials 005°-030° unusable due to roughness and bends.

HUNTSVILLE MUN ARPT: Caution - rnwy 18-36 under const.

MOBILE-RADIO: About July 16, VOR will be shut down until approx Sept. 17. (6-8) During shut down, temporary MEA V-20 New Orleans VOR to Evergreen VOR using Biloxi LF rng. 2500' New Orleans VOR to Biloxi LF rng. 4000' Biloxi LF rng to Evergreen VOR. During shut down period Arwys V-20 N Mobile VOR to Evergreen VOR, V-240 Dog Intersection to Mobile VOR, V-242 Mobile VOR to Bon Secour intersection unusable. During period fixes Dog intersection and Bon Secour VHF intersection on V-22 unusable. (7-7)

ALABAMA: **MONTGOMERY-DANELLY FLD: Taxiway from rnwy 15 to E/W taxi strip perm clsd. Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft lndg and taking-off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard hangar. E/W rnwy clsd to all military acft-const. Eastermost 5000' avail days, easternmost 6000' avail sunset to sunrise to civil acft. Western end marked by flags-days, lgts-ngts.

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi acct scalloping and bends.

ARIZONA: SPECIAL NOTICE: Until July 24, 1956, captive balloons will be flown nightly from one hour after sunset to one hour before sunrise at lctns 10 mi W Gila Bend AF Aux, 2 mi S Sentinel and 3 mi E Dateland, Ariz. Surface to 1500' and lgtd by one red lgt. Extreme caution when flying at low alts near these lctns.

AJO ARPT: Beacon and lights inoperative.

**CHANDLER-RIGGS ARPT: ABANDONED.

COCHISE-RADIO: VOR/DME flgt-checked, opern normal. Coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA.

FLORENCE-CONTROLLED FIRING AREA: A temporary Controlled Firing Area is established: Name: Florence, Ariz. Description: N-bndry-N lat 33-07-30; E bndry-W long. 111°-20-00; S bndry-N. lat 33-03-30; W bndry-W long. 111-22-30. Altitude: Surface to 6,000' MSL. Activities conducted: 4.2" mortar firing. Using Agency: Arizona National Guard. Effective dates: 0800-1800- July 14 and 15.

GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.

HASSAYAMPA-RADIO: VOR/DME usable to 30 n mi from 30°-70°, 240°-255°, 320°-345° and 40 n mi from 70°-85° at MEA.

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission manager. Const in progress S of taxiway 1 from rnwy 8L to trans ramp and S to arpt entrance road.

PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185°, 39 n mi at 10,000'.

SALOME, SITE # 27B, LAX-PHX: Caution - puncture vines.

SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed.

**SEDONA-OAK CREEK ARPT: New fld-Type: P. Lat 34-50, long. 111-47. Lctn: 2 mi SE. Elev: 4800'. No of rnwys: 1. Lngst rnwy & facs: 38. Fuel: F2.

TUCSON-RADIO: VOR/DME shut down.

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF- steers unrel beyond 35 n mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.

**TUCSON-GILPIN ARPT: Two 200' lgtd twrs erected 2.0 n mi N (13°T) at lat 32-00-19, long. 111-00-32.

YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA.

YUMA COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area.

ARKANSAS: ARKADELPHIA MUN ARPT: Unsafe- due to holes in landing areas.

EL DORADO-RADIO: DME 2000'MSL coverage 43.5 mi 325° thru N to 225°; 2000' MSL coverage 35 mi 225° thru W to 325°.

FAYETTEVILLE-RADIO: July 7, VOR flgt-checked operations normal.

FLIPPIN-RADIO: About July 23, VOR will be shut down until approx September 24.

HARRISON ARPT: N/S, new NW/SE runways closed - construction. Field closed nights.

**LITTLE ROCK ARPT-TOWER: ILS, Glide Slope Angle 3°-1'.

NORTH LITTLE ROCK-CENTRAL ARPT: Field closed to all operations - construction.

TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends.

WALNUT RIDGE-RADIO: VOR radials 290°-320°, 120°-150° and 200°-210° unusable acct bends and course roughness.

**WALNUT RIDGE ARPT: Three 65' lgtd antenna poles erected 985 ft. E of north end of N/S rnwy.

CALIFORNIA: **ADELANTO-GREY BUTTE ARPT: ABANDONED.

AUBURN ARPT: Clsd to hvy acft. Lgtd acft use extreme caution acct soft rnwys.

BLYTHE-RADIO: DME coverage 165°-188°, 39 n mi at 7000'; 189°-200°, 26 n mi at 6000'; 200°-220°, 39 n mi at 6000'; 220°-293°, 43 n mi at 9000'; 293°-310°, 26 n mi at 9000'; 310°-327°, 35 n mi at 9000'. May 28 VOR/DME shut down until approx Aug 1. During this period, the following arwys will not be usable: Victor 64 Thermal to Blythe; V-16 Palm Springs Intersection to Hassayampa, Ariz; V-135 Needles to Yuma, Ariz.

CAMARILLO-RADIO: All courses have multiples.

CHICO-RADIO-SPECIAL NOTICE: USAF will conduct maneuvers at Chico Mun Arpt. 24 hrs each day during periods July 22, 1956 thru Aug 5, 1956 and Aug 12 thru Aug 26. CAA will oper mobile ctl twr during following hrs Standard Time: July 22, 0800-1700; July 23 thru Aug 4, 0500-2300; Aug 5, 0800-1700; Aug 12, 0800-1700; Aug 13 thru 25, 0500-2300; Aug 26, 0800-1700. Rdo freq avail as follows: Trans: 278kc, 119.9, 121.5, 126.18, 236.6, 243.0, 275.8 mc. Rcvg: 3023.5kc., 122.5, 121.5, 126.18, 236.6, 243.0, 275.8 mc. Two way rdo equip capable of commun with ctl twr rqrd of all acft except transient during periods of maneuvers. Military Flight Service interphone avail Chico Mun Arpt.

CHINO PACIFIC ARPT: Equip. on or near all rnwys - use caution.

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

CRESCENT CITY-DEL NORTE COUNTY ARPT: Entire length of rnwy 11 usable and free of drifting sand.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.

FAIRFIELD-TRAVIS AFB-RADIO: USAF VHF/DF bearings and communications in NW quad unreliable below 8500'. Opers 0700-1600 Mon-Fri training status only.

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked.

FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy rads flgt-checked. DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRESNO AIR TERMINAL: Exercise extreme caution in vcnty, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Extensive construction and hvy equip both ends rnwy 11-29, apch areas and adj taxiways. First 250' rnwy 11 clsd-usable length 6750'. Extreme caution apch end rnwy 11 large equip working in rnwy extention area.

FURNACE CREEK SITE 17 RIV-DLS: N 1200' of rnwy closed to all operns - mrkd. Entire fld clsd to all hvy or multi-eng acft. S 4500' of rnwy open to lgt acft- caution.

KLAMATH-McBETH ARPT: Closed.

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340° 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. ILS and LF rng during VFR conditions heavy simulated instrument approach traffic. About July 23, VOR will be shut down until approx August 13 - modernization.

LONG BEACH ARPT-TOWER: ILS glide slope decmsnd. (7-5) FLD: Several 230'MSL portable oil derricks NW, W & S of fld. No fuel servicing avail. for civil acft 2400-0600. First 800' rnwy 30 and adj taxiways clsd-const. 6200' rnwy 30 avail lndgs & take-offs. Rnwy 12 closed. N 800' apch end rnwy 16L perm closed.

LOS ANGELES-RADIO-SPECIAL NOTICE: July 3 transcribed weather bdcasts oper tests basis. Hrs. opern: 0800-2400. Manual bdcast continues on VOR-on both VOR and LF combined 2400-0800.

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL.

LOS ANGELES AIR ROUTE TRAFFIC CONTROL CENTER: Center will activate high alt sector 0900 Mar 20. Sector will control all acft operg at specific alt at or above 25,000'. IFR including jet acft operg at least 1000' on top. All jet acft specific alt or at least 1,000' on top should ctc ARTC center 301.4 mc as soon as possible after departure within or entering area inbound.

LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx. 4000' W of Sepulveda Blvd open VFR tfc only. Equip. on and adj to const areas. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL approx the intersection of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu Intersection in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the shoreline or Del Rey FM unless cleared otherwise by ATC. Jet aircraft pattern down-wind leg is 2500'. Acft

CALIFORNIA: not intending lndg at arpt should avoid apch areas to W and E below 3000' in VFR wea. Recommend cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt, or between LF rng and arpt. Avoid shoreline W due high performance of departing jet acft. Due to non-visibility twr unable to ctl tfc on last 2400' rnwy 34. (2-10)

LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700.

**MOJAVE-MYER ARPT: Abandoned. (5-28)

OAKLAND-RADIO-SPECIAL NOTICE: Effect. Sept 1, military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland , Alameda NAS, Hayward or San Francisco. (5-23)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND INTERNATIONAL ARPT-TOWER: ASR will issue distance values in nautical miles in connection with radar control. UHF/DF steers unreliable below 7,000' within 10 mi of stn. (4-24) FLD: Dredging and clam shell equip working S of lndg area. All booms and equip lgts and mrkd. Use extreme caution when flying over or within this area.

OCEANSIDE-RADIO: VOR coverage 310°-020°, 35 n mi at min en route alt. (10-10)

ONTARIO-RADIO: DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-0°, 35 n mi at 13,000'. May 7, VOR shut down until approx July 13. (6-22)

ONTARIO INTN'L ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng runs ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as mrkd by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th fighter interceptor acft. (5-14)

OXNARD AFB-RADIO: USAF VHF/DF unreliable below 12,000' within 50 n mi. (4-20)

**OXNARD-VENTURA COUNTY ARPT: 160' lgtd derrick erected 700' N center of arpt.

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)

**PALOMAR MOUNTAIN-CAUTION AREA: Effect. July 26, the portion of Caution Area (C-444) overlapped by the airway "From the Oceanside VOR via the 101°T rad thereof to its intersection with the 46°T rad of the San Diego, Calif., VOR; thence via the San Diego 46°T rad and the Thermal, Calif 226°T rad to the Thermal VOR radio Range" will be rescinded.

PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'.

QUINCY-GANSNER FLD: East 700' E/W rnwy and taxi strip unusable. (1-3)

RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30)

**REDLANDS-FLYING INN-REDLANDS ARPT: (Formerly Redlands Arpt) Lngst rnwy & facs: 26-L4-S3. Fuel: F2. Remarks: Rgt tfc E. Lgts on req after 2400. Rolling.

**RICE FLD: Abandoned. (6-14)

RIDGECREST-DAVIS ARPT: Lgts inop. (4-11)

RIVERSIDE-RADIO: USAF VOR unreliable. (6-20)

RIVERSIDE ARPT: Closed to all itinerant tfc-const. (5-5)

SACRAMENTO-RADIO: June 28, VOR shut down until approx Aug 28-modernization. During this period the following Victor Arwys are affected: V-150 Sacramento to West Point intersection may be used utilizing 082° bear. from Sacramento LFR provided acft is equip with ADF; MEA westbound 5000', Eastbound 8000'; Modesto VOR to Williams VOR direct MEA 3000'. Following arwys are not usable: V-23 Sacramento to intersection with V-200; V-195 Rio intersection to Williams; V-6 Rio intersection to Reno; V-6N Sacramento to Mt. Lola intersection; V-212 Auburn intersection to Reno. (6-28)

SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive CALIFORNIA: simulated instr apchs including jets VFR weather actual apchs IFR wea.

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20° 43 n mi at 7000'.

**SAN ANDERAS-CALAVERAS COUNTY ARPT: New fld. Type: P. Lat. 38-11, long. 120-40. Lctn: 0.5 SE. Elev: 1200'. No. of rnwys: 1- E/W. Lngst rnwy & facs: h20-*L4-S3. Fuel: F2. Remarks: No storage. (6-26)

★SAN DIEGO-RADIO-SPECIAL NOTICE: Effect. May 16, acft VFR inbound to Lindbergh Fld, are requested to make initial call to San Diego Apch Ctl on 118.3 mc. This initial call should be made over one of the following reporting points: Oceanside from north; Jamul from east; Mexican Border from south; approximately 20 mi west from seaward. Apch Ctl will give initial tfc ctl instructions and advise pilot where to contact Lindbergh Tower for lndg clearance. This procedure does not apply to VFR acft departing local immediate area for Lindbergh Fld due to short distance involved. (5-14)

SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads xcpt 20 mi MEA from 310° to 330°. Soon, VOR will be shut down until approx July 12. (6-7)

SAN DIEGO-LINDBERGH FLD: 500' W end rnwy 9-27 clsd-jet barrier. (2-29)

SAN FRANCISCO: See Oakland Control Zone Notam.

SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft inbound to San Francisco Intn'l Arpt are requested to make initial call to San Francisco Approach Control, freq 118.5 mc. Points over which to make this initial call are changed to the following: Richmond from N; Bay Point from NE; Livermore-E; Evergreen or Campbell-SE; at or abeam Farallon Islands-W; at or abeam Stinson Beach - NW. Approach Control will give initial traffic control instructions and advise pilot when to change to local ctl freq for lndg clearance. This procedure does not apply to VFR acft departing Oakland for San Francisco due to the short distance involved. These flgts should call San Francisco tower-freq 119.1 mc as in the past.

SAN FRANCISCO-RADIO: DME coverage 10°-30°, 17 n mi at 5000'; 30°-85°, 26 n mi at 7000'; 85°-100°, 35 n mi at 7000'; 160°-180°, 26 n mi at 5000'; 180°-225°, 17 n mi at 5000'; 225°-265°, 26 n mi at 5000'; 345°-10°, 35 n mi at 4000'.

SAN FRANCISCO INTN'L ARPT-TOWER: Interference on 119.1 mc vcnty ILS OM. (4-24)

SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)

SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. Reception 3023.5 kc unreliable daylgt hrs.

**SANTA BARBARA ARPT: Group of six 200' twrs lctd 2 mi ESE perm. removed. Rnwy lgts rnwy 15L-33R perm discontd. (7-2)

SANTA MONICA-RADIO: TVOR radials 030°, 075°, 210°, 260°, and 323° usable. (1-20)

SANTA MONICA ARPT: Service avail only between 0700-2100 daily. Extreme caution advised during ngt use of fld due to unlgtd open storm ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)

THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi; 060°-085°, 40 n mi; 145°-175°, 40 n mi; 175° thru 180° to 250°, 20 n mi; 250°-280°, 40 n mi at min en route alt. (3-14)

TULARE ARPT: Closed-construction. (5-18)

UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500' MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100°-150° at 6000'. 105° thru S and W to 305° over water not checked.

VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360°-045° below 15,000'.

COLORADO: COLORADO SPRINGS-PETERSON FLD: Caution-lndg acft due to rise in terrain at apch end rnwy 21. Const on ramp SE of twr. (5-1)

DENVER-STAPLETON FLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft xcpt when absolutely necessary for taxiing W of rnwy 3-21. Hvy air tfc N and E due to extensive instrument trng. Flashing amber lgt in segmented circle indicates rgt hand tfc. Two-way rdo rqrd capable of communicating with twr.

EADS ARPT: Emerg only-rough. (4-20)

★EAGLE-RADIO: July 2, Trans 255.4 & 243.0 mc & rcvr 243.0 mc. cmsnd.

★GRAND JUNCTION-RADIO: July 4, glide slope relocated 784' from approach end of runway 11; 450' north of runway centerline. Point of touchdown 709' from approach end of rnwy 11.

KREMLING-RADIO: About July 10, VOR will be shut down until approx August 7. (6-22)

COLORADO: LONGMONT APPT: NW/SE rnwy under const. (3-13)
PUEBLO-SPECIAL NOTICE: Ordnance depot approx 14.8 n mi E at lat 38-16-53, long. 104-18-00, conducting demolition work - days.

SULPHUR SPRINGS-RADIO: Soon VOR will be shut down until approx Aug 27. During shut down, MEA Texarkana to Dallas via V-16 will be 3800'. (6-18)

**TERLINGUA-MENCHIN RANCH ARPT: Abandoned. (6-19)

TEXARKANA-SPECIAL NOTICE: Demolition in progress during daylgt hrs on Green Arwy #5 approx 13.4 n mi WSW of Texarkana LF rng.

TYLER-POUNDS FLD-TOWER: ILS glideslope not to be used from MM to touchdown - caution. (10-14)

WACO-RADIO: DME coverage 190°-290°, 35 n mi at 2300'; 290°-190°, 43 n mi at 2300'. Coverage over Restricted Areas 219 and 443 not certified.

WICHITA FALLS-SHEPPARD AFB: 3300' NW end rnwy 12-30 usable for lgt acft daylgt hrs only. Rnwy 17-35C no longer usable for landings & take-offs - usable for taxiway only.

UTAH: BOONEVILLE-RADIO: DME coverage 295°-350°, 35 n mi at 12,000'.

BRYCE CANYON-RADIO: VOR has lgt roughness below 13,000'.

DELTA-RADIO: VOR coverage 40°-80° and 100°-135°, 35 n mi at 11,000'. DME coverage 40°-90°, 26 n mi at 13,000'.

HANKSVILLE-RADIO: VOR coverage 40°-60°, 35 n mi at 10,000'; 172°-190°, 26 n mi at 13,000'.

LUCIN-RADIO: VOR usable dist at min IFR terrain clearance alt 280°-900°, 35 n mi; 350°-30° and 180°-220°, 35 n mi. (11-26)

MILFORD-RADIO: VOR coverage 20°-140°, 22 n mi; 235°-330°, 35 n mi at min en route alt. (1-2)

OGDEN-RADIO: VOR coverage 5°-120°, 30 n mi at 11,000'. DME coverage 360°-150°, 17 n mi at 12,000'.

**PRICE-CARBON COUNTY ARPT: Unicom. (6-12)

SALT LAKE CITY RADIO: VOR shut down until approx June 25. The following arwys will not be usable during shutdown: V-21 Ogden to Utah Lake V-32 Bonneville to Fort Bridger. (5-25)

UTAH LAKE-RADIO: VOR usable dist at 14,000' MSL from 010°-040° 35 n mi; 40°-50°, 30 n mi; 50°-85°, 40 n mi; at 13,000' MSL from 145°-155°, 35 n mi, and 275°-295°, 30 n mi. Course roughness exists over mountain ridges N thru E between 15 and 20 n mi. (2-1)

VERMONT: SPECIAL NOTICE: Arpt condition info avail. by calling Vt. Aero Comm. (Tel. Capital 3-2311 Ext. 808) 0830-1630, Mon thru Fri or CAA Communs Stn, Barre-Montpelier Arpt anytime (tel Capital 3-2376). Acft in flgt call Montpelier Rdo.

BARRE-MONTPELIER ARPT: Caution - 500' exten S end rnwy 35 under const, men, equip on field.

BRISTOL ARPT: E/W rnwy closed, obstruction.

BURLINGTON-RADIO: VHF/DF bearings unreliable inbound headings 055°-110° below 6000'; 110°-140° below 4000'; 235°-255° below 4000'; 255°-355° below 9000' all beyond 50 n mi. UHF/DF bearings unreliable inbound headings 134°-194° beyond 45 n mi below 7500'; 195°-250° beyond 45 n mi below 8500'; 251°-268° beyond 50 n mi below 8500'; 269°-343° beyond 40 n mi below 7600'; 344°-133° beyond 45 n mi below 5000'.

VIRGINIA: SPECIAL NOTICE : On or about June 26, 1956, obstn lgts and mrkgs on the MRL antenna poles at Blackstone, Norfolk and Tappahannock will be perm discontd.

BLACKSTONE AAF: Fld clsd to civil acft. Frequent parachute dropping exercises involving personnel and equip. in progress. Exercise extreme caution when in vcnty. Contact Blackstone Rdo for advisory info.

CHASE CITY-EMILES ARPT: Extension to S end rnwy under construction.

**DAHLGREN-SPECIAL NOTICE: Restricted Area (R-38) daily air and surface firing present. Extreme hazard to aircraft all altitudes all times.

FRONT ROYAL-RADIO: VOR coverage 120°-160°, 175°-200°, 220°-226°, 270°-010°, 35 n mi at 4000'. INSACS discontd - Martinsburg, W. Va. will control VOR and LF ranges. Auto. wea trans entered on Service A.

GORDONSVILLE-RADIO: VOR has roughness in all quads. DME coverage 55°-75°, 35 n mi at 1500'; 75°-85°, 30 n mi at 1500'; 85°-130°, 35 n mi at 1500'; 130°-160°, 39 n mi at 3000'.

GRUBBS-RADIO: VOR operg on test basis. Freq: 109.2 mc. Ident: GBS. Lctd at latitude 38-20-09, long 77-21-11. Class: VORW.

HERNDON-RADIO: VOR usable dist 35 n mi at min instr alt NE quad. Terrain causes minor course roughness in SW quad.

LAWRENCEVILLE-RADIO: VOR radials 185°-240° usable only to 22 n mi at min en route instr alt. Soon VOR/DME will be shut down until approximately August 3.

LEESBURG ARPT: New 3500' E/W strip closed - old strip lying parallel and S will be available-2200'.

LYNCHBURG-PRESTON GLEN ARPT: Signal for below VFR wea minimums inop, nights.

MONTEBELLO-RADIO: VOR coverage 110°-220°, 35 n mi at min en route alt. DME coverage 150°-180°, 35 n mi at 3000'; 180°-210°, 35 n mi at 5000'.

NORFOLK-RADIO: Visual courses VAR slightly rough.

PULASKI-RADIO: VOR coverage 305°-15°, 22 n mi; 15°-55° and 195°-210°, 35 n mi at min instr alt. DME coverage 10°-40°, 35 n mi at 6000'; 40°-120°, 43 n mi at 6000'; 120°-200°, 35 n mi at 6000'; 200°-225°, 26 n mi at 6000'; 225°-255°, 43 n mi at 6000'; 255°-010°, 26 n mi at 6000'.

RICHMOND-BYRD FLD: Due to non-visibility twr unable to ctl tfc on N portion of N/S taxiway parallel to rnwy 2-20. All acft rqrd to have two-way rdo for ngt opern and at least rdo rcvr for daylgt opern. Use paved areas only, all other soft. Landing FEE for milti-engine executive and non-scheduled acft.

ROANOKE MUN-WOODRUM FLD: Due to non-visibility twr unable to ctl tfc last 200' NE/SW taxi strip and 200' approx midway E/W strip. Men and equip adj all rnwys and taxiways - caution.

WEST POINT ARPT: Caution-men, equip. on rnwys 0730-1630 daily xcpt Sat and Sun.

WILLIAMSBURG-SPECIAL NOTICE: After 0730 daily avoid flying within a 5 mile radius of lat 37-16, long 76-43 - concerts.

WILLIAMSBURG-COLLEGE ARPT: Caution NE/SW rnwy under const. Men, equip on rnwy all hours.

WASHINGTON: SPECIAL NOTICE: Unmrkd p-lines across coves in Puget Sound area and lakes.

BELLEVUE ARPT: 40' power crane working S end of rnwy in apch zone.

BELLINGHAM-RADIO: VOR radial 280°, on Vancouver, B.C. lmtd to usable dist of 27 n mi acct course roughness at the lowest instr alt of 1500'. In general, usable dist of other radials are lmtd in the signal shadow areas imposed by intervening high terrain.

BELLINGHAM ARPT: 1000' NE end NE/SE rnwy closed to hvy traffic.

BREMERTON-KITSAP COUNTY ARPT: The first 2,000' rnwy 1 closed to all Naval acft.

DEER PARK ARPT: E/W rnwy closed on alternate Sundays - drag races.

ELLENSBURG-RADIO: DME and VOR coverage 40°-60°, 26 n mi at 7000'; 60°-150° unknown, prohibited area; 150°-175°, 26 n mi at 5500'; 175°-260°, 43 n mi at 10,000'; 260°-290°, 43 n mi at 8000'; 290°-40°, 26 n mi at 10,000'.

EPHRATA-RADIO: DME and VOR coverage 124°-209°, unknown, prohibited area; 227°-280°, 35 n mi at 8000'; 280°-340°, 26 n mi at 5000'; 340°-350°, 35 n mi at 5000'.

EVERETT-PAINE AFB-RADIO: USAF VHF/DF steers unreliable 080°-160° below 9000'; opers 0700-2300 daily, 30 mins notice other hrs.

**FORT LEWIS-CONTROLLED FIRING AREA: Effect. July 26, the following Controlled Firing Area will be established: Name: Fort Lewis, Wash. Description: From a point of Northern Pacific RR at lat 47-05-22, long 122-30-15; easterly to a highway at lat 47-05-22, long. 122-26-00; southeasterly along this highway to lat 47-01-20, long 122-22-00; southwesterly to lat 46-59-40, long 122-26-00; westerly to lat 46-59-40, long 122-30-00; northwesterly to lat 47-00-50, long 122-32-10; thence northerly along the eastern edge of R-503 and R-504 to point of beginning at lat 47-05-22, long 122-30-15. Time of Use: Daylgt hrs only. Activities conducted: Artillery firing, intermittent air/ground firing and aerial bombing in support of ground troops. Controlling Agency: CG, Fort Lewis, Wash.

MOSES LAKE-LARSON AFB-RADIO: USAF VHF/DF unreliable below 7000' NE quad; 5000' all other quads.

OLYMPIA-RADIO: VOR coverage 340°-45°, 43 n mi at 4000'; 45°-135°, 43 n mi at 8000'; 135°-155°, 43 n mi at 7000'; 155°-225°, 43 n mi at 5000'; 225°-275°, 17 n mi at 5000'; 275°-340°, 43 n mi at 8000'; 314° radial on Shelton usable for 26 n mi at 2000'. 143° radial on Portland, Oregon intsxn usable for 35 n mi at 5000'.

OLYMPIA ARPT: Farming activities adj to rnwys and taxiways spring thru fall.

OTHELLO ARPT: Caution-unlgtd power line approx 50' high E end-unmarked.

PULLMAN-MOSCOW ARPT: Closed to night operns.

SEATTLE-RADIO: July 5, VOR shut down until approx July 15. (7-5)

SEATTLE AIR ROUTE TRAFFIC CONTROL CENTER-RADIO: Flight Advisory Information is bases upon an increase in separation standards from 500 to 1000' between flight levels of 12,500' and 29,000' in the Seattle Flight Information Region. 500' vertical separation will be acceptable for flight levels of 12,500' and below 2,000' vertical separation above 29,000'.

SEATTLE-BOEING FLD: All daylgt VFR operns of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat. to the E at 1000'. All turns when taxiing off lgt plane strip made toward twr. Hvy acft make tfc pat W of fld at 1500'- use main rnwys, taxi strips only. Due to non-visibility twr unable to ctl tfc W blast fence in front Boeing Flgt Center and parking apron #4. Men, equip working on N 5000' of main rnwy. Crew in rdo ctc with twr-caution.

SEATTLE-TACOMA INTERNATIONAL ARPT-TOWER: ASR will issue dist values in n mi in connection with radar control. Glide slope point of touchdown 1314' N of apch end rnwy 34. Glide slope rough not approved for automatic apch. FLD: Soft dirt along both sides and N end N 1000' rnwy 16-34. Rnwys 7-25 and 11-29 clsd. Rnwy 7-25 will be redesignated as E/W taxiway. S taxiway from rnwy 7 to rnwy 34 will be clsd to all 4 engine acft.

SHELTON-RADIO: Soon, Z marker associated with H fac will be changed to low powered FM. Class: HW.

SPOKANE-RADIO: DME and VOR coverage 36°-152°, 43 n mi at 7000'; 153°-224°, 43 n mi at 5000'; 225°-264°, 43 n mi at 6000'; 265°-35°, 43 n mi at 8000'.

**SPOKANE-CAUTION AREA: Effect. July 20, Caution Area (C-249) will be rescinded.

SPOKANE-FAIRCHILD AFB-RADIO: USAF VHF/DF unreliable below 9500' in all quads. Operg on trng status only.

SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip. on field.

SPOKANE-GEIGER FLD-TOWER: UHF/DF coverage 110°-260°, 50 n mi at 5000'; 261°-280°, unreliable; 281°-330°, 40 n mi at 9000'; 331°-110°, 50 n mi at 9000'. Effect. May 7, request all VFR tfc arriving Geiger Arpt or utilizing apch facilities to Geiger for practice purposes make initial rdo contact with Spokane apch control on appropriate apch ctl freq in lieu of contacting Geiger twr. Contact Geiger twr lcl ctl freq approx 5 mi from arpt unless instructed otherwise. FLD: Perm crash barriers 40 inches high lctd 150' off ends rnwy 3-21. Rnwy 7-25 closed to all operations.

TACOMA-RADIO : July 16, RAPCON surveillance radar will be shut down until approx July 30 - modification. RAPCON will provide enroute ctl and manual apch ctl during this period using Anchorage, Alaska separation standards.

TACOMA ARPT: Runways being repaired. Caution - land according to wind tee between runways.

[redacted]: TACOMA-BARRY'S SKYHARBOR ARPT: Closed. (6-14)
YAKIMA-RADIO: VOR flgt-checked for en route Voctor Arwys use only at min instr alts, and on the 123°, 161°, 191°, 298°, 321° and 336° radials at min terrain clearance alts.
[redacted]: CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000'; 270°-330°, 26 n mi at 2500'. Moderate roughness all azimuths. (6-18)
CHARLESTON-KANAWHA COUNTY ARPT-TOWER: ILS glide slope 335 mc operg on test basis. (6-25)
ELKINS-PADIO: LF rng has multiples and fades all courses. (5-31) DME coverage 35°-95°, 43 n mi at 6000'; 95°-120°, 35 n mi at 6800'; 120°-165°, 26 n mi at 6800'; 165°-195°, 35 n mi at 6800'; 195°-220°, 43 n mi at 6800'; 220°-35°, 43 n mi at 5000'. (7-1)
ELKINS MUNICIPAL ARPT: Rnwy lgts 4-22 inop. (2-24)
MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500'; 95°-150°, 35 n mi at 2000'.
MARTINSBURG ARPT: Serv fac avail 0800 until sunset. 28' hangar 500' E of centerline and 1100' from S end rnwy 35, lgtd. (6-7) Factory bldg 40' high under const 1000' E of S end rnwy 35 in flood lgtd area. (9-13) Constr under way end of rnwy 26 and along entire length of rnwy 8 and 26, men and equip. on fld, obstn mrkd. (5-3)
MORGANTOWN-RADIO: LF rng has multiples and fades all courses.
PARKERSBURG-WOOD COUNTY ARPT: Caution - dip midway rnwy 16-34 covering full width of rnwy. (5-4)
**PETERSBURGH ARPT: 285' lgtd rdo twr erected 7.5 n mi NE(64°T) at lat 39-03-06, long 79-00-16. (7-2)

Revisions to Instrument Approach Procedures

LOW FREQUENCY RANGE PROCEDURES

(DISTANCES ARE IN NAUTICAL MILES)

If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below.

CITY AND STATE AIRPORT NAME AIRPORT ELEVATION CLASS OF FACILITY, FREQ., IDENT. PROCEDURE NO.	INITIAL APPROACH TO FACILITY FROM	CRS. AND DIST.	MIN. ALT.	PROCEDURE TURN: ( ) SIDE OF FINAL APCH. CRS. GROUND CONTROLLED APPROACH SYSTEM PROCEDURES

If a GCA instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude (s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with GCA to final authorized landing minimums the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a PAR approach or, for more than 30 seconds during an ASR approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing, minimums; or (D) if landing is not accomplished.

NOTICES TO AIRMEN Page 2

VOL. 11 ,NO. 10 . . . . . JULY 24,1956

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF AVIATION INFORMATION

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

ATC IFR CLEARANCE PHRASEOLOGY: Effective November 15, 1955, ATC facilities will resume general use of the phrase "VIA FLIGHT PLANNED ROUTE" in air traffic clearances to replace the lengthier detailed description of any portion of the route of flight that is identical to the route filed by the pilot. When used, the phrase will be preceded by sufficient detailed route of flight information to establish the flight on the filed route. The "VIA FLIGHT PLANNED ROUTE" phraseology does not include approval of altitudes filed in the flight plan. Specific altitudes assignments will be issued in each clearance. IFR flight plans filed by the pilots should contain the complete route of flight and should be relayed to air traffic control unchanged. Pilots may request route verification when considered necessary and are requested to do so whenever a filed route has been changed prior to departure. If route verification is desired prior to departure, the request should be included with the initial call for taxi clearance to avoid delay in receiving the information.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequences available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations). N

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-..- -.-... (LGB in Code).

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy fields is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

WARNING OF MAINTENANCE AT CAA NAVAIDS: During periods of routine or emergency maintenance, the coded identification (or code and voice, where applicable) will be removed from certain CAA Navaids, namely, ILS localizers, VHF ranges (VOR, TVOR and VAR) and L/MF ranges but not from "H" facilities, compass locators or 75 mc marker beacons. The removal of identification serves as a warning to pilots that the facility has been officially taken over by "Maintenance" for tune-up or repair and may be unreliable even though on the air intermittently or constantly.

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS: In the Airman's Guide, "n miles" or "n mi" stands for nautical miles; "s miles" or "s mi" for statute miles.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight

(24 July 1956)

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

RADIO CALL-UP PROCEDURES - ARTC CENTERS: Effective February 1, 1956, aircraft on IFR flight plans making position reports direct to ARTC centers shall, in the initial call-up include the fix or geographical location over which the aircraft is reporting. Examples: "Indianapolis Center, this is TWA 55, Maxwell, over."; "Indianapolis Center, this is Beechcraft 1234, 20 south of Maxwell, over."

Pilots are reminded, however, that direct communication with the center shall NOT be established until the pilot is specifically requested to do so.

UNACCEPTABLE RADIO MESSAGES: CAA facilities will no longer accept non-safety messages (requests for ground transportation, meals, telephone calls, etc.) from pilots of aircraft in flight. Arrangements should be made by a pilot prior to departure via public communications (telephone, telegraph, etc.) for such requirements. Pilots are also reminded that transmission of such messages violates the terms of their aircraft radio license as provided in Part 9 of the FCC Regulations.

CLASSIFICATION OF ILS BACK COURSES: ILS back courses have in the past been classified as either "usable" or "unusable". It now appears that further classification of the "unusable" courses are necessary, since some back courses formerly classified as "unusable" actually may be satisfactory for intersections, holding, transitions or missed approaches, even though they are not satisfactory for back course approaches.

ILS back courses will in the future be classified as follows:

Usable	-	suitable for ILS back course approaches
Restricted	-	not suitable for ILS back course approaches, but suitable for intersections, holding, transitions or missed approaches
Unusable	-	not suitable for any of the above.

SPURIOUS GLIDE SLOPE INDICATIONS: CAA glide slope facilities are intended to provide reliable glide slope signals for use in conjunction with the front course of the ILS localizer. Glide slope signals may be received in other azimuths (because of stray radiation from the antennas and reflections from nearby objects) which may in some cases be sufficient to activate the airborne warning flag. Any glide slope needle activity in these other azimuths should be disregarded.

All pilots are particulary cautioned to ignore glide slope indications when making back course localizer approaches. All CAA approved procedures for back course approaches are limited to use of the localizer portion of the ILS. Any attempt to fly spurious glide slope indications on such back course approaches could result in hazardous operations.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, regardless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

INTERFERENCE ON INSACS COMMUNICATIONS CHANNELS: If excessive interference is noted on INSACS VHF or UHF simplex frequencies, pilots should request the INSACS to reply on the VOR voice channel. This will often expedite the exchange of messages as the VOR has a clear channel for communications.

CONTROL BOUNDARY CHANGES: August 1, 1956, the following boundary changes between the Salt Lake City, Oakland and Seattle Centers shall become effective. Control Boundary: From the present boundary at 45°N, 115°W to 45°N, 116°45'W, to 43°55'N, 118° 30'W to 42°N, 118°30'W, to 42°, 117°30'W, to 40°N, 117°30'W to join the present boundary.

MEMPHIS AND ATLANTA CENTER BOUNDARIES: Effective July 26, 1956, the Memphis Center and Atlanta Center boundaries are amended as follows: Beginning at the present boundary crossing VOR civil airway No. 54 to a point 40 miles W of the Chattanooga, Tenn., VOR stn, thence direct to cross VOR civil airway No. 5, Amber civil airway No. 6 and VOR civil airway No. 243 on a 30 mile arc NW of the Chattanooga, Tenn., LF rng stn; thence direct to cross VOR civil airway No. 165, VOR civil airway No. 16 and Green civil airway No. 5 on a 30 mile arc W of the Crossville, Tenn., VOR stn; thence direct to the present boundary at 36°15'N and 85°45'W.

RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

(Part 608-Restricted Areas-Amendment 174)
(August 23, 1956)

(1) In Section 608.56, the Leon, West Virginia, area (R-490), published on October 20, 1955 in 20 F.R. 7902 is rescinded.

(Part 608-Restricted Areas Amendment 175)
(August 10, 1956)

(1) In Section 608.30, the Oscoda, Michigan, area (R-81 formerly D-81), published on July 16, 1949, in 14 F.R. 4287 is rescinded.

(2) In Section 608.30, the Upper Lake Huron, Michigan, area (R-91 formerly D-91), amended on June 13, 1951 in 16 F.R. 5616 is further amended by changing the "Designated Altitudes" column to read: "Surface to 50,000 feet MSL."

(3) In Section 608.31, the Upper Red Lake, Minnesota, area No. 1 (R-186) amended on March 26, 1955, in 20 F.R. 1846, is further amended by changing the "Designated Altitude" column to read: "Surface to 50,000 feet MSL."

(4) In Section 608.31, the Upper Red Lake, Minnesota, area No. 2 (R-406), amended on September 21, 1955, in 20 F.R. 7074 is rescinded.

(5) In Section 608.31, the Grand Marais, Minnesota, area (R-187) amended on April 9, 1955 in 20 F.R. 2302, is further amended by changing the "Designated Altitude" column to read: "Surface to 50,000 feet MSL", and the "Time of Designation" column to read: "Day and night." NOTE: This area to be used only during VFR Weather conditions.

(6) In Section 608.49, the Scenic, North Dakota, area (R-190), amended on September 21, 1955 in 20 F.R. 7074, is further amended by changing the "Designated Altitude" column to read: "50,000 feet MSL." (24 July 1956)

(7) In Section 608. 30, the Upper Lake Huron, Michigan, area No. 2 (R-491), published on July 13, 1955 in 20 F.R. 4981, is further amended by changing the "Designated Altitude" column to read: "50,000 feet MSL."

(8) In Section 608.31, the Camp Ripley, Minnesota, area (R-191), amended on September 21, 1955 in 20 F.R. 7074, is further amended by changing the "Designated Altitude" column to read: "Surface to 27,000 feet MSL."

(Part 608-Restricted Areas Amendment 176)
(August 24, 1956)

(1) In Section 608.30, the Sturgeon Bay, Michigan, area (R-502), published on May 25, 1956, in 21 F.R. 3496 is amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at latitude 44°48'00", longitude 87°16'00"; thence to latitude 45°23'00", longitude 86°47'00"; thence to latitude 45°18'00", longitude 86°28'00"; thence to latitude 45°10'00", longitude 86°17'00"; thence to latitude 44°39'00", longitude 86°42'00"; thence to latitude 44°23'45", longitude 86°48'45"; thence to latitude 44°30'30", longitude 87°24'30"; thence to point of beginning".

CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective August 23, 1956, unless otherwise advised the following civil airways control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Amber civil airway No. 9(Charleston, S. C., to Norfolk, Va.) is amended to read: "From the Charleston, S. C., rdo rng stn via the Myrtle Beach, S. C., non-directional radio beacon; Wilmington N.C., non-directional radio beacon; New Bern, N.C., non-directional radio beacon; the intersection of a line bearing 11° True from the New Bern N. C., non-directional radio beacon and the SW course of the Norfolk, Va., radio range station to the Norfolk, Va., radio rng stn The portions of this airway between 11,000 feet and 16,000 feet above MSL and between 23,000 feet and 45,000 feet above MSL which lie within the Cherry Point, N.C., night restricted area R-125 are excluded during the hrs. of darkness".

(2) Amber civil airway No. 14(Washington D.C to New York, N.Y.) is amended to read: "From the Riverdale Maryland non-directional radio beacon via the intersection of the S crs. of the Harrisburg, Pa. radio range and the W crs. of the Baltimore, Maryland, radio range; the intersection of the S crs. of the Harrisburg Pa., radio range and the NE crs of the Arcola Va., radio range to the Lancaster, Pa., non-directinnal radio beacon. From the Willow Grove, Pa. (Navy) radio range stn. via the intersection of the NE crs. of the Willow Grove, Pa., (Navy) radio range and the E crs. of the Allentown, Pa., rdo rng to the Chatham, N.J., non-directional radio beacon."

(3) Red civil airway No. 28 (Rockford, Ill., to Detroit, Mich.), is amended by changing the last portion to read: "From the Lansing, Mich., radio rng stn to the intersection of a line bearing 127°True from the Lansing, Mich., radio rng stn to its intersection with the W crs. of the Detroit, Mich., radio range.".

(4) Red civil airway No. 45 is amended by changing caption to read: "(Blackstone, Va., to Lancaster, Pa.)" and by deleting the portion which reads: "From the Lancaster, Pa., non-directional rdo beacon to the Willow Grove, Pa.,(Navy) radio range station."

(5) Red civil airway No. 104(Greensboro, N.C. to Raleigh, N.C.) is amended to read: "From the Greensboro, N.C., rdo rng stn to the intersection of the SE crs. of the Greensboro, N.C. rdo rng with a line bearing 191°True from the Raleigh, N.C., radio range".

(6) VOR civil airway No. 8 (Long Beach, Calif., to Washington, D.C.) is amended by changing the portion which reads: "Daggett, Calif., omnirange stn"to read: "Daggett, Calif., omnirange stn,, including a N alternate from the Long Beach omnirange stn to the Daggett omnirange station via the point of intersection of the Long Beach omnirange 024°True and the Los Angeles omnirange 057° True radials and the point of intersection of the Los Angeles omnirange 057°True and the Daggett omnirange 235°True".

(7) VOR civil airway No. 10(Pueblo, Colo., to New York, N.Y.) is amended by changing all after Selinsgrove, Pa., omnirange stn to read: "Selinsgrove, Pa., omnirange stn; point of intersection of the Wilkes-Barre-Scranton, Pa., omnirange 217°True and the Stroudsburg, Pa., omnirange 270° True rads; Stroudsburg, Pa., omnirange stn; to the point of intersection of the Stroudsburg omnirange 114°True radial and the LaGuardia(New York, N.Y.) airport ILS lclzr SW course".

(8) VOR civil airway No. 17 (Laredo, Texas to Goodland, Kansas) is amended by changing the portion which reads: "Austin, Texas omnirange station, including an E alternate via the intersection of the San Antonio omnirange 061° True and the Austin omnirange 158° True rads and a W alternate via the intersection of the San Antonio omnirange 002° True and the Austin omnirange 237°True radials"; to read: "Austin, Texas omnirange stn.,including a W alternate via the intersection of the San Antonio omnirange 002° True and the Austin omnirange 237°True radials".

(9) VOR civil airway No. 30(Milwaukee, Wisc., to Nantucket, Mass.) is amended by changing the portion which reads: "Allentown, Pa., omnirange stn.; to the point of intsxn of the Allentown omnirange 088°True and the Caldwell, N.J. omnirange 217°True radials", to read: "to the Allentown, Pa., omnirange stn.".

(10) VOR civil airway No. 38 is amended by changing the caption to read: "(Iowa City, Iowa to Elkins, W. Va.)" and by changing all before the Findlay, Ohio omnirange stn to read: "From the Iowa City, Iowa omnirange stn via the intsxn of the Iowa City omnirange 092°True and the Joliet omnirange 265°True radials; Joliet, Ill., omnirange stn.; Peotone, Ill., omnirange stn.; Ft. Wayne, Ind., omnirange stn.; Findlay, Ohio omnirange stn."

(11) VOR civil airway No. 58(Bergholz, Ohio to Hartford, Conn.) is amended to read: "From the point of intsxn of the Youngstown, Ohio omnirange 195° True and the Wheeling, W. Va., omnirange 313°True radials via the Ellwood City, Pa., omnirange stn.; intsxn of the Ellwood City omnirange 087°True and the Philipsburg omnirange 267°True radials; Philipsburg, Pa., omnirange stn.; Williamsport, Pa., omnirange stn.; intsxn of the Williamsport omnirange 088°True and the Wilkes-Barre-Scranton omnirange 238°True radials; Wilkes-Barre-Scranton, Pa., omnirange stn.; Poughkeepsie, N.Y., omnirange stn., Hartford, Conn., omnirange stn.; to the point of intsxn of the Hartford omnirange 130°True and the River Head, N.Y., omnirange 042° True radials.

(12) VOR civil airway No. 74 is amended by changing the caption to read: "(Dodge City, Kans., to Little Rock, Ark.,)" and by changing all before the Tulsa, Okla., omnirange stn. to read: "From the Dodge City, Kans. omnirange stn via the Anthony, Kans., omnirange stn.; Ponca City, Okla omnirange stn.; Tulsa, Okla. omnirange stn., including a South alternate."

(13) VOR civil airway No. 88(Tulsa, Okla. to Vichy, Mo.) is amended to read: "From the Tulsa, Okla. omnirange stn via the intsxn of the Tulsa, omnirange 050° True and the Springfield omnirange 261°True rads; Springfield, Mo. omnirange stn.; Vichy, Mo. omnirange stn.; to the point of intsxn of the Vichy omnirange 084°True and the St. Louis, Mo. omnirange 170°True radials".

(14) VOR civil airway No. 128(Chicago, Ill. to New Bern, N.C.) is amended by changing the portion which reads: "York, Ky. omnirange stn., including a S alternate via the intsxn of the Cincinnati omnirange 120° True and the York omnirange 272°True rads.;" to read: "York, Ky. omnirange stn.; including a S alternate via the intsxn of the Cincinnati omnirange 120° True and the York omnirange 271°True radials".

(15) VOR civil airway No. 153(New York, N.Y. to Syracuse, N.Y.) is amended to read: "From the Caldwell, N.Y omnirange stn via the Stillwater, N.J. omnirange stn.; Wilkes-Barre-Scranton, Pa., omnirange stn.; point of intsxn of the Binghamton, N.Y. omnirange 071°True and the Syracuse omnirange 149°True radials; to the Syracuse, N.Y. omnirange stn."

(16) VOR civil airway No. 163 is amended by changing the caption to read: "(Brownsville, Texas to Oklahoma City, Okla)", and by adding a new first portion to read: "That airspace over United States territory from the Brownsville, Texas omnirange station via the intsxn of the Brownsville omnirange 339° True and the Alice omnirange 171° True radials; Alice, Texas omnirange stn.; to the San Antonio, Texas omnirange station."

(17)VOR civil airway No. 164(Bradford, Pa., to New York, N.Y.) is amended to read: "From the Bradford, Pa. omnirange stn via the intsxn of the Bradford omnirange 097°True and the Williamsport omnirange 306° True rads.; Williamsport, Pa. omnirange stn.; point of intsxn of the Allentown, Pa. omnirange 329° True and the Wilkes-Barre-Scranton, Pa. omnirange 224°True radials; to the Stroudsburg, Pa. omnirange station, including a S alternate from the Williamsport omnirange stn to the Stroudsburg omnirange stn via the intsxn of the Williamsport omnirange 125°True and the Stroudsburg omnirange 270°True radials."

(18) VOR civil airway No. 217(Chicago, Ill., to Green Bay, Wisc.) is amended to read: "From the Naperville, Ill. omnirange station via the point of intersection of the Janesville, Wisc. omnirange 107° True and the Chicago Heights, Ill. omnirange 342°True radials; point of intsxn of the Chicago Heights omnirange 342°True radial and the Milwaukee(General Mitchel Field) ILS lclzr front course; Milwaukee, Wisc. (General Mitchel Field) ILS lclzr; intsxn of the Milwaukee (General Mitchel Field) ILS lclzr back course and the Green Bay omnirange 165°True radial; to the Green Bay, Wisc. omnirange station."

(19) VOR civil airway No. 245 is added to read: "(Unassigned)".

(20) VOR civil airway No. 246(Dayton, Ohio to Mansfield, Ohio) is added to read: "From the Dayton, Ohio omnirange station to the Mansfield, Ohio omnirange station.".

(21) VOR civil airway No. 247 is added to read: "(Unassigned)".

(22) VOR civil airway No. 248 is added to read: "(Unassigned)".

(23) VOR civil airway No. 250(Bergholz, Ohio to Fitzgerald, Pa.) is added to read: "From the point of intsxn of the Youngstown, Ohio omnirange 195°True and the Wheeling, W. Va. omnirange 313°True radials via the Ellwood City, Pa. omnirange station; intsxn of the Ellwood City omnirange 054°True and the Fitzgerald omnirange 240°True radials; to the Fitzgerald, Pa. omnirange station."

(24) VOR civil airway No. 174(Vichy, Mo. to Washington, D.C.) is amended by changing the portion which reads: "York, Ky., omnirange station; intsxn of the York omnirange 076° True and the Elkins omnirange 270°True radials; Elkins, W. Va. omnirange station;" to read: "York, Ky., omnirange station; Elkins, W. Va., omnirange station."

(25) VOR civil airway No. 189 (Pittsburgh, Pa., to Brookville, Pa.) " is revoked".

CONTROL AREAS: (1) Red civil airway No. 45 is amended by changing the caption to read: "(Blackstone, Va., to Lancaster, Pa.)". (24 July 1956)

(2) VOR civil airway No. 17(Laredo, Texas to Goodland, Kans.) is amended to read: "All of VOR civil airway No. 17 including an E alternate and W alternates".

(3) VOR civil airway No. 38(Iowa City, Iowa to Elkins, W. Va.) is amended to read: "All of VOR civil airway No. 38".

(4) VOR civil airway No. 58 (Bergholtz, Ohio to Hartford, Conn.) is amended to read: "All of VOR civil airway No. 58".

(5) VOR civil airway No. 74 (Dodge City, Kans. to Little Rock, Ark.) is amended to read: "All of VOR civil airway No. 74 including a N alternate and S alternates."

(6) VOR civil airway No. 88 (Tulsa, Okla. to Vichy, Mo.) is amended to read: "All of VOR civil airway No. 88".

(7) VOR civil airway No. 153 (New York, N.Y. to Syracuse, N.Y.) is amended to read: "All of VOR civil airway No. 153".

(8) VOR civil airway No. 163(Brownsville, Texas to Oklahoma City, Okla.) is amended to read: "All of VOR civil airway No. 163 including an E alternate".

(9) VOR civil airway No. 189 (Pittsburgh, Pa. to Brookville, Pa.) "is revoked".

(10) VOR civil airway No. 217 (Chicago, Ill. to Green Bay, Wisc.) is amended to read: "All of VOR civil airway No. 217".

(11) VOR civil airway No. 245 is added to read: "(Unassigned)".

(12) VOR civil airway No. 246(Dayton, Ohio to Mansfield, Ohio) is added to read: "All of VOR civil airway No. 246".

(13) VOR civil airway No. 247 is added to read: "(Unassigned)".

(14) VOR civil airway No. 248 is added to read: "(Unassigned)".

(15) VOR civil airway No. 250(Bergholtz, Ohio to Fitzgerald, Pa.) is added to read: "All of VOR civil airway No. 25[illegible]4.

CONTROL AREA EXTENSIONS: (1) (Reading, Pa.), is revoked.

(2) (Newberg, Oreg.) is added to read: "Within 5 miles either side of the 70°True radial of the Newberg omnirange extending from the omnirange station to its intsxn with the Portland, Oreg., omnirange 96° True radial".

(3) (Medford, Oreg.) is amended by adding the following portion to present control area extension: "and within 5 miles either side of the 270°True radial of the Medford omnirange extending from the omnirange stn to VOR civil airway No. 27".

(4) (New York, N.Y.) is amended to read: "That airspace within a radius of 125 miles of the Idlewild, N.Y., omnirange stn extending clockwise from the 238°True radial to the 328° True radial of the omnirange thence within a radius of 30 miles of the Idlewild omnirange stn., extending clockwise from the 328°True radial to the 238°True radial of the omnirange".

(5) (Spokane, Wash.) is amended to read: "That airspace within a radius of 45 nautical miles centered on Fairchild Air Force Base, Spokane, Washington".

(6) (Allentown, Pa.) is revoked.

(7) (Fort Worth, Texas) is amended by changing the last portion which reads: "and on the S by VOR civil airway No. 114 N" to read: "and on the S by Red civil airway No. 10".

(8) (Mountain Home, Idaho) is amended to read: "Within 5 miles either side of a direct line extending from the Mountain Home non-directional radio beacon to the Boise, Idaho, radio range station, and the airspace within a 35 mile radius of the Mountain Home AFB bounded on the NE by Green civil airway No. 10, excluding the portion which overlaps restricted area R-254".

(9) (Little Rock, Ark.) is amended to read: "That airspace withina 50 mile radius of the Little Rock radio range station, excluding the portion which overlaps restricted areas R-134 and R-135".

(10) (Miramar, Calif.) is added to read: "That airspace bounded on the N by Red civil airway No. 65, on the E by Blue civil airway No. 14, on the S by Red civil airway No. 9 and on the W by Amber civil airway No. 1, excluding the portion which overlaps restricted area R-297".

(11) (Alice, Texas) is amended to read: "That airspace within 5 miles either side of a direct line extending from the Alice, Texas omnirange station to the Cotulla, Texas omnirange station, and the airspace within a 35 mile radius of the Alice radio range station, excluding the portion which overlaps restricted areas".

(12) (Portsmouth, N.H.) is added to read: "That airspace within a 10 mile radius of the Portsmouth AFB".

CONTROL ZONES: (1) Five mile radius zones is amended by deleting the following airport: Mountain Home, Idaho; Mountain Home AFB.

(2) (Dover, Del.,) is amended to read: "Within a 6 mile radius of Dover AFB, within 2 miles either side of the Dover ILS lclzr crs. extending from AFB to a point 10 miles S of the ILS outer marker, and within 2 miles either side of the SE crs. of the Dover AFB radio rng. extending from the radio rng stn. to a point 10 miles SE, excluding the portion which overlaps restricted area R-12".

(3) (Sedalia, Mo.,) is amended by changing the name "Sedalia AFB" to read: "Whiteman AFB".

(4) (Oscoda, Mich.,) is amended by changing the name "Oscoda AFB" to read:"Wurtsmith AFB" and by changing "danger areas" and read: "restricted areas".

(5) (Utica, N.Y.) is amended to read: "Within a 5 mile radius of Oneida County Airport and within 2 miles either side of the ILS lclzr course extending from the airport to the Utica non-directional radio beacon, excluding the portion which overlaps the Griffis AFB control zone".

(6) (Mojave, Calif.,) is added to read: "Within a 5 mile radius of MCAAS, Mojave, Calif., excluding the airspace above 20,000 feet MSL and excluding the airspace which overlaps restricted areas R-279 and R-306".

(7) (Mountain Home, Idaho) is added to read: "Within a 5 mile radius of the Mountain Home AFB and within 2 miles either side of lines bearing 136°True and 316°True extending from the AFB to points 8 miles NW and SE".

(8)(Miramar, Calif.,) is added to read: "Within a 5 mile radius of the Naval Air Station, Miramar, Calif., excluding the portion which overlaps the San Diego, Calif., control zone".

(9) (Portsmouth, N.H.) is added to read: "Within a 5 mile radius of the Portsmouth AFB and within 2 miles either side of a line bearing 144°True from the AFB extending to a point 10 miles SE of the ILS outer marker".

(10) (Peoria, Ill.,) is amended to read: "Within a 5 mile radius of Greater Peoria Arpt., within 2 miles either side of the N course of the Peoria radio range extending from the radio range station to a point 12 miles N, and within 2 miles either side of the 102° True and 282° True radials of the Peoria omnirange extending from the 5 mile radius zone to a point 12 mi. W of the omnirange station".

(11) (San Diego, Calif.,) is amended to read: "Within a 5 mile radius of Lindbergh Field, San Diego, Calif., and within 2 miles either side of the N course of the San Diego radio range extending from the radio range station to the La Jolla fan marker".

(12) (Austin, Texas) is amended by adding the following portion to present control zone: "and within 2 miles either side of the centerline of the Bergstrom AFB North-South runway extending from the AFB 5 mile radius zone to a point 3 miles S of the Bergstrom non-directional radio beacon".

(13) (San Antonio, Texas) is added to read: "That airspace lying one mile W of and 3 miles E of and parallel to lines bearing 001°True and 181°True from a point centered on Brooks AFB North-South runway at latitude 29°20'30", longitude 98°26'00", extending from this point to points 4 and one half miles North and South".

REPORTING POINTS: (1) Amber civil airway No. 9 (Charleston, S.C., to Norfolk, Va.) is amended to read: "Myrtle Beach, S.C., non-directional radio beacon; Wilmington, N.C. non-directional radio beacon; New Bern, N.C., non-directional radio beacon; the intsxn. of a line bearing 11°True from the New Bern, N.C., non-directional radio beacon and the SW course of the Norfolk, Va., radio range".

(2) Red civil airway No. 45 is amended by changing the caption to read:"(Blackstone, Va., to Lancaster, Pa.)".

DOMESTIC VOR REPORTING POINTS is amended by adding the following reporting point to read: Clareville Intsxn - the intsxn. of the Alice, Tex., omnirange 010° True and the Corpus Christi, Tex., 321°True radials.

√ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

BUO - Beaumont, Calif. (Reassignment)
COL - Colts Neck, N. J., VOR (Change from OLT REP about August 10)
CZZ - Campo, Calif. (Assignment)
EDV - East Dover, Maine, REP (Assignment)
MWS - Mt. Wilson, Calif. (Reassignment)
RFX - Rapid City, S.D., Radiobeacon (Assignment)
HJ - Holberg, B.C.

MINIMUM EN ROUTE ALTITUDES: The following minimum en route IFR altitudes are amended as follows, effective August 23, 1956:

ON-REQUEST REPORTING POINTS: The following on-request reporting points are designated, redesignated or cancelled and shall become effective as indicated:

DESIGNATE - Effective August 23, 1956.

(1) BENSON, W. VA. INTSXN - the intsxn of Morgantown, W. Va., 235° mag radial and Elkins, W. Va., VOR 302° mag radial.

(2) CONEY ISLAND, NEW YORK INTSXN - the intsxn of Stroudsburg, Pa. VOR direct radial to Newark, N. J. LOM with the LaGuardia ILS lclzr crs.

(3) CORAL INTSXN - the intsxn of 306° mag bearing from the San Juan, P.R., LF radio range and the 084° mag bearing from the Ramey AFB, P.R. (BQN-347kc) radiobeacon.

(4) DOLPHIN INTSXN - the intsxn of the N crs. of the San Juan, P.R., LF radio range and the 048° mag bearing from the Ramey AFB, P.R. (BQN-347kc) radiobeacon.

(5) ECHO PA. INTSXN - the intsxn of Ellwood City, Pa. VOR 092° mag rad and Pittsburgh, Pa. VOR 045° mag radial.

(6) EUREKA, OHIO INTSXN - the intsxn 045° mag bearing from Huntington, W. Va. radio beacon and direct radial from York, Kentucky VOR to Elkins, W. Va. VOR.

(7) GAY, W. VA. INTSXN - the intsxn of Charleston, W. Va. 019° mag radial direct enroute radial from York, Ky., VOR to Elkins, W. Va. VOR 302° mag radial.

(8) GREENWATER INTSXN - the intsxn of the N crs. of the San Juan, P.R., LF radio range and the 075° mag bearing from the Ramey AFB, P.R. (BQN-347kc) radiobeacon.

(9) GUAYNABO INTSXN - the intsxn of the SE crs. of the San Juan, P.R., LF radio range and the 191° mag bearing from the San Pat, P.R., radiobeacon.

(10) HIGHGATE, VERMONT INTSXN - the intsxn of 081° mag radial of Plattsburgh, N.Y. VOR and N crs. Burlington, Vermont LFR.

(11) ISLA VERDE INTSXN - the intsxn of the E crs. of the San Juan, P.R., LF radio range and the 056° mag bearing from the San Pat, P.R., radiobeacon.

(12) KNOX, PA. INTSXN - the intsxn of Fitzgerald, Pa. VOR 246° mag radial and Youngstown, Ohio VOR 105° mag radial.

(13) MANSFIELD, MASS - the intsxn of NE crs. Providence, Rhode Island ILS lclzr and Gardner, Mass. VOR 146° mag radial.

(14) PRAIRIE, IOWA INTSXN - the intsxn of 087° mag radial Iowa City, Iowa VOR and 240° mag radial Moline, Illinois VOR.

(15) RAMEY AFB, P.R. OMNIRANGE STATION - located latitude 18°29'10" N, longitude 67°07'27" W. (Frequency 114.3 mc. Identifier BQN).

(16) SABANA SECA INTSXN - the intsxn of the 283° mag bearing from the San Pat, P.R., radiobeacon and the 245° mag bearing from the San Juan, P.R., radio range.

(17) SOMERSET, N.J. INTSXN - the intsxn of Stroudsburg, Pa. VOR direct radial to the Newark, N.J. LOM with the Caldwell, N.J. VOR 228° mag radial.

(18) TRIUMPH, ILL. INTSXN - the intsxn of Bradford, Illinois VOR 044° mag radial (V-10) and the Joliet, Illinois VOR 263° mag radial.

(19) WADSWORTH, OHIO INTSXN - the intsxn of Mansfield, Ohio VOR 065° mag radial and Cleveland, Ohio VOR 135° mag radial.

(20) WEBBERVILLE INTSXN - the intsxn of the SE crs. of the Austin, Texas ILS lclzr. and 060° mag bearing from the Bergstrom AFB, Texas, non-directional radiobeacon.

(21) COVINA, CALIF., INTSXN - the intsxn of 009° mag radial Long Beach, Calif., VOR and 283° mag radial Ontario, Calif. VOR.

(22) HAWKINS, CALIF. INTSXN- the intsxn of 009° mag radial Long Beach, Calif. VOR and 042° mag radial Los Angeles, Calif. VOR.

(23) ALHAMBRA, CALIF. INTSXN - the intsxn of 042° mag radial Los Angeles, Calif. VOR and 331° mag radial Long Beach, Calif. VOR.

(24) ROGUE RIVER(VHF) INTSXN - the intsxn of 250° mag radial of the Medford, Oregon VOR and the 342° mag radial of the Crescent City, California VOR.

(25) BELMONT (LF) INTSXN - the intsxn of the SE crs. of the San Francisco, Calif., LFR and a 312° mag bearing to the outer marker compass locator of the San Francisco ILS.

(26) SCHOOL (VHF) INTSXN - the intsxn of 096° mag radial of the Anton Chico, New Mexico VOR and the 207° mag radial of the Tucumcari, New Mexico VOR.

(27) KUNA (VHF) INTSXN - the intsxn of 164° mag radial of the Boise, Idaho VOR and the 264° mag radial of the Mountain Home AFB, Idaho VOR.

(28) MANOR (LF) INTSXN - the intsxn of the N course of the Portland, Oregon LFR and a 183° mag bearing to the Sauvies Island, Oregon radio-beacon.

(29) SHAW (LF) INTSXN - the intsxn of the NW course of the Whidbey Island, Washington LFR and the E course of the Patricia Bay, Washington LFR.

REDESIGNATE - Effective August 23 1956.

(1) ANNAWAN, ILL. INTSXN - the intsxn 087° mag radial Iowa City, Iowa VOR and 134° mag radial Moline, Ill., VOR.

(2) BIVINS, TEXAS INTSXN - the intsxn of 321° mag radial Amarillo, Texas VOR and 340° mag bearing from the Tradewind, Texas LF radio-beacon.

(3) CLARA, W. VA. INTSXN - the intsxn of Charleston, W. Va. VOR 052° mag radial and Elkins, W. Va. VOR direct radial to York, Kentucky VOR.

(4) CLAUDE, TEXAS INTSXN - the intsxn of 117° mag radial Amarillo, Texas VOR and 092° mag bearing from the Tradewind, Texas LF radio-beacon.

(5) DISTRICT, D. C. INTSXN - the intsxn of Herndon, Va. VOR 110° mag radial and Washington, D. C. VOR 023° mag radial.

(6) ELMENDORF (VHF) INTSXN - the intsxn of San Antonio, Texas VOR 159° mag and Cotulla, Texas VOR 031° mag radials.

(7) FINLEY, TEXAS INTSXN - the intsxn of 132° mag radial Amarillo, Texas VOR and 092° mag bearing from the Tradewind, Texas LF radio-beacon.

(8) HONEA, S. C.(INTEGRATED) INTSXN - the intsxn of the Royston, Ga., VOR 074° mag radial and the S crs. of the Greenville, S. C., LF radio range.

(9) MILTON, KANSAS INTSXN - the intsxn of the Anthony, Kansas VOR 035° mag radial (V-12), the Ponca City, Okla., VOR 318° mag radial (V-77), and the Wichita, Kansas VOR 216° mag radial (V-12).

(10) MULHALL, OKLA INTSXN - the intsxn of the N crs. Oklahoma City, Okla., LFR and 120°-300° mag bearing Enid, (Vance), Okla., LF radio-beacon.

(11) MURRAY, N. C. INTSXN - the intsxn of the SE crs. Greensboro, N.C. LFR and 015°-195° mag bearing Raleigh, N.C. LFR.

(12) PALO DURO, TEXAS - the intsxn of 161° mag radial Amarillo, Texas VOR and 130° mag bearing from the Tradewind, Texas LF radio-beacon.

(13) PANHANDLE, TEXAS INTSXN- the intsxn of 075° mag radial Amarillo, Texas VOR and 060° magnetic bearing from the Tradewind, Texas LF radio-beacon.

(14) PLANT, TEXAS INTSXN - the intsxn of 306° mag radial Amarillo, Texas VOR and 340° mag bearing from the Tradewind, Texas LF radio-beacon.

(15) SAM, TEXAS INTSXN - the intsxn of 270° mag radial Amarillo, Texas VOR and 302° mag bearing from Tradewind, Texas LF radio-beacon.

(16) TOWER, TEXAS INTSXN - the intsxn of 255° mag radial Amarillo, Texas VOR and 302° mag bearing from the Tradewind, Texas LF radio-beacon.

CANCEL - Effective Immediately.

(1) DELPHI, INDIANA

CANCEL - Effective August 23, 1956.

(1) EASTON, MASS. INTSXN
(2) HENDERSON, KY. INTSXN
(3) MILLINGTON, N.J. INTSXN
(4) SANDYVILLE, W. VA. INTSXN
(5) WRIGHTWOOD, CALIF., INTSXN

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Chicago	**New York**	**Dayton Local**
Cincinnati	**Nashville**	**Kansas City Local**
Cleveland	**Sioux City**	**WAC 138**
Huntington	**Tulsa**	**WAC 266**
Kansas City	**Chicago Local**	**WAC 307**

A new edition or new chart for the charts listed below is now available for issue. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

NON-STANDARD HOLDING PATTERNS

The following non-standard holding patterns are established or cancelled and shall become effective on August 23, 1956.

ESTABLISHED:

(1) WADSWORTH, OHIO INTSXN - direction of holding - SW; direction of turn - RIGHT- time - one minute; minimum altitude - 3000'.

(2) BERGSTROM AFB, TEXAS RADIOBEACON - direction of holding - S on 170° mag bearing from radio-beacon (inbound course 350° mag); direction of turn - RIGHT - time - one minute; minimum altitude 1800'.

(3) SAN JUAN, P.R., LFR - Direction of holding - W on W crs. of radio range(inbound course 097° mag); direction of turn - LEFT - time - 2 minutes; minimum altitude - 3000'

(4) SAN PAT, P.R., RADIOBEACON - direction of holding W on 283° mag bearing from radiobeacon (inbound course 103° mag); direction of turn - LEFT - time - 2 minutes; minimum altitude - 3000'.

(5) RAMEY AFB, P.R. RADIOBEACON(BQN)- direction of holding - E on 085° mag bearing from radio-beacon (inbound course 265° mag); direction of turn - LEFT- time - 2 minutes; minimum altitude 3000'.

CANCELLED:

(1) EASTON, MASS. INTSXN - direction of holding -SW; direction of turn- RIGHT; time - one minute; altitude-3000'.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31)	-	Month and day item was reported.
**	-	New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★	-	New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE	-	Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

[illegible]: ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.

BESSEMER-DURHAM ARPT: Caution-auto drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd.(5-8)

BIRMINGHAM-RADIO: About Aug 10, VOR will be shut down - relctn. (7-18)

BIRMINGHAM ARPT: Caution-traffic operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm closed to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.

★HUNTSVILLE-RADIO: Voice call "Redstone Army Radio" is changed to "Huntsville Radio". VOR radials 005°-030° unusable due to roughness and bends (5-11)

HUNTSVILLE MUN ARPT: Cautinn - rnwy 18-36 under const.

MOBILE-BATES FLD-TOWER: About Aug 3, twr freq will be changed from 317 to 385 kc.

★MONTGOMERY-RADIO: July 9, 243.0 mc cmsnd. (7-10)

**MONTGOMERY-DANNELLY FLD: Taxiway from rnwy 15 to E/W taxi strip perm clsd. Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft lndg and taking-off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E/W parallel taxi strip W of a point adj to Air National Guard hangar. E/W rnwy clsd to all military acft-const. Easternmost 5000' avail days, easternmost 6000' avail sunset to sunrise to civil acft. Western end mrkd by flags-days, lgts-ngts. (5-15)

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi act scalloping and bends. (4-22)

**OZARK ARPT: New fld. Type: L. Lat. 31-27-30, long. 85-37-15. Lctn: 2.0 SE. Elev: 353'. no.of rnwys 1 - 2000' x 200' - sod. Lngst rnwy & facs: 20. Remarks: Drive-in theater S.

(24 July 1956)

ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)
**CHANDLER-RIGGS ARPT: Abandoned. (6-11)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30-35 n mi on 106° radial.
HASSAYAMPA-RADIO: VOR/DME usable to 30 n mi from 30°-70°, 240°-255°, 320°-345° and 40 n mi from 70°-85° at MEA. (3-30)
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. Const. in progress S of taxiway 1 from 8L to trans. ramp and S to arpt entrance road. (7-3)
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145° and 165°-185°, 39 n mi at 10,000'.
SALOME, SITE # 27B, LAX-PHX: Caution-puncture vines. (6-18)
SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)
**SEDONA-OAK CREEK ARPT: New fld - Type: P. Lat 34-50, long. 111-47. Lctn: 2 mi SE. Elev: 4800'. No. of rnwys: 1. Lngst rnwy & facs: 38. Fuel: F2. (5-7)
TUCSON-RADIO: VOR/DME coverage: 360°-050° 35 n mi 11,000'; 050°-060° 22 n mi 11,000'; 060°-075°, 35 n mi 11,000; 075°-085° 21 n mi 11,000'; 090°-170° 40 n mi 12,000'; 225°-230° 40 n mi 7000'; 330°-345°, 35 n mi 11,000'; 345°-360°, 25 n mi at 11,000'. (7-17)
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steers unrel beyond 35 mi at or below the following alt: NW quad 10,000';SW 10,000'; SE 12,000'; NE 13,000'.
YUMA-RADIO: VOR coverage 280° - 300°, 30 n mi MEA. (5-18)
YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area. Rnwy 03-21 clsd-const. Rnwy 17-35 clsd daylgt hrs only. (7-23)
ARKANSAS: ARKADELPHIA MUN ARPT: Unsafe-due to holes in landing areas. (7-5)
EL DORADO-RADIO: DME 2000' MSL coverage 43.5 mi 325°-N to 225°; 2000' MSL coverage 35 n mi 225°-W to 325°. (3-30)
HARRISON ARPT: N/S, new NW/SE rnwys closed-const. Fld clsd nights.
** HOT SPRINGS-STOVER SEAPLANE BASE: Abandoned. (6-22)
NORTH LITTLE ROCK-CENTRAL ARPT: Fld closed to all operns-const. (3-1)
TEXARKANA-RADIO: VOR 143° radial to rnwy 13 beyond tolerance due to roughness and bends.
WALNUT RIDGE-RADIO: VOR radials 290°-320°, 120°-150° and 200°-210° unusable acct bends & course roughness. (10-14)
**WALNUT RIDGE ARPT: Three 65' lgtd antenna poles erected 985' E of N end of N/S rnwy. (6-18)
CALIFORNIA: **ADELANTO-GREY BUTTE ARPT: Abandoned. (5-28)
AUBURN ARPT: Closed to hvy acft. Lgt acft use extreme caution acct soft rnwys. (1-24)
★BAKERSFIELD-RADIO: Trans and rcvr 243.0 mc cmsnd. (7-2)

FAIRFIELD-TRAVIS AFB-RADIO: USAF VHF/DF bearings and communs in NW quad unreliable below 8500'. Opers 0700-1600 Mon-Fri training status only. (7-5)
FILLMORE-RADIO:: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'. (9-17)
★FT JONES-RADIO: July 9, trans and rcvr 243.0 mc cmsnd. VOR has lgt course roughness all quads. Only arwy radials flgt-checked.
FORTUNA-RADIO: VOR has light to moderate scalloping beyond 26 n mi. Only arwy radials flight-checked. DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.
FRESNO AIR TERMINAL: Exercise extreme caution in vcnty, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N & E of arpt. Extensive const and hvy equipment both ends rnwy 11-29, apch areas and adj taxiways. First 250' rnwy 11 clsd-usable length 6750'. Extreme caution apch end rnwy 11 large equip working in rnwy extension area. (7-5)
**FRESNO-CHANDLER ARPT: 241' (4720'MSL) lgtd RV twr erected 28 n mi NW (40°T) at lat 37-04-38, long. 119-26-01. (7-3)
FURNACE CREEK SITE 17 RIV-DLS: N 1200' of rnwy clsd to all operns-mrkd. Entire fld clsd to all hvy or multi-eng acft. S 4500' of rnwy open to lgt acft-caution. (4-3)
**GLENDALE-GRAND CENTRAL ARPT: SE/NW taxi strips SW side of fld perm clsd. Extensive const in progress.
KLAMATH-McBETH ARPT: Closed. (6-13)
LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. ILS and LF rng during VFR conditions heavy simulated instrument apch traffic. About July 23, VOR will be shut down until approx Aug. 13 - modernization. (7-3)
LONG BEACH ARPT-TOWER: ILS glide slope inop. (7-5) FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail. for civil acft 2400-0600.
** Rnwy 12 clsd. N 800' apch end rnwy 16L perm clsd.
LOS ANGELES-RADIO-SPECIAL NOTICE: July 3, transcribed weather bdcasts oper test basis. Hrs opern: 0800-1800. Manual bdcast continues on both VOR and LF combined.
LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (7-16)
LOS ANGELES AIR ROUTE TRAFFIC CONTROL CENTER: Center will activate high alt sector 0800 Mar 20. Sector will control all acft operg at specific alt at or above 25,000'. IFR including jet acft operg at least 1000' on top. All jet acft specific alt or at least 1000' on top should ctc ARTC center 301.4 mc as soon as possible after departure within or entering area inbound. (7-3)
LOS ANGELES INTERNATIONAL ARPT: Use paved areas only. New lgtd rnwy 16-34 approx. 4000' W of Sepulveda Blvd open VFR tfc only. Equip. on and adj to const areas. Pilots are urged to use extreme caution when operg off-shore just W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a maximum of 3000' MSL approx the intersection of the extended centerlines of the above rnwys with the shoreline. Acft proceeding E-bound from Malibu Intersection in VFR conditions making a track which approximates the extended centerlines of the above rnwys are cautioned not to descend below 4000' MSL until passing the Shoreline or Del Rey FM unless cleared otherwise by ATC. Jet acft pat. down-wind let is 2500'. Acft not intending landing at arpt should avoid apch areas to W and E below 3000' in VFR weather. Recommended cross tfc plan crossing course at 3000' or above, ceiling permitting, directly over arpt, or between LF rng and arpt. Avoid shoreline W due high performance of departing jet acft. Due non-visibility twr unable ctl tfc on last 2400' rnwy 34. (2-10)
LOS ANGELES-SAN FERNANDO VALLEY ARPT: Tfc direction indicator inop 2300-0700.
**MOJAVE-MYER ARPT: Abandoned. (5-28)
★MONTAGUE-RADIO: July 9, trans and rcvr 243.0 mc cmsnd.
NATIONAL CITY ARPT: Extensive const around arpt. 75' obstns E end of rnwy.(7-19)
OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flight within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

CALIFORNIA: OAKLAND-RADIO-SPECIAL NOTICE: Effect. Sept 1, military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 mc. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (5-23)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND INTN'L ARPT: Dredging and clam shell equip working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area.

**OAKLAND-NORTON MARINE AIR SERVICE: Abandoned.

OCEANSIDE-RADIO: VOR coverage 310°-020°, 35 n mi at min en route alt. (10-10)

ONTARIO-RADIO: DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-0°, 35 n mi at 13,000'. May 7, VOR shut down until approx Aug. 1. (7-16)

ONTARIO INTN'L ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th fighter interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16)

OXNARD AFB-RADIO: USAF VHF/DF unreliable below 12,000' within 50 n mi. (4-20)

**OXNARD-VENTURA COUNTY ARPT: 160' lgtd derrick erected 700' N center of arpt. (4-23)

**PALOMAR MOUNTAIN-CAUTION AREA: Effect. July 26, the portion of Caution Area (C-444) overlapped by the airway "From the Oceanside VOR via the 101°T radial thereof to its intersection with the 46° T radial of the San Diego, Calif. VOR; thence via the San Diego 46° T radial and the Thermal, Calif 226° T radial to the Thermal VOR radio range" will be rescinded.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

AIR NAVIGATION RADIO AIDS

INSACS = Interstate Airway Communications Station/s (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSACS. (C) The station identification is monitored continuously by the communicator at the associated INSACS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSACS. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSACS, and located too distant from INSACS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)=Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
* = Automatic voice identification
[redacted] Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
B. . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . . Control Tower, CAA
CI. . . . . Control Tower, (City, County, Private, etc.)
D. . . . . Distantly controlled
DME. . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . Instrument Landing System (voice on localizer channel)
J. . . . . L/MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MOR. . . . Low frequency omni-drectional range
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control Center.
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing and voice signals available. Inclusion suffix "W" indicates range and homing signals only
T. . . . . Teletype
TVOR. . . Low power VOR (no standby equipment) located on airport
TX. . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same INSACS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

RADAR AVAILABLE : How and Where

(7 Aug 1956)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach - Military Equivalent of Combined ASR and PAR Equipment. TASR = Terminal Area Surveillance Radar. RAPCON = Radar Approach Control Center.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots shoud anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR FLIGHT ADVISORY SERVICE: If radar advisory service is desired, the pilot of an aircraft will request such service through the appropriate Air Route Traffic Control Center, using normal en route communications facilities. ARTC will determine if service can be provided and will request pilot to change to appropriate frequency for direct communication with radar. Radar station will be identified by "THIS IS AIR FORCE RADAR ADVISORY". All suggested vectors to circumnavigate storm areas will be of advisory nature and do not relieve pilot of responsibility for safety of aircraft. If advisory service cannot be furnished for any reason, the procedure word "UNABLE" will be used. This will terminate radar advisory service to the aircraft without further explanation. This service will be available in the following ARTC Flight Advisory Areas; Chicago, St. Louis, Minneapolis, Kansas City, Albuquerque, San Antonio, Ft. Worth, Oakland, Denver, Great Falls, Los Angeles, and the area immediately around Knoxville, Tenn.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc. are not guarded. Other transmitting frequencies listed are guarded plus 122.5 mc. and 3023.5 kc. Transmit and guard 121.5 mc. all locations.

ILS localizer identifier is preceded by International Morse Code "I" (two dots). Time interval between the "I" designator and the first letter of the assigned characteristic will be 0.6 second. *-Automatic voice identification. **-Distance from markers to approach end ILS runway. NOTE: The service area of compass locators is 15 miles.
(L5) - Instrument Approach (neon) (L7) - Hi-intensity Approach Lights. W - Without voice. BC - Back course BC-restricted = Not suitable for approaches

V = 135.9, 135.0 mc transmitted. # = Guards same VHF and UHF frequencies facility transmits except 122.2, 135.0 mc. (1) = 3023.5 kc guarded. (2) = 3023.5 kc; 122.5 mc. (3) = 3023.5 kc; 122.1, 126.7, 135.9 mc. e.g., (3)-135.9, 122.1 guards every frequency in group (3) except 135.9, 122.1 mc. (g) = Twr equipped with 121.9 mc or (g.7) = Twr equipped with 121.7 mc for control of ground traffic. * = Automatic voice identification. NOTE: FIRST FREQUENCY LISTED IS THE NAVIGATIONAL AID CHANNEL; OTHERS ARE COMMUNICATIONS CHANNELS.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates New or Revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Information, Attention: W-52, CAA, Washington 25, D. C.)

Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide.

ATC IFR CLEARANCE PHRASEOLOGY: Effective November 15, 1955, ATC facilities will resume general use of the phrase "VIA FLIGHT PLANNED ROUTE" in air traffic clearances to replace the lengthier detailed description of any portion of the route of flight that is identical to the route filed by the pilot. When used, the phrase will be preceded by sufficient detailed route of flight information to establish the flight on the filed route. The "VIA FLIGHT PLANNED ROUTE" phraseology does not include approval of altitudes filed in the flight plan. Specific altitudes assignments will be issued in each clearance. IFR flight plans filed by the pilots should contain the complete route of flight and should be relayed to air traffic control unchanged. Pilots may request route verification when considered necessary and are requested to do so whenever a filed route has been changed prior to departure. If route verification is desired prior to departure, the request should be included with the initial call for taxi clearance to avoid delay in receiving the information.

VHF INSACS-TO-PRIVATE AIRCRAFT CHANNELS: The national VHF channel for transmission from INSACS-to-private aircraft 122.2 mc was partially implemented beginning August 1, 1951. (The companion aircraft-to-INSACS frequency is 122.1 mc). Eventually all INSACS will transmit on 122.2 mc but in the meantime VHF reply to private aircraft will be furnished on the VHF range voice channel at INSACS which have not yet commissioned 122.2 mc. Pilots should consult the Airman's Guide and current Notams for information on frequences available at specific stations. The frequency upon which the pilot expects reply should be specified in the initial call.

When an INSACS is unable to reply on the VHF range voice channel because of equipment failure or maintenance shut down, reply will be made on 121.5 mc. A small number of INSACS have not yet installed transmitting service on 121.5 mc. At these locations, the reply on 121.5 mc will be made by an adjacent control tower. Therefore, when a pilot calling such station has reason to believe that the VHF range voice channel is not operating, he should request reply on 121.5 mc.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .--..- -.-.. (LGB in Code).

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Officer of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy fields is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

WARNING OF MAINTENANCE AT CAA NAVAIDS: During periods of routine or emergency maintenance, the coded identification (or code and voice, where applicable) will be removed from certain CAA Navaids, namely, ILS localizers, VHF ranges (VOR, TVOR and VAR) and L/MF ranges but not from "H" facilities, compass locators or 75 mc marker beacons. The removal of identification serves as a warning to pilots that the facility has been officially taken over by "Maintenance" for tune-up or repair and may be unreliable even though on the air intermittently or constantly.

NAUTICAL MILE AND STATUTE MILE ABBREVIATIONS: In the Airman's Guide, "n miles" or "n mi" stands for nautical miles; "s miles" or "s mi" for statute miles.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight

(7 Aug 1956)

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark will be amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200.5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

RADIO CALL-UP PROCEDURES - ARTC CENTERS: Effective February 1, 1956, aircraft on IFR flight plans making position reports direct to ARTC centers shall, in the initial call-up include the fix or geographical location over which the aircraft is reporting. Examples: "Indianapolis Center, this is TWA 55, Maxwell, over."; "Indianapolis Center, this is Beechcraft 1234, 20 south of Maxwell, over."

Pilots are reminded, however, that direct communication with the center shall NOT be established until the pilot is specifically requested to do so.

UNACCEPTABLE RADIO MESSAGES: CAA facilities will no longer accept non-safety messages (requests for ground transportation, meals, telephone calls, etc.) from pilots of aircraft in flight. Arrangements should be made by a pilot prior to departure via public communications (telephone, telegraph, etc.) for such requirements. Pilots are also reminded that transmission of such messages violates the terms of their aircraft radio license as provided in Part 9 of the FCC Regulations.

CLASSIFICATION OF ILS BACK COURSES: ILS back courses have in the past been classified as either "usable" or "unusable". It now appears that further classification of the "unusable" courses are necessary, since some back courses formerly classified as "unusable" actually may be satisfactory for intersections, holding, transitions or missed approaches, even though they are not satisfactory for back course approaches.

ILS back courses will in the future be classified as follows:

Usable	-	suitable for ILS back course approaches
Restricted	-	not suitable for ILS back course approaches, but suitable for intersections, holding, transitions or missed approaches
Unusable	-	not suitable for any of the above.

SPURIOUS GLIDE SLOPE INDICATIONS: CAA glide slope facilities are intended to provide reliable glide slope signals for use in conjunction with the front course of the ILS localizer. Glide slope signals may be received in other azimuths (because of stray radiation from the antennas and reflections from nearby objects) which may in some cases be sufficient to activate the airborne warning flag. Any glide slope needle activity in these other azimuths should be disregarded.

All pilots are particulary cautioned to ignore glide slope indications when making back course localizer approaches. All CAA approved procedures for back course approaches are limited to use of the localizer portion of the ILS. Any attempt to fly spurious glide slope indications on such back course approaches could result in hazardous operations.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

IFR COMPULSORY REPORTING POINTS: In the near future, a new symbol will be used on Coast and Geodetic Survey Radio Facility Charts to indicate those compulsory reporting points over which reports need not be made by aircraft operating above 15,200 feet. Approximately 200 of the existing compulsory reporting points will be converted to this class as the various charts are revised.

Compulsory reporting points for all aircraft, regardless of altitude, will continue to be depicted as a solid triangle. Subscribers to these charts will be furnished a new legend sheet prior to distribution of charts containing the new symbol.

FLIGHT IN RESTRICTED AREA: Pilots are responsible for obtaining an approval from the appropriate controlling agency prior to conducting flight in Restricted Areas, when governing restrictions are in effect. ATC is unable, because of communications workload and other factors, to obtain such approval for pilots. An ATC clearance should not be considered as authority to conduct flight in Restricted Areas EXCEPT where a control area overlays a Restricted Area as ATC has responsibility only within controlled airspace.

INTERFERENCE ON INSACS COMMUNICATIONS CHANNELS: If excessive interference is noted on INSACS VHF or UHF simplex frequencies, pilots should request the INSACS to reply on the VOR voice channel. This will often expedite the exchange of messages as the VOR has a clear channel for communications.

✓ POSITION REPORTING PROCEDURE FOR IFR FLIGHTS OPERATING AT LEAST 1000 FEET ON TOP: Effective September 15, 1956, IFR flights operating at an altitude of at least 1000 feet on top, either at pilot's request or because of an ATC clearance, shall conform to the following position reporting procedures:

1. Flights along airways, regardless of actual altitude, shall report only over those fixes that are compulsory reporting for flights at all altitudes unless additional reports are required by ATC.

2. Flights operating on a direct route, regardless of actual altitude, shall report over each reporting point specified in the flight plan (approximately 200 miles apart) and also over each compulsory reporting point along the route for flights operating at all altitudes unless additional reports are required by ATC.

Pilots filing direct route flight plans requesting an altitude of at least 1000 feet on top should designate the route of flight by appropriate fixes approximately 200 miles apart over which they plan to report.

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Informational Manual, Volume 10, dated June 15, 1956, as follows:

(1) Page 24 - Indianapolis, Indiana - Correct WB telephone number to read: CHapel 1-2550.

(2) Page 25 - St. Louis, Missouri. - Correct CAA telephone number to read: PErshing 1-0525.

(3) Page 26 - Buffalo, New York - Correct WB telephone number to read: PLaza 6300 and CAA telephone number to read: PLaza 6083.

(4) Page 28 - Everett (Paine Fld.), Washington - Delete CAA telephone listing.

(5) Page 28 - Yakima, Washington - Correct WB telephone number to read: GLencourt 7-4371.

(6) Page 29 - San Diego, California - Correct ASDO telephone number to read: CYpress 5-3112 and 5-3113.

(7) Page 98 - (Airborne) Austin, Texas: Correct rcvr check point to read: 177°.

(8) Page 101 - (Airborne) Livingston, Montana - Add rcvr check point Location #2 - 206°; over new airport hangar beacon.

(9) Page 102 - (Airborne) Red Bluff, California - Add rcvr check point Location #2 - 328°; over centerline runway 33; 500'.

(10) Page 103 - (Airborne) Wink, Texas, (Site 18, ELP-FTW) - Add rcvr check point 151°; over LF range; 1000'.

(11) Page 103 - (Ground) Brownsville, Texas - Add rcvr check point 248°; approach end runway 13L.

(12) Page 107 - (Ground) San Francisco, California - Correct rcvr check point to read: 080°; on runup mat for runway 28R and located 2800 feet from TVOR.

(13) Page 107 - (Ground) Sidney, Nebraska - Cancel rcvr check point.

(14) Page 108 - (Ground) Wink, Texas (Site 18, ELP-FTW) - Decommission rcvr check point.

✓ AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in avaition. Orders for these particular charts should be kept to a minimum until new edition is printed.

Washington	Cleveland Local	WAC 308
Winston-Salem	St. Louis Local	WAC 359
		WAC 360

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for issue. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

✓ AERONAUTICAL CHART CORRECTIONS: Correct the following Aeronautical Charts as indicated:

(1) Aircraft Position Chart of the North Atlantic No. 3071, 15th edition dated April 1, 1956. Correct locations of the Presque Isle AFB, the VOR and the L/MF range re 1° west of the charted positions. Correct positions are:
Presque Isle AFB - 46° 41' N, 68° 03' W; Presque Isle VOR - 46° . N, 68°, 06' W.
Presque Isle L/MF Range - 46° 45' N, 68° 04' W.

✓ AIRMAN'S GUIDE CORRECTION: Correct Airman's Guide, Volume 11, No. 10, dated July 24, 1956, as follows:

(1) Page 8 - On-Request Reporting Points, Under D signate: GAY, W. VA. INTSXN - Correct to read: the intsxn of Charleston, W. Va. 019 mag al and the direct en route radial from York, Ky., VOR to Elkins, W. Va. VOR.

✓ NON-STANDARD HOLDING PATTERN: The following non-standard holding pattern is established and shall become effective immediately:

(1) Colorado Springs, Colorado MHW - direction of holding - N (inbound course 166° mag); direction of turn - LEFT; time - two minutes; minimum altitude - 9000'.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31)	-	Month and day item was reported.
**	-	New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★	-	New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE	-	Such items usually are cited only once, because of space limitations. Examples: erection or removal of radio or television towers, water tanks, oil derricks and permanent airport obstructions.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-070° not usable acct course bends and roughness.
BESSEMER-DURHAM ARPT: Caution - auto-drag strip runs parallel to sod landing strip with separation of 50'. Auto racing is NOT done on rnwy. Drag strip ends are mrkd.
BIRMINGHAM-RADIO: About Aug 10, VOR will be shut down - relctn. (7-18)
BIRMINGHAM ARPT: Caution - traffic operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm closed to high performance single engine conventional lndg gear-type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
EVERGREEN-RADIO: VOR radials 320° thru N unusable acct severe scalloping and bends.
HUNTSVILLE-RADIO: VOR radials 005°-030° unusable due to roughness and bends.

ALABAMA: HUNTSVILLE MUN ARPT: Caution - rnwy 18-36 under const.
MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Acft lndg and taking-off are cautioned to avoid Maxwell AFB tfc pat. and control zone. Due to non-visibility twr unable to ctl tfc on E/ W parallel taxi strip W of a point adj to Air National Guard hangar. E/W rnwy clsd to all military acft - const. Easternmost 5000' avail. days, easternmost 6000' avail. sunset to sunrise to civil acft. Western end mrkd by flags-days, lgts-ngts. (5-15)
MUSCLE SHOALD-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn not usable beyond 15 n mi acct scalloping and bends. (4-22)
**OZARK ARPT: New fld. Type: L. Lat 31-27-30, long. 85-37-15. Lctn: 2.0 SE. Elev: 358', No. of rnwys -1 - 2000' x 200' - sod. Lngst rnwy & facs: 20. Remarks: Drive-in theatre S.
RED BAY MUN ARPT: Closed - const. (7-26)
ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)
**CHANDLER-RIGGS ARPT: Abandoned. (6-11)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA.
GILA BEND-RADIO: VOR has slow bends and scalloping starting at approx 25 to 30 n mi on 247° radial and at 30 to 35 n mi on 106° radial.
HASSAYAMPA-RADIO: VOR/DME usable to 30 n mi from 30°-70°, 240°-255°, 320°-345° and 40 n mi from 70°-85° at MEA.
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. Const in progress S of taxiway 1 from rnwy 8L to trans ramp and S to arpt entrance road.
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000; 135°-145° and 165°-185°; 39 n mi at 10,000'.
SALOME, SITE #27B, LAX-PHX: Caution - puncture vines.
SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed.
**SEDONA-OAK CREEK ARPT: New fld. Type: P. Lat 34-50, long. 111-47. Lctn: 2 mi SE Elev: 4800'. No. of rnwys: 1. Lngst rnwy & facs: 38. Fuel: F2.
**TES NOS PAS ARPT: Elev: 5450'.
TUCSON-RADIO: VOR/DME coverage 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000'; 060°-075°, 35 n mi 11,000'; 075°-085°, 21 n mi 11.000'; 090°-170°, 40 n mi 12,000'; 225°-230°, 40 n mi 7000'; 330°-345°, 35 n mi 11,000'; 345°-360°, 25 n mi 11,000'.
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF VHF and UHF - steer unrel beyond 35 mi at or below the following alt: (a) NW quad 10,000; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'.
YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA.
YUMA-COUNTY ARPT: B-45 type acft towing 5000' of cable and tow target in vcnty. All acft refrain from flying in close proximity to B-45 type acft in Yuma area.
